Calfskin. George Martin Leather Co. 53,783; renewed June 12, 1926.

Coal. Mitchell & Dillon Coal Company. 209,109; Feb. 16; Serial No. 219,675; published Nov. 17, 1925.

Coal. Raven Red Ash Coal Co. 209,130; Feb. 16; Serial No. 219,606; published Nov. 10, 1925.

Condensation products of phenol and formaldehyde. Redmanol Chemical Products Company. 209,238; Feb. 16; Serial No. 218,086; published Oct. 6, 1925.

Foxes, Silver. Alaska Silver Fox & Fur Farms Co. 209,287; Feb. 16.

Leather. Carl E. Schmidt and Company. 209,213; Feb. 16; Serial No. 219,206; published Nov. 17, 1925.

Leather, Colored. J. H. Epstein A. G. 209,282; Feb. 16; Serial No. 219,822; published Nov. 10, 1925.

Pulp. International Pulp Co. 48,346; renewed Dec. 26, 1925.

Sand, White. Del Monte Properties Company. 209,253; Feb. 16; Serial No. 220,386; published Nov. 24, 1925.

Seeds, Field. Illinois Crop Improvement Association. 209,056; Feb. 16; Serial No. 207,080; published Nov. 10, 1925.

Whiting, a carbonate of lime. R. T. Vanderbilt Company. 209,190; Feb. 16; Serial No. 214,039; published Nov. 3, 1925.

CLASS 2.

Paper cans. Purity Paper Vessels Co. 209,002; Feb. 16; Serial No. 200,777; published July 14, 1925.

CLASS 3.

Horse-collar pads. N. A. Shane. 208,988; Feb. 16; Serial No. 220,923; published Nov. 24, 1925.

CLASS 4.

Aluminous abrasive grains and stones, grinding wheels, and crystalline alumina. Norton Company. 209,096–7; Feb. 16; Serial Nos. 218,867–8; published Nov. 17, 1925.

Auto top dressing. J. M. Clayton. 209,137; Feb. 16; Serial No. 221,049; published Nov. 17, 1925.

Buffing wheels. Peters Manufacturing Company. 209,239; Feb. 16; Serial No. 217,896; published Nov. 3, 1925.

Cleaner for personal and household use. Allen Soap Company. 209,094; Feb. 16; Serial No. 219,022; published Nov. 17, 1925.

Cleaning compound. L. W. Gibson. 209,297; Feb. 16; 217,222; published Nov. 10, 1925.

Cleaning compound. R. A. Preo. 209,092; Feb. 16; Serial No. 219,086; published Nov. 17, 1925.

Cleaning fluid used as a dry cleaner. J. A. Buttny. 209,263; Feb. 16; Serial No. 219,527; published Nov. 10, 1925.

Cleansing compound. Seaboard Crystal Company. 209,233; Feb. 16; Serial No. 218,577; published Nov. 17, 1925.

Cloths, Scouring. Metal Textile Corporation. 209,259; Feb. 16; Serial No. 219,753; published Nov. 3, 1925.

Dressings, Belt. Black Diamond Manufacturing Company. 51,204–5; renewed Apr. 10, 1926.

Laundry and cleaning composition. C & B Products Co. 209,271; Feb. 16; Serial No. 219,057; published Nov. 3, 1925.

Paint for use especially on automobile tops. Never Leak Rubber Paint Company. 209,246; Feb. 16; Serial No. 217,229; published Nov. 17, 1925.

Polish for windshields, etc. Bolduc Bros. 209,133; Feb. 16; Serial No. 221,300; published Nov. 17, 1925.

Polish, Leather. Whittemore Brothers and Company. 48,628; renewed Jan. 9, 1926.

Polish, Metal. W. V. Morgan. 209,001; Feb. 16; Serial No. 202,514; published Nov. 24, 1925.

Scouring powder. Swift and Company. 209,055; Feb. 16; Serial No. 207,690; published Nov. 10, 1925.

Soap. James S. Kirk & Company. 209,158; Feb. 16; Serial No. 216,346; published Oct. 6, 1925.

Soap and scouring powder. Hashemesh Inc. 209,249; Feb. 16; Serial No. 216,978; published Nov. 3, 1925.

Soap and shaving cream, Toilet. Karlsruher Parfumerie- und Toilettenseifen-Fabrik F. Wolff & Sohn Gesellschaft mit beschrankter Haftung. 209,141–2; Feb. 16; Serial Nos. 220,722–3; published Nov. 17, 1925.

Soap and shaving powder, Toilet. Karlsruher Parfumerie- und Toilettenseifen-Fabrik F. Wolff & Sohn Gesellschaft mit beschrankter Haftung. 209,118; Feb. 16; Serial No. 220,728; published Nov. 17, 1925.

Soap and shaving powder, Toilet. Karlsruher Parfumerie- und Toilettenseifen-Fabrik F. Wolff & Sohn Gesellschaft mit beschrankter Haftung. 209,139; Feb. 16; Serial No. 220,726; published Nov. 17, 1925.

Soap and shaving powder, Toilet. Karlsruher Parfumerie- und Toilettenseifen-Fabrik F. Wolff & Sohn Gesellschaft mit beschrankter Haftung. 209,140; Feb. 16; Serial No. 220,725; published Nov. 17, 1925.

Soap and shaving powder, Toilet. Karlsruher Parfumerie- und Toilettenseifen-Fabrik F. Wolff & Sohn Gesellschaft mit beschrankter Haftung. 209,143; Feb. 16; Serial No 220,720; published Nov. 17, 1925.

Soap, Medicinal. Barclay & Barclay. 50,534; renewed Mar. 20, 1926.

Soap, Medicinal. Barclay & Barclay. 53,947; renewed June 19, 1926.

Soap powders. Sun Soap Products, Incorporated. 209,159; Feb. 16; Serial No. 216,300; published Nov. 10, 1925.

Soap, Shampoo. F. W. Barber. 209,160; Feb. 16; Serial No. 216,134; published Nov. 10, 1925.

Soaps. 2-J Soap Co. 208,998; Feb. 16; Serial No. 216,751; published Nov. 24, 1925.

Soaps and shaving creams, Toilet. Cheramy, Inc. 209,145; Feb. 16; Serial No. 220,446; published Nov. 17, 1925.

Washing fluid. L. Fajolo. 209,240; Feb. 16; Serial No. 217,870; published Nov. 10, 1925; Serial No. 217,870; published Nov. 10, 1925.

Washing powder. V. B. Van Tilburg. 209,255; Feb. 16; Serial No. 220,002; published Nov. 10, 1925.

CLASS 5.

Size, Wall. Patent Cereals Company. 209,151; Feb. 16; Serial No. 220,249; published Nov. 24, 1925.

CLASS 6.

Acid, phosphoric-acid paste, monoammonium phosphate, monocalcium phosphate, and trisodium phosphate, Phosphoric. Federal Phosphorus Co. 209,099; Feb. 16; Serial No. 218,618; published Nov. 24 1925.

Baking powder. Jack Frost Baking Powder Co. 50,616; renewed Mar. 27, 1926.

Camphorated oil, Rochelle salt, tincture of iodine, etc. McLaughlin Gormley King Co. 209,289; Feb. 16.

Cod-liver oil and malt extract, Combination of. Dr. A. Wander S. A. 209,014; Feb. 16; Serial No. 221,862; published Nov. 24, 1925.

Coloring preparation for butter. Wells & Richardson Company. 49,265; renewed Jan. 30, 1926.

Cough drops, Medicated. Wm. H. Luden, Inc. 209,296; Feb. 16.

Finishes, Colorless binding agent for use with pigment. American Leather Finish Co. 209,125; Feb. 16; Serial No. 221,797; published Nov. 24, 1925.

Finishes for leather, Pigment. American Leather Finish Co. 209,126; Feb. 16; Serial No. 221,798; published Nov. 24, 1925.

Hair and skin tonic. Barclay & Barclay. 53,971; renewed June 19, 1926.

Hair and skin tonic. Barclay & Barclay. 54,096; renewed June 19, 1926.

Insecticide. Wm. Peterman, Inc. 209,294–5; Feb. 16.

Liniment. C. Stanley. 48,425; renewed Dec. 26, 1925.

Gunpowder. American Powder Mills. 53,655; renewed June 12, 1926.

Guns and parts thereof. Hunter Arms Co. 45,243; renewed Aug. 8, 1925.

Guns and parts thereof. Hunter Arms Co. 45,245–8; renewed Aug. 8, 1925.

Guns and parts thereof. Hunter Arms Co. 45,336; renewed Aug. 15, 1925.

Guns and parts thereof. Hunter Arms Co. 45,488; renewed Aug. 22, 1925.

CLASS 12.

Asphalt, mixtures of asphalt and stone, etc. J. D. Forrester. 209,182; Feb. 16; Serial No. 218,910; published Nov. 17, 1925.

Asphalt, Mulsified. Baldwin-Tarvin Company. 209,186; Feb. 16; Serial No. 218,156; published Nov. 10, 1925.

Asphalt product. Minwax Company, Inc. 208,996; Feb. 16; Serial No. 218,131; published Nov. 24, 1925.

Board, Wall. Beaver Products Company. 208,991; Feb. 16; Serial No. 220,106; published Nov. 24, 1926.

Bricks. C. E. Holley. 209,154; Feb. 16; Serial No. 220,025; published Nov. 17, 1925.

Cement and plaster. F. Mulligan. 209,180; Feb. 16; Serial No. 219,194; published Nov. 3, 1925.

Cement, Portland. Edison Portland Cement Company. 53,657; renewed June 12, 1926.

Cement, Portland. Texas Portland Cement Co. 209,225; Feb. 16; Serial No. 213,809; published Nov. 17, 1925.

Concrete surfaces, Material for treating horizontal. Concrete Surface Corporation. 209,200; Feb. 16; Serial No. 219,815; published Nov. 3, 1925.

Ironing boards, folding seats, etc. Built-In Fixture Company. 209,199; Feb. 16; Serial No. 219,934; published Nov. 3, 1925.

Lime, Hydrated. Pacific Lime & Plaster Co. 209,122; Feb. 16; Serial No. 221,276; published Nov. 17, 1925.

Lumber, wood, sash, and doors, etc. E. K. Wood Lumber Company. 209,218; Feb. 16; Serial No. 217,315; published Nov. 3, 1925.

Mortar. Wellston Iron Furnace Company. 209,015; Feb. 16; Serial No. 221,792; published Nov. 24, 1925.

Paper, Reenforced. American Reenforced Paper Company. 209,188; Feb. 16; Serial No. 216,810; published Nov. 3, 1925.

Pipe joints and the like, Compound for sealing. Pure Asphalt Products Company. 209,048; Feb. 16; Serial No. 202,678; published Nov. 3, 1925.

Plaster base, wall boards, and sheathing. Insulite Co. 209,192; Feb. 16; Serial No. 201,087; published Nov. 3, 1925.

Preparation for coating wall board, etc. Lewis & Ferro, Inc. 209,205; Feb. 16; Serial No. 219,252; published Nov. 3, 1925.

Roofing, lumber, and shingles, Composition. West Lumber Company. 209,189; Feb. 16; Serial No. 216,808; published Nov. 10, 1925.

Stone, Artificial. A. Marzoli. 208,989; Feb. 16; Serial No. 220,732; published Nov. 24, 1925.

Stucco. Artisti-Kote Company. 209,020; Feb. 16; Serial No. 221,156; published Nov. 24, 1925.
Stucco. Artisti-Kote Company. 209,121; Feb. 16; Serial No. 221,157; published Nov. 17, 1925.
Stucco and plaster. Flint-Rock Stucco Company. 209,215; Feb. 16; Serial No. 217,926; published Nov. 17, 1925.
Talc, Special. W. H. Loomis Talc Corporation. 209,108; Feb. 16; Serial No. 219,592; published Nov. 17, 1925.
Wall board, heat-insulating material, shingles, etc. L. R. Skolnik. 209,201; Feb. 16; Serial No. 219,608; published Nov. 3, 1925.

CLASS 13.

Ball cocks. Wolverine Brass Works. 209,123; Feb. 16; Serial No. 221,524; published Nov. 24, 1925.
Staples, Strips of united. E. H. Hotchkiss Company. 53,216; renewed May 29, 1926.

CLASS 14.

Alloys, Nonferrous. Lumen Bearing Company. 49,950; renewed Feb. 27, 1926.

CLASS 15.

Gasoline. W. F. Carvell. 209,248; Feb. 16; Serial No. 217,208; published Nov. 17, 1925.
Gasoline. National Independent Oil Company. 209,033; Feb. 16; Serial No. 220,032; published Dec. 1, 1925.
Gasoline. Pocahontas Oil Company. 209,073; Feb. 16; Serial No. 222,395; published Dec. 1, 1925.
Gasoline, kerosene, and lubricating oils and greases. "Supertest" Limited. 209,104; Feb. 16; Serial No. 217,969; published Nov. 10, 1925.
Kerosene, fuel oils, gasoline, etc. Gilmore Oil Company. 209,057; Feb. 16; Serial No. 207,501; published Nov. 3, 1925.
Lubricant, Domestic. Gulf Refining Company. 209,106; Feb. 16; Serial No. 216,675; published Nov. 10, 1925.
Naphthalene and creosote oil, Sublimed and crude. Certain-teed Products Corporation. 209,217; Feb. 16; Serial No. 217,450; published Nov. 3, 1925.
Oil and greases, Lubricating. K. Z. Garvey. 209,069; Feb. 16; Serial No. 201,805; published Aug. 18, 1925.
Oils and greases. Central Commercial Company. 209,072; Feb. 16; Serial No. 183,363; published Nov. 10, 1925.
Oils and greases, Lubricating. Landis Machine Company. 209,031; Feb. 16; Serial No. 220,239; published Dec. 1, 1925.
Oils and greases, Lubricating. Panther Oil & Grease Mfg. Co. 209,149; Feb. 16; Serial No. 220,356; published Nov. 17, 1925.
Oils, Lubricating. American Petroleum Products Co. 52,051; renewed May 1, 1926.
Oils, Lubricating. Crew Levick Co. 50,851; renewed Apr. 3, 1926.
Petroleum and products of petroleum. Standard Oil Company of New York. 209,234; Feb. 16; Serial No. 218,506; published Nov. 24, 1925.

Oranges and lemons, Fresh. Rialto Heights Association. 225,523; Feb. 16.
Pickles. F. P. Keene. 224,765; Feb. 16.
Potato flakes. E. J. Metz. 222,389; Feb. 16.
Potatoes. J. W. Barrett. 224,072; Feb. 16.
Shortening, Vegetable. Van Camp Packing Company. 225,688; Feb. 16.
Tea. Seeman Brothers, Inc. 225,742; Feb. 16.
Vegetables, Fresh. C. B. Williams. 225,535; Feb. 16.

CLASS 48.

Malt extracts and liquors. H. D. Stratton. 223,451; Feb. 16.

CLASS 50.

Blackboards. Beckley-Cardy Company. 215,115; Feb. 16.
Leather cloth. Nobel Industries, Limited. 223,861; Feb. 16.
Leather cloth. Storey Brothers & Company. 221,723; Feb. 16.
Mattress-protecting shield, Sanitary. H. A. Copeland. 224,500; Feb. 16.
Phonograph records and rosaries. Bakelite Corporation. 212,527; Feb. 16.
Tents. M. L. Vanderherchen. 212,519; Feb. 16.
Tents and awnings. Williams Tent & Awning Co. 224,486; Feb. 16.
Textile material, Coated. C. R. Whiting Co. 219,157; Feb. 16.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 16TH DAY OF FEBRUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

A/S Krystal. (See Isaachsen, Isak, assignor.)
Aalborg, Christian, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Graphic-meter-control mechanism. 1,572,871; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Backplate for lighting fixtures. Des. 69,423; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Arm for lighting fixtures. Des. 69,424; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Rosette for lighting fixtures. Des. 69,425; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Canopy for lighting fixtures. Des. 69,426; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Arm for lighting fixtures. Des. 69,427; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Segmental portion for lighting fixtures. Des. 69,428; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Arm for lighting fixtures. Des. 69,429; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Candle plate. Des. 69,430; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Plate for lighting fixtures. Des. 69,431; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Loop for lighting fixtures. Des. 69,432; Feb. 16.
Abrams, Herman, Philadelphia, assignor to Crescent Brass Mfg. Co., Reading, Pa. Plate for lighting fixtures. Des. 69,433; Feb. 16.
Acosta, Adolfo. (See Ledesma, M., and Acosta.)
Acosta, St. Elmo W., Jacksonville, Fla. Flag holder. 1,573,757; Feb. 16.
Adams, Arthur H., Lakeville, Conn., assignor to Western Electric Company, Incorporated, New York, N. Y. Electromagnet. 1,572,869; Feb. 16.
Adkison, John S. (See Diamond, Rubin L., assignor.)
Akins, Bryant L., Brooklyn, N. Y. Directory board. 1,573,126; Feb. 16.
Aktiebolaget Gebr. Arehns Mekaniska Verkstad. (See Ekström, Gunnar C., assignor.)
Aktiebolaget Vaporackumulator. (See Ruths, J., and Persson, assignors.)
Aktiebolaget Vaporackumulator. (See Ruths, Johannes K., assignor.)
Alben, Frank L., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Driver brake shoe. 1,572,872; Feb. 16.
Albright, John F., Oregon City, Oreg. Fish ladder. 1,573,785; Feb. 16.
Albright, Sidney S., Sacramento, Calif. Window control for vehicle tops. 1,573,473; Feb. 16.
Aldrich, George H., and A. L. Gilbo, Westmoreland Depot, N. H. Poultry feeder. 1,572,981; Feb. 16.
Aldrich, John P., and H. A. Morris, assignors to The Automat Molding & Folding Machine Company, Toledo, Ohio. Stacking machine. 1,573,024; Feb. 16.
Alexander, Clive M., New York, N. Y. Process and apparatus for decomposing oils. 1,573,582; Feb. 16.
All Clear Windshields, Inc. (See Demand, Joseph, assignor.)
Allgemeine Elektricitats Gesellschaft. (See Kieser, Walter, assignor.)
Allcutt, Chester T., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. High-frequency dielectric and magnetic furnace. 1,572,873; Feb. 16.
Allen, Arthur M., Mesa, assignor of one-fourth to E. Kirby and one-fourth to L. L. Long, Connell, Wash. Shimless bearing. 1,573,110; Feb. 16.
Allston, Joseph B., Georgetown, S. C. Meal kit. 1,573,620; Feb. 16.
Alstad, Oscar, Evansville, Minn. Automatic speed-controlled device. 1,573,621; Feb. 16.
Amari, Thony. (See Brignolo, C., Amari, and Brignolo.)
American Chain Company, Inc. (See Fageol, Rollie B., assignor.)
American Demulsifying Company. (See Leeper, Wadsworth D., assignor.)
American Hardware Corporation, The. (See Hurd, Norman B., assignor.)
American Iron & Machine Works, Inc. (See Crosby, Arthur S., assignor.)
American Laundry Machinery Company, The, et al. (See Braley, Charles L., assignor.)
American Laundry Machinery Company, The. (See Wilson, George W., assignor.)
American Optical Company. (See Laabs, Max A., assignor.)
American Optical Company. (See Peloquin, Edmond, assignor.)
American Optical Company. (See Wrighton, William, assignor.)
American Schaeffer & Budenberg Corporation. (See Milker, Herbert, assignor.)
American Scrubbing Equipment Company. (See Finnell, Walter S., assignor.)
American Shoe Machinery and Tool Company. (See Krag, Harry W., assignor.)
American Steel Products Co. (See Landgraf, Jacob T., assignor.)
American Stove Company, The. (See Stockstrom, Arthur, assignor.)
American Telephone and Telegraph Company. (See Crisson, G., and Glezen, assignors.)
American Telephone and Telegraph Company. (See Honaman, Richard K., assignor.)
American Telephone and Telegraph Company. (See Stone, John S., assignor.)
American Telephone and Telegraph Company. (See von Nostitz, Erich, assignor.)
Amsden, Frederick H., et al. (See Ilcs, Charles E., assignor.)
Anderson, Alexander, assignor to E. Holley, Detroit, Mich. Making cores. 1,573,436; Feb. 16.
Anderson, Arthur N. (See Saklatwalla, B. D., and Anderson.)
Ansco Photoproducts, Inc. (See Jansson, T. A., and Bornmann, assignors.)
Anthracite Separator Company. (See Blatch, Francis H., assignor.)
Anundi, Matt, Clatskanie, Oreg. Lock. 1,573,506; Feb. 16.
Apex Gutter Hanger Corporation. (See Rachlin, Max, assignor.)
Archila, Fulgencio, Bogota, Colombia. Electric sign. 1,572,874; Feb. 16.
Armstrong, Edwin J., assignor to Erie Steam Shovel Company, Erie, Pa. Clutch. 1,572,870; Feb. 16.
Arnold, Harold D., Maplewood, N. J., and J. P. Minton, White Plains, assignors to Western Electric Company, Incorporated, New York, N. Y. Generating an alternating current of variable frequency. 1,573,367; Feb. 16.
Arnold, William C., et al. (See Gerow, George C., assignor.)
Atlanta Model Machine Company. (See Robeson, Edna G., assignor.)
Atlas Alloy Steel Corporation. (See Johnson, A. D., and Schulze, assignors.)
Attarian, Bedros T. (See Attarian, Sarkis T. and B. T.)
Attarian, Sarkis T., Philadelphia, Pa., and B. T. Attarian, Brooklyn, N. Y. Brush. 1,573,758; Feb. 16.
Atwater, Harry A., Kansas City, Mo. Furnace construction. 1,573,507; Feb. 16.
Austin, Gilbert, J. C. Macfarlane, and W. A. Macfarlane, Glasgow, Scotland. Electric motor for use on a constant-current variable-voltage system. 1,573,508; Feb. 16.
Austin, William E. (See Stein, H., Austin, and Liebowitz.)
Autocar Company, The. (See Brumbaugh, Andrew K., assignor.)
Automat Molding & Folding Machine Company, The. (See Aldrich, J. P., and Morris, assignors.)
Automatic Electric Inc. (See Mellinger, Edward A., assignor.)
Averill, Willard C., jr., Houston, Tex. Apparatus for separating hydrocarbons. 1,573,025; Feb. 16.
Averill, Willard C., jr., Houston, Tex. Mining sulphur. 1,573,026; Feb. 16.

Babcock & Wilcox Company, The. (See Pratt, Arthur D., assignor.)
Badische Anilin- & Soda-Fabrik. (See Günther, Fritz assignor.)
Baker, Frank L., Chicago, Ill. Lubricating system for motor vehicles. 1,573,127; Feb. 16.
Baker, Mose E., Des Moines, Iowa. Jig saw. 1,573,510; Feb. 16.
Baker, Walter, assignor to Speeder Machinery Corporation, Fairfield, Iowa. Bucket for excavators. 1,573,128; Feb. 16.
Balda, Joseph O., assignor to A. H. Heisey & Co., Newark, Ohio. Goblet or similar article. Des. 69,434; Feb. 16.
Ball Brothers Company. (See Drey, Leo A., assignor.)
Ballou, Eugene H., Pawtucket, R. I. Filling detector. 1,572,875; Feb. 16.
Balmer, Robert, Toronto, Ontario, Canada. Method of and apparatus for the moving of piled materials. 1,573,437; Feb. 16.
Bank of America, The, et al., executors. (See Sperry, Lawrence B.)
Barber Asphalt Company, The. (See Forrest, Charles N., assignor.)
Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Demountable dispenser for paper cups. 1,573,027; Feb. 16.
Bardy Projector Co. (See Bardy, Samuel, assignor.)
Bardy, Samuel, assignor, by mesne assignments, to Bardy Projector Co., Philadelphia, Pa. Projecting moving pictures and moving-picture-projecting machines. 1,573,438; Feb. 16.
Barger, Harvey F. (See Barger, Newton A. and H. F.)
Barger, Newton A. and H. F., Cedar Vale, Kans. Deborning mechanism. 1,572,982; Feb. 16.
Barker, Percy E., assignor to The Van Dorn Iron Works Company, Cleveland, Ohio. Dump truck. 1,572,876; Feb. 16.
Barnes, Charles J., Redlands, Calif. Bait depositor for rodents. 1,573,670; Feb. 16.
Barnes, Julius E., Woodruff, Kans., assignor of one-half to L. O. Flynn, Imperial, Nebr. Combined door check and fastener. 1,573,368; Feb. 16.
Barr, James A., Mount Pleasant, Tenn., assignor to The International Agricultural Corporation, New York, N. Y. Method and apparatus for drying or calcining. 1,573,533; Feb. 16.
Barrier, William A., Frederick, Okla. Casing-pulling device. 1,572,983; Feb. 16.
Barrow, A. L. (See Portis, James A., assignor.)
Barrows, Donald S., Rochester, assignor to The Symington Company, New York, N. Y. Draft rigging. 1,573,290; Feb. 16.
Bateman, Ernest, Madison, Wis., assignor to United States of America, Producing highly-adsorbent charcoal. 1,573,509; Feb. 16.
Bates, Mortimer F., Brooklyn, N. Y., assignor to The Sperry Gyroscope Company. Stabilized bomb sight. 1,573,028; Feb. 16.
Batsel, Max C., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Wireless receiving apparatus. 1,572,877; Feb. 16.
Batten, Edward and J. D., Beckenham, England. Manufacture of inlaid floorcloths. 1,573,534; Feb. 16.
Batten, James D. (See Batten, Edward and J. D.)
Baxter, Harold G., Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Switch box. 1,572,878; Feb. 16.
Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Removable water-tube connection for stope drills. 1,573,474; Feb. 16.
Beardall, John P., Brooklyn, N. Y. Building material. 1,573,029; Feb. 16.
Beaumont, R. H., Co., The. (See Beaumont, Robert H., assignor.)
Beaumont, Robert H., Radnor, assignor to R. H. Beaumont Co., Philadelphia, Pa. Tailblock equipment. 1,573,778; Feb. 16.
Bedford, Howard E., London, England, assignor, by mesne asignments, to Pyrene Manufacturing Company, Newark, N. J. Reel for double hose lines. 1,573,439; Feb. 16.
Beech-Nut Packing Company. (See Penley, Benjamin S., assignor.)
Beisel, Frank A., assignor to Menasha Printing and Carton Company, Menasha, Wis. Carton-spot dewaxer. 1,572,879; Feb. 16.
Belcher, Claude, assignor of forty-nine per cent to F. J. Douglas, Des Moines, Iowa. Adjustable flange for pipe lines. 1,573,511; Feb. 16.
Bell, John E. (See Isom, E. W., and Bell.)
Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Process and apparatus for fractional condensation. 1,573,129; Feb. 16.
Bellis, Arthur E., Springfield, Mass., and C. S. Collins, New York, N. Y., assignors, by mesne assignments, to The Bellis Heat Treating Company, New Haven, Conn. Pot or crucible. 1,573,535; Feb. 16.
Bellis Heat Treating Company, The. (See Bellis, A. E., and Collins, assignors.)
Bendix Brake Company. (See Price, Jacob L., assignor.)
Benham, Edgar M., Norwood, Ohio, assignor to The Mosler Lock Company, Covington, Ky. Key. 1,573,536; Feb. 16.
Benjamin Electric Manufacturing Company. (See Benjamin, Reuben R., assignor.)
Benjamin Electric Manufacturing Company. (See Phillips, Paul D., assignor.)
Benjamin, Reuben R., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Outlet fitting. 1,573,440; Feb. 16.
Benner, Raymond C., Bayside, assignor to The Prest-O-Lite Company, Inc., New York, N. Y. Storage-battery separator. 1,573,369; Feb. 16.
Bennett, Charles H., Oakhurst, Brisbane, Queensland, Australia. Combined metal hook and lever. 1,573,759; Feb. 16.
Benson, Clarence R. (See Rutter, A. M., and Benson.)
Benton, Homer W., assignor to Whiting Corporation, Harvey, Ill. Self-righting bucket. 1,573,130; Feb. 16.
Bergere, Emerick W., Bridgeport, Conn., assignor to F. Howard, New York, N. Y. Slide projector. 1,573,030; Feb. 16.
Berliner, Emile, Washington, D. C. Auditorium wall and the like. 1,573,475; Feb. 16.
Bernard, James L., Beaver, Pa. Steam trap. 1,573,131; Feb. 16.
Berry, Henry R., et al. (See Primm, Joseph P., assignor.)
Bertels, Arnold S. (See MacDougall, H. W., and Bertels.)
Betke, Michael, Denver, Colo. Automatic rail-joint fastening. 1,573,132; Feb. 16.
Betts, John H. (See Curtis, Henry E., assignor.)
Bettis, William I., Los Angeles, and L. H. Perry, Gardena, Calif.; said Perry assignor to said Bettis. Well-casing protector. 1,573,031; Feb. 16.
Beyer, Albin H., New York, N. Y. Process and apparatus for measuring kinetic energy. 1,573,133; Feb. 16.
Beyerle, William N., Mesa, Ariz. Ore-grinding mill. 1,573,032; Feb. 16.
Bianchi, Louis, Redding, Calif. Siphon. 1,573,291; Feb. 16.
Bieder, Herman, Cleveland, Ohio. Lamp holder. 1,573,218; Feb. 16.
Biermanns, Josef, and O. Mayr, Karlshorst, Germany, assignors to General Electric Company. Protective system. 1,573,622; Feb. 16.
Biermanns, Josef, Karlshorst, Germany, assignor to General Electric Company. Protective system. 1,573,623; Feb. 16.
Biermanns, Josef, Karlshorst, Germany, assignor to General Electric Company. Protective system. 1,573,624; Feb. 16.
Bieser, Carl W., assignor to The Gruen National Watch Case Company, Cincinnati, Ohio. Watchcase and making same. 1,573,134; Feb. 16.
Birkenhauer, Carl, Barmen, Germany. Single-thread lace-braiding machine. 1,573,625; Feb. 16.
Birtman Electric Company. (See Wiehle, Edward W., assignor.)
Bishop, Frederic L., assignor to Window Glass Machine Company, Pittsburgh, Pa. Method and apparatus for annealing and cooling sheet glass. 1,573,033; Feb. 16.
Bissell, Carl H., and E. G. Smith, assignors to Crouse-Hinds Company, Syracuse, N. Y. Incandescent-electric-lamp housing. 1,573,292; Feb. 16.
Bisson, Percival N. (See Westbo, B. W., and Bisson.)
Black, Lee J., Beaumont, Tex. Lubricating device. 1,573,293; Feb. 16.
Black, Robert F., San Jose, Calif. Weed cutter. 1,573,034; Feb. 16.
Black, William M., Lansing, Mich. Milk cooler. 1,573,760; Feb. 16.
Blackmore, Lloyd, and L. M. Spencer, Highland Park, assignor to General Motors Corporation, Detroit, Mich. Wheel assembly. 1,573,671; Feb. 16.
Blackwell, William T., Westfield, N. J., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company. Lighting fixture. 1,572,880; Feb. 16.
Blair, William R. (See Smith, William J., assignor.)
Blakely, William W., Detroit, Mich. Anchorage device for vehicles. 1,573,441; Feb. 16.
Blatch, Francis H., assignor to Anthracite Separator Company, Hazleton, Pa. Adjustable apparatus for feeding and separating coal and like materials. 1,573,035; Feb. 16.
Blenio, Guido, assignor to Proofing Laboratories, Inc., New York, N. Y. Paint and varnish remover. 1,573,537; Feb. 16.
Bloch, Arthur, Philadelphia, Pa. Oil-circulation signal. 1,573,371; Feb. 16.
Blümner, Erwin, Berlin-Charlottenburg, Germany. Method and apparatus for continuous distillation of tars and oils. 1,573,370; Feb. 16.
Bobrow, Jacob, assignor to Bobrow Optical Mfg. Co., Inc., Brooklyn, N. Y. Spectacle frame. Des. 69,435; Feb. 16.
Bobrow Optical Mfg. Co. (See Bobrow, Jacob, assignor.)
Bock, Charles S., assignor to Andrew Hoffman Mfg. Co., Chicago, Ill. Metal casement window. 1,573,538; Feb. 16.
Bolingbroke, Charles W. H., Los Angeles, Calif. Package-sealing device. 1,573,669; Feb. 16.
Bongers, Arnold H., assignor of one-half to G. Boudon, London, England. Heater for permanent hair waving. 1,573,761; Feb. 16.
Boothby, Frederick L. M., Tilford, near Farnham, England. Protection of airships against fire. 1,573,762; Feb. 16.
Bornmann, Carl A. (See Jansson, T. A., and Bornmann.)
Böttner, Arno, Sudenburg, near Magdeburg, assignor to the Firm Polte, Magdeburg, Germany. Gate valve. 1,572,984; Feb. 16.
Böttner, Arro, Sudenburg, near Magdeburg, assignor to the Firm Polte, Magdeburg, Germany. Steam-cut-off valve or stop valve. 1,572,985; Feb. 16.
Boudou, Gaston. (See Bongers, Arnold H., assignor.)
Boulton, Berthoud C., Dayton, Ohio. Reenforced bracing member for aircraft. 1,573,294; Feb. 16.
Bourgeois, Edgar, Marlboro, Mass. Lettering. 1,573,295; Feb. 16.
Bourne, Ralph H., and A. J. Grindle, Chicago, assignors to Grindle Fuel Equipment Company, Harvey, Ill. Dust collector. 1,573,135; Feb. 16.
Bowden, Gardiner S., Brooklyn, assignor to J. B. Bowden & Co., New York, N. Y. Wedding ring. Des. 69,436; Feb. 16.
Bowden, J. B., & Co. (See Bowden, Gardiner S., assignor.)
Bowman, Annie, Los Angeles, Calif. Face-powder box. 1,573,036; Feb. 16.
Boye, James H., assignor to James H. Boye Manufacturing Company, Chicago, Ill. Pulley-banger bracket for draw-curtain fixtures. 1,573,136; Feb. 16.
Boye, James H., Manufacturing Company. (See Boye, James H., assignor.)
Brace, Porter H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric-furnace resistor. 1,572,881; Feb. 16.
Bradley, Richard C., assignor to B. W. Gammon & Company, New York, N. Y. Vending machine. 1,573,037; Feb. 16.
Braine, Rancroft G., assignor to The Rail Joint Company, New York, N. Y. Stress-balancing splice bar. 1,573,476; Feb. 16.
Braley, Charles L., assignor of one-half to C. F. Noftsger, Chicago, Ill., and one-half to The American Laundry Machinery Company, Cincinnati, Ohio. Laundry apparatus. 1,573,626; Feb. 16.
Branington, Edwin O., assignor of one-half to O. A. Peters, Rochester, N. Y. Egg tray for incubators. 1,573,038; Feb. 16.
Brannon, Emmitt E., assignor of one-half to L. H. Rickenbacker, Turlock, Calif. Tule and sod scraper. 1,573,137; Feb. 16.
Brase, Wilhelm, Berlin, Germany. Sewing machine. 1,573,138; Feb. 16.
Brase, Wilhelm, Berlin, Germany. Sewing machine. 1,573,139; Feb. 16.
Brasell, Hugh T., Fort Sumner, N. Mex. Adjustable splint. 1,573,296; Feb. 16.
Braun, Hubert J., Chicago, Ill. Curtain tie back. Des. 69,437; Feb. 16.
Breisch, Edgar W., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Hot-cathode apparatus. 1,572,882; Feb. 16.
Brewster, Harry C., Shreveport, La. Pipe tongs. 1,572,986; Feb. 16.
Briggs Manufacturing Company. (See Marshall, William, assignor.)
Brignolo, Cyrill, T. Amari, and G. Brignolo, East Boston, Mass. Bumper. 1,573,672; Feb. 16.
Brignolo, Giuseppe. (See Brignolo, C., Amari, and Brignolo.)
Brill, Lawrence E., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Chain. 1,573,627; Feb. 16.
Briner, Emil A., East Orange, N. J., and H. J. Guild, Bangor, Me.; said Guild assignor to Eastern Manufacturing Company, Boston, Mass. Drying paper. 1,573,297; Feb. 16.
Broman, Fred G., Philadelphia, Pa. Antislipping means. 1,573,779; Feb. 16.
Bronstein, Jesse B., Allentown, Pa., assignor to Trojan Powder Company, New York, N. Y. Drying finely-divided materials. 1,573,673; Feb. 16.
Broomfield, Herbert. (See Russell, R., and Broomfield.)
Brown, Fred A., Los Angeles, Calif. Pike-pole gad. 1,573,539; Feb. 16.
Brown, Max, assignor to The Brown-Sebco Terminal Mfg. Co., Inc., Chicago, Ill. Storage-battery terminal-post clamp. 1,573,298; Feb. 16.
Brown-Sebco Terminal Mfg. Co., The. (See Brown, Max, assignor.)
Brown, William S. (See Platt, C. B., and Brown.)
Bruce, Alfred W., New York, N. Y. Superheated-steam throttle valve. 1,573,540; Feb. 16.
Brubaker, John A., assignor to The Haughton Elevator & Machine Company, Toledo, Ohio. Landing doorlock. 1,573,140; Feb. 16.
Brumbaugh, Andrew K., assignor to The Autocar Company, Ardmore, Pa. Method of and means for controlling the operation of motor vehicles. 1,573,628; Feb. 16.
Budd, Edward G., Manufacturing Co. (See Ledwinka, Joseph, assignor.)
Bullock, Hugh, Andover, Mass., assignor to Converse Rubber Shoe Co. Shoe. 1,573,299; Feb. 16.
Bulman, Elvah O., Grand Rapids, Mich. Paper-roll holder and cutter. 1,573,141; Feb. 16.
Bundo, James T. (See Repkow, G. H., and Bundo.)
Burgoyne Light & Signal Corporation. (See Olsson, Zacharias, assignor.)
Burnham, George A., Saugus, assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass. Electrically-operated electric switch. 1,573,674; Feb. 16.
Burns, Leonard S. (See Wilson, F. D., and Burns.)
Burton, Robert N., Oak Park, Ill., assignor to Highway Trailer Company, Edgerton, Wis. Covered dump body. 1,573,372; Feb. 16.
Buschell, William H., assignor of one-fourth to J. D. Eastman, Indianapolis, Ind. Mending rubber articles. 1,573,039; Feb. 16.
Bush, Alden J., Columbus, Ohio. Door holder. 1,573,512; Feb. 16.
Byron, John F., Providence, R. I., assignor to Freeman-Daughaday Co., Chartley, Mass., doing business as Providence Collar Button Company, Providence, R. I. Cuff button. 1,573,477; Feb. 16.
Cadwell, Charles A., assignor to The Electric Railway Improvement Company, Cleveland, Ohio. Manufacture of rail bonds. 1,573,219; Feb. 16.
California Cyanide Company. (See Metzger, Floyd J., assignor.)
Calkins, Claude C., Spokane, Wash. Machine for treating seed grain. 1,573,142; Feb. 16.
Cameron Machine Company. (See Johnstone, Robert M., assignor.)
Cameron, Robt. T. (See Pardoe, John D., assignor.)
Campbell, John R., Regina, Saskatchewan, Canada. Combined floor waxer and polisher. 1,572,987; Feb. 16.
Campbell, Ronald E., Columbia, S. C. Safety device for electric irons. 1,572,988; Feb. 16.
Caradine, James T., and W. T. Christmas, St. Louis, Mo. Hat. Des. 69,438; Feb. 16.
Caradine, James T., and W. T. Christmas, St. Louis, Mo. Hat. Des. 69,439; Feb. 16.
Carborundum Company, The. (See Hartmann, Miner L., assignor.)
Carlson, Albert, Swanton, Vt. Garter. 1,573,675; Feb. 16.
Carman, Charles W., Chicago, Ill. Photographic print and making the same. 1,573,478; Feb. 16.
Carr Fastener Company. (See Carr, Fred S., assignor.)
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,573,763; Feb. 16.
Carrier Construction Company. (See Gamble, William J., assignor.)
Carroll, Samuel W., Cincinnati, Ohio. Cover plate. 1,573,676; Feb. 16.
Carver, James H., Carman, N. Y., assignor to General Electric Company. Making blanks for noiseless gears. 1,573,629; Feb. 16.
Cassell, Walter C., and C. K. Springfield, assignors of one-half to The Texas Carbon Industries, Inc., Breckenridge, Tex. Process and apparatus for bolting carbon black. 1,573,373; Feb. 16.
Caudrelier, Edmond, Paris, France. Machine for the manufacture of tickets or labels. 1,573,677; Feb. 16.
Chamberlain, Paul A., assignor to Electrical Dealers Supply House, Inc., Chicago, Ill. Radiocondenaer. 1,573,374; Feb. 16.
Chamberlain, Rufus N., Chicago, Ill., assignor, by mesne assignments, to Gould Storage Battery Company, Inc., New York, N. Y. Storage battery. 1,573,300; Feb. 16.
Charlton, Newton E., Clayton, N. Mex. Safety-razor-blade holder. 1,573,630; Feb. 16.
Chase, Fred G. (See Magranis, W. C., and Chase.)
Cheape, John A., assignor to Exyon Corporation, Charlottesville, Va. Antiskid chain. 1,573,631; Feb. 16.
Chemische Fabrik Griesheim-Elektron. (See Pistor, Gustav, assignor.)
Chero-Cola Company. (See Sears, Claud A., assignor.)
Chicago Electric Manufacturing Co. (See Gough, James J., assignor.)
Chicago Engineering Works, Inc. (See Mahoney, George H., assignor.)
Chicago Spring Hinge Company. (See Keene, William J., assignor.)
Chickering, Daniel J., Spokane, assignor of fifty-one per cent to Eggers Pole & Supply Company, Parkwater, Wash. Portable punching machine. 1,573,143; Feb. 16.
Christie, James W., Minneapolis, Minn. Moistening cover for containers. 1,573,479; Feb. 16.
Christmas, William T. (See Caradine, J. T., and Christmas.)
Church, Frank E., Scarsdale, N. Y., assignor to National India Rubber Company, Bristol, R. I. Shoe sole. Des. 69,440; Feb. 16.
Church, Frank E., Scarsdale, N. Y., assignor to National India Rubber Company, Bristol, R. I. Shoe sole. Des. 69,441; Feb. 16.
Chwala, August, Vienna, Austria, assignor to Oderberger Chemische Werke Aktiengesellschaft, Oderberg, Czechoslovakia. Manufacturing colloidal compounds of arsenic. 1,573,375; Feb. 16.
Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)
Clark, Paul L., Brooklyn, N. Y. Apparatus for the electrical transmission for visual images. 1,572,989; Feb. 16.
Clark Thread Company, The. (See Clauss, Max O., assignor.)
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skein holder. 1,573,220; Feb. 16.

Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skein holder. 1,573,221; Feb. 16.
Clayton Gin Compress Company. (See Mackenzie, Alexander S., assignor.)
Clift, Verne E. (See De Cola, S., and Clift.)
Coberly, Clarence J., assignor to Kobe, Inc., Los Angeles, Calif. Method of and apparatus for cutting wide slots. 1,573,301; Feb. 16.
Cocklin, Lewis A., Griswold, Iowa. Liquid-fuel burner. 1,572,883; Feb. 16.
Coelho, Manuel T., Redwood City, Calif. Weed puller. 1,573,222; Feb. 16.
Coen, Garnet W., Pasadena, Calif. Liquid heater. 1,573,223; Feb. 16.
Cohen, Charles, et al. (See Warren, William, assignor.)
Cohen, Isidore M., Philadelphia, Pa. Coat, 1,573,302; Feb. 16.
Cohn, Alfred, Milwaukee, Wis. Knitted sweater. Des. 69,442; Feb. 16.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermal switch. 1,572,990; Feb. 16.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Fluid cut-out for percolators. 1,572,991; Feb. 16.
Colen, Bernard D. (See Strongson, Herman L., assignor.)
Collins, Charles S. (See Bellis, A. E., and Collins.)
Collinson, Francis E. (See Hill, W. J., Lupton, and Collinson.)
Colpitts, Edwin H., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Carrier-wave transmission. 1,573,303; Feb. 16.
Colvin, Charles H., Brooklyn, N. Y. Stop watch and dial. 1,572,884; Feb. 16.
Combustion Engineering Corporation. (See Nygaard, Oscar O., assignor.)
Comstock, Daniel F. (See Wall, E. J., and Comstock.)
Condit Electrical Manufacturing Corporation. (See Burnham, George A., assignor.)
Condit Electrical Manufacturing Corporation. (See Edsall, William S., assignor.)
Condit Electrical Manufacturing Corporation. (See Mahoney, Joseph N., assignor.)
Condit Electrical Manufacturing Corporation. (See O'Keeffe, George W., assignor.)
Condit, Park N., Boston, Mass. Liquid applicator. 1,573,224; Feb. 16.
Conlon, Walter J. (See Gustafson, Axel R., assignor.)
Conner, Frank S., Petaluma, Calif. Oil burner for brooder stoves. 1,573,480; Feb. 16.
Converse Rubber Shoe Co. (See Bullock, Hugh, assignor.)
Corbett, Edward L., New York, N. Y. Shaving brush. 1,572,885; Feb. 16.
Corrall, Herbert, Helensburgh, and B. A. Stevens, Clydebank, Scotland, assignors to The Singer Manufacturing Company, Elizabeth, N. J. Sewing machine. 1,573,225; Feb. 16.
Costa, Anthony L., East Boston, assignor to R. Woodman Mfg. & Supply Co. Inc., Boston, Mass. Ink pad. 1,573,481; Feb. 16.
Cowles, Irving, Chicago, Ill. Vapor-feed means. 1,573,780; Feb. 16.
Cramp, William, & Sons Ship & Engine Building Company, The. (See Larner, Chester W., assignor.)
Crandall, Jay E., Chicago, and A. Oigny, Glen Ellyn, Ill. Humidifier for gas engines. 1,572,886; Feb. 16.
Crawford, George E., San Francisco, Calif. Ash receiver. 1,573,678; Feb. 16.
Credo, Julius, assignor to Louisville Drying Machinery Co. Inc., Louisville, Ky. Method and apparatus for drying. 1,573,144; Feb. 16.
Crescent Brass Mfg. Co. (See Abrams, Herman, assignor.)
Crisson, George, Hackensack, N. J., and L. L. Giezen, New Brighton, N. Y., assignors to American Telephone and Telegraph Company. Adjustable electrical network. 1,572,992; Feb. 16.
Crites, Joe, Lakeside, Ohio, assignor to Raymond Brothers Impact Pulverizer Co., Chicago, Ill. Pulverizing, feeding, and burning fuel. 1,573,040; Feb. 16.
Crossdale, Stuart, Denver, Colo. Concentration of oxidized ores. 1,573,226; Feb. 16.
Crooksville China Company, The. (See Trischler, Harry, assignor.)
Crosby, Arthur S., Marland, Okla., assignor of two-thirds to American Iron & Machine Works, Inc., Tonkawa, Okla. Paraffin cleaner. 1,573,679; Feb. 16.
Crouse-Hinds Company. (See Bissell, C. H., and Smith, assignors.)
Crowell, Russell B., assignor to Western Industries Company, Agnew, Calif. Producing light basic magnesium carbonate. 1,573,632; Feb. 16.
Curtis, Henry E., San Jose, assignor of one-half to J. H. Betts, Long Beach, Calif. Spring mounting for motor vehicles. 1,573,633; Feb. 16.
Cuvelier, Pierre A. I., Haubourdin, France. Agglomerating machine. 1,573,680; Feb. 16.
Dalreaux, Jorge G., Buenos Aires, Argentina. Trocar. 1,573,681; Feb. 16.
Daisy Manufacturing Company. (See Lefever, Charles F., assignor.)
Dale, Richard, Mount Carroll, Ill. Building construction. 1,572,887; Feb. 16.
Daltan, Richard A., Philo, Ohio. Fire brick or block. 1,573,482; Feb. 16.
Dänhardt, Emil, Cologne-Kalk, Germany. Apparatus for separating solid substances from gases and vapors, more especially blast-furnace gases. 1,572,888; Feb. 16.
Darling, Philip G., Bridgeport, Conn., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y. Valve. 1,573,304; Feb. 16.
Daum, George W. (See Lewis, S. G., and Daum.)
Davies, Wayne, Atlanta, Ga. Cooking apparatus. 1,573,041; Feb. 16.
Davis, Harry A. (See Stimpson, W. I., and Davis.)
Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,573,227; Feb. 16.
Davol Rubber Company. (See Little, Jesse, assignor.)
Dawn Manufacturing Co., The. (See Dickerman, J. A., and Leckie, assignors.)
Dawson, Clarence L., Los Angeles, Calif. Automatic overflow outlet for plumbing fixtures, etc. 1,573,042; Feb. 16.
De Bothezat, George, Dayton, Ohio. Helicopter. 1,573,228; Feb. 16.
De Cola, Salvatore, and V. E. Clift, San Jose, Calif. Stair construction. 1,573,043; Feb. 16.
De Forest, Lee, New York, N. Y. Loud speaker. Des. 69,443; Feb. 16.
Degen, Irwin C., Chaska, Minn. Safety parachute for aeronauts. 1,572,889; Feb. 16.
De Gruchy, Francis, Newark, N. J. Grate. 1,573,682; Feb. 16.
Delco-Light Company. (See King, James G., assignor.)
Delco-Light Company. (See Warner, Clarence, assignor.)
De Lin, Martin. (See Nystrom, O. P., and De Lin.)
Demand, Joseph, New York, N. Y., assignor, by mesne assignments, to All Clear Windshields, Inc., Boston, Mass. Reciprocating mechanism for windshield cleaners and the like. 1,573,541; Feb. 16.
Desautels, Charles H., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Heater connection. 1,573,305; Feb. 16.
Diamond, Rubin L., assignor of one-half to J. S. Adkison, McHenry, Miss. Agricultural implement. 1,573,044; Feb. 16.
Dickerman, John A., and H. V. Leckie, Bridgeport, assignors to The Dawn Manufacturing Co., Stratford, Conn. Washing machine. 1,573,542; Feb. 16.
Dickerson, Walter H., East Orange, N. J., and W. B. McLaughlin, deceased, New York, N. Y.; said Dickerson assignor to Industrial Waste Products Corporation, Dover, Del.; C. B. McLaughlin, administratrix. Powder collector. 1,573,376; Feb. 16.
Diehl, Stanley, Bedford, Pa. Ice-cutting, timber-framing, and wood-sawing machine. 1,573,377; Feb. 16.
Diekelmann, Kurt A., Birmingham, Ala. Wardrobe trunk. 1,573,306; Feb. 16.
Dietz, Frank L., Brooklyn, N. Y. Fuel oil. 1,573,307; Feb. 16.
Dietz, Frank L., Brooklyn, N. Y. Motor fuel oil. 1,573,308; Feb. 16.
Diffinger, Eugène A., assignor of one-half to Etablissements P. Colombier Fils, Paris, France. Rotary pump. 1,573,683; Feb. 16.
Dinsmoor, John L., New York, N. Y. Sealable package tie. 1,573,684; Feb. 16.
Dinsmoor, John L., New York, N. Y. Sealable package tie. 1,573,685; Feb. 16.
Diversey Foundry Company. (See League, Thomas J., assignor.)
Dodge, Charles J., Brooklyn, N. Y. Sound amplifier. 1,573,634; Feb. 16.
Dominguez, Manuel D., New Orleans, La. Shock absorber. 1,573,229; Feb. 16.
Donahue, Peter C., Cambridge, Mass. Making mops. 1,573,686; Feb. 16.
Donovan, Charles M., Wichita, Kans. Emergency supply for fuel-combustion engines. 1,573,230; Feb. 16.
Douglas, Frank J. (See Belcher, Claude, assignor.)
Douglas, Paul H., and I. D. Thomas, Cleveland Heights, assignors to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Coke-releasing device for vertical retorts. 1,573,145; Feb. 16.
Dowey, Thomas L., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Recording and reproducing machine. 1,573,309; Feb. 16.
Draper Corporation. (See Davis, Harry A., assignor.)
Draper Corporation. (See Hollins, Denis M., assignor.)
Draper Corporation. (See Stimpson, W. I., and Davis, assignors.)
Draper Corporation. (See Stone, Melvin L., assignor.)
Draper Corporation. (See Tinkham, Eugene L., assignor.)
Dreese, Gertrude, assignor of one-half to M. G. Hoyman, Neenah, Wis. Shield. 1,573,146; Feb. 16.
Drewitz, John W., Chicago, Ill. Cap for bottles and the like. 1,573,147; Feb. 16.
Drey, Leo A., St. Louis, Mo., assignor, by mesne assignments, to Ball Brothers Company, Muncie, Ind. Feeding glass to forming machines. 1,573,635; Feb. 16.
Drey, Leo A., St. Louis, Mo., assignor, by mesne assignments, to Ball Brothers Company, Muncie, Ind. Apparatus for feeding glass into molds. 1,573,636; Feb. 16.

Drozd, Frank, assignor of one-half to J. G. Jalufka, Hallettsville, Tex. Cotton chopper. 1,573,637; Feb. 16.
Dubin, Harry E., assignor to H. A. Metz, New York, N. Y. Malt sirup and preparing the same. 1,573,687; Feb. 16.
Dumrnese, Paul A., Milford, Conn. Carburetor. 1,573,689; Feb. 16.
Dumont, Albert, Maple City, Mich. Valve. 1,573,688; Feb. 16.
Duncan Electric Manufacturing Company. (See Harris, Jesse, assignor.)
Dunlop Rubber Company, The. (See Penfold, Albert E., assignor.)
Duplex Engine Governor Company. (See Tabb, Warner T., assignor.)
Durrance, Thomas, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Work support. 1,573,045; Feb. 16.
Eakman, William W. (See Wright, William L., assignor.)
Eastern Manufacturing Company. (See Briner, E. A., and Guild, assignors.)
Eastman, J. D. (See Buschell, William H., assignor.)
Economides, Michael J., Brooklyn, N. Y. Hinge. 1,573,231; Feb. 16.
Edison Electric Appliance Company. (See Randolph, Charles P., assignor.)
Edsall, William S., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass. Electrical generating and distribution system and apparatus therefor. 1,573,148; Feb. 16.
Edstrom, Otto E., Chicago, assignor to Illinois Patents Corporation, Cary, Ill. Automatic stop roller for shades. 1,573,378; Feb. 16.
Edwards, Charles E., Galion, Ohio. Air moistener. 1,573,690; Feb. 16.
Eggers Pole & Supply Company. (See Chickering, Daniel J., assignor.)
Egler, Nickolas F., Chicago, Ill. Furnace used in connection with the making of steel. 1,572,912; Feb. 16.
Eichberg, Simon, Chicago, Ill. Ironing board. 1,573,691; Feb. 16.
Eklund, Elmer A., Spencer, S. Dak. Auxiliary air control for internal-combustion engines. 1,573,692; Feb. 16.
Ekström, Gunnar C., assignor to Aktiebolaget Gehr Arehns Mekaniska Verkstad, Stockholm, Sweden. Transporting device for boxes or the like. 1,573,232; Feb. 16.
Eldredge, Robert B., Denver, Colo. Treating zinc-sulphate solutions. 1,573,233; Feb. 16.
Electric Heating Apparatus Company. (See Smalley, Edwin L., assignor.)
Electric Railway Improvement Company. (See Cadwell, Charles A., assignor.)
Electrical Dealers Supply House, Inc. (See Chamberlain, Paul A., assignor.)
Elevator Supplies Company, Inc. (See Lighthipe, Kenneth D., assignor.)
Elliott, William E., Lynn, Mass. System for making pads. 1,573,599; Feb. 16.
Ellson, Horace S. (See Herman, A. F., and Ellson.)
Elmendorf, Armin, Chicago, Ill. Method of and apparatus for drying wood veneer. 1,573,379; Feb. 16.
Enderes, Ernst, Albert Lea, Minn. Splitting shear. 1,573,483; Feb. 16.
Endres, Peter, Independence, Kans. Disappearing foot scraper. 1,573,046; Feb. 16.
Engel, Albert W., Chicago, Ill. Display box. 1,573,149; Feb. 16.
Englander, Benjamin B., assignor to Englander Spring Bed Company, Brooklyn, N. Y. Box-spring structure. 1,573,047; Feb. 16.
Englander Spring Bed Company. (See Englander, Benjamin B., assignor.)
Englert, William. (See Fischer, P., and Englert.)
Engstrom, George E., Deerfield, Ill. Electric facial device. 1,573,693; Feb. 16.
Enna, Ernst F. H. (See Sorensen, Marius M., assignor.)
Eppley, Charles S., York, Pa. Automatic railway switch. 1,573,234; Feb. 16.
Eppley, Charles S., York, Pa. Circuit breaker. 1,573,235; Feb. 16.
Erie Shovel Company. (See Armstrong, Edwin J., assignor.)
Ernst Leitz, Optische Werke. (See Heine, Hermann, assignor.)
Espeseth, Alfred, Prospy, Alberta, Canada. Grain pickler and loader. 1,573,694; Feb. 16.
Estes, Thomas W., New York, N. Y. Textile fabric. Des. 69,444; Feb. 16.
Etablissements P. Colombier Fils. (See Diffinger, Eugène A., assignor.)
Etablissements Poulenc Freres. (See Oechslin, Carl, assignor.)
Evans, Frank G., New Plymouth, New Zealand. Mounting and means for tilting vehicle headlights. 1,573,380; Feb. 16.
Evelyn, Harry C., Chicago, Ill. Signal device for motor vehicles. 1,573,638; Feb. 16.
Exyon Corporation. (See Cheape, John A., assignor.)
Fageol, Rollie B., Los Angeles, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn. Bumper bracket. 1,573,381; Feb. 16.

Fancher, Charles J., and R. A. Johnson, Windsor, Vt., assignors to The National Acme Company, Cleveland, Ohio. Feed collet. 1,573,048; Feb. 16.
Fancher, Charles J., and R. A. Johnson, Windsor, Vt., assignors to The National Acme Company, Cleveland, Ohio. Feed collet. 1,573,049; Feb. 16.
Farr, Edward A., assignor to Manning, Bowman & Company, Meriden, Conn. Tray or similar article. Des. 69,445; Feb. 16.
Fay, Harry, Millersburg, Ky. Grease gun. 1,573,150; Feb. 16.
Feddersen, Henry L., San Francisco, Calif. Drawcut scissors. 1,573,442; Feb. 16.
Feldenheimer, William, London, England. Treatment of earthy minerals. 1,573,385; Feb. 16.
Felker, Lewis H. (See Ohme, W. F., and Felker.)
Field, Maletis F., assignor to himself and A. H. Marietta, Akron, Ohio. Mandrel. 1,573,386; Feb. 16.
Fields, Clarence M., and W. Worrick, Bellefontaine, Ohio. Musical instrument. 1,573,695; Feb. 16.
Finnell, Walter S., assignor to American Scrubbing Equipment Company, Hannibal, Mo. Mopping and rinsing machine. 1,572,913; Feb. 16.
Fischer, Paul, New York, and W. Englert, Hempstead, N. Y. Apparatus for massaging and the like. 1,573,639; Feb. 16.
Fischer, Richard F. (See Williams, J. M., jr., and Fischer.)
Fisbel, Alvin S., Cleveland, Ohio. Socket for expansion-bolt shields. 1,573,151; Feb. 16.
Fisher, Adam E., and J. A. Storm, St. Louis, Mo. Washing machine. 1,573,640; Feb. 16.
Fisk Rubber Company, The. (See Desautels, Charles H., assignor.)
Fisk Rubber Company, The. (See Wood, Harley C., assignor.)
Fitz Gerald, Francis A. J., Niagara Falls, N. Y., assignor to Harper Electric Furnace Corporation. Tunnel kiln. 1,573,543; Feb. 16.
Fizzell, William, jr., Bradford, Pa. Attachment for doors. 1,573,236; Feb. 16.
Fleischer, Max, Brooklyn, assignor to Out Of The Inkwell Films, Inc., New York, N. Y. Song motion-picture film. 1,573,696; Feb. 16.
Fleming, Walter P., Detroit, Mich. Drive-a-way towing fixture. 1,572,914; Feb. 16.
Fletcher, John, New York, N. Y. Press. 1,573,769; Feb. 16.
Flynn, Lawrence O. (See Barnes, Julius E., assignor.)
Foote, Paul D. (See Harrison, T. R., and Foote.)
Forney, Elwood W., Joplin, Mo. Copyholder. 1,573,237; Feb. 16.
Forrest, Charles N., Rahway, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Treating gilsonite. 1,573,764; Feb. 16.
Forrest, Charles N., Rahway, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Gilsonite products. 1,573,765; Feb. 16.
Forsberg, Harold S. (See French, D. S., and Forsberg.)
Forsberg Manufacturing Company, The. (See French, D. S., and Forsberg, assignors.)
Förster, Hans, Nieder-Zwonitz, Erzgebirge, Germany. Knitting machine. 1,572,993; Feb. 16.
Forsyth, George H., Chicago, Ill., assignor to Motor Wheel Corporation, Lansing, Mich. Disk wheel. 1,573,238; Feb. 16.
Foster, Isaac M., et al. (See Mulligan, Paul C., assignor.)
Foulds, William C., Tuckerton, N. J. Indicator for injector-pressure kiers. 1,573,310; Feb. 16.
Foxboro Company, The. (See Watts, Edward J., assignor.)
Franklin, Claud A., Kansas City, Kans. Gasket holder. 1,573,484; Feb. 16.
Frederics, E., Inc. (See Frederics, Ernest O., assignor.)
Frederics, Ernest O., assignor to E. Frederics, Inc., New York, N. Y. Hair waving and curling device. 1,573,600; Feb. 16.
Freeman-Daughaday Co. (See Byron, John F., assignor.)
French, David S., and H. S. Forsberg, assignors to The Forsberg Manufacturing Company, Bridgeport, Conn. Hinge. 1,573,311; Feb. 16.
French, Sherman Q., Hawarden, Iowa. Dishwasher. 1,573,387; Feb. 16.
Frey, Eugene, Mount Vernon, N. Y. Riveting punch. 1,573,050; Feb. 16.
Fricker, Anthony, Lakewood, Ohio. Discharge mechanism for bituminous distributors. 1,572,915; Feb. 16.
Friel, Patrick A., Richmond Hill, N. Y. Time switch for alarm systems. 1,573,152; Feb. 16.
Friesen, George C., Dallas, Oreg. Truck-moving apparatus. 1,573,388; Feb. 16.
Frisch, Albert C. and J. R., Wilmington, Del. Loudspeaker horn for radio receiving sets. Des. 69,446; Feb. 16.
Frisch, John R. (See Frisch, Albert C. and J. R.)
Fritts, Francis M., assignor of one-half to L. H. Stevens, Coffeyville, Kans. Moisture and vapor separator. 1,573,485; Feb. 16.
Fritz, Joseph L., Philadelphia, Pa. Stop box. 1,573,312; Feb. 16.
Froesch, Charles, assignor to International Motor Company, New York, N. Y. Brake system. 1,572,890; Feb. 16.
Fromm, Salomon. (See Wiese, Otto C., assignor.)

Fuller, Carl T., Nutley, N. J., assignor to General Electric Company. Article containing visible temperature records and method of obtaining the records. 1,573,601; Feb. 16.

Fuller, Henry C., Washington, D. C. Denatured alcohol. 1,573,697; Feb. 16.

Fuller, Henry C., Washington, D. C., assignor to Union Carbide and Carbon Research Laboratories, Inc., Long Island City, N. Y. Denatured alcohol. 1,573,698; Feb. 16.

Galbreath, H. C. (See Kennedy, Charles, assignor.)

Gamble, Stanley B., Oakland, Calif. Flour sifter. 1,573,513; Feb. 16.

Gamble, William J., East Orange, assignor, by mesne assignments, to Carrier Construction Company, Inc., Newark, N. J. Radiator or the like. 1,572,916; Feb. 16.

Gammell-Hanney Manufacturing Co. (See Hanney, Angus F., assignor.)

Gammon, Benj. W., & Company. (See Bradley, Richard C., assignor.)

Garcelon, George H., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Short-circuiting device. 1,572,917; Feb. 16.

Garfinkle, David, Alameda, Calif. Price-tag holder. 1,572,994; Feb. 16.

Garrison, Orlando, Dayton, Ohio. Gear grinder. 1,573,153; Feb. 16.

Gates, Leroy G., Bakersfield, assignor to Standard Oil Company, San Francisco, Calif. Method of and apparatus for breaking emulsions. 1,573,389; Feb. 16.

Gates, Paul F., Portland, Oreg. Steering-wheel grip. 1,572,995; Feb. 16.

Gathmann, Emil, Baltimore, Md. Ingot mold. 1,573,486; Feb. 16.

Geddes, William F., Subiaco, assignor of three-eighths to Walter Schofield, Bassendean, Western Australia, Australia. Internal-combustion engine. 1,572,918; Feb. 16.

Geese, Clarence D., Columbus, Ohio. Tile. 1,572,919; Feb. 16.

Gehman, Elmer L., Seattle, Wash. Electric bake oven. 1,573,602; Feb. 16.

Gelder, Irving L., Brooklyn, N. Y. Grating. 1,573,154; Feb. 16.

General Electric Company. (See Biermanns, J., and Mayr, assignors.)

General Electric Company. (See Biermanns, Josef, assignor.)

General Electric Company. (See Carver, James H., assignor.)

General Electric Company. (See Fuller, Carl T., assignor.)

General Electric Company. (See Smith, Arthur R., assignor.)

General Metals Recovery Company. (See Keith, Edward W., assignor.)

General Motors Corporation. (See Blackmore, L., and Spencer, assignors.)

General Motors Corporation. (See Lovett, George A., assignor.)

General Motors Research Corporation. (See Hunt, John H., assignor.)

General Motors Research Corporation. (See King, Jesse G., assignor.)

Gerdien, Hans, Berlin-Grunewald, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Rectifier with a change-over switch. 1,573,155; Feb. 16.

Gerding, Edward A. (See Gerding, Herbert H. and E. A.)

Gerding, Herbert H., Newport, and E. A. Gerding, Fort Thomas, Ky. Bottle crate. 1,573,111; Feb. 16.

Gerding, Herbert H., Newport, and E. A. Gerding, Fort Thomas, Ky. Bottle crate. 1,573,112; Feb. 16.

Gerow, George C., assignor of eight-twentieths to W. J. Press, one-twentieth to W. C. Arnold, one-twentieth to J. L. Kemp, and two-twentieths to E. Press, Ottawa, Ontario, Canada. Combustion apparatus and method. 1,572,920; Feb. 16.

Gervais, Wainwright B., and J. C. Wilmot, assignors to Variety Fire Door Company, Chicago, Ill. Interlock for elevator doors and the like. 1,573,156; Feb. 16.

Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches. (See Osnos, Mendel, assignor.)

Gessner, Albert, jr., Morgantown, W. Va. Manufacture of rubber-coated weftless cord fabric. 1,573,390; Feb. 16.

Giddings, Victor P., jr., Beaumont, Tex. Self-emtying motor-vehicle radiator. 1,573,157; Feb. 16.

Giesey, Victor A. Cleveland Heights, Ohio. Hot top for ingot molds. 1,573,313; Feb. 16.

Gignoux, John R., Long Beach, and T. E. Swigart, Los Angeles, assignors to Shell Company of California, San Francisco, Calif. Gas anchor for pumping wells. 1,573,051; Feb. 16.

Gilardone, Joseph C., Fleetwood, Pa. Vehicle spring. 1,573,052; Feb. 16.

Gilberg, Harry W. (See Lieske, Frank J., assignor.)

Gilbert, Evangeline L., Rochester, N. Y. Dimple-producing appliance. 1,572,891; Feb. 16.

Gilbertson, Frank H., Los Angeles, Calif. Flue-pipe support and insulator. 1,573,053; Feb. 16.

Gilbo, Alfred L. (See Aldrich, G. H., and Gilbo.)

Gilchrist Company, The. (See Gilchrist, Raymond B., assignor.)

Gilchrist, Raymond B., assignor to The Gilchrist Company, Newark, N. J. Straw dispenser. 1,573,158; Feb. 16.

Gilliland, Robert E., Los Angeles, Calif. Bather's article. 1,573,239; Feb. 16.

Gilpin, Garth G., Riverside, assignor, by mesne assignments, to Union Metal Products Company, Chicago, Ill. Uncoupling device for car couplers. 1,573,054; Feb. 16.

Giovannetti, William J., Brooklyn, N. Y. Fountain pen. 1,573,699; Feb. 16.

Girin, Pierre, assignor to Société Anonyme de Commentry, Fourchambault & Decazeville, Paris, France. Alloy. 1,572,996; Feb. 16.

Gizienski, Lawrence, Curtisville, Pa. Welding process. 1,572,921; Feb. 16.

Gledhill, Edward C., Galion, Ohio. Machine for use in repairing roads. 1,573,700; Feb. 16.

Glezen, Lee L. (See Crisson, G., and Glezen.)

Glowacki, John B., Chicago, Ill. Renewable fuse element. 1,573,392; Feb. 16.

Goelitz, Henry G., et al. (See Purnell, Lemuel H., assignor.)

Going, George G., Middletown, Conn., assignor to Remington-Noiseless Typewriter Corporation, New York, N. Y. Typewriting machine. 1,573,544; Feb. 16.

Gold, Abraham. (See Gold, Charles and A.)

Gold, Charles, and A., assignors to Charles Gold & Brothers, New York, N. Y. Combined mirror and compact holder. 1,573,393; Feb. 16.

Gold, Charles, & Brothers. (See Gold, Charles and A., assignors.)

Goldberg, Emanuel, and M. Nowicki, Dresden, Germany. Enlarging camera. 1,573,314; Feb. 16.

Goldsmith, Byron B., New York, N. Y. Mechanical pencil. 1,573,055; Feb. 16.

Goodman Bros. (See Rappaport, Arthur G., assignor.)

Goodrich, B. F., Company, The. (See Kroeger, Edwin J., assignor.)

Goodyear Tire & Rubber Company, The. (See O'Brien, William G., assignor.)

Gorgolis, Spyridon. (See Thomas, Antony, assignor.)

Gorman, Thomas A., Johnstown, Pa. Forging machine. 1,573,487; Feb. 16.

Gough, James J., assignor to Chicago Electric Manufacturing Co., Chicago, Ill. Parking lamp. 1,573,394; Feb. 16.

Gould Storage Battery Company. (See Chamberlain, Rufus N., assignor.)

Govers, Francis X., New York, N. Y., and E. R. Hewitt, Midvale, N. J. Balanced packing for shafts. 1,572,922; Feb. 16.

Gowdridge, William H., Rossiter, Pa. Auger bit. 1,573,701; Feb. 16.

Grabler Manufacturing Company. (See McCabe, F. E., and Roshetko, assignors.)

Gramma, James J., New York, N. Y. Circuit closer. 1,573,702; Feb. 16.

Grauss, Georges, Paris, France. Centrifugal drying apparatus. 1,573,240; Feb. 16.

Gray, William H. (See Longley, R. W., and Gray.)

Green, Charles W. (See Johnson, E. D., and Green.)

Green, Charles W., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,573,396; Feb. 16.

Grenier, Joseph O., Vancouver, British Columbia, Canada. Rope puller. 1,573,397; Feb. 16.

Griffin, Frank H., Wawa, assignor to The Viscose Company, Marcus Hook, Pa. Recovery of caustic hydroxides from waste solutions. 1,573,703; Feb. 16.

Griffin, James T., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Cementing two parts together. 1,573,315; Feb. 16.

Griffith, Benjamin M., assignor to National Casket Company, Pittsburgh, Pa. Bier. 1,573,398; Feb. 16.

Grindle Fuel Equipment Company. (See Bourne, R. H., and Grindle.)

Groebli, Paul, New York, N. Y. Lace. Des. 69,447; Feb. 16.

Gross, Louis N., Cleveland Heights, Ohio. Ventilated sunshade. 1,573,159; Feb. 16.

Grove, John H., Cascade Locks, Oreg. Trap. 1,573,704; Feb. 16.

Gruelle, William D. (See Thomas, Jesse M., assignor.)

Gruen National Watch Case Company, The. (See Bieser, Carl W., assignor.)

Gruhler, Walter. (See Schott, Otto, assignor.)

Grunwald, Bertrand B., Alameda, Calif. Making heavy basic carbonate of magnesium. 1,573,603; Feb. 16.

Grunwald, Bertrand B., Alameda, Calif. Making light basic carbonate of magnesium. 1,573,604; Feb. 16.

Guard, Abiah H., Colfax, Ind. Combined corn harvester and stalk cutter. 1,573,399; Feb. 16.

Gubelmann, Ivan, and J. M. Tinker, South Milwaukee, assignors to The Newport Company, Carrollville, Wis. Process of preparing 1,8-aminonaphthol sulphonic acids. 1,573,056; Feb. 16.

Guild, Henry J. (See Briner, E. A., and Guild.)

Gunn, Charles H., Oakland, Calif. Seat-controlled toilet flush and intake valve. 1,573,160; Feb. 16.

Günther, Fritz, assignor to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany. Manufacture of azo dyestuffs. 1,573,605; Feb. 16.

Gustafson, Axel R., Chicago, assignor to W. J. Conlon, Oak Park, Ill. Ironing machine. 1,573,161; Feb. 16.

Hackman, William C., assignor to B. Hoffman Manufacturing Co., Milwaukee, Wis. Safety appliance for steam boilers. 1,573,488; Feb. 16.

Haddock, Ernest L., Vancouver, British Columbia, Canada. Magneto plug. 1,573,316; Feb. 16.

Haentjens, Otto, Hazleton, Pa. Lubrication system. 1,573,706; Feb. 16.

Hague, Ainsworth J., jr., Red Bank, N. J. Needlebook. Des. 69,448; Feb. 16.

Hague, Ainsworth J., jr., Red Bank, N. J. Needlebook. Des. 69,449; Feb. 16.

Hall, Francis C., New York, N. Y. Shade holder. 1,573,489; Feb. 16.

Hallar, Forrest, Blairstown, Mo., and B. C. Long, Topeka, Kans. License-plate holder. 1,573,443; Feb. 16.

Hamilton, Arden L., Brooklyn, N. Y. Inner ring for pistons. 1,573,545; Feb. 16.

Hamilton, Earl R., Pekin, Ind. Applicator. 1,573,514; Feb. 16.

Hamilton, Murray B., Toronto, Ontario, Canada. Non-slip device for heels of low shoes. 1,572,997; Feb. 16.

Hammerl, Jacob, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,573,241; Feb. 16.

Hammes, John H., assignor to Sewell Cushion Wheel Company, Detroit, Mich. Steering wheel. 1,572,923; Feb. 16.

Hancock, Melburn B., Mount Meigs, Ala. Combination instrument. 1,573,057; Feb. 16.

Hand, Carl N., Nitro, W. Va., assignor to The Rubber Service Laboratories Co., Akron, Ohio. Insecticidal composition of matter. 1,573,490; Feb. 16.

Hand, Lawrence J., and H. G. Passé, Dayton, Ohio. Pipe-end-forming tool. 1,572,924; Feb. 16.

Hand, Walter A., Brooklyn, N. Y. Attachment for harmonicas. 1,573,242; Feb. 16.

Hanford, Parmly, Springfield, Mass. Shock absorber. 1,573,058; Feb. 16.

Hanney, Angus F., assignor to Gammell-Hanney Manufacturing Co., Chicago, Ill. Laundry counting device. 1,573,102; Feb. 16.

Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Double drum hoist. 1,573,491; Feb. 16.

Hard, Malcolm, Flushing, assignor to The Superheater Company, New York, N. Y. Steam injector. 1,573,059; Feb. 16.

Hardisty, Henry, Tualatin, Oreg. Radiator cap or similar article. Des. 69,450; Feb. 16.

Harkom, John W., Melbourne, Quebec, Canada. Rear sight for high-velocity weapons. 1,573,515; Feb. 16.

Harper Electric Furnace Corporation. (See Fitz Gerald, Francis, A. J., assignor.)

Harris, Jesse, assignor to Duncan Electric Manufacturing Company, Lafayette, Ind. Induction electricity meter. 1,573,546; Feb. 16.

Harris, John. (See Rose, James R., assignor.)

Harris, Rex, San Diego, Calif. Internal-combustion-engine-starting mechanism. 1,572,998; Feb. 16.

Harris, Rex, San Diego, Calif. Internal-combustion-engine-starting mechanism. 1,572,999; Feb. 16.

Harrison, Opal. (See Munson, Oliver P., assignor.)

Harrison, Thomas R., Philadelphia, Pa., and P. D. Foote, Washington, D. C. Method and apparatus for making electrical measurements. 1,573,606; Feb. 16.

Harrison, Walter H., Highmore, S. Dak. End gate. 1,573,060; Feb. 16.

Hart, George H., West Hartford, Conn. Electric switch. 1,573,163; Feb. 16.

Hart, George H., West Hartford, Conn. Electric switch. 1,573,164; Feb. 16.

Harteau, Edith, Sobieski, Wis. Fire preventer. 1,572,925; Feb. 16.

Hartford-Fairmont Company. (See Peller, Karl E., assignor.)

Hartmann, Miner L., assignor to The Carborundum Company, Niagara Falls, N. Y. Abrasive article and making the same. 1,573,061; Feb. 16.

Hartmann, Miner L., assignor to The Carborundum Company, Niagara Falls, N. Y. Making abrasive articles. 1,573,400; Feb. 16.

Hartogs, Jacques C., Arnhem, Netherlands. Spinning viscose. 1,573,062; Feb. 16.

Hartshorn, Stewart, Company. (See Hartsborn, Stewart, assignor.)

Hartshorn, Stewart, Short Hills, assignor to Stewart Hartsborn Company, East Newark, N. J. Shade roller. 1,573,492; Feb. 16.

Harty, William A., Buffalo, N. Y., and F. W. Moore, Thorold, Ontario, Canada. Rotary drier. Re16,265; Feb. 16.

Haseltine, Stacy B., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Door operating and locking device. 1,573,063; Feb. 16.

Hauck, Andrew C., assignor to Williamsburg Wood Heel Company, Brooklyn, N. Y. Edging gauge. 1,573,705; Feb. 16.

Haughton Elevator & Machine Company. (See Brubaker, John A., assignor.)

Haughton Elevator & Machine Company. (See Thurston, Ernest B., assignor.)

Hawley, Charles G., assignor to Locomotive Firebox Company, Chicago, Ill. Locomotive boiler. 1,573,547; Feb. 16.

Hawley, Charles G., assignor to Locomotive Firebox Company, Chicago, Ill. Brick-supporting thermic siphon. 1,573,548; Feb. 16.

Heald, James N., A. Turner, and G. C. Kimmel, assignors to The Heald Machine Company, Worcester, Mass. Grinding machine. 1,572,926; Feb. 16.

Heald Machine Company, The. (See Heald, J. N., Turner, and Kimmel, assignors.)

Heath, Spencer, Baltimore, Md. Propeller-blade mounting. 1,573,000; Feb. 16.

Heine, Hermann, assignor to the Firm Ernst Leitz, Optische Werke, Wetzlar, Germany. Photographic camera. 1,573,401; Feb. 16.

Heisey, A. H., & Co. (See Balda, Joseph O., assignor.)

Heitzman, Emanuel, Alexandria, S. Dak. Attachment for corn shellers. 1,573,064; Feb. 16.

Hellmund, Rudolf E., Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control apparatus. 1,572,927; Feb. 16.

Henderson, Matthew, Auckland, New Zealand. Tramway trolley pole. 1,573,001; Feb. 16.

Henry, James B., Burlingame, Calif. Vehicle fender. 1,573,243; Feb. 16.

Herman, Albert F., Cleveland, and H. S. Ellson, Lakewood, Ohio, assignors to National Carbon Company, Inc. Conductive brush and securing attachments thereto. 1,573,402; Feb. 16.

Hermann, Ralph L. (See Owens, C. C., and Hermann.)

Herzog, Joseph L., New Rochelle, N. Y. Finger ring or similar article. Des. 69,451; Feb. 16.

Hess, Albert J., Springfield, Ohio. Motormeter lock. 1,573,002; Feb. 16.

Hess, William C., Toledo, Ohio. Carburetor. 1,573,065; Feb. 16.

Hewitt, Edward R. (See Govers, F. X., and Hewitt.)

Heyd, Esler B., Garrettsville, Ohio. Drill for fertilizers and seeds. 1,573,493; Feb. 16.

Heyman, Wilbert A. (See McComb, W., and Heyman.)

Hiatt, Enos B., Palisade, Colo. Device for packing fruit and the like. 1,573,341; Feb. 16.

Hibner, John M., assignor to Morgan & Wright, Detroit, Mich. Manufacturing cushion tires. 1,573,391; Feb. 16.

Hickey, Dennis E., Chicago, Ill. Razor blade. 1,573,244; Feb. 16.

Highway Trailer Company. (See Burton, Robert N., assignor.)

Hill, Willard J., S. J. Lupton, and F. E. Collinson, Winnipeg, Manitoba, Canada, assignors to said Hill. Combined water-gauge illuminator and protector. 1,573,342; Feb. 16.

Himes, Walter H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Short-circuiting device. 1,572,928; Feb. 16.

Himes, Walter H., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Short-circuiting device. 1,572,929; Feb. 16.

Himpel, Joseph, West Haven, Conn. Upright piano action. 1,573,607; Feb. 16.

Hinnekens, Florent, Paterson, N. J. Flock-printing machine. 1,573,494; Feb. 16.

Hitchcock, Delbert, Millersburg, Ohio. Electric time switch. 1,573,066; Feb. 16.

Hoerle, William F., assignor to Union Hardware Company, Torrington, Conn. Steel golf-club shaft. 1,573,707; Feb. 16.

Hoerle, William F., assignor to Union Hardware Company, Torrington, Conn. Manufacture of golf-club shafts. 1,573,708; Feb. 16.

Hoffman, Andrew, Mfg. Co. (See Bock, Charles S., assignor.)

Hoffman, B., Manufacturing Co. (See Hackman, William C., assignor.)

Hohl, Jacob, Weehawken, and E. G. Keller, New Durham, N. J. Embroidery machine. 1,573,165; Feb. 16.

Hohorst, William F., Monrovia, Calif. Tackle. 1,573,245; Feb. 16.

Holeka, William F., San Francisco, Calif. Support. 1,573,343; Feb. 16.

Holland Furnace Company. (See Nystrom, O. P., and De Ldn, assignors.)

Holland, Henry T., Winfield, N. Y. Bracket. 1,573,246; Feb. 16.

Holland, Norman, Westmount, Quebec, Canada. Drain-pipe strainer. 1,573,067; Feb. 16.

Holley, Earl. (See Anderson, Alexander, assignor.)

Hollius, Denis M., Blackburn, England, assignor to Draper Corporation, Hopedale, Mass. Weft-cutting means for automatic weft-replenishing looms. 1,572,930; Feb. 16.

Homan, William C., Meriden, Conn., assignor to L. T. Wilcox, Peekskill, N. Y. Liquid-fuel burner. 1,573,549; Feb. 16.

Honaman, Richard K., Bloomfield, N. J., assignor to American Telephone and Telegraph Company. Voltage-limiting device. 1,573,068; Feb. 16.

Hopp, Hermann and L., assignors to Hopp Press, Inc., New York, N. Y. Price card or ticket. 1,573,403; Feb. 16.

Hopp, Leo. (See Hopp, Hermann and L.)

Hopp Press, Inc. (See Hopp, Hermann and L., assignors.)

Horman, Augustine F., Andover, Mass. Supply-controlling means for textile-preparing machinery. 1,573,709; Feb. 16.

Horton, Bryson D., assignor to Square D Company, Detroit, Mich. Electrical-switch inclosure or cabinet. 1,573,710; Feb. 16.

Houle, Louis C., West Pittsburg, Pa. Game. 1,573,711; Feb. 16.

Housekeeper, William G., assignor to Western Electric Company, Incorporated, New York, N. Y. Manufacture of vacuum tubes. 1,573,317; Feb. 16.

Howard, Frank. (See Bergere, Emerick W., assignor.)

Howard, Frank A., Elizabeth, N. J., and D. G. Tomkins, New York, N. Y., assignors to Standard Development Company. Liquid-dispensing device. 1,573,766; Feb. 16.

Hoy, Llewellyn C., et al. (See Iles, Charles E., assignor.)

Hoyman, Milan G. (See Dreese, Gertrude, assignor.)

Hrusëcky, Joseph. (See Yanovich, J., and Hrusëcky.)

Huber, Joseph, Bozeman, Mont. Racing sulky. 1,573,318; Feb. 16.

Huffman, Samuel C., Lincoln, Nebr. Metal filing case. 1,573,608; Feb. 16.

Hughes, Frank C., Chicago, Ill. Tire-valve-casing cap. 1,573,495; Feb. 16.

Hull, Luther J., et al. (See Mulligan, Paul C., assignor.)

Hunt, Arthur L., Ravenwood, Mo. Fender control. 1,573,712; Feb. 16.

Hunt, Fay, New York, N. Y. Derrick. 1,573,713; Feb. 16.

Hunt, John H., assignor to General Motors Research Corporation, Dayton, Ohio. Air-cooling system. 1,573,641; Feb. 16.

Hurd, Norman B., assignor to The American Hardware Corporation, New Britain, Conn. Friction door holder. 1,573,404; Feb. 16.

Hurst, George S., assignor to The J. B. Williams Company, Glastonbury, Conn. Display device. 1,573,767; Feb. 16.

Hutchinson, Arthur H., Atlanta, Ga. Ice-making apparatus. 1,573,714; Feb. 16.

Hutchinson, Thomas C., Duluth, Minn. Grain separator. 1,573,166; Feb. 16.

Huyck, F. C., & Sons. (See Wilson, E. J., and Rees, assignors.)

Iles, Charles E., deceased, Birmingham, assignor of one-fourth to F. H. Amsden, one-fourth to L. C. Hoy, London, and one-fourth to T. F. Thirlby, Birmingham, England; E. A. Iles and C. E. Iles, executors. Addition to sewing thimbles. 1,573,715; Feb. 16.

Iles, Charles E., et al., executors. (See Iles, Charles E.)

Iles, Emily A., et al., executors. (See Iles, Charles E.)

Illinois-Pacific Glass Co. (See Pleukharp, Claude W., assignor.)

Illinois Patents Corporation. (See Edstrom, Otto E., assignor.)

Industrial Waste Products Corporation. (See Dickerson, W. H., and McLaughlin, assignors.)

Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)

Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)

Ingersoll-Rand Company. (See Slater, Fred M., assignor.)

Ingersoll-Rand Company. (See Smith, William A., assignor.)

Inglis, Henry B. (See Paulus, C. L., Kauch, and Inglis.)

Ingold, Ernest A., assignor to Messrs. W. & C. Pantin, London, England. Wire binding or tying apparatus. 1,573,516; Feb. 16.

International Agricultural Corporation. (See Barr, James A., assignor.)

International Motor Company. (See Froesch, Charles, assignor.)

International Motor Company. (See Robbins, Azor D., assignor.)

Irie, George G., Los Angeles, Calif. Automobile license-plate holder. 1,573,118; Feb. 16.

Isaachsen, Isak, assignor to A/S Krystal, Christiania, Norway. Suspension vessel. 1,573,716; Feb. 16.

Isley, George H. (See Lummis, C. W., and Isley.)

Isom, Edward W., Winnetka, Ill., and J. B. Bell, Brooklyn, N. Y., assignors to Sinclair Refining Company, Chicago, Ill. Condensation of hydrocarbon vapors. 1,573,167; Feb. 16.

Jalufka, Julius G. (See Drozd, Frank, assignor.)

James, William T., Chicago, Ill. Scooter. 1,573,247; Feb. 16.

Jansson, Theodore A., Johnson City, and C. A. Bornmann, Binghamton, assignors to Ansco Photoproducts, Inc., Binghamton, N. Y. Tripod. 1,573,496; Feb. 16.

Japolsky, Nicolas, and M. Kostenko, London, England. Installation for operating reciprocating electric motors. 1,573,003; Feb. 16.

Jeffrey Manufacturing Company, The. (See Brill, Lawrence E., assignor.)

Jenkins, Charles F., assignor to Radio Pictures Corporation, Washington, D. C. Machine for making optical prisms. 1,573,609; Feb. 16.

Jensen, Anton M., Los Gatos, Calif. Furring nail. 1,573,069; Feb. 16.

Jersemann, Max, Brooklyn, N. Y. Radiator inclosure. 1,573,610; Feb. 16.

Johnsen, Peter, assignor of one-half to C. L. Johnson, New Orleans, La. Fuel-injection device. 1,573,248; Feb. 16.

Johnson, Arthur D., and F. A. Schulze, Welland, Ontario, Canada, assignors to Atlas Alloy Steel Corporation, Dunkirk, N. Y. Core-removing machine for hollow drill steel. 1,573,070; Feb. 16.

Johnson, August, Toivola, Minn. Screw jack. 1,573,611; Feb. 16.

Johnson, Charles E., Hale, England. Fastener for stair carpets and the like. 1,572,931; Feb. 16.

Johnson, Claude L. (See Johnsen, Peter, assignor.)

Johnson, Edgar D., East Orange, and C. W. Green, Wyoming, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Signaling circuit. 1,573,395; Feb. 16.

Johnson, Ecbert A. (See Fancher, C. J., and Johnson.)

Johnston, Georgina A., Los Angeles, Calif. Vending machine. 1,573,517; Feb. 16.

Johnston, Waldo C., Cooperstown, N. Y. Hand grip for golf clubs. 1,573,612; Feb. 16.

Johnstone, Robert M., Roselle Park, N. J., assignor to Cameron Machine Company, Brooklyn, N. Y. Spacing cores. 1,573,613; Feb. 16.

Jones, Harry C., Larchmont, assignor to Lithoprintex Corporation, New York, N. Y. Counting head. 1,572,932; Feb. 16.

Jones, James D., Sault Ste. Marie, Ontario, Canada, and E. E. Litz, East Chicago, Ind. Manufacturing open-hearth steel. 1,573,004; Feb. 16.

Jones, Thomas H., Nottingham, England. Knitting machine. 1,573,614; Feb. 16.

Jonick Sirken Co. (See Kohler, J. F., assignor.)

Jordan, Louis G., Aberdeen, Wash. Picture device. 1,573,344; Feb. 16.

Jordan, Luther M., Owasso, Okla. Hook for well drilling machines. 1,573,444; Feb. 16.

Kadel, Byers W., Baltimore, Md., assignor, by mesne assignments, to The Symington Company, York. 1,573,249; Feb. 16.

Kahn, Maurice, assignor to Société Française des Produits Alimentaires Azotés, Paris, France. Manufacture of certain albumins and fatty matters. 1,572,933; Feb. 16.

Kalamazoo Loose Leaf Binder Co. (See Wigginton, George P., assignor.)

Kalmus, Comstock & Wescott. (See Wall, E. J., and Comstock, assignors.)

Kalte, Frederick E., assignor to Randall Control and Hydrometric Corporation, Los Angeles, Calif. Elevator-door lock. 1,573,345; Feb. 16.

Karstens, Henry C., Shelby County, near Avoca, Iowa. Oil tube for motor vehicles. 1,572,924; Feb. 16.

Kasley, Alexander T., Essington, Pa., assignor to Westinghouse Electric and Manufacturing Company. Reversing mechanism for opposed-piston engines. 1,573,319; Feb. 16.

Kansas City Gasoline Company, The. (See Wellman, Frank E., assignor.)

Kauch, Robert. (See Paulus, C. L., Kauch, and Inglis.)

Kaufmann, Albert, Berlin, Germany. Casting machine. 1,573,518; Feb. 16.

Kay, Arthur P., Auckland, New Zealand. Kettle. 1,573,250; Feb. 16.

Kaye, John A., Sault Ste. Marie, Ontario, Canada. Collapsible barrel. 1,573,071; Feb. 16.

Kayler, Samuel E., Alliance, Ohio. Striping duco and the like. 1,573,168; Feb. 16.

Keckler, Andrew R. (See Wallace, James G., assignor.)

Keehn, Le Roy D., Chicago, Ill. Shoe-sole protector. 1,572,935; Feb. 16.

Keene, William J., assignor to Chicago Spring Hinge Company, Chicago, Ill. Spring hinge. 1,573,550; Feb. 16.

Keith, Edward W., Denver, Colo., assignor to General Metals Recovery Company. Purifying gas-house liquor. 1,573,169; Feb. 16.

Keller, Ernest G. (See Hohl, J., and Keller.)

Kelly, William M., Westfield, N. J. Impression throw-off. 1,573,005; Feb. 16.

Kemp, James L., et al. (See Gerow, George C., assignors.)

Kemp, Robert, Chicago, Ill., assignor to Westinghouse Electric & Manufacturing Company. Molding. 1,572,936; Feb. 16.

Kempton, Willard H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Strain insulator. 1,572,937; Feb. 16.

Kennedy, Charles, Mays Lick, assignor of one-third to H. C. Galbreath, Brookaville, Ky. Hand transplanting machine. 1,573,768; Feb. 16.

Kestner, Paul J. F., Boulogne-sur-Seine, France. Refractory cement and concrete. 1,573,072; Feb. 16.

Kieser, Walter, Charlottenburg, assignor, by mesne assignments, to Allgemeine Elektricitats Gesellschaft, Berlin, Germany. Governing mechanism for turbines. 1,573,781; Feb. 16.

Killars, Charles, Stonington, Conn. Lamp lock. 1,573,717; Feb. 16.

Kimble, Frank R., Van Nuys, Calif. Gas brooder. 1,573,718; Feb. 16.

Kimmel, George C. (See Heald, J. N., Turner, and Kimmel.)

King, Jesse G., assignor, by mesne assignments, to General Motors Research Corporation, Dayton, Ohio. Refrigerating apparatus. 1,573,114; Feb. 16.

King, Jesse G., assignor to Delco-Light Company, Dayton, Ohio. Refrigerating apparatus. 1,573,115; Feb. 16.

Kirby, Eugene, et al. (See Allen, Arthur M., assignor.)

Kissam, Allen, Orlando, Fla. Process for filling and tamping molds. 1,573,346; Feb. 16.

Knoll, William J., assignor to H. B. Rouse & Company, Chicago, Ill. Beveling machine. 1,573,554; Feb. 16.

Knoll, Willy, Stuttgart, Germany. Ornamenting leather. 1,573,251; Feb. 16.

Knoll, Willy, Stuttgart, Germany. Producing shading-off ornamentation on leather. 1,573,252; Feb. 16.

Knottingham, Claude C. and W. S., and J. F. Otis, Roxboro, Wash. Combination lock. 1,573,170; Feb. 16.

Knottingham, William S. (See Knottingham, C. C. and W. S., and Otis.)

Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Peephole for threads. 1,573,551; Feb. 16.

Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Column-binder-control linkage. 1,573,552; Feb. 16.

Kline, Virgil C., Far Rockaway, N. Y. Draft mechanism. 1,573,320; Feb. 16.

Klinger, Rich., Ges. m. b. H. (See Klinger, Richard, assignor.)

Klinger, Richard, assignor to the Firm of Rich. Klinger Ges. m. b. H., Gumpoldskirchen, Austria. Water-level indicator. 1,573,719; Feb. 16.

Klipec, Joseph, Cleveland, Ohio. Fishhook. 1,573,553; Feb. 16.

Kobayashi, Tsurukichi, Los Angeles, Calif. Thermatologic electrode. 1,573,116; Feb. 16.

Kobe, Inc. (See Coberly, Clarence J., assignor.)

Koerner, Ewald, Dresden, Germany. Drying apparatus for tobacco and the like. 1,573,615; Feb. 16.

Koerner, Ewald, Dresden, Germany. Cigarette-making machine. 1,573,616; Feb. 16.

Köhler, Gerhard. (See Rüdenberg, R., Trettin, and Köhler.)

Kohler, Jacob F., New York, N. Y., assignor to Jonick Sirken Co., Inc. Ceiling plate for lighting fixtures. Des. 69,452; Feb. 16.

Kook, Otto. (See Kujawa, L., and Kook.)

Kostenko, Michael. (See Japolsky, N., and Kostenko.)

Krag, Harry W., assignor to American Shoe Machinery and Tool Company, St. Louis, Mo. Sewing machine. 1,573,617; Feb. 16.

Krantz, Hubert K., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Switch mechanism. 1,572,938; Feb. 16.

Kroeger, Edwin J., Akron, Ohio, assignor to The B. F Goodrich Company, New York, N. Y. Method and apparatus for making hollow articles. 1,573,497; Feb. 16.

Kronfoth, Frank R., Amsterdam, N. Y. Radioantenna. 1,573,171; Feb. 16.

Kujawa, Lorenz, and O. Kook, Madgeburg, Germany. Regulator for air or gas currents. 1,573,253; Feb. 16.

Laabs, Max A., assignor to American Optical Company, Southbridge, Mass. Lens-producing apparatus. 1,573,073; Feb. 16.

Labasse, Paul C., New Orleans, La. Caliper. 1,573,347; Feb. 16.

Lachaine, Joseph, Lowell, Mass. Multiple metal cabinet. 1,573,254; Feb. 16.

Laffey, William J., Chicago, Ill. Adjustable plural-deck truck. 1,573,172; Feb. 16.

Laganke, Charles F., Cleveland, assignor to The Outlook Company, Cleveland, Ohio. Windshield cleaner. 1,573,618; Feb. 16.

Lakeside Supply Company. (See Lunden, John A., assignor.)

Lamp'l, Rosi, Berlin, Germany. Polychromatic security print. 1,573,006; Feb. 16.

Lampson, Edward C., Jefferson, Ohio. Plunger cleaning device. 1,573,720; Feb. 16.

Landgraf, Jacob T., assignor to American Steel Products Co., Macomb, Ill. Brooder stove. 1,573,382; Feb. 16.

Landwehr, Herman W., Holland, Mich. Washing machine. 1,573,173; Feb. 16.

Lanners, Jacob L. (See Mendes, B. P., and Lanners.)

Larner, Chester W., Philadelphia, Pa., assignor to The William Cramp & Sons Ship & Engine Building Company. Valve. 1,573,074; Feb. 16.

Lasker, William W., Jr., Brooklyn, N. Y. Record-forming device. 1,573,174; Feb. 16.

La Societe pour la Fabrication de la Soie "Rhodiaseta." (See Prince, Edmond, assignor.)

Lawrence, George W., Winnipeg, Manitoba, Canada. Talking machine. 1,573,348; Feb. 16.

League, Thomas J., Chicago, Ill., assignor to Diversey Foundry Company. Lamp base. Des. 69,453; Feb. 16.

League, Thomas J., Chicago, Ill. Lamp base. Des. 69,454; Feb. 16.

League, Thomas J., Chicago, Ill. Spindle for lighting fixtures. Des. 69,455; Feb. 16.

League, Thomas J., Chicago, Ill. Lamp base. Des. 69,456; Feb. 16.

League, Thomas J., Chicago, Ill. Lamp base. Des. 69,457; Feb. 16.

Leber, George J. (See Smith, O. A., and Leber.)

Leckie, Herbert V. (See Dickerman, J. A., and Leckie.)

Ledesma, Merced, and A. Acosta, El Paso, Tex. Clean-out attachment for the retention pipe and retention valve of an air-brake system. 1,573,349; Feb. 16.

Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Motor vehicle. 1,573,117; Feb. 16.

Lee, Hoard, Shreveport, La. Internal-combustion motor. 1,573,255; Feb. 16.

Leeper, Wadsworth D., New York, N. Y., assignor to American Demulsifying Company, Muskogee, Okla. Continuous process of demulsifying mineral oils. 1,573,321; Feb. 16.

Lefever, Charles F., assignor to Daisy Manufacturing Company, Plymouth, Mich. Air gun. 1,573,383; Feb. 16.

Leffert, Charles B., assignor to United States Tent & Awning Company, Chicago, Ill. Tent construction. 1,572,939; Feb. 16.

Legg, Joseph W., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transmission dynamometer. 1,572,940; Feb. 16.

Lehmann, George, jr., San Jose, Calif. Valve-stem silencer. 1,573,075; Feb. 16.

Lemmer, Paul J., Danbury, Conn. Toilet-seat cover. 1,573,619; Feb. 16.

Lett, James E., jr. (See Nash, D. S., and Lett.)

Levoz, Toussaint, Heer, Belgium. Side-blast converter furnace. 1,572,892; Feb. 16.

Lewis, Edward D., Elmira, N. Y. Combined chimney, furnace, and ventilator. 1,573,406; Feb. 16.

Lewis, George S., Springfield, and E. B. Smith, Chicopee Falls, Mass. Gun. 1,573,405; Feb. 16.

Lewis, Royal S., Yakima, Wash. Snubbing device. 1,573,555; Feb. 16.

Lewis, Seneca G., Greensburg, and G. W. Daum, Jeannette, Pa., Shock absorber. 1,573,175; Feb. 16.

Liebing, William A., and E. H. Loughridge, Cleveland, Ohio. Registering meter. 1,573,176; Feb. 16.

Liebowitz, Irving. (See Stein, H., Austin, and Liebowitz.)

Lieske, Frank J., assignor of one-half to H. W. Gilberg, Detroit, Mich. Game. 1,573,384; Feb. 16.

Lighthipe, Kenneth D., East Orange, N. J., assignor to Elevator Supplies Company, Inc. Signal lens. Des. 69,458; Feb. 16.

Lindburg, Joseph, Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,573,407; Feb. 16.

Link-Belt Company. (See Rapp, Axel G. J., assignor.)

Lithoprintex Corporation. (See Jones, Harry C., assignor.)

Little, George M., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace. 1,572,893; Feb. 16.

Little, George M., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric furnace. 1,572,894; Feb. 16.

Little, Jesse, Lakewood, assignor to Davol Rubber Company, Providence, R. I. Nursing nipple. 1,573,519; Feb. 16.

Litz, Earl E. (See Jones, J. D., and Litz.)

Lloyd, Herman R., and J. E. Reynolds, Taft, Calif. Sucker-rod fishing tool. 1,573,408; Feb. 16.

Locomotive Firebox Company. (See Hawley, Charles G., assignor.)

Loeffler, Charles H., Brooklyn, N. Y. Collapsible bag. 1,573,721; Feb. 16.

Loffler, Charles L., Des Moines, Iowa. Detachable lug for tractors and the like. 1,572,895; Feb. 16.

Logan, Henry A., Cedar Grove, assignor of one-fourth to M. D. Logan, Shreveport, La. Monkey wrench. 1,573,722; Feb. 16.

Logan, Henry H., Chicago, Ill. Hoist-control unit. 1,573,256; Feb. 16.

Logan, Mack D. (See Logan, Henry A., assignor.)

Lombardi, Lamberto. (See Valentini, Umberto, assignor.)

Long, Beryl C. (See Hallar, F., and Long.)

Long, Logan L., et al. (See Allen, Arthur M., assignor.)

Long, Louis, Parsons, Kans. Key holder. 1,573,723; Feb. 16.

Longley, Roy W., and W. H. Gray, Monroe, Mich. Glue machine. 1,572,896; Feb. 16.

Loomis, George N., Ruth, Nev. Railway brake mechanism. 1,573,257; Feb. 16.

Loughridge, Edwin H. (See Liebing, W. A., and Loughridge.)

Louisville Drying Machinery Co. (See Credo, Julius, assignor.)

Love, Merrill D., Los Angeles, Calif. Aerial projectile toy. 1,573,076; Feb. 16.

Lovett, George A., assignor to General Motors Corporation, Detroit, Mich. Vehicle bumper. 1,573,642; Feb. 16.

Lowe, Cecil W. (See Lowe, Claude M., L. R., and C. W.)

Lowe, Claude M., L. R., and C. W., Kansas City, Mo. Floor construction. 1,573,724; Feb. 16.

Lowe, John C., Minot, N. Dak. Combined phonograph and telephone. 1,573,258; Feb. 16.

Lowe, Lincoln R. (See Lowe, Claude M., L. R., and C. W.)

Lowry, Morris V., Santa Maria, assignor to West End Chemical Company, Oakland, Calif. Producing borax and sodium bicarbonate from lake brines. 1,573,259; Feb. 16.

Lucas, Joseph C., Blandinsville, Ill. Protecting shield for bank and other windows. 1,573,770; Feb. 16.

Luke, Andrew, Zeigler, Ill. Adjustable window-shade and curtain bracket. 1,573,260; Feb. 16.

Lummis, Charles W., and G. H. Isley, assignors to Morgan Construction Company, Worcester, Mass. Gas producer. Re16,262; Feb. 16.

Lundberg, Carl E. (See Taylor, F. L., and Lundberg.)
Lunden, John A., assignor to Lakeside Supply Company, Chicago, Ill. Spring motor. 1,573,556; Feb. 16.
Lupton, Samuel J. (See Hill, W. J., Lupton, and Collinson.)
Lynch, Theodore L., and L. P. Nicholson, Oxnard, Calif. Tubing tongs and wrench. 1,573,409; Feb. 16.
MacDonald, John F., Hillsboro, New Brunswick, Canada. Tire-inflating device. 1,573,725; Feb. 16.
MacDougall, Harry W., East Orange, and A. S. Bertels, Tenafly, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Automatic testing system to test automatic switches. 1,573,412; Feb. 16.
MacDougall, Harry W., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic testing system to test automatic switches. 1,573,413; Feb. 16.
Macfarlane, James C. (See Austin, G., and Macfarlane.)
Macfarlane, William A. (See Austin G., and Macfarlane.)
MacInnes, Robert H., assignor to D. Moore Company, Limited, Hamilton, Ontario, Canada. Electric stove. 1,573,380; Feb. 16.
Mackenzie, Alexander S., assignor to Clayton Gin Compress Company, Houston, Tex. Temporary bale fastening. 1,573,557; Feb. 16.
MacKenzie, Fred L., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastening-inserting machine. 1,573,081; Feb. 16.
MacLean, Donald, North Vancouver, British Columbia, Canada. Trolley wheel. 1,573,008; Feb. 16.
MacLellan, Angus D., assignor to MacLellan Mixer Company, Owensboro, Ky. Percentage feeder. 1,573,350; Feb. 16.
MacLellan Mixer Company. (See MacLellan, Angus D., assignor.)
MacLeod, James. (See Reid, H., and MacLeod.)
Macomber, Lynn W., assignor, by mesne assignments, to United Steel & Wire Company, Battle Creek, Mich. Wire basket or receptacle. 1,573,558; Feb. 16.
Madden, Harry D., Newark, N. J., assignor to Westinghouse Lamp Company. Stencil. 1,573,082; Feb. 16.
Madden, Jeremiah, Kansas City, Mo. Lifting tongs. 1,573,263; Feb. 16.
Madoff, Barnett, Scranton, Pa. Sanitary protector. 1,573,726; Feb. 16.
Magranis, Warren C., Northampton, and F. G. Chase, Mittineague, Mass. Heating device for automobile windshields. 1,573,727; Feb. 16.
Mahoney, George H., assignor to Chicago Engineering Works, Inc., Chicago, Ill. Static eliminator. 1,573,414; Feb. 16.
Mahoney, Joseph N., Brooklyn, N. Y., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass. Electric switch. 1,573,179; Feb. 16.
Mallory, Frederick B., Portland, Oreg. Pulley block. 1,573,351; Feb. 16.
Mallory, Frederick B., Portland, Oreg. Pulley block. 1,573,352; Feb. 16.
Manley, Fred B., Paterson, N. J., assignor to Textiles Development Corporation, New York, N. Y. Fabric. 1,573,559; Feb. 16.
Mann, Milton H., San Francisco, Calif. Telephone-directory stand. 1,573,560; Feb. 16.
Mankameyer, Harry A., Kansas City, Mo. Self-closing case. 1,573,264; Feb. 16.
Manning, Bowman & Company. (See Farr, Edward A., assignor.)
Manning, John E., Beckley, W. Va. Loading apparatus. 1,573,728; Feb. 16.
Manning, Maxwell & Moore, Inc. (See Darling, Philip G., assignor.)
Manning, Maxwell & Moore, Inc. (See Williston, Belvin T., assignor.)
Manning, Sim, assignor of one-third to R. Willis, St. Louis, Mo. Lubricating apparatus. 1,573,561; Feb. 16.
Marbury, Ralph E., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Variable condenser. 1,572,897; Feb. 16.
Marden, John W., and C. C. Van Voorhis, East Orange, N. J., assignors to Westinghouse Lamp Company. Production of metals. 1,573,083; Feb. 16.
Marietta, Alphonso H. (See Field, Maletis F., assignor.)
Marquette Manufacturing Company. (See Nordgren, Algot W., assignor.)
Martin, Harry, New York, N. Y. Shoehorn. 1,573,729; Feb. 16.
Martin, Neil, Milton, Mass. Combined hammer and knife. 1,572,898; Feb. 16.
Marshall, William, assignor to Briggs Manufacturing Company, Detroit, Mich. Vehicle-top construction. 1,573,180; Feb. 16.
Marx, Louis, New York, N. Y. Sounding spinning top. 1,573,084; Feb. 16.
Mastrukoff, Michael S., New York, N. Y. Universal art camera. 1,572,899; Feb. 16.
Matchett, George H., Cleveland, Ohio. Coin-control mechanism. 1,573,181; Feb. 16.
Matha, Albert, Chicago, Ill. Baseball-game apparatus. 1,573,182; Feb. 16.
Maurer, Otto, Great Falls, Mont. Valve lifter. 1,573,773; Feb. 16.
Maxwell, George H., Phoenix, Ariz. Using or applying sticky, heat-sensitive shoe-bottom filler to shoe bottoms. 1,573,353; Feb. 16.
Mayr, Otto. (See Biermanns, J., and Mayr.)
Mays, Hubert, Okmulgee, Okla. Valve attachment. 1,573,730; Feb. 16.
McBride, Jesse E., assignor to Palmer-Bee Company, Detroit, Mich. Trolley conveyer. 1,572,941; Feb. 16.
McCabe, Frank E., Chagrin Falls, and M. L. Roshetko, assignor to The Grabler Manufacturing Company, Cleveland, Ohio. Test fitting. 1,573,410; Feb. 16.
McClatchie, Stanley, Cambridge, Mass. Vacuum cleaner. 1,573,771; Feb. 16.
McClatchie, Stanley, Stuttgart, Germany. Vacuum cleaner. 1,573,772; Feb. 16.
McClintock, Lewis G., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Transformer. 1,573,077; Feb. 16.
McComb, William, New York, N. Y., and W. A. Heyman, Habana, Cuba. Sterilization and clarification of liquids. 1,573,177; Feb. 16.
McCool, William A., Traverse City, Mich. Confection and making the same. 1,573,078; Feb. 16.
McCullough, William C., Fernwood, Ohio. Thrashing machine. 1,573,178; Feb. 16.
McDarment, Corley P., Mayfield, Ky. Sounding device. 1,573,261; Feb. 16.
McDevitt, James B., Chicago, Il. Humidifier. 1,573,262; Feb. 16.
McGough, Joseph E. (See Wicker, J., and McGough.)
McGregor, Robert R., Chicago, Ill. Radiator and lamp fender for automobiles. 1,572,942; Feb. 16.
McKee, Garnet W., Rockford, Ill. Apparatus for proportionately mixing air and gas. 1,573,079; Feb. 16.
McKinley, Charles W., assignor to The Willys-Overland Company, Toledo, Ohio. Tractor. 1,572,943; Feb. 16.
McKissick, William H., Tulsa, Okla. Means for draining well-tubing preparatory to pulling same. 1,573,411; Feb. 16.
McLaughlin, Celia B., administratrix. (See Dickerson, W. H., and McLaughlin.)
McLaughlin, Wharton B. (See Dickerson, W. H., and McLaughlin.)
McNab, John C., Rochester, N. Y. Valve. 1,573,520; Feb. 16.
McPhetridge, William R., Pittsburgh, Pa. Rail joint. 1,573,007; Feb. 16.
Measuregraph Company, The. (See Wheeler, John L., assignor.)
Mehlum, Casper, Waltham, Mass. Collapsible mandrel. 1,573,183; Feb. 16.
Melani, Alessandro, Spezia, Italy. Apparatus for recovering naphtha floating on the surface of water. 1,573,085; Feb. 16.
Meijer, Martinus A., The Hague, Netherlands, and R. vom Feld, Brunswick, Germany. Receptacle containing volatile or inflammable liquids such as benzine and other hydrocarbons. 1,573,731; Feb. 16.
Mellinger, Edward A., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Telephone-exchange automatic switching system. Re16,268; Feb. 16.
Menasha Printing and Carton Company. (See Beisel, Frank A., assignor.)
Mendes, Bram P., and J. L. Lanners, New York, N. Y. Toy golf game. 1,573,415; Feb. 16.
Mercedes Büro-Maschinen- und Waffen-Werke. (See Schulze, Max, assignor.)
Mersman, Joseph, Ottawa, Ohio. Means for intensifying reproduced tones. 1,573,265; Feb. 16.
Methlin, Nicholas E., assignor to Schneider & Cie., Paris, France. Hydraulic distant-control apparatus. 1,573,354; Feb. 16.
Metropolitan-Columbia Mfg. Co. (See Perry, Harry, assignor.)
Metz, Herman A. (See Dubin, Harry E., assignor.)
Metzger, Floyd J., assignor to California Cyanide Company, Inc., New York, N. Y. Making calcium cyanide and product thereof. 1,573,732; Feb. 16.
Miersma, Thomas, Muskegon, Mich. Curtain stretcher. 1,573,562; Feb. 16.
Milker, Herbert, assignor to American Schaeffer & Budenberg Corporation, Brooklyn, N. Y. Automatic-control system. 1,572,900; Feb. 16.
Miller, Clyde L., and J. F., Los Angeles, Calif. Tonneau windshield. 1,573,086; Feb. 16.
Miller, John F. (See Miller, Clyde L., and J. F.)
Miller, Robert E. L., Front Royal, Va. Dental clamp. 1,572,901; Feb. 16.
Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Minton, John P. (See Arnold, H. D., and Minton.)
Mitchell, Alfred W. (See Smith, Charles H., assignor.)
Monger, Clayton C., Camden, Ark. Turpentine substitute and process of manufacturing. 1,572,902; Feb. 16.
Moore, D., Company. (See MacInnes, Robert H., assignor.)
Moore, Edward Y., Cleveland, Ohio. Helicopter. 1,573,563; Feb. 16.
Moore, Frank W. (See Harty, W. A., and Moore.)
Moore, Harold N., Kearney, Nebr. Internal-combustion engine. 1,573,266; Feb. 16.

Moran, William C., Laurel Springs, N. J., assignor to Riehle Bros. Testing Machine Company, Philadelphia, Pa. Testing machine. 1,573,521; Feb. 16.
Moresi, Demag, et al. (See Morse, Irving H., assignor.)
Morgan Construction Company. (See Lummis, C. W., and Isley, assignors.)
Morgan, Hess P., Lisbon, Ohio. Mining machine. 1,573,564; Feb. 16.
Morgan & Wright. (See Hibner, John M., assignor.)
Morris, Ebenezer, Augusta, Ga. Brake device. 1,573,322; Feb. 16.
Morris, Howard A. (See Aldrich, J. P., and Morris.)
Morrissey, Patrick F., Auburn, N. Y. Holder for license and city name plates. 1,573,087; Feb. 16.
Morse, Irving H., New Orleans, assignor of one-fourth to E. R. Theriot, Ashton, and one-fourth to D. Moresi, Jeanerette, La. Clarifying saccharine liquors. 1,573,733; Feb. 16.
Mosler Lock Company, The. (See Benham, Edgar M., assignor.)
Motor Wheel Corporation. (See Forsyth, George H., assignor.)
Muentener, Christian, Wechawken Heights, N. J. Fabric frame for embroidering machines. 1,573,184; Feb. 16.
Müller, Otto, Esslingen-on-the-Neckar, Germany. Molding machine. 1,573,009; Feb. 16.
Mulligan, Paul C., assignor to himself, H. G. Swalwell, I. M. Foster, and L. J. Hull, Seattle, Wash. Briquetting. 1,573,565; Feb. 16.
Munson, Oliver P., Clinton, Ind., assignor, by mesne assignments, of one-half to O. Harrison, Cayuga, Ind. Demountable rim. 1,573,010; Feb. 16.
Nagel, Carl E. (See Small, F. F., and Nagel.)
Nash, David S., Corsicana, and J. E. Lett, jr., Dallas, Tex. Road log and map display device. 1,573,011; Feb. 16.
National Acme Company, The. (See Francher, C. J., and Johnson, assignors.)
National Acme Company. (See Smith, O. A., and Leber, assignors.)
National Carbon Company. (See Herman, A. F., and Ellson, assignors.)
National Casket Company. (See Griffith, Benjamin M., assignor.)
National India Rubber Company. (See Church, Frank E., assignor.)
Naylor, Isaac, San Francisco, Calif. Article of manufacture. 1,573,734; Feb. 16.
Nelson, George M., Monterey, Calif. Concrete reenforcement. 1,573,735; Feb. 16.
Nelson, Joseph E., & Sons. (See Tanner, Inos B., assignor.)
Neumann, Herman, New York, N. Y. Antiskid device. 1,573,736; Feb. 16.
Newman, Martin F., assignor to Wm. B. Scaife & Sons Company, Oakmont, Pa. Softening water. 1,572,944; Feb. 16.
Newport Company, The. (See Gubelmann, I., and Tinker, assignors.)
Ney, Jacob, Canton, Ohio. Animal trap. 1,573,185; Feb. 16.
Nichols, Clifford R., Dallas, Tex. Distributing and placement device for plastic material in centrifugal processes and process of using the same. 1,573,566; Feb. 16.
Nichols, Clifford R., Detroit, Mich. Centrifugal process of forming and finishing hollow bodies of plastic materials and apparatus therefor. 1,573,567; Feb. 16.
Nichols, Clifford R., Detroit, Mich. Impregnating cementitious products. 1,573,568; Feb. 16.
Nichols, Harold W., Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Highly-selective circuit. 1,573,323; Feb. 16.
Nicholson, Luther P. (See Lynch, T. L., and Nicholson.)
Nicol, John M., Mill Valley, Calif. Centrifugal separator. 1,573,498; Feb. 16.
Nicol, John M., Mill Valley, Calif. Centrifugal separation. 1,573,499; Feb. 16.
Nistle, Frank P., Intervilla, Pa. Feeding mechanism for continuous baking ovens. 1,573,416; Feb. 16.
Nixon, Jeddy D., Houston, assignor to H. F. Smith, Harris County, Tex. Tong. 1,573,267; Feb. 16.
Noftzger, Charles F., et al. (See Braley, Charles L., assignor.)
Nolen, Harry H., San Diego, Calif. Engine-compression brake apparatus. 1,573,417; Feb. 16.
Nordgren, Algot W., assignor to Marquette Manufacturing Company, St. Paul, Minn. Fastener for supporting arms for bumpers. 1,573,774; Feb. 16.
Norman, Wilfred G., New York, N. Y. Rope-end stopper. 1,573,737; Feb. 16.
Norman, William F., Nevada, Mo. Grave marker 1,573,268; Feb. 16.
Norris, Almon E., Brookline, Mass. Friction clutch. 1,573,324; Feb. 16.
Norton, John F., Boston, Mass. Rotary valve and carbon remover therefor. 1,573,325; Feb. 16.
Nowicki, Martin. (See Goldberg, E., and Nowicki.)
Nygaard, Oscar O., Boston, Mass., assignor to Combustion Engineering Corporation, New York, N. Y. Automatic-stoker dumping grate. 1,572,945; Feb. 16.
Nystrom, Oscar P., and M. De Lin, assignors to Holland Furnace Company, Holland, Mich. Portable conveyer. 1,573,186; Feb. 16.
O'Brien, William G., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Drying apparatus for sheet material. 1,573,775; Feb. 16.
Oechslin, Carl, assignor to Etablissements Poulenc Freres, Paris, France. Preparation of organic derivatives of tin. 1,573,738; Feb. 16.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,573,118; Feb. 16.
Oderberger Chemische Werke Aktiengesellschaft. (See Chwala, August, assignor.)
O'Donnell, Patrick S., London, England. Telephone-mouthpiece disinfector. 1,573,012; Feb. 16.
Ogg, William A., Newton, Mass. Smelting ores of volatile metals. 1,573,013; Feb. 16.
Ogg, William A., Newton, Mass. Smelting volatilizable metals. 1,573,014; Feb. 16.
Ogg, William A., Newton, Mass. Smelting volatilizable metals. 1,573,015; Feb. 16.
Olgay, Albert. (See Crandall, J. E., and Olgay.)
Ohme, Walter F., Minneapolis, and L. H. Felker, St. Paul, Minn. Bumper. 1,573,326; Feb. 16.
O'Keefe, George W., Dorchester, assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass. Thermal electric-circuit controller. 1,573,187; Feb. 16.
Olsen, John K., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Range-limiting device for searchlights. 1,573,418; Feb. 16.
Olsson, Zacharias, assignor, by mesne assignments, to Burgoyne Light & Signal Corporation, New York, N. Y. Lamp wick. 1,573,500; Feb. 16.
O'Neill, John H., Springfield, Mo. Telephonic device. 1,573,739; Feb. 16.
O'Rourke, John J., Harrisburg, Pa. Railway-switch mechanism. 1,573,355; Feb. 16.
Osgian, James M., Racine, Wis. Automobile signal. 1,573,501; Feb. 16.
Osnos, Mendel, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany. Transmitting arrangement for wireless signaling. 1,572,789; Feb. 16.
Oswego Falls Corporation. (See Wright, Wilbur L., assignor.)
Otis, John F. (See Knottingham, C. C. and W. S., and Otis.)
Out of The Inkwell Films, Inc. (See Fleischer, Max, assignor.)
Outlook Company, The. (See Laganke, Charles F., assignor.)
Owens, Charles C., and Ralph L. Hermann, Detroit, Mich., assignors to Westinghouse Electric & Manufacturing Company. Trolley pole. 1,572,946; Feb. 16.
Packard Motor Car Company. (See Hammerl, Jacob, assignor.)
Page, Herbert P., Boston, Mass.. Edible ice-cream container. Des. 69,459; Feb. 16.
Palmer-Bee Company. (See McBride, Jesse E., assignor.)
Palmer, Roy R. (See Wieser, Frank E., assignor.)
Pamblanco, Henry E., Stockton, Calif. Shoe-lace hook. 1,573,119; Feb. 16.
Pambrun, Leopold B., San Francisco, Calif. Applicator for therapeutic lamps. 1,573,419; Feb. 16.
Pantin, W & C., Messrs. (See Ingold, Ernest A., assignor.)
Papadopoulos, John C., now by judicial change of name known as J. Paulas, New York, N. Y. Telegraphone. 1,573,740; Feb. 16.
Paramount Rubber Consolidated, Inc. (See Roberts, F. T., assignor.)
Paramount Rubber Consolidated, Inc. (See Roberts, F. T. and W. E., assignors.)
Pardoe, John D., assignor of one-half to R. T. Cameron, Memphis, Tenn. Motor lock. 1,572,947; Feb. 16.
Parent, William E., Philadelphia, Pa., assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn. Lock. 1,573,741; Feb. 16.
Parker, George M., St. Louis, Mo. Boiler wall. 1,573,188; Feb. 16.
Parks, Dennis, St. Louis, Mo. Method of and machine for randing heel blanks. 1,573,189; Feb. 16.
Passé, Henry G. (See Hand, L. J., and Passé.)
Paulas, John. (See Papadopoulos, John C.)
Panius, Charles I., R. Kauch, and H. B. Inglis, Dayton, Ohio. Vertical finder for aircraft. 1,573,269; Feb. 16.
Pearson, Elihu C., Stillwater, Okla. Plant setter. 1,573,270; Feb. 16.
Pedroes, Rose A., Chicago, Ill. Vapor-bath cabinet. 1,573,016; Feb. 16.
Peller, Karl E., West Hartford, assignor to Hartford-Fairmont Company, Hartford, Conn. Feeding molten glass. 1,573,742; Feb. 16.
Peloquin, Edmond, assignor to American Optical Company, Southbridge, Mass. Goggles. 1,573,088; Feb. 16.
Penfold, Albert E., Birmingham, assignor to The Dunlop Rubber Company, Limited, Lnodn, England. Manufacture of golf balls. 1,573,271; Feb. 16.
Penley, Benjamin S., Philadelphia, Pa., assignor to Beech-Nut Packing Company, Canajoharie, N. Y. Sheet producing and stacking apparatus. 1,573,120; Feb. 16.
Penney, Albert E., et al. (See Taylor, William B., assignor.)
Perry, Harry, Brooklyn, N. Y., assignor to Metropolitan-Columbia Mfg. Co., Inc. Backplate for lighting fixtures. Des. 69,460; Feb. 16.

Perry, John M., et al. (See Primm, Joseph P., assignor.)
Perry, Leroy H. (See Bettis, W. I., and Perry.)
Person, Earl R., Leominster, Mass., assignor to The Viscoloid Company. Shaping sheet pyroxylin and the like. 1,573,358; Feb. 16.
Persson, Nils. (See Ruths, J., and Persson.)
Peters, Charles A., Downey, Calif., assignor to Peters Holding Company. Method and apparatus for molding reenforced-composition studding. 1,573,502; Feb. 16.
Peters Holding Company. (See Peters, Charles A., assignor.)
Peters, Oscar A. (See Brannington, Edwin O., assignor.)
Petersen, Armand, Omaha, Nebr. Display and storage counter. 1,573,569; Feb. 16.
Phillips, George E., Imola, Calif. Antiglare shield. 1,573,272; Feb. 16.
Phillips, Harry D., Bluefield, W. Va. Display container. 1,573,445; Feb. 16.
Phillips, Paul D., Elmhurst, assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Electric fixture. 1,573,420; Feb. 16.
Phoenix, Joseph, Adams, Mass. Swing. 1,573,357; Feb. 16.
Pieper, Alphonse F., Rochester, N. Y. Valve. 1,573,786; Feb. 16.
Pierce, Raymond T., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Graphic-meter-control mechanism. 1,572,948; Feb. 16.
Pierce, Raymond T., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Graphic-meter-control mechanism. 1,572,949; Feb. 16.
Pierce, Raymond T., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Graphic-meter-control mechanism. 1,572,950; Feb. 16.
Pierce, Raymond T., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Relay-tripping system. 1,572,951; Feb. 16.
Pike, Frank P., et al. (See Taylor, William B., assignor.)
Pilnacek, Michael. (See Simonek, Rudolph, assignor.)
Pistor, Gustav, Griesheim-on-the-Main, assignor to Chemische Fabrik Griesheim-Elektron, Frankfort-on-the-Main, Germany. Drying calcium-hypochlorite compounds. 1,572,952; Feb. 16.
Pittsburgh Transformer Company. (See McClintock, Lewis G., assignor.)
Platt, Cornelius B., and W. S. Brown, Carthage, Mo. Connecting springs for use in bed bottoms and other places. 1,573,570; Feb. 16.
Pletsch, Carl, Bad-Nauheim, Germany. Galvanizing apparatus. 1,572,953; Feb. 16.
Pleukharp, Claude W., assignor to Illinois-Pacific Glass Co., San Francisco, Calif. Glass-flowing device. 1,573,273; Feb. 16.
Podszus, Emil, Berlin-Friedrichshagan, Germany. Obtaining powders of great fineness. 1,573,017; Feb. 16.
Pohl, Ernst, Kiel, Germany. Table for X-ray transradiation. 1,573,571; Feb. 16.
Polte. (See Böttner, Arno, assignor.)
Popham, Arthur C., Kansas City, Mo. Restraining device. 1,573,446; Feb. 16.
Portis, James A., Dalsetta, assignor of one-fourth to A. L. Barrow, Liberty County, Tex. Radius rod. 1,573,782; Feb. 16.
Porter, Benjamin, Fullerton, N. Dak. Light deflector. 1,573,743; Feb. 16.
Potter, Justus, Richmond Hill, assignor of one-half to W. T. Stevenson, Woodside, Long Island, N. Y. Snow-removing apparatus. 1,573,121; Feb. 16.
Pratt, Arthur D., Short Hills, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Superheater and setting therefor. 1,572,954; Feb. 16.
Prescott, Thomas, Stockton, Calif. Potato-sorting device. 1,573,274; Feb. 16.
Press, Edith, et al. (See Gerow, George C., assignor.)
Press, William J., et al. (See Gerow, George C., assignor.)
Prest-O-Lite Company. (See Benner, Raymond C., assignor.)
Prewitt, John C., Santa Margarita, Calif. Road-map and registration-certificate holder. 1,573,447; Feb. 16.
Price, Jacob L., Chicago, Ill., assignor to Bendix Brake Company. Brake-operating connection. 1,573,275; Feb. 16.
Primm, Joseph P., assignor of one-third to H. R. Berry and one-third to J. M. Berry, Rome, Ga. Knitting machine. 1,573,018; Feb. 16.
Prince, Edmond, Lyon, assignor to La Societe pour la Fabrication de la Sole "Rhodiaseta," Paris, France. Process and apparatus for the manufacture of artificial thread. 1,572,955; Feb. 16.
Printing Machinery Company. (See Thiel, Emil E., assignor.)
Proch, Joseph F., Chicago, Ill. Bowling machine. 1,573,643; Feb. 16.
Proofing Laboratories, Inc. (See Blenio, Guido, assignor.)
Providence Collar Button Company. (See Byron, John F.)
Purnell, Enoch, et al. (See Purnell, Lemuel H., assignor.)
Purnell, Lemuel H., Oak Park, Ill., assignor of one-half to H. G. Goelitz and one-half to E. Purnell. Making pipe elbows. 1,573,448; Feb. 16.
Pyrene Manufacturing Company. (See Bedford, Howard E., assignor.)
Rachlin, Max, assignor to Apex Gutter Hanger Corporation, New York, N. Y. Gutter hanger. 1,573,449; Feb. 16.
Radio Pictures Corporation. (See Jenkins, Charles F., assignor.)
Rail Joint Company, The. (See Braine, Bancroft G., assignor.)
Railway Safety Brake Lock Corporation. (See Westbo, B. W., and Bisson, assignors.)
Ralzen, Charles S., Brooklyn, N. Y. Toy dish playing set. 1,573,190; Feb. 16.
Randall Control and Hydrometric Corporation. (See Kalte, Frederick E., assignor.)
Randolph, Charles P., Oak Park, assignor to Edison Electric Appliance Company, Incorporated, Chicago, Ill. Electric heater. 1,573,787; Feb. 16.
Rank, Herman J., St. Paul, Minn. Electrical toy. 1,573,122; Feb. 16.
Rapp, Axel G. J., assignor to Link-Belt Company, Chicago, Ill. Casting-handling machine. 1,573,421; Feb. 16.
Rappaport, Arthur G., assignor to Goodman Bros., New York, N. Y. Stocking. 1,572,956; Feb. 16.
Rawlings Manufacturing Company. (See Whitley, W. P., and Zuppke, assignors.)
Raymond Brothers Impact Pulverizer Co. (See Crites, Joe, assignor.)
Raymond Brothers Impact Pulverizer Company, The. (See Raymond, Fred I., assignor.)
Raymond Brothers Impact Pulverizer Company. (See Raymond, F. I., and Senseman, assignors.)
Raymond, Fred I., Evanston, Ill., and W. B. Senseman, Los Angeles, Calif., assignors to The Raymond Brothers Impact Pulverizer Company, Chicago, Ill. Pulverizing mill. 1,573,191; Feb. 16.
Raymond, Fred I., River Forest, assignor to The Raymond Brothers Impact Pulverizer Company, Chicago, Ill. Feed-controlling mechanism. 1,573,192; Feb. 16.
Raynor, John S., Philadelphia, Pa. Clip for fastening expanded-metal laths. 1,573,783; Feb. 16.
Rayson, Charles H. M., St. Kilda, near Melbourne, Victoria, Australia. Chilling apparatus. 1,573,450; Feb. 16.
Red Jacket Manufacturing Company. (See Stebbins, Timothy J., assignor.)
Reed, James H., Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Shoe-sewing machine. 1,572,957; Feb. 16.
Rees, Edwin A. (See Wilson, E. J., and Rees.)
Rees, Frank W., assignor to Superior Tool Company, Inc., Olympia, Wash. Wheel puller for motor vehicles. 1,573,572; Feb. 16.
Regars, Ridgeway, assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Ring-heating furnace. 1,573,522; Feb. 16.
Reid, Hugh, and J. MacLeod, Glasgow, Scotland. Turbine-driven locomotive. 1,572,958; Feb. 16.
Reifsnyder, James D., Brooklyn, assignor to Tulip Container Corporation, New York, N. Y. Tube-forming machine. 1,573,573; Feb. 16.
Reifsnyder, James D., Brooklyn, assignor to Tulip Container Corporation, New York, N. Y. Tube-forming machine. 1,573,574; Feb. 16.
Rein, Charles L., Baltimore, Md. Antiglare headlight front. 1,573,451; Feb. 16.
Reingold, Meyer. (See Reingold, Noah and M.)
Reingold, Noah and M., New York, N. Y. Suction device for unhairing machines. 1,573,575; Feb. 16.
Remington-Noiseless Typewriter Corporation. (See Going, George G., assignor.)
Repkow, George H., and J. T. Bundo, Waukegan, Ill. Automobile carburetor adjuster. 1,573,123; Feb. 16.
Ressegule, Alba A., Terril, Iowa. Planter depth gauge. 1,573,327; Feb. 16.
Reynolds, Jack E. (See Lloyd, H. R., and Reynolds.)
Rhines, Frank W., Lamont, Iowa. Leg band. 1,573,744; Feb. 16.
Ribbeck, William A. (See Ross, James H., jr., assignor.)
Rice, John, Burlington, N. J. Mold construction for centrifugal casting machines. 1,573,089; Feb. 16.
Rice, John V., jr., Bordentown, N. J., assignor to Rice Portable Rock Drill Corporation, Wilmington, Del. Gasoline rock drill. 1,573,790; Feb. 16.
Rice Portable Drill Corporation. (See Rice, John V., jr., assignor.)
Richard, Stephen, jr., Sturbridge, Mass. Thread-grinding machine. 1,573,523; Feb. 16.
Richards, Bernard, et al. (See Warren, William, assignor.)
Richards, Charles H., Aurora, Ill., assignor of one-half to Richsto Manufacturing Company. Window casing. 1,573,452; Feb. 16.
Richsto Manufacturing Company. (See Richards, Charles H., assignor.)
Rickenbacker, Louis H. (See Brannon, Emmitt E., assignor.)
Ricks, Fred, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Manufacture of shoes. 1,573,124; Feb. 16.
Riehle Bros. Testing Machine Company. (See Moran, William C., assignor.)

Riesenweber, Charles, St. Louis, Mo., assignor, by mesne assignments, to Universal Ironing Machine Company. Ironing machine. 1,573,193; Feb. 16.
Rifner, Frank D., Dayton, Ohio. Metal-working device. 1,573,503; Feb. 16.
Ritchie, Rush J., Kansas City, Mo., assignor of one-half to F. Spiekerman, Greenwich, Conn. Drier. 1,573,453; Feb. 16.
Robbins, Azor D., assignor to International Motor Company, New York, N. Y. Drive for motor vehicles. 1,572,903; Feb. 16.
Robbins, Hugh P., Chicago, Ill. Automatic loader. 1,573,125; Feb. 16.
Roberts, Fred T., Upper Montclair, and W. E. Roberts, assignors to Paramount Rubber Consolidated, Inc., Little Falls, N. J. Football and method of making the same. 1,573,576; Feb. 16.
Roberts, Fred T., Yonkers, assignor to Paramount Rubber Consolidated, Inc., Tuckahoe, N. Y. Method and apparatus for making flush-tank bulbs. 1,573,577; Feb. 16.
Roberts, Turney B., Memphis, Tex. Lister plow. 1,573,745; Feb. 16
Roberts, William E. (See Roberts, Fred T. and W. E.)
Robeson, Edna G., Atlanta, Ga., assignor to Atlanta Model Machine Company. Type bar. Re16,263; Feb. 16.
Robinson, Lulu H., Dallas, Tex. Multiple-rod support for window hangings. 1,573,644; Feb. 16.
Roe, Bradley, assignor to Roe Door and Window Company, Chicago, Ill. Door. 1,573,194; Feb. 16.
Roe Door and Window Company. (See Roe, Bradley, assignor.)
Rosthlisberger, Emil, New York, N. Y. Combination key. 1,573,791; Feb. 16.
Rogers, Newman L., Los Angeles, Calif. Amusement device. 1,573,645; Feb. 16.
Rollinson, Earl H., Lyon Farms, N. J. Diaphragm for telephone receivers. 1,573,276; Feb. 16.
Rose, James R., Edgeworth, Pa., assignor of one-half to J. Harris, Cleveland, Ohio. Gaseous fuel production. 1,573,524; Feb. 16.
Rosenbaum, Leo R., Campbellsport, Wis. Demountable wheel rim. 1,573,746; Feb. 16.
Rosenbluth, Edwin M., Willingford, Pa. Automobile accessory. 1,573,578; Feb. 16.
Rosenstein, Sidney, New York, N. Y. Renewable match book. 1,573,747; Feb. 16.
Rosenstein, Sidney, New York, N. Y. Place card. 1,573,748; Feb. 16.
Roshetko, Michael L. (See McCabe, F. E., and Roshetko.)
Ross, Clifton H., Junction City, Kans. Lid fastener for boxes. 1,573,579; Feb. 16.
Ross, James H., jr., assignor of one-half to W. A. Ribbeck, Chicago, Ill. Dental appliance. 1,573,749; Feb. 16.
Ross, Joseph P., Winona, Minn. Educational device. 1,573,358; Feb. 16.
Rouse, H. B., & Company. (See Knoll, William J., assignor.)
Rovere, R. Dalla. (See Steiner, Julius, assignor.)
Rowlett, Jerry, Mound City, Mo. Feed cooker and heater. 1,573,090; Feb. 16.
Rowlett, Jerry, Mound City, Mo. Marker for corn planters. 1,573,091; Feb. 16.
Rownick, Frank, Iron River, Mich. Illuminating lens. Des. 69,461; Feb. 16.
Rubber Service Laboratories Co., The. (See Hand, Carl N., assignor.)
Ruckstell, Glover E., Berkeley, Calif. Power-transmission device. 1,573,359; Feb. 16.
Rüdenberg, Reinhold, Berlin-Charlottenburg, C. Trettin, Berlin, and G. Köhler, Berlin-Wilmersdorf, assignors to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Rapid regulation of the voltage in conductor systems. 1,572,959; Feb. 16.
Russell, Irving H., assignor to Sloan Valve Company, Chicago, Ill. Valve. 1,573,092; Feb. 16.
Russell, John F., Santa Monica, Calif. Hotel code and information chart holder. 1,573,195; Feb. 16.
Russell, Robert, Manchester, and H. Broomfield, Stockport, England. Tennis and other playing balls. 1,573,093; Feb. 16.
Ruths, Johannes K., Djursholm, assignor to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Steam-power plant. 1,572,960; Feb. 16.
Ruths, Johannes, Djursholm, and N. Persson, Brevik, Lidingon, assignors to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Steam-accumulator apparatus for steam plants. 1,572,961; Feb. 16.
Ruths, Johannes K., Djursholm, and N. Persson, assignors to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Steam-accumulator plant. 1,572,962; Feb. 16.
Ruths, Johannes K., Djursholm, and N. Persson, assignors to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Steam-accumulator plant. 1,572,963; Feb. 16.
Rutter, Albert M., and C. R. Benson, Baltimore, Md. Bearing scraping and burnishing tool. 1,573,019; Feb. 16.
Ruttle, Harry E., Chicago, Ill. Canopy holder. 1,573,580; Feb. 16.
Rutz, Roy, Navarre, Kans. Tire tool. 1,573,581; Feb. 16.
Saal, Henry G., Chicago, Ill. Polarized electromagnet. 1,573,094; Feb. 16.
Sager, Charlie W., Superior, Ariz. Bracket for alarm clocks and watches. 1,573,277; Feb. 16.
Saklatwalla, Byramji D., and A. N. Anderson, Crafton, Pa., assignors, by mesne assignments, to Vanadium Corporation of America, New York, N. Y. Power control. 1,573,095; Feb. 16.
Sale, Burt, Portland, Oreg. Lock nut. 1,573,328; Feb. 16.
Salorio, William, Lancaster, Pa. Motion-picture machine. 1,573,422; Feb. 16.
Sanders, William W., Griffin, Ark. Shut-off discharge valve. 1,572,964; Feb. 16.
Sandoz, Henri, assignor to Tavannes Watch Co., S. A., Tavannes, Switzerland. Multicylinder pump. 1,573,525; Feb. 16.
Scaife, Wm B., & Sons Company. (See Newman, Martin F., assignor.)
Schaake, William, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Trolley-conductor device. 1,572,965; Feb. 16.
Schnake, William, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Conduit plow. 1,572,966; Feb. 16.
Schat, Ane P., Wassenaar, Netherlands. Apparatus for lowering lifeboats. 1,573,196; Feb. 16.
Schiefferle, Charles, Los Angeles, and J. Schiefferle, Inglewood, Calif. Fishing tool. 1,573,646; Feb. 16.
Schiefferle, Julius. (See Schiefferle, Charles and J.)
Schieren, George A., Great Neck, N. Y. Safety razor. Re16,264; Feb. 16.
Schlaich, Herman, Long Island City, N. Y. Retaining device for radiator caps. 1,573,096; Feb. 16.
Schlesinger, Anthony W., Beaumont, Tex. Poison-liquid container. 1,573,278; Feb. 16.
Schlosser, John B., Detroit, Mich. Boiler. 1,573,097; Feb. 16.
Schmid, William, Bronson, Mich. Carburetor. 1,572,967; Feb. 16.
Schmid, William, Bronson, Mich. Carburetor. 1,572,968; Feb. 16.
Schneider & Cie. (See Methlin, Nicholas E., assignor.)
Schofield, Walter. (See Geddes, William F., assignor.)
Schott, Otto, Stuttgart, assignor to W. Gruhler, Panoramastr. 31, Degerloch, Stuttgart, Germany. Faucet or tap for water pipes, etc. 1,573,526; Feb. 16.
Schreader, Arthur F., Flandreau, S. Dak. Combined hayrack and hograck. 1,573,750; Feb. 16.
Schuette, Robert W., Munhall Borough, Pa. Flexible coupling. 1,573,197; Feb. 16.
Schuh, Alfred E. (See Schuh, George A. and A. E.)
Schuh, George A. and A. E., Buffalo, N. Y. Combined license-plate holder, name plate, and signal light. Des. 69,463; Feb. 16.
Schultz, Klara P. A., and L. Wuest, Brooklyn, N. Y. Washing machine. 1,573,423; Feb. 16.
Schulze, Frederick A. (See Johnson, A. D., and Schulze.)
Schulze, Max, Thuringen, assignor to Mercedes Büro-Maschinen- und Waffen-Werke, Benshausen, Thuringa, Germany. Power-operated typewriter. 1,573,751; Feb. 16.
Schwartz, Arnold A., Chicago, Ill. Lamp bracket. Des. 69,464; Feb. 16.
Schwimmer, Oscar, Los Angeles, Calif. Thermostat control. 1,572,969; Feb. 16.
Scott, Lewis L., St. Louis, Mo. Refrigerating system. 1,573,198; Feb. 16.
Scranton, Henry O., Jeanerette, La. Truck. 1,573,329; Feb. 16.
Scruggs, Richard B., Willsburg, Ky. Tobacco harvester. 1,573,020; Feb. 16.
Sears, Claud A., assignor to Chero-Cola Company, Columbus, Ga. Bottle. Des. 69,462; Feb. 16.
Seligmann, Arthur, Bremen, Germany. Low-temperature cooling, liquefaction, and separation of not easily condensable gases. 1,573,752; Feb. 16.
Senseman, William B. (See Raymond, F. I., and Senseman.)
Sewell, Benjamin F. B., Chula, Va. Multiple-purpose quick-acting implement. 1,573,647; Feb. 16.
Sewell Cushion Wheel Company. (See Hammes, John H., assignor.)
Shand Engineering and Sales Company. (See Workman, Robert C., assignor.)
Sheely, Joseph H., St. Louis, Mo. Container. 1,573,648; Feb. 16.
Shell Company of California. (See Gignoux, J. R., and Swigart, assignors.)
Sherman, Jacob S., assignor to Universal Lamp Company, Chicago, Ill. Smoker's ash receiver. Des. 69,465; Feb. 16.
Shoenberger, Philip D., San Mateo, assignor to Western Pipe & Steel Company, San Francisco, Calif. Welding apparatus. 1,573,360; Feb. 16.
Shutz, John A., Richmond, Ind. Multiple spining machine. 1,573,454; Feb. 16.
Sibley, Edwin J., Woodhaven, N. Y. Friction adjuster for screened windows. 1,573,455; Feb. 16.
Sibley, Edwin J., Westbury, N. Y. Friction casement adjuster. 1,573,456; Feb. 16.
Siemens & Halske, Aktiengesellschaft. (See Gerdien, Hans, assignor.)

Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Rüdenberg, R., Trettin, and Köhler, assignors.)
Signer, Charles I., Olympia, Wash. Antiskid cable-end fastener. 1,573,650; Feb. 16.
Silveira, Isauro V., Fallon, Nev. Self-locking cover 1,573,279; Feb. 16.
Simmons, Oscar C., Dallas, Tex. Window-shade support. 1,573,361; Feb. 16.
Simonek, Rudolph, assignor of one-half to M. Pilnacek, New York, N. Y. Flying top. 1,573,527; Feb. 16.
Simpson, Bryant, Washington, D. C. Garment hanger. 1,573,649; Feb. 16.
Simpson, Fred E., Toronto, Ontario, Canada. Reenforced flooring construction. 1,573,280; Feb. 16.
Sinclair Refining Company. (See Bell, John E., assignor.)
Sinclair Refining Company. (See Isom, E. W., and Bell, assignors.)
Singer Manufacturing Company, The. (See Corrall, H., and Stevens, assignors.)
Slater, Fred M., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Valve for rock drills. 1,573,457; Feb. 16.
Sloan Valve Company. (See Russell, Irving H., assignor.)
Small, Fred F., and C. E. Nagel, Oakland, Calif. Multiple-speed planetary-gear transmission mechanism. 1,573,098; Feb. 16.
Smalley, Edwin L., Milwaukee, Wis., assignor to Electric Heating Apparatus Company, Newark, N. J. Electric furnace. Re16,269; Feb. 16.
Smith, Alfred H., Co. (See Vogler, John J., assignor.)
Smith, Arthur R., Schenectady, N. Y., assignor to General Electric Company. Power plant. 1,573,582; Feb. 16.
Smith, Charles H., Aurora, Ill., assignor of one-half to A. W. Mitchell, Janesville, Wis. Spring suspension for motor vehicles. 1,573,583; Feb. 16.
Smith, Clara D., Reading, Mass. Screen. 1,573,330; Feb. 16.
Smith, Earl B. (See Lewis, G. S., and Smith.)
Smith, Elda G. (See Bissell, C. H., and Smith.)
Smith, Ernest A., Barry, Iowa. Belt tool. 1,573,651; Feb. 16.
Smith, Fred. (See Steed, Charles, assignor.)
Smith, Howard F. (See Nixon, Jeddy D., assignor.)
Smith, Howard F., Houston, Tex. Pipe-rotating attachment for rotaries. 1,573,281; Feb. 16.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,572,904; Feb. 16.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,573,331; Feb. 16.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,573,424; Feb. 16.
Smith, Oberlin, Bridgeton, N. J. Automatic phonograph. 1,573,504; Feb. 16.
Smith, Oscar A., East Cleveland, and G. J. Leber, assignors to The National Acme Company, Cleveland, Ohio. Nut-tapping machine. 1,573,099; Feb. 16.
Smith, William A., Athens, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Cushion handle. 1,573,458; Feb. 16.
Smith, William J., assignor of one-half to W. R. Blair, Philadelphia, Pa. Oil-well pump. 1,573,584; Feb. 16.
Smythe, Francis and R., Akron, Iowa. Egg-handling machine. 1,573,332; Feb. 16.
Smythe, Ross. (See Smythe, Francis and R.)
Snyder, Earl S., Long Beach, Calif. Arch restorer. 1,573,652; Feb. 16.
Société Anonlyme de Commentry, Fourchambault & Decazeville. (See Girin, Pierre, assignor.)
Société Anonyme des Anciens Etablissements Hotchkiss et Compagnie. (See Sutter, Charles, assignor.)
Société Française des Produits Alimentaires Azotes. (See Kahn, Maurice, assignor.)
Sorensen, Marius M., Vallerod, assignor of one-half to E. F. H. Enna, Copenhagen, Denmark. Footwear. 1,573,528; Feb. 16.
Speeder Machinery Corporation. (See Baker, Walter, assignor.)
Spencer, Louis M. (See Blackmore, L., and Spencer.)
Sperry Gyroscope Company. (See Bates, Mortimer F., assignor.)
Sperry, Lawrence B., deceased, Farmingdale; The Bank of America, New York, and W. A. Sperry, Hempstead, N. Y., executors. Means for guiding aeroplanes on the ground. 1,573,100; Feb. 16.
Sperry, Winifred A., et al., executors. (See Sperry, Lawrence B.)
Spicer, Clarence W. (See Tarbox, G. L., and Spicer.)
Spickerman, Frank. (See Ritchie, Rush J., assignor.)
Springfield, Carl K. (See Cassell, W. C., and Springfield.)
Square D Company. (See Horton, Bryson D., assignor.)
Stabler, Robinson R., Baltimore, Md. Automobile lock. 1,573,459; Feb. 16.
Stalker, Frederick W., assignor to Taylor Instrument Companies, Rochester, N. Y. Fluid-pressure diaphragm. 1,572,970; Feb. 16.
Standard Development Company. (See Howard, F. A., and Tomkins, assignors.)
Standard Oil Company. (See Gates, Leroy G., assignor.)
Standlee, Harvey R., Tulsa, Okla. Swivel swab. 1,573,585; Feb. 16.
Starck, William F., San Francisco, Calif. Shoe rack. 1,573,460; Feb. 16.
Stebbins, Timothy J., assignor to Red Jacket Manufacturing Company, Davenport, Iowa. Water conductor. 1,573,199; Feb. 16.
Steckol, Harry, Houston, Tex. Sign suspension. 1,573,101; Feb. 16.
Steed, Charles, assignor of one-half to F. Smith, Los Angeles, Calif. Making artificial stone. 1,573,425; Feb. 16.
Stein Fur Dyeing Co., Inc. (See Stein, H., Austin, and Liebowitz, assignors.)
Stein, Hyman, Arverne, W. E. Austin, New York, and I. Liebowitz, Brooklyn, assignors to Stein Fur Dyeing Co., Inc., New York, N. Y. Bleaching and dyeing furs and the like. 1,573,200; Feb. 16.
Steiner, Julius, West New York, assignor of one-half to R. Dalla Rovere, Woodcliff, N. J. Producing bags or the like. 1,573,201; Feb. 16.
Stenwick, Albert O., Red Wing, Minn. Sewer trap and pipe cleaning device. 1,573,202; Feb. 16.
Stewart, John H., Rutherford, N. J. Self-locking door bolt. 1,573,653; Feb. 16.
Stewart, Otho V., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Impregnating wood. 1,572,905; Feb. 16.
Stewart-Warner Speedometer Corporation. (See Olsen, John K., assignor.)
Stevens, Arthur, Buffalo, N. Y. Separating butyl alcohol and water. Re16,267; Feb. 16.
Stevens, Bertram A. (See Corrall, H., and Stevens.)
Stevens, L. H. (See Fritts, Francis M., assignor.)
Stevenson, William T. (See Potter, Justus, assignor.)
Stimpson, Wallace I., and H. A. Davis, assignors to Draper Corporation, Hopedale, Mass. Automatically filling replenishing shuttle for looms. 1,573,753; Feb. 16.
Stock, Augusta M. and R., Cleveland, Ohio. Interlocking nut and bolt. 1,573,426; Feb. 16.
Stock, Robert. (See Stock, Augusta M. and R.)
Stockstrom, Arthur, assignor to The American Stove Company, St. Louis, Mo. Hydrocarbon burner. 1,573,654; Feb. 16.
Stoller, Hugh M., Mountain Lakes, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Dynamoelectric machine. 1,573,333; Feb. 16.
Stone, Elmer D., Framingham, Mass. Last. 1,573,461; Feb. 16.
Stone, Jacob M., Breckenridge, Tex. Steering gear. 1,573,586; Feb. 16.
Stone, John S., San Diego, Calif., assignor to American Telephone and Telegraph Company. Thermionic modulator. 1,573,282; Feb. 16.
Stone, Melvin L., Lawrence, assignor to Draper Corporation, Hopedale, Mass. Shuttle feeler mechanism for looms. 1,573,505; Feb. 16.
Storm, James A. (See Fisher, A. E., and Storm.)
Stout, Harry H., Douglas, Ariz. Utilization of waste heat of furnace gases. 1,573,427; Feb. 16.
Stovall, Columbus D., Lexington, Ky. Child's toy and exerciser. 1,573,362; Feb. 16.
Strawn, Orval R., Columbus, Ohio. Traffic signal. 1,573,363; Feb. 16.
Strohacker, Louis, assignor to Structo Manufacturing Company, Freeport, Ill. Grab-bucket-crane toy. 1,573,203; Feb. 16.
Strongson, Herman L., Brooklyn, assignor of one-half to B. D. Colen, New York, N. Y. Electric-light-globe socket. 1,572,906; Feb. 16.
Structo Manufacturing Company. (See Strohacker, Louis, assignor.)
Superheater Company, The. (See Hard, Malcolm, assignor.)
Superior Tool Company. (See Rees, Frank W., assignor.)
Sutter, Charles, Suresnes, assignor to Societe Anonyme des Anciens Etablissements Hotchkiss et Compagnie, St. Denis, France. Firing regulator for automatic firearms. 1,573,655; Feb. 16.
Sutter, Robert L., Falls City, Nebr. Mud-chain-applying mechanism. 1,573,283; Feb. 16.
Swaim, Charles S., Long Beach, Calif. Relief valve for deep wells. 1,573,021; Feb. 16.
Swalwell, Herbert G., et al. (See Mulligan, Paul C., assignor.)
Swigart, Theodore E. (See Gignoux, J. R., and Swigart.)
Syers, Paul R., Indianapolis, Ind. Laundry truck. 1,572,971; Feb. 16.
Symington Company, The. (See Barrows, Donald S., assignor.)
Symington Company, The. (See Kadel, Byers W., assignor.)
Tabb, Warner T., assignor to Duplex Engine Governor Company, Inc., Brooklyn, N. Y. Speed regulator. 1,572,972; Feb. 16.
Tait, Charles, Vancouver, British Columbia, Canada. Hat hanger. 1,572,973; Feb. 16.
Tangerman, William J., Hammond, Ind. Plate-fabricating machine. 1,573,102; Feb. 16.
Tanner, Daniel R., La Grande, Oreg. Arresting a sawmill carriage. 1,573,428; Feb. 16.
Tanner, Inos B., assignor to Joseph E. Nelson & Sons, Chicago, Ill. Liquid-treating apparatus. 1,573,204; Feb. 16.

Tarbox, Gurdon L., North Plainfield, and C. W. Spicer, Plainfield, N. J. Universal joint. 1,573,587; Feb. 16.
Tate, John C., Oakland, Calif. Composition for absorbing and purifying the waste products of combustion. 1,573,284; Feb. 16.
Tavannes Watch Co., S. A. (See Sandoz, Henri, assignor.)
Taylor, Frederick L., and C. E. Lundberg, Spokane, Wash. Writing machine. 1,573,205; Feb. 16.
Taylor Instrument Companies. (See Stalker, Frederick W., assignor.)
Taylor, William B., Carbonear, Newfoundland, assignor of one-fourth to F. P. Pike and one-fourth to A. E. Penney. Twisting device. 1,572,907; Feb. 16.
Terhune, Royal E., Clifton, N. J. Air filter. 1,573,656; Feb. 16.
Terry, Donald M., New York, N. Y., assignor, by mesne assignments, to Western Electric Company, Incorporated. Picture-transmission system. 1,573,529; Feb. 16.
Texas Carbon Industries, Inc. (See Cassell, W. C., and Springfield, assignors.)
Textiles Development Corporation. (See Manley, Fred B., assignor.)
Thatcher, Charles A., Portland, Oreg. Battery cover. 1,573,462; Feb. 16.
Theriot, Ernest R., et al. (See Morse, Irving H., assignor.)
Thiel, Emil E., assignor to The Printing Machinery Company, Cincinnati, Ohio. Printing-plate holder. 1,573,429; Feb. 16.
Thiel, Emil E., assignor to The Printing Machinery Company, Cincinnati, Ohio. Printing-plate holder. 1,573,430; Feb. 16.
Thiel, Emil E., assignor to The Printing Machinery Company, Cincinnati, Ohio. Printing-plate holder. 1,573,431; Feb. 16.
Thirlby, Thomas F. (See Iles, Charles E., assignors.)
Thomas, Antony, assignor of one-half to S. Gorgolis, Philadelphia, Pa. Atomizer. 1,573,334; Feb. 16.
Thomas, Ivor D. (See Douglas, P. H., and Thomas.)
Thomas, Jesse M., Pine Lawn, assignor of one-third to W. D. Gruelle, St. Louis, Mo. Piston and piston ring. 1,573,285; Feb. 16.
Thomas, Oscar A., Oxnard, Calif. Beet puller. 1,573,657; Feb. 16.
Thompson, Emery, New Rochelle, N. Y. Mixing and ejecting mechanism. 1,573,658; Feb. 16.
Thompson, Henry G., Cleveland, Ohio. Pressed-metal hook and making the same. 1,573,206; Feb. 16.
Thompson, Henry L., Philadelphia, Pa. Engine-hood-vent cover. 1,573,659; Feb. 16.
Thompson, Thomas E., Chicago, Ill. Automobile signaling device. 1,573,660; Feb. 16.
Thurber, Edward J., assignor to Thurber, Perkins and Cook, Incorporated, New Orleans, La. Fastening means for curtains. 1,573,776; Feb. 16.
Thurber, Perkins and Cook, Incorporated. (See Thurber, Edward J., assignor.)
Thurston, Ernest B., assignor to The Haughton Elevator & Machine Co., Toledo, Ohio. Elevator motor controller. 1,573,207; Feb. 16.
Tinker, John M. (See Gubelmann, L., and Tinker.)
Tinkham, Eugene L., assignor to Draper Corporation, Hopedale, Mass. Center brace for drag rolls of looms. 1,573,777; Feb. 16.
Tippett, Charles C., Luckey, Ohio. Pit bucket. 1,573,463; Feb. 16.
Todd, Victor H., Summit, N. J., assignor to Westinghouse Electric & Manufacturing Company. Graphic meter. 1,572,908; Feb. 16.
Tomkins, Douglass G. (See Howard, F. A., and Tomkins.)
Tomlinson, Frederick, Salford, England. Coupling for metal tubes. 1,573,103; Feb. 16.
Toothaker, Fred E., Swampscott, Mass., assignor to United States Shoe Machinery Corporation, Paterson, N. J. Shoemaking. 1,573,104; Feb. 16.
Topping, Henry, Ashley, Ill. Screw-driver attachment. 1,573,464; Feb. 16.
Torda, Lajos, Budapest, Hungary. Arrangement for the compensating windings of commutator motors with salient poles. 1,573,335; Feb. 16.
Trettin, Carl. (See Rüdenberg, R., Trettin, and Köhler.)
Trischler, Harry, assignor to The Crooksville China Company, Crooksville, Ohio. Plate or similar article. Des. 69,466; Feb. 16.
Trischler, Harry, assignor to The Crooksville China Company, Crooksville, Ohio. Teapot or similar article. Des. 69,467; Feb. 16.
Trojan Powder Company. (See Bronstein, Jesse B., assignor.)
Trumbull, George R., Bantam, Conn. Renewable fuse. 1,573,432; Feb. 16.
Tulip Container Corporation. (See Reifsnyder, James D., assignor.)
Tuner, Axel J., Gottenborg, Sweden. Music leaf turner. 1,572,974; Feb. 16.
Turner, Albert. (See Heald, J. N., Turner, and Kimmel.)
Turner, James T., Atlanta, Ga. Machine for making ice-cream cones. 1,573,588; Feb. 16.
Tuthill, Roy E., Bridgeport, Conn. Wax-form compressor for indirect inlay system. 1,573,433; Feb. 16.
Underwood Typewriter Company. (See Lindburg, Joseph, assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Union Carbide and Carbon Research Laboratories, Inc. (See Fuller, Henry C., assignor.)
Union Hardware Company. (See Hoerle, William F., assignor.)
Union Metal Porducts Company. (See Gilpin, Garth G., assignor.)
Union Tool Company. (See Zerbe, Lewis E., assignor.)
United Shoe Machinery Corporation. (See Durrance, Thomas, assignor.)
United Shoe Machinery Corporation. (See MacKenzie, Fred L., assignor.)
United Shoe Machinery Corporation. (See Reed, James H., assignor.)
United Shoe Machinery Corporation. (See Ricks, Fred, assignor.)
United Shoe Machinery Corporation. (See Toothaker, Fred E., assignor.)
United States Cast Iron Pipe & Foundry Company. (See Regars, Ridgeway, assignor.)
United States of America. (See Bateman, Ernest, assignor.)
United States Tent & Awning Company. (See Leffert, Charles B., assignor.)
United Steel & Wire Company. (See Macomber, Lynn W., assignor.)
Universal Ironing Machine Company. (See Riesenweber, Charles, assignor.)
Universal Lamp Company. (See Sherman, Jacob S., assignor.)
Valentini, Umberto, Rome, Italy, assignor to L. Lombardi. Building heating device. 1,573,364; Feb. 16.
Van Anden, Frank, Miami, Fla. Block-molding device. 1,573,336; Feb. 16.
Vanadium Corporation of America. (See Saklatwalla, B. D., and Anderson, assignors.)
Vanderveld, Anthony, Grand Rapids, Mich. Return-speed check for measuring machines. 1,573,589; Feb. 16.
Van Dorn Iron Works Company, The. (See Barker, Percy E., assignor.)
Van Meter, James W., San Rafael, Calif. Heating metal, glass, or other material to render the same workable. 1,572,975; Feb. 16.
Van Meter, James W., San Rafael, Calif. Tempering metals and other materials. 1,573,784; Feb. 16.
Van Voorhis, Cletus C. (See Marden, J. W., and Clinton.)
Van Voorhis, Cletus C. (See Marden, J. W., and Van Voorhis.)
Van Voorhis, Cletus C., Wilkinsburg, Pa., assignor to Westinghouse Lamp Company. X-ray tubes. 1,573,105; Feb. 16
Variety Fire Door Company. (See Gervais, W. B., and Wilmot, assignors.)
Varely, Thomas W., New York, N. Y. Electric pyrometer. Re16,270; Feb. 16.
Vennes, Harald J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical bridge. 1,573,337; Feb. 16.
Viscoloid Company, The. (See Person, Earl R., assignor.)
Viscose Company, The. (See Griffin, Frank H., assignor.)
Vogler, John J., Douglaston, assignor to Alfred H. Smith Co., Inc., New York, N. Y. Perfume bottle. Des. 69,468; Feb. 16.
Vom Feld, Richard. (See Meijer, M. A., and Vom Feld.)
Von Holmingen-Huene, Franz F., Schloss Thorn, near Taizern, Germany. Construction of sailing craft. 1,572,976; Feb. 16.
Von Nostitz, Erich, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Telephone system. 1,572,977; Feb. 16.
Von Porten, Udo, St. Louis, Mo. Artificial fuel. 1,572,909; Feb. 16.
Von Waldy, Julius, New York, N. Y. Aeroplane hull. 1,573,465; Feb. 16.
Vortex Mfg. Co. (See Barbieri, Cesare, assignor.)
Walbridge, Burnise A., and C. E., Iblen, Minn. Pet-cock-operating device for automobiles. 1,573,661; Feb. 16.
Walbridge, Charles E. (See Walbridge, Burnise A. and C. E.)
Wald, David, Brooklyn, N. Y. Telephone receiver. 1,573,754; Feb. 16.
Wall, Edward J., Wallaston, and D. F. Comstock, assignors to Kalmus, Comstock & Wescott, Boston, Mass. Dye composition. 1,573,595; Feb. 16.
Wall, Edward J., Wollaston, and D. F. Comstock, assignors to Kalmus, Comstock & Wescott, Boston, Mass. Treating photographic emulsion and color-sensitizing composition. 1,573,596; Feb. 16.
Wallace & Warner. (See Warner, Fred G., assignor.)
Wallace, James G., assignor of one-half to A. R. Keckler, Baltimore, Md. Water-tight container. 1,573,590; Feb. 16.
Ward, May E. P., Tulsa, Okla. Storage case. 1,573,466; Feb. 16.
Warga, Robert V., St. Louis, Mo. Window lock. 1,573,662; Feb. 16.
Warner, Clarence, assignor to Delco-Light Company, Dayton, Ohio. Pumping apparatus. 1,573,106; Feb. 16.
Warner, Fred G., Narberth, Pa., assignor to Wallace & Warner, Philadelphia, Pa. Signboard. Des. 69,469; Feb. 16.
Warren, John J., Brownville, N. Y. Method and apparatus for making color-blended wall paper. 1,573,208; Feb. 16.

Warren, William, assignor of one-half to B. Richards, one-fourth to W. Warren, and one-fourth to C. Cohen, Newport, R. I. Pocket license container or holder. 1,573,663; Feb. 16.
Warren, William, et al. (See Warren, William, assignor.)
Warth, Christian C., Spokane, Wash. Collapsible-tube closure. 1,573,338; Feb. 16.
Watson, Harry W., Memphis, Tenn. Tool-operating attachment for planers or shapers. 1,572,978; Feb. 16.
Watts, Edward J., assignor to The Foxboro Company, Foxboro, Mass. Pen for recording gauges. 1,573,339; Feb. 16.
Weaver, William A., Philadelphia, Pa. Bed bottom for hospital bedsteads. 1,573,530; Feb. 16.
Webster, Arvin C., Detroit, Mich. Screw-threaded attaching device. 1,573,531; Feb. 16.
Wehr, Rudolph, Los Angeles, Calif. Rotary valve. 1,573,022; Feb. 16.
Weitman, Samuel A., Kahlotus, Wash. Grain-treating machine. 1,573,340; Feb. 16.
Wellman, Frank E., assignor to The Kansas City Gasoline Company, Kansas City, Kans. Heating fluids. 1,573,591; Feb. 16.
Wellman-Seaver-Morgan Company. (See Douglas, P. H., and Thomas, assignors.)
West End Chemical Company. (See Lowry, Morris V., assignor.)
Westbo, Bernhard W. and P. N. Bisson, South Prairie, assignors to Railway Safety Brake Lock Corporation, Tacoma, Wash. Air-brake lock. 1,573,597; Feb. 16.
Western Electric Company. (See Adams, Arthur H., assignor.)
Western Electric Company. (See Arnold, H. D., and Minton, assignors.)
Western Electric Company. (See Colpitts, Edwin H., assignor.)
Western Electric Company. (See Dowey, Thomas L., assignor.)
Western Electric Company. (See Green, Charles W., assignor.)
Western Electric Company. (See Griffin, James T., assignor.)
Western Electric Company. (See Houskeeper, William G., assignor.)
Western Electric Company. (See Johnson, E. D., and Green, assignors.)
Western Electric Company. (See MacDougall, H. W., and Bertels, assignors.)
Western Electric Company. (See MacDougall, Harry W., assignor.)
Western Electric Company. (See Nichols, Harold W., assignor.)
Western Electric Company. (See Stoller, Hugh M., assignor.)
Western Electric Company. (See Terry, Donald M., assignor.)
Western Electric Company. (See Vennes, Harald, J., assignor.)
Western Industries Company. (See Crowell, Russell B., assignor.)
Western Pipe & Steel Company. (See Shoenberger, Philip D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Aalborg, Christian, assignor.)
Westinghouse Electric & Manufacturing Company. (See Alben, Frank L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Allcutt, Chester T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Batsel, Max C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Baxter, Harold G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Blackwell, William T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Brace, Porter H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Breisch, Edgar W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Colby, Ora A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Garceion, George H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hellmund, Rudolf E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Himes, Walter H., assignor.)
Westinghouse Electric and Manufacturing Company. (See Kasley, Alexander T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kemp, Robert, assignor.)
Westinghouse Electric & Manufacturing Company. (See Kempton, Williard H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Krantz, Hubert K., assignor.)
Westinghouse Electric & Manufacturing Company. (See Legg, Joseph W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Little, George M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Marbury, Ralph E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Owens, C. C., and Hermann, assignors.)
Westinghouse Electric & Manufacturing Company. (See Pierce, Raymond T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schaake, William, assignor.)
Westinghouse Electric & Manufacturing Company. (See Stewart, Otho V., assignor.)
Westinghouse Electric & Manufacturing Company. (See Todd, Victor H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wilson, Arthur L., assignor.)
Westinghouse Lamp Company. (See Marden, J. W., and Van Voorhis, assignors.)
Westinghouse Lamp Company. (See Madden, Harry D., assignor.)
Westinghouse Lamp Company. (See Van Voorhis, Cletus C., assignor.)
Wetherill, Richard W., Philadelphia, Pa. Storage and reclaiming system. 1,573,664; Feb. 16.
Wheeler, John L., assignor to The Measuregraph Company, St. Louis, Mo. Governor for measuring and cost-computing machines. 1,573,200; Feb. 16.
Whidden, Austin C., Los Angeles, Calif. Variable fluid-controlling device. 1,573,210; Feb. 16.
White, D'Orsay M., Detroit, Mich. Manifold construction. 1,573,211; Feb. 16.
Whiting Corporation. (See Benton, Horner W., assignor.)
Whitley, William P., St. Louis, Mo., and R. C. Zuppke, Champaign, Ill., assignors to Rawlings Manufacturing Company, St. Louis, Mo. Football trousers. 1,573,212; Feb. 16.
Whitney, Karl H., Kirksville, Mo. Supporting bracket for window hangings. 1,573,286; Feb. 16.
Whybrew, Ernst A., Collingwood, Ontario, Canada. Coupling. 1,572,979; Feb. 16.
Whyte, Frederic M., Tarrytown, N. Y. Coupler lock-releasing device. 1,573,434; Feb. 16.
Wicker, John, and J. E. McGough, Sprague, Wash. Weed gatherer for plows. 1,573,592; Feb. 16.
Wiehle, Edward W., assignor to Birtman Electric Company, Chicago, Ill. Handle for vacuum cleaners and the like. 1,573,467; Feb. 16.
Wiese, Otto C., assignor to S. Fromm, Brooklyn, N. Y. Cloth. 1,573,788; Feb. 16.
Wieser, Frank E., assignor of one-half to R. R. Palmer, San Luis Obispo, Calif. Composition for treating brake linings. 1,573,468; Feb. 16.
Wigginton, George P., assignor to Kalamazoo Loose Leaf Binder Co., Kalamazoo, Mich. Desk. 1,573,665; Feb. 16.
Wilcox, Lewis T. (See Homan, William C., assignor.)
Wilkins, Albert A., Middleton, Mass. Electric bulb. 1,573,593; Feb. 16.
Wilkins, Charles H. L., Crows Nest, near Sydney, New South Wales, Australia. Can-side-seams-soldering machine. 1,573,107; Feb. 16.
Williams, J. B., Company, The. (See Hurst, George S., assignor.)
Williams, John M., jr., and R. F. Fischer, Dayton, Ohio. Distant-operated valve. 1,573,287; Feb. 16.
Williamsburg Wood Heel Company. (See Hauck, Andrew C., assignor.)
Willis, Richard. (See Manning, Sim, assignor.)
Williston, Belvin T., Somerville, Mass., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y. Stop valve. 1,573,108; Feb. 16.
Willys-Overland Company, The. (See McKinley, Charles W., assignor.)
Wilmot, John C. (See Gervais, W. R., and Wilmot.)
Wilson, Albert W., San Francisco, Calif. Trolling gear. 1,573,288; Feb. 16.
Wilson, Arthur L., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermionic device. 1,572,910; Feb. 16.
Wilson, Ezekiel J., East Greenbush, and E. A. Rees, Albany, assignors to F. C. Huyck & Sons, Rensselaer, N. Y. Regulating the operation of paper-making machines. 1,573,469; Feb. 16.
Wilson, Frederick D., and L. S. Burns, Harvey, Ill., assignors, by mesne assignments, to Wilson Tractor Manufacturing Company, Ottumwa, Iowa. Transmission device. Re16,286; Feb. 16.
Wilson, George W., Reading, assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Door-closing mechanism for dry-cleaning washing machines. 1,573,666; Feb. 16.
Wilson, Otto E., Peru, Ind. Wheel. 1,573,667; Feb. 16.
Wilson Tractor Manufacturing Company. (See Wilson, F. D., and Burns, assignors.)
Wilson, Wylie G., Jersey City, N. J. Boiler blow-off apparatus. 1,572,911; Feb. 16.
Window Glass Machine Company. (See Bishop, Frederic L., assignor.)
Winkenbach, Konrad, Newark, N. J. Graining tool. 1,573,594; Feb. 16.
Withers, W. A., Shoe Company. (See Withers, William A., assignor.)
Withers, William A., assignor to W. A. Withers Shoe Company, Elizabethtown, Pa. Manufacturing shoes. 1,573,289; Feb. 16.
Wolf, George S., West Dover, Ohio. Combined crank-case drain valve and oil gauge. 1,573,213; Feb. 16.
Wood, Harley C., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Truck. 1,573,365; Feb. 16.

Wood, Moses L., Washington, D. C. Percolator coffeepot. 1,573,668; Feb. 16.
Woodman, R., Mfg. & Supply Co. (See Costa, Anthony L., assignor.)
Workman, Robert C., Camden, assignor of one-half to Shand Engineering and Sales Company, Columbia, S. C. Tongue-supporting gear for draft animals. 1,573,755; Feb. 16.
Worrick, Walter. (See Fields, C. M., and Worrick.)
Wright, Wilbur L., assignor to Oswego Falls Corporation, Fulton, N. Y. Paper container. 1,573,598; Feb. 16.
Wright, William L., Kansas City, Mo., assignor of one-half to W. W. Eakman, Missouri Valley, Iowa. Window screen. 1,573,756; Feb. 16.
Wrighton, William J., assignor to American Optical Company, Southbridge, Mass. Producing ophthalmic mountings. 1,573,023; Feb. 16.
Wuest, Louis. (See Schultz, K. P. A., and Wuest.)
Wyckoff, Andrew D., Oak Park, Ill. Lubricating waste. 1,573,214; Feb. 16.
Yale & Towne Manufacturing Company, The. (See Parent, William E., assignor.)
Yankoff, Peter D., Fort Smith, Ark. Sadiron. 1,573,470; Feb. 16.
Yanovich, John, and J. Hrusecky, Zelienople, Pa. Safety fender for motor vehicles. 1,573,471; Feb. 16.
Yaxley, Ernest E., Chicago, Ill. Connecting plug. 1,573,435; Feb. 16.
Yorke, Patrick, Washington, Pa. Derrick. 1,573,215; Feb. 16.
Young, Charles M., New Britain, Conn. Emergency link. 1,572,980; Feb. 16.
Zander, Albert, Chicago, Ill. Burner. 1,573,472; Feb. 16.
Zerbe, Lewis E., Monte, assignor to Union Tool Company, Torrance, Calif. Pulley support for crown blocks. 1,573,216; Feb. 16.
Zetwo, Joseph R., jr., Pittsburgh, Pa. Friction clutch. 1,573,217; Feb. 16.
Zottel, Herman J., Milwaukee, Wis. Stability and steering device for aircraft. 1,573,109; Feb. 16.
Zucco, Pierre, San Francisco, Calif. Dam construction. 1,573,366; Feb. 16.
Zuppke, Robert C. (See Whitley, W. P., and Zuppke.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 16TH DAY OF FEBRUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abrasive article and making the same. M. L. Hartmann. 1,573,061; Feb. 16.
Abrasive articles, Making. M. L. Hartmann. 1,573,400; Feb. 16.
Acids, Preparing 1,8-aminonaphthol sulphonic. I. Gubelmann and J. M. Tinker. 1,573,056; Feb. 16.
Aeronauts, Safety parachute for. L. C. Degen. 1,572,889; Feb. 16.
Aeroplane hull. J. Von Waldy. 1,573,465; Feb. 16.
Aeroplanes on the ground, Guiding. L. B. Sperry. 1,573,100; Feb. 16.
Agglomerating machine. P. A. I. Cuveller. 1,573,680; Feb. 16.
Agricultural implement. R. L. Diamond. 1,573,044; Feb. 16.
Air and gas, Apparatus for proportionately mixing. G. W. McKee. 1,573,079; Feb. 16.
Air-brake lock. B. W. Westbo and P. N. Bisson. 1,573,597; Feb. 16.
Air-brake system, Clean-out attachment for the retention pipe and retention valve of an. M. Ledesma and A. Acosta. 1,573,349; Feb. 16.
Air-cooling system. J. H. Hunt. 1,573,641; Feb. 16.
Aircraft, Reenforced bracing member for. B. C. Boulton. 1,573,294; Feb. 16.
Aircraft, Stability and steering device for. H. J. Zottel. 1,573,109; Feb. 16.
Aircraft, Vertical finder for. C. L. Paulus, R. Kauch, and H. B. Inglis. 1,573,269; Feb. 16.
Air filter. R. E. Terhune. 1,573,656; Feb. 16.
Air moistener. C. E. Edwards. 1,573,690; Feb. 16.
Air or gas current regulator. L. Kujawa and O. Kook. 1,573,253; Feb. 16.
Airships against fire, Protection of. F. L. M. Boothby. 1,573,762; Feb. 16.
Alarm systems, Time switch for. P. A. Friel. 1,573,152; Feb. 16.
Albumins and fatty matters, Manufacture of certain. M. Kahn. 1,572,933; Feb. 16.
Alcohol and water, Separating butyl. A. Stevens. Re16,267; Feb. 16.
Alcohol, Denatured. H. C. Fuller. 1,573,697–8; Feb. 16.
Alloy. P. Girin. 1,572,996; Feb. 16.
Amusement device. N. L. Rogers. 1,573,645; Feb. 16.
Animal trap. J. Ney. 1,573,185; Feb. 16.
Antiglare shield. G. E. Phillips. 1,573,272; Feb. 16.
Antiskid device. H. Neumann. 1,573,736; Feb. 16.
Antislipping means. F. G. Broman. 1,573,779; Feb. 16.
Applicator. E. R. Hamilton. 1,573,514; Feb. 16.
Arch restorer. E. S. Snyder. 1,573,652; Feb. 16.
Arsenic, Manufacturing colloidal compounds of. A. Chwala. 1,573,375; Feb. 16.
Article of manufacture. I. Naylor. 1,573,734; Feb. 16.
Ash receiver. G. E. Crawford. 1,573,678; Feb. 16.
Ash receiver, Smoker's. J. S. Sherman. Des. 69,465; Feb. 16.
Atomizer. A. Thomas. 1,573,334; Feb. 16.
Auditorium wall and the like. E. Berliner. 1,573,475; Feb. 16.
Auger bit. W. H. Gowdridge. 1,573,701; Feb. 16.
Automobile accessory. E. M. Rosenbluth. 1,573,578; Feb. 16.
Automobile carburetor adjuster. G. H. Repkow and J. T. Bundo. 1,573,123; Feb. 16.
Automobile lock. R. R. Stabler. 1,573,459; Feb. 16.
Automobile signal. J. M. Osgian. 1,573,501; Feb. 16.
Automobile signaling device. T. E. Thompson. 1,573,660; Feb. 16.
Automobiles, Pet-cock-operating device for. B. A. and C. E. Walbridge. 1,573,661; Feb. 16.
Automobiles, Radiator and lamp fender for. R. R. McGregor. 1,572,942; Feb. 16.
Azo dy-stuffs, Manufacture of. F. Günther. 1,573,605; Feb. 16.
Bag: *See*—
  Collapsible bag.
Bags or the like, Producing. J. Steiner. 1,573,201; Feb. 16.
Bale fastening, Temporary. A. S. Mackenzie. 1,573,557; Feb. 16.
Balls, Manufacture of golf. A. E. Penfold. 1,573,271; Feb. 16.
Bar: *See*—
  Splice bar.
  Type bar.

Barrel, Collapsible. J. A. Kaye. 1,573,071; Feb. 16.
Baseball game apparatus. A. Matha. 1,573,182; Feb. 16.
Basket or receptacle, Wire. L. W. Macomber. 1,573,558.
Bather's article. R. E. Gilliland. 1,573,239; Feb. 16.
Battery: *See*—
  Storage battery.
Battery cover. C. A. Thatcher. 1,573,462; Feb. 16.
Battery separator, Storage. R. C. Benner. 1,573,369; Feb. 16.
Battery terminal-post clamp, Storage. M. Brown. 1,573,298; Feb. 16.
Bearing scraping and burnishing tool. A. M. Rutter and C. R. Benson. 1,573,019; Feb. 16.
Bearing, Shimless. A. M. Allen. 1,573,110; Feb. 16.
Bedstead, Bed bottom for hospital. W. A. Weaver. 1,573,530; Feb. 16.
Beet puller. O. A. Thomas. 1,573,657; Feb. 16.
Belt tool. E. A. Smith. 1,573,651; Feb. 16.
Beveling machine. W. J. Knoll. 1,573,554; Feb. 16.
Bier. B. M. Griffith. 1,573,398; Feb. 16.
Binder-control linkage, Column-. D. C. Klausmeyer. 1,573,552; Feb. 16.
Bit: *See*—
  Auger bit.
Bituminous distributors, Discharge mechanism for. A. Fricker. 1,572,915; Feb. 16.
Block: *See*—
  Pulley block.
Block-molding device. F. Van Anden. 1,573,336; Feb. 16.
Board: *See*—
  Directory board.
  Ironing board.
Boiler: *See*—
  Locomotive boiler.
Boiler. J. B. Schlosser. 1,573,097; Feb. 16.
Boiler blow-off apparatus. W. G. Wilson. 1,572,911; Feb. 16.
Boiler wall. G. M. Parker. 1,573,188; Feb. 16.
Boilers, Safety appliance for steam. W. C. Hackman. 1,573,488; Feb. 16.
Bolt: *See*—
  Door bolt.
Bolt shield, Socket for expansion-. A. S. Fishel. 1,573,151; Feb. 16.
Bomb sight, Stabilized. M. F. Bates. 1,573,028; Feb. 16.
Borax and sodium bicarbonate from lake brines, Producing. M. V. Lowry. 1,573,259; Feb. 16.
Bottle. C. A. Sears. Des. 69,462; Feb. 16.
Bottle, Perfume. J. J. Vogler. Des. 69,468; Feb. 16.
Bottles and the like, Cap for. J. W. Drewitz. 1,573,147; Feb. 16.
Bowling machine. J. F. Proch. 1,573,643; Feb. 16.
Box: *See*—
  Display box.
  Powder box.
  Stop box.
  Switch box.
Box-spring structure. B. B. Englander. 1,573,047; Feb. 16.
Boxes, Lid fastener for. C. H. Ross. 1,573,579; Feb. 16.
Bracket: *See*—
  Bumper bracket.
Bracket. H. T. Holland. 1,573,246; Feb. 16.
Braiding machine, Single-thread lace-. C. Birkenhauer. 1,573,625; Feb. 16.
Brake device. E. Morris. 1,573,322; Feb. 16.
Brake linings, Composition for treating. F. E. Wieser. 1,573,468; Feb. 16.
Brake-operating connection. J. L. Price. 1,573,275; Feb. 16.
Brake shoe, Driver. F. L. Alben. 1,572,872; Feb. 16.
Brake system. C. Froesch. 1,572,890; Feb. 16.
Briquetting. P. C. Mulligan. 1,573,565; Feb. 16.
Brush. S. T. and B. T. Attarian. 1,573,758; Feb. 16.
Brush and securing attachments thereto, Conductive. A. F. Herman and H. S. Ellson. 1,573,402; Feb. 16.
Brush, Shaving. E. L. Corbett. 1,572,885; Feb. 16.
Bucket, Pit. C. C. Tippett. 1,573,463; Feb. 16.
Building construction. R. Dale. 1,572,887; Feb. 16.
Building-heating device. U. Valentini. 1,573,364; Feb. 16.
Building material. J. P. Beardall. 1,573,029; Feb. 16.
Bumper. C. Brignolo, T. Amari, and G. Brignolo. 1,573,672; Feb. 16.
Bumper. W. F. Obme and L. H. Felker. 1,573,326; Feb. 16.
Bumper bracket. R. B. Fageol. 1,573,381; Feb. 16.

Bumpers, Fastener for supporting arms for. A. W. Nordgren. 1,573,774; Feb. 16.
Burner: *See*—
  Hydrocarbon burner.
  Liquid-fuel burner.
Burner. A. Zander. 1,573,472; Feb. 16.
Button, Cuff. J. F. Byron. 1,573,477; Feb. 16.
Cabinet, Multiple metal. J. Lachaine. 1,573,254; Feb. 16.
Cabinet, Vapor-bath. R. A. Pedroes. 1,573,016; Feb. 16.
Cable-end fastener, Antiskid. C. I. Signer. 1,573,650; Feb. 16.
Calcium cyanide and product thereof, Making. F. J. Metzger. 1,573,732; Feb. 16.
Calcium hypochlorite compounds, Drying. G. Pistor. 1,572,952; Feb. 16.
Caliper. P. C. Labasse. 1,573,347; Feb. 16.
Camera, Enlarging. E. Goldberg and M. Nowicki. 1,573,314; Feb. 16.
Camera, Photographic. H. Heine. 1,573,401; Feb. 16.
Camera, Universal art. M. S. Mastrukoff. 1,572,899; Feb. 16.
Candle plate. H. Abrams. Des. 69,430; Feb. 16.
Canopy holder. H. E. Ruttle. 1,573,580; Feb. 16.
Car couplers, Uncoupling device for. G. G. Gilpin. 1,573,054; Feb. 16.
Carbon black, Process and apparatus for bolting. W. C. Cassell and C. K. Springfield. 1,573,373; Feb. 16.
Carbonate of magnesium, Making heavy basic. B. B. Grunwald. 1,573,603–4; Feb. 16.
Carburetor. P. A. Dumraese. 1,573,689; Feb. 16.
Carburetor. W. C. Hess. 1,573,065; Feb. 16.
Carburetor. W. Schmid. 1,572,967–8; Feb. 16.
Card, Place. S. Rosenstein. 1,573,748; Feb. 16.
Carpets and the like, Fastener for stair. C. E. Johnson. 1,572,931; Feb. 16.
Carrier-wave transmission. E. H. Colpitts. 1,573,303; Feb. 16.
Carton-spot dewaxer. F. A. Beisel. 1,572,879; Feb. 16.
Case: *See*—
  Filing case.
  Self-closing case.
  Storage case.
Casement adjuster, Friction. E. J. Sibley. 1,573,456; Feb. 16.
Casing-pulling device. W. A. Barrier. 1,572,983; Feb. 16.
Casting-handling machine. A. G. J. Rapp. 1,573,421; Feb. 16.
Casting machine. A. Kaufmann. 1,573,518; Feb. 16.
Casting machines, Mold construction for centrifugal. J. Rice. 1,573,089; Feb. 16.
Cement and concrete, Refractory. P. J. F. Kestner. 1,573,072; Feb. 16.
Cementing two parts together. J. T. Griffin. 1,573,315; Feb. 16.
Cementitious products, Impregnating. C. R. Nichols. 1,573,568; Feb. 16.
Centrifugal separation. J. M. Nicol. 1,573,499; Feb. 16.
Centrifugal separator. J. M. Nicol. 1,573,498; Feb. 16.
Chain. L. E. Brill. 1,573,627; Feb. 16.
Chain, Antiskid. J. A. Cheape. 1,573,631; Feb. 16.
Chain-applying mechanism, Mud-. R. L. Sutter. 1,573,283; Feb. 16.
Charcoal. Producing highly-adsorbent. E. Bateman. 1,573,509; Feb. 16.
Chilling apparatus. C. H. M. Rayson. 1,573,450; Feb. 16.
Chimney, furnace, and ventilator, Combined. E. D. Lewis. 1,573,406; Feb. 16.
Chopper: *See*—
  Cotton chopper.
Cigarette-making machine. E. Koerner. 1,573,616; Feb. 16.
Circuit breaker. C. S. Eppley. 1,573,235; Feb. 16.
Circuit closer. J. J. Gramma. 1,573,702; Feb. 16.
Circuit, Highly-selective. H. W. Nichols. 1,573,323; Feb. 16.
Clamp: *See*—
  Dental clamp.
Cleaner: *See*—
  Paraffin cleaner.
  Vacuum cleaner.
  Windshield cleaner.
Clocks and watches, Bracket for alarm. C. W. Sager. 1,573,277; Feb. 16.
Cloth. O. C. Wiese. 1,573,788; Feb. 16.
Clutch. E. J. Armstrong. 1,572,870; Feb. 16.
Clutch, Friction. A. E. Norris. 1,573,324; Feb. 16.
Clutch, Friction. J. R. Zetwo, jr. 1,573,217; Feb. 16.
Coal and like materials, Adjustable apparatus for feeding and separating. F. H. Blatch. 1,573,035; Feb. 16.
Coat. I. M. Cohen. 1,573,302; Feb. 16.
Coffeepot, Percolator. M. L. Wood. 1,573,668; Feb. 16.
Coin-control mechanism. G. H. Matchett. 1,573,181; Feb. 16.
Collapsible bag. C. H. Loeffler. 1,573,721; Feb. 16.
Combination instrument. M. B. Hancock. 1,573,057; Feb. 16.
Combination lock. C. C. and W. S. Knottingham and J. F. Otis. 1,573,170; Feb. 16.
Combustion apparatus and method. G. C. Gerow. 1,572,920; Feb. 16.
Combustion, Composition for absorbing and purifying the waste products of. J. C. Tate. 1,573,284; Feb. 16.
Compressor for indirect inlay system, Wax-form. R. E. Tuthill. 1,573,433; Feb. 16.
Cooker and heater, Feed. J. Rowlett. 1,573,090; Feb. 16.
Cooking apparatus. W. Davies. 1,573,041; Feb. 16.
Cooler: *See*—
  Milk cooler.
Concrete reenforcement. G. M. Nelson. 1,573,735; Feb. 16.
Condensation, Process and apparatus for fractional. J. E. Bell. 1,573,129; Feb. 16.
Condenser, Variable. R. E. Marbury. 1,572,897; Feb. 16.
Conductor systems, Rapid regulation of the voltage in. R. Rüdenberg, C. Trettin, and G. Köhler. 1,572,959; Feb. 16.
Confection and making the same. W. A. McCool. 1,573,078; Feb. 16.
Container. J. H. Sheely. 1,573,648; Feb. 16.
Container, Water-tight. J. G. Wallace. 1,573,590; Feb. 16.
Containers, Moistening cover for. J. W. Christie. 1,573,479; Feb. 16.
Control apparatus. R. E. Hellmund. 1,572,927; Feb. 16.
Control system, Automatic-. H. Milker. 1,572,900; Feb. 16.
Converter furnace, Side-blast. T. Levoz. 1,573,892; Feb. 16.
Conveyer, Portable. O. P. Nystrom and M. De Lin. 1,573,186; Feb. 16.
Copyholder. E. W. Forney. 1,573,237; Feb. 16.
Core-removing machine for hollow drill steel. A. D. Johnson and F. A. Schulze. 1,573,070; Feb. 16.
Cores, Making. A. Anderson. 1,573,436; Feb. 16.
Cores, Spacing. R. M. Johnstone. 1,573,612; Feb. 16.
Corn planters, Marker for. J. Rowlett. 1,573,091; Feb. 16.
Corn shellers, Attachment for. E. Heltzman. 1,573,064; Feb. 16.
Cotton chopper. F. Drozd. 1,573,637; Feb. 16.
Counting head. H. C. Jones. 1,572,932; Feb. 16.
Coupling: *See*—
  Flexible coupling.
Coupler-lock-releasing device. F. M. Whyte. 1,573,434; Feb. 16.
Coupling. E. A. Whybrew. 1,572,979; Feb. 16.
Coupling for metal tubes. F. Tomlinson. 1,573,103; Feb. 16.
Cover plate. S. W. Carroll. 1,573,676; Feb. 16.
Crate, Bottle. H. H. and E. A. Gerding. 1,573,111–2; Feb. 16.
Crown blocks, Pulley support for. L. E. Zerbe. 1,573,216; Feb. 16.
Current of variable frequency, Generating an alternating. H. D. Arnold and J. P. Minton. 1,573,367; Feb. 16.
Curtain fixtures, Pulley-hanger bracket for draw-. J. H. Boye. 1,573,136; Feb. 16.
Curtain stretcher. T. Miersma. 1,573,562; Feb. 16.
Curtain tie back. H. J. Braun. Des. 69,437; Feb. 16.
Curtains, Fastening means for. E. J. Thurber. 1,573,776; Feb. 16.
Cushion handle. W. A. Smith. 1,573,458; Feb. 16.
Cutter: *See*—
  Weed cutter.
Dam construction. P. Zucco. 1,573,366; Feb. 16.
Debarking mechanism. N. A. and H. F. Barger. 1,572,982; Feb. 16.
Dental appliance. J. H. Ross, jr. 1,573,749; Feb. 16.
Dental clamp. R. E. L. Miller. 1,572,901; Feb. 16.
Derrick. F. Hunt. 1,573,713; Feb. 16.
Derrick. P. Yorke. 1,573,215; Feb. 16.
Desk. G. P. Wigginton. 1,573,665; Feb. 16.
Dimple-producing appliance. E. I. Gilbert. 1,572,891; Feb. 16.
Directory board. B. L. Akins. 1,573,126; Feb. 16.
Dishwasher. S. O. French. 1,573,387; Feb. 16.
Disk wheel. G. H. Forsyth. 1,573,238; Feb. 16.
Display and storage counter. A. Petersen. 1,573,569; Feb. 16.
Display box. A. W. Engel. 1,573,149; Feb. 16.
Display container. H. D. Phillips. 1,573,445; Feb. 16.
Display device. G. S. Hurst. 1,573,767; Feb. 16.
Door. B. Roe. 1,573,194; Feb. 16.
Door bolt, Self-locking. J. H. Stewart. 1,573,653; Feb. 16.
Door check and fastener, Combined. J. E. Barnes. 1,573,368; Feb. 16.
Door holder. A. J. Bush. 1,573,512; Feb. 16.
Door holder, Friction. N. B. Hurd. 1,573,404; Feb. 16.
Door operating and locking device. S. B. Haseltine. 1,573,063; Feb. 16.
Doors, Attachment for. W. Fizzell, jr. 1,573,236; Feb. 16.
Draft mechanism. V. C. Kline. 1,573,320; Feb. 16.
Draft rigging. D. S. Barrows. 1,573,290; Feb. 16.
Drain-pipe strainer. N. Holland. 1,573,067; Feb. 16.
Drier: *See*—
  Rotary drier.
Drier. R. J. Ritchie. 1,573,453; Feb. 16.
Drill: *See*—
  Rock drill.
Drill for fertilizers and seeds. E. B. Heyd. 1,573,493; Feb. 16.
Drills, Removable water-tube connection for stope. L. C. Bayles. 1,573,474; Feb. 16.
Drying apparatus, Centrifugal. G. Grauss. 1,573,240; Feb. 16.

Drying apparatus for tobacco and the like. E. Koerner. 1,573,615; Feb. 16.
Drying finely-divided materials. J. B. Bronstein. 1,573,673; Feb. 16.
Drying, Method and apparatus for. J. Credo. 1,573,144; Feb. 16.
Drying or calcining, Method and apparatus for. J. A. Barr. 1,573,533; Feb. 16.
Dump body, Covered. R. N. Burton. 1,573,372; Feb. 16.
Dust collector. R. H. Bourne and A. J. Grindle. 1,573,135; Feb. 16.
Dye composition. E. J. Wall and D. F. Comstock. 1,573,595; Feb. 16.
Dynamoelectric machine. H. M. Stoller. 1,573,333; Feb. 16.
Edging gauge. A. C. Hauck. 1,573,705; Feb. 16.
Educational device. J. P. Ross. 1,573,358; Feb. 16.
Egg-handling machine. F. and R. Smythe. 1,573,332; Feb. 16.
Electric bulb. A. A. Wilkins. 1,573,593; Feb. 16.
Electric-circuit controller, Thermal. G. W. O'Keeffe. 1,573,187; Feb. 16.
Electric fixture. P. D. Phillips. 1,573,420; Feb. 16.
Electric furnace. G. M. Little. 1,572,893–4; Feb. 16.
Electric furnace. E. L. Smalley. Re16,269; Feb. 16.
Electric heater. C. P. Randolph. 1,573,787; Feb. 16.
Electric-lamp housing, Incandescent. C. H. Bissell and E. G. Smith. 1,573,292; Feb. 16.
Electric-light-globe socket. H. L. Strongson. 1,572,906; Feb. 16.
Electric pyrometer. T. W. Varley. Re16,270; Feb. 16.
Electric switch. G. H. Hart. 1,573,163–4; Feb. 16.
Electric switch. J. N. Mahoney. 1,573,179; Feb. 16.
Electric switch, Electrically-operated. G. A. Burnham. 1,573,674; Feb. 16.
Electric time switch. D. Hitchcock. 1,573,066; Feb. 16.
Electrical bridge. H. J. Vennes. 1,573,337; Feb. 16.
Electrical generating and distribution system and apparatus therefor. W. S. Edsall. 1,573,148; Feb. 16.
Electrical measurements, Method and apparatus for making. T. R. Harrison and P. D. Foote. 1,573,606; Feb. 16.
Electrical network, Adjustable. G. Crisson and L. L. Glezen. 1,572,992; Feb. 16.
Electricity meter, Induction. J. Harris. 1,573,546; Feb. 16.
Electromagnet. A. H. Adams. 1,572,869; Feb. 16.
Electromagnet, Polarized. H. G. Saal. 1,573,094; Feb. 16.
Elevator-door lock. F. E. Kalte. 1,573,345; Feb. 16.
Elevator doors and the like, Interlock for. W. B. Gervais and J. C. Wilmot. 1,573,156; Feb. 16.
Elevator motor controller. E. B. Thurston. 1,573,207; Feb. 16.
Embroidering machines, Fabric frame for. C. Muentener. 1,573,184; Feb. 16.
Embroidery machine. J. Hohl and E. G. Keller. 1,573,165; Feb. 16.
Emulsions, Method of and apparatus for breaking. L. G. Gates. 1,573,389; Feb. 16.
End gate. W. H. Harrison. 1,573,060; Feb. 16.
Engine: *See*—
Internal-combustion engine.
Engine-compression-brake apparatus. H. H. Nolen. 1,573,417; Feb. 16.
Engine-hood-vent cover. H. L. Thompson. 1,573,659; Feb. 16.
Engine-starting mechanism, Internal-combustion-. R. Harris. 1,572,998–9; Feb. 16.
Engines, Auxiliary air control for internal-combustion. E. A. Eklund. 1,573,692; Feb. 16.
Engines, Emergency supply for fuel-combustion. C. M. Donovan. 1,573,230; Feb. 16.
Engines, Humidifier for gas. J. E. Crandall and A. Olgay. 1,572,886; Feb. 16.
Engines, Reversing mechanism for opposed-piston. A. T. Kasley. 1,573,319; Feb. 16.
Excavator bucket. W. Baker. 1,573,128; Feb. 16.
Fabric. F. B. Manley. 1,573,559; Feb. 16.
Facial device, Electrical. G. E. Engstrom. 1,573,693; Feb. 16.
Fastener. F. S. Carr. 1,573,763; Feb. 16.
Fastening-inserting machine. F. L. MacKenzie. 1,573,081; Feb. 16.
Faucet or tap for water pipes, etc. O. Schott. 1,573,526; Feb. 16.
Feed collet. C. J. Fancher and R. A. Johnson. 1,573,048–9; Feb. 16.
Feed-controlling mechanism. F. I. Raymond. 1,573,192; Feb. 16.
Fender: *See*—

Plow, Lister. T. B. Roberts. 1,573,745; Feb. 16.
Plows, Weed gatherer for. J. Wicker and J. E. McGough. 1,573,592; Feb. 16.
Plug, Connecting. E. E. Yaxley. 1,573,435; Feb. 16.
Plumbing fixtures, etc., Automatic overflow outlet for. C. L. Dawson. 1,573,042; Feb. 16.

Plunger cleaning device. E. C. Lampson. 1,573,720; Feb. 16.
Poison-liquid container. A. W. Schlesinger. 1,573,278; Feb. 16.
Polychromatic security print. R. Lamp'l. 1,573,006; Feb. 16.
Pot: *See*—
Coffeepot.
Pot or crucible. A. E. Bellis and C. S. Collins. 1,573,535; Feb. 16.
Potato-sorting device. T. Prescott. 1,573,274; Feb. 16.
Poultry feeder. G. H. Aldrich and A. L. Gilbo. 1,572,981; Feb. 16.
Powder box, Face-. A. Bowman. 1,573,036; Feb. 16.
Powder collector. W. H. Dickerson and W. B. McLaughlin. 1,573,376; Feb. 16.
Powders of great fineness, Obtaining. E. Podszus. 1,573,017; Feb. 16.
Power control. B. D. Saklatwalla and A. N. Anderson. 1,573,695; Feb. 16.
Power plant. A. R. Smith. 1,573,582; Feb. 16.
Power plant, Steam-. J. K. Ruths. 1,572,960; Feb. 16.
Power-transmission device. G. E. Ruckstell. 1,573,359; Feb. 16.
Press. J. Fletcher. 1,573,769; Feb. 16.
Price card or ticket. H. and L. Hopp. 1,573,403; Feb. 16.
Printing machine, Flock-. F. Hinnekens. 1,573,494; Feb. 16
Printing-plate holder. E. E. Thiel. 1,573,429–31; Feb. 16.
Propeller-blade mounting. S. Heath. 1,573,000; Feb. 16.
Protective system. J. Biermanns. 1,573,623–4; Feb. 16.
Protective system. J. Biermanns and O. Mayr. 1,573,622; Feb. 16.
Puller: *See*—
Beet puller. Weed puller.
Rope puller.
Pulley block. F. B. Mallory. 1,573,351–2; Feb. 16.
Pulverizing mill. F. I. Raymond and W. B. Senseman. 1,573,191; Feb. 16.
Pump, Multicylinder. H. Sandoz. 1,573,525; Feb. 16.
Pump, Oil-well. W. J. Smith. 1,573,584; Feb. 16.
Pump, Rotary. E. A. Diffinger. 1,573,683; Feb. 16.
Pumping apparatus. C. Warner. 1,573,106. Feb. 16.
Punch, Riveting. E. Frey. 1,573,050; Feb. 16.
Punching machine, Portable. D. J. Chickering. 1,573,143; Feb. 16.
Pyroxylin and the like, Shaping sheet. E. R. Person. 1,573,356; Feb. 16.
Rack: *See*—
Shoe rack.
Radiator cap or similar article. H. Hardisty. Des. 69,450; Feb. 16.
Radiator caps, Retaining device for. H. Schlaich. 1,573,096; Feb. 16.
Radiator inclosure. M. Jersemann. 1,573,610; Feb. 16.
Radiator or the like, W. J. Gamble. 1,572,916; Feb. 16.
Radiator, Self-emptying, motor-vehicle. V. P. Giddings, jr. 1,573,157; Feb. 16.
Radio receiving sets, Loud-speaker horn for. A. C. and J. R. Frisch. Des. 69,446; Feb. 16.
Radioantenna. F. R. Kronfoth. 1,573,171; Feb. 16.
Radiocondenser. P. A. Chamberlain. 1,573,374; Feb. 16.
Radius rod. J. A. Portis. 1,573,782; Feb. 16.
Rail bonds, Manufacture of. C. A. Cadwell. 1,573,219; Feb. 16.
Rail joint. W. R. McPhetridge. 1,573,007; Feb. 16.
Rail joint fastening, Automatic. M. Betke. 1,573,132; Feb. 16.
Railway brake mechanism. G. N. Loomis. 1,573,257; Feb. 16.
Railway switch, Automatic. C. S. Eppley. 1,573,234; Feb. 16.
Railway switch mechanism. J. J. O'Rourke. 1,573,355; Feb. 16.
Razor blade. D. E. Hickey. 1,573,244; Feb. 16.
Razor-blade holder, Safety-. N. E. Charlton. 1,573,630; Feb. 16.
Razor, Safety. G. A. Schieren. Re16,264; Feb. 16.
Receptacle containing volatile or inflammable liquids such as benzine and other hydrocarbons. M. A. Meijer and R. von Feld. 1,573,731; Feb. 16.
Record-forming device. W. W. Lasker, jr. 1,573,174; Feb. 16.
Recording and reproducing machine. T. L. Dowey. 1,573,509; Feb. 16.
Rectifier with a change-over switch. H. Gerdien. 1,573,155; Feb. 16.
Refrigerating apparatus. J. G. King. 1,573,114; Feb. 16.
Refrigerating apparatus. J. G. King. 1,573,115; Feb. 16.
Refrigerating system. L. L. Scott. 1,573,198; Feb. 16.
Registering meter. W. A. Liebing and E. H. Loughridge. 1,573,176; Feb. 16.
Regulator: *See*—
Speed regulator.
Relay-tripping system. R. T. Pierce. 1,572,951; Feb. 16.
Restraining device. A. C. Popham. 1,573,446; Feb. 16.
Retorts, Coke-releasing device for vertical. P. H. Douglas and I. D. Thomas. 1,573,145; Feb. 16.
Rim, Demountable. O. P. Munson. 1,573,010; Feb. 16.
Ring-heating furnace. R. Regars. 1,573,522; Feb. 16.
Road log and map display device. D. S. Nash and J. E. Lett, jr. 1,573,011; Feb. 16.
Roads, Machine for use in repairing. E. C. Gledhill. 1,573,700; Feb. 16.
Rock drill, Gasoline. J. V. Rice, jr. 1,573,790; Feb. 16.
Rod: *See*—
Radius rod.
Rodents, Bait depositor for. C. J. Barnes. 1,573,670; Feb. 16.
Roller: *See*—
Shade roller.
Rope-end stopper. W. G. Norman. 1,573,737; Feb. 16.
Rope puller. J. O. Grenier. 1,573,397; Feb. 16.
Rotaries, Pipe-rotating attachment for. H. F. Smith. 1,573,281; Feb. 16.
Rotary drier. W. A. Harty and F. W. Moore. Re16,265; Feb. 16.
Rubber articles, Mending. W. H. Buschell. 1,573,039; Feb. 16.
Rubber-coated weftless cord fabric, Manufacture of. A. Gessner, jr. 1,573,390; Feb. 16.
Saccharine liquors, Clarifying. I. H. Morse. 1,573,733; Feb. 16.
Sadiron. P. D. Yankoff. 1,573,470; Feb. 16.
Sailing craft, Construction of. F. F. von Hoiningen-Huene. 1,572,976; Feb. 16.
Sanitary protector. B. Madoff. 1,573,726; Feb. 16.
Saw, Jig. M. E. Baker. 1,573,510; Feb. 16.
Sawmill carriage, Arresting a. D. R. Tanner. 1,573,428; Feb. 16.

Trolley conveyer. J. E. McBride. 1,572,941; Feb. 16.
Trolley pole. C. C. Owens and R. L. Hermann. 1,572,946; Feb. 16.
Trolley pole, Tramway. M. Henderson. 1,573,001; Feb. 16.
Trolley wheel. D. MacLean. 1,573,008; Feb. 16.
Trolling gear. A. W. Wilson. 1,573,288; Feb. 16.
Trousers, Football. W. P. Whitley and R. C. Zuppke. 1,573,212; Feb. 16.

Truck. H. O. Scranton. 1,573,329; Feb. 16.
Truck. H. C. Wood. 1,573,365; Feb. 16.
Truck, Adjustable plural-deck. W. J. Laffey. 1,573,172; Feb. 16.
Truck, Dump. P. E. Barker. 1,572,876; Feb. 16.
Truck, Laundry. P. R. Syers. 1,572,971; Feb. 16.
Truck-moving apparatus. G. C. Friesen. 1,573,388; Feb. 16.
Trunk, Wardrobe. K. A. Diekelmann. 1,573,306; Feb. 16.
Tube: *See*—
X-ray tube.
Tube closure, Collapsible. C. C. Warth. 1,573,338; Feb. 16.
Tube-forming machine. J. D. Reifsnyder. 1,573,573–4; Feb. 16.
Tule and sod scraper. E. E. Brannon. 1,573,137; Feb. 16.
Turbines, Governing mechanism for. W. Kieser. 1,573,781; Feb. 16.
Turpentine substitute and process of manufacturing. C. C. Monger. 1,572,902; Feb. 16.
Type bar. E. G. Robeson. Re16,263; Feb. 16.
Typewriter, Power-operated. M. Schulze. 1,573,751; Feb. 16.
Typewriting machine. G. G. Going. 1,573,544; Feb. 16.
Typewriting machine. J. Lindburg. 1,573,407; Feb. 16.
Typewriting machine. J. A. B. Smith. 1,572,904; Feb. 16.
Typewriting machine. J. A. B. Smith. 1,573,331; Feb. 16.
Typewriting machine. J. A. B. Smith. 1,573,424; Feb. 16.
Twisting device. W. B. Taylor. 1,572,907; Feb. 16.
Unhairing machines, Suction device for. N. M. Reingold. 1,573,575; Feb. 16.
Universal joint. G. L. Tarbox and C. W. Spicer. 1,573,587; Feb. 16.
Vacuum cleaner. S. McClatchie. 1,573,771–2; Feb. 16.
Vacuum cleaners and the like, Handle for. E. W. Wiehle. 1,573,467; Feb. 16.
Vacuum tubes, Manufacture of. W. G. Houskeeper. 1,573,317; Feb. 16.
Valve. P. G. Darling. 1,573,304; Feb. 16.
Valve. A. Dumont. 1,573,688; Feb. 16.
Valve. C. W. Larner. 1,573,074; Feb. 16.
Valve. J. C. McNab. 1,573,520; Feb. 16.
Valve. A. F. Pieper. 1,573,786; Feb. 16.
Valve. I. H. Russell. 1,573,092; Feb. 16.
Valve and carbon remover therefor, Rotary. J. F. Norton. 1,573,325; Feb. 16.
Valve and oil gauge, Combined crank-case drain. G. S. Wolf. 1,573,213; Feb. 16.
Valve attachment. H. Mays. 1,573,730; Feb. 16.
Valve, Distant-operated. J. M. Williams, jr., and R. F. Fischer. 1,573,287; Feb. 16.
Valve for deep wells, Relief. C. S. Swaim. 1,573,021; Feb. 16.
Valve for rock drills. F. M. Slater. 1,573,457; Feb. 16.
Valve, Gate. A. Böttner. 1,572,984; Feb. 16.
Valve lifter. O. Maurer. 1,573,773; Feb. 16.
Valve or stop valve, Steam-cut-off. A. Böttner. 1,572,985; Feb. 16.
Valve, Rotary. R. Wehr. 1,573,022; Feb. 16.
Valve, Seat-controlled toilet flush and intake. C. H. Gunn. 1,573,160; Feb. 16.
Valve, Shut-off discharge. W. W. Sanders. 1,572,964; Feb. 16.
Valve-stem silencer. G. Lehmann, jr. 1,573,075; Feb. 16.
Valve, Stop. B. T. Williston. 1,573,108; Feb. 16.
Valve, Superheated-steam throttle. A. W. Bruce. 1,573,540; Feb. 16.
Vapor-feed means. I. Cowles. 1,573,780; Feb. 16.
Vehicle bumper. G. A. Lovett. 1,573,642; Feb. 16.
Vehicle fender. J. B. Henry. 1,573,243; Feb. 16.
Vehicle, Motor. J. Hammerl. 1,573,241; Feb. 16.
Vehicle, Motor. J. Ledwinka. 1,573,117; Feb. 16.
Vehicle spring. J. C. Gilardone. 1,573,052; Feb. 16.
Vehicle-top construction. W. Marshall. 1,573,180; Feb. 16.
Vehicle tops, Window control for. S. S. Albright. 1,573,473; Feb. 16.
Vehicles, Anchorage device for. W. W. Blakely. 1,573,441; Feb. 16.
Vehicles, Controlling the operation of motor. A. K. Brumbaugh. 1,573,628; Feb. 16.
Vehicles, Drive for motor. A. D. Robbins. 1,572,903; Feb. 16.
Vehicles, Lubricating system for motor. F. L. Baker. 1,573,127; Feb. 16.
Vehicles, Oil tube for motor. H. C. Karstens. 1,572,934; Feb. 16.
Vehicles, Safety fender for motor. J. Yanovich and J. Hrusecky. 1,573,471; Feb. 16.
Vehicles, Signal device for motor. H. C. Evelyn. 1,573,638; Feb. 16.
Vehicles, Spring mounting for motor. H. E. Curtis. 1,573,633; Feb. 16.
Vehicles, Spring suspension for motor. C. H. Smith. 1,573,583; Feb. 16.
Vehicles, Wheel-puller for motor. F. W. Rees. 1,573,572; Feb. 16.
Vending machine. R. C. Bradley. 1,573,037; Feb. 16.
Vending machine. G. A. Johnston. 1,573,517; Feb. 16.
Veneer, Method of and apparatus for drying wood. A. Elmendorf. 1,573,379; Feb. 16.
Vessel, Suspension. I. Isaachsen. 1,573,716; Feb. 16.
Visual images, Apparatus for the electrical transmission of. P. L. Clark. 1,572,989; Feb. 16.
Voltage-limiting device. R. K. Honaman. 1,573,068; Feb. 16.
Washing machine. J. A. Dickerman and H. V. Leckie. 1,573,542; Feb. 16.
Washing machine. A. E. Fisher and J. A. Storm. 1,573,640; Feb. 16.
Washing machine. H. W. Landwehr. 1,573,173; Feb. 16.
Washing machine. K. P. A. Schultz and L. Wuest. 1,573,423; Feb. 16.
Washing machines, Door-closing mechanism for dry-cleaning. G. W. Wilson. 1,573,666; Feb. 16.
Waste, Lubricating. A. D. Wyckoff. 1,573,214; Feb. 16.
Watchcase and making same. C. W. Bieser. 1,573,134; Feb. 16.
Water conductor. T. J. Stebbins. 1,573,199; Feb. 16.
Water gauge illuminator and protector, Combined. W. J. Hill, S. J. Lupton, and F. E. Collinson. 1,573,342; Feb. 16.
Water-level indicator. R. Klinger. 1,573,719; Feb. 16.
Water, Softening. M. F. Newman. 1,572,944; Feb. 16.
Weapons, Rear sight for high-velocity. J. W. Harkom. 1,573,515; Feb. 16.
Wedding ring. G. S. Bowden. Des. 69,436; Feb. 16.
Weed cutter. R. F. Black. 1,573,034; Feb. 16.
Weed puller. M. T. Coelho. 1,573,222; Feb. 16.
Welding apparatus. P. D. Shoenberger. 1,573,360; Feb. 16.
Welding process. L. Gizienski. 1,572,921; Feb. 16.
Well-casing protector. W. I. Bettis and L. H. Perry. 1,573,031; Feb. 16.
Well-drilling machines, Hook for. L. M. Jordan. 1,573,444; Feb. 16.
Well tubing preparatory to pulling same, Means for draining. W. H. McKissick. 1,573,411; Feb. 16.
Wells, Gas anchor for pumping. J. R. Gignoux and T. E. Swigart. 1,573,051; Feb. 16.
Wheel: *See*—
Disk wheel. Trolley wheel.
Steering wheel.
Wheel. O. E. Wilson. 1,573,667; Feb. 16.
Wheel assembly. L. Blackmore and L. M. Spencer. 1,573,671; Feb. 16.
Wheel rim, Demountable. L. R. Rosenbaum. 1,573,746; Feb. 16.
Window casing. C. H. Richards. 1,573,452; Feb. 16.
Window hangings, Multiple-rod support for. L. H. Robinson. 1,573,644; Feb. 16.
Window hangings, Supporting bracket for. K. H. Whitney. 1,573,286; Feb. 16.
Window lock. R. V. Warga. 1,573,662; Feb. 16.
Window, Metal casement. C. S. Bock. 1,573,538; Feb. 16.
Window screen. W. L. Wright. 1,573,756; Feb. 16.
Windows, Friction adjuster for screened. E. J. Sibley. 1,573,455; Feb. 16.
Windows, Protecting shield for bank and other. J. C. Lucas. 1,573,770; Feb. 16.
Windshield cleaner. C. F. Laganke. 1,573,618; Feb. 16.
Windshield cleaners and the like, Reciprocating mechanism for. J. Demand. 1,573,541; Feb. 16.
Windshield, Tonneau. C. L. and J. F. Miller. 1,573,086; Feb. 16.
Windshields, Heating device for automobile. W. C. Magranis and F. G. Chase. 1,573,727; Feb. 16.
Wire binding or tying apparatus. E. A. Ingold. 1,573,516; Feb. 16.
Wireless receiving apparatus. M. C. Batsel. 1,572,877; Feb. 16.
Wireless signaling, Transmitting arrangement for. M. Osnos. 1,573,789; Feb. 16.
Work support. T. Durrance. 1,573,045; Feb. 16.
Wrench: *See*—
Monkey wrench.
Writing machine. F. L. Taylor and C. E. Lundberg. 1,573,205; Feb. 16.
X-ray transradiation, Table for. E. Pohl. 1,573,571; Feb. 16.
X-ray tube. C. C. Van Voorhis. 1,573,105; Feb. 16.
Yoke. B. W. Kadel. 1,573,249; Feb. 16.
Zinc-sulphate solutions, Treating. R. B. Eldredge. 1,573,233; Feb. 16.

CLASSIFICATION OF PATENTS

FEBRUARY 16, 1926.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 41: 1,573,081
2— 14: 1,573,088
23: 1,573,212
239: 1,572,956
247: 1,573,302
4— 21: 1,573,160
63: 1,573,688
163: 1,573,016
194: 1,573,042
243: 1,573,619
247: 1,573,517
256: 1,573,202
5— 69: 1,573,530
269: 1,573,570
354: 1,573,047
7— 8: 1,572,898
8— 2: 1,573,200
9— 1: 1,572,976
22: 1,573,196
10— 130: 1,573,099
12— 50: 1,573,189
123: 1,573,045
142: 1,573,104
1,573,289
146: 1,573,124
15— 16: 1,573,771
21: 1,573,720
98: 1,572,913
138: 1,573,758
187: 1,572,885
237: 1,573,046
256: 1,573,618
16— 4: 1,573,763
10: 1,572,931
65: 1,573,404
135: 1,573,231
182: 1,573,550
185: 1,573,311
211: 1,573,676
18— 1: 1,573,353
5.3: 1,573,769
8: 1,572,955
16: 1,573,433
19: 1,573,497
45: 1,573,386
46: 1,573,461
51: 1,573,023
1,573,356
53: 1,573,039
54: 1,573,062
55: 1,572,936
1,573,391
56: 1,573,577
57: 1,573,271
59: 1,573,315
1,573,576
60: 1,573,482
19— 69: 1,573,709
20— 4: 1,573,029
8: 1,573,724
35: 1,573,236
36: 1,573,194
22— 32: 1,573,009
65: 1,573,089
69: 1,573,518
139: 1,573,486
147: 1,573,313
194: 1,573,436
204: 1,573,219
23— 39: 1,573,259
67: 1,573,603
1,573,604
1,573,632
79: 1,573,732
86: 1,572,952
125: 1,573,233
135: 1,573,169
252: 1,573,703
273: 1,573,716
24— 30.5: 1,573,684
1,573,685
69: 1,573,759
102: 1,573,477
123: 1,573,737
134: 1,573,650
146: 1,573,119
153: 1,573,557
24— 211: 1,573,444
243: 1,573,675
25— 30: 1,573,566
1,573,567
38: 1,573,568
41: 1,573,680
42: 1,573,502

Tallow, Mutton. H. L. McQueen. 225,022–3; Feb. 23.
Tonic elixir of iron. Walter Lewis Company. 223,950; Feb. 23.
Tooth paste. Orphos Co. 220,914; Feb. 23.
Veterinary products. Bayer Company. 212,230; Feb. 23.

CLASS 7.

Ropes, twine, and cord. New Bedford Cordage Company. 225,375; Feb. 23.
Twine, cordage, and thread for closing bags. Chase Bag Co. 226,042; Feb. 23.

Twine, cordage, and thread for closing bags. Chase Bag Co. 226,044; Feb. 23.

CLASS 10.

Humus or decayed vegetable matter. American Humus Company. 224,270; Feb. 23.

CLASS 11.

Typewriter ribbons. Thurston Cutting Corporation. 225,817; Feb. 23.

CLASS 12.

Pipe-jointing element for connecting sewer pipe. Presstite Engineering Company. 223,941; Feb. 23.
Plaster. Beaver Products Company. 205,732; Feb. 23.
Roofing in rolls and flexible shingles, Flexible. Hyle Co. 224,333; Feb. 23.
Roofing, Prepared. Northern Corrugating Company. 223,798; Feb. 23.
Windows, including frames and sashes, Casement. Crittall Casement Window Company. 224,861; Feb. 23.

CLASS 13.

Basin connection. Wolverine Brass Works. 224,222; Feb. 23.
Hinges. Chicago Spring Hinge Company. 207,967; Feb. 23.
Laundry trays. Reliable Cement Products Company. 220,573; Feb. 23.
Lavatories, drinking fountains, towels holders, etc. Thomas Maddock's Sons Co. 224,921; Feb. 23.
Rods, Metal curtain. James H. Boye Manufacturing Co. 224,650; Feb. 23.

CLASS 14.

Iron and steel. Uddeholms Aktiebolag. 224,214; Feb. 23.
Iron, iron, and Bessemer iron, Bar. Uddeholms Aktiebolag. 224,213; Feb. 23.
Iron, iron, and steel, Pig. Uddeholms Aktiebolag. 224,212; Feb. 23.
Lead, solder, and babbitt, and metals and metal alloys, American Smelting & Refining Company. 224,739; Feb. 23.
Welding rods. Oxweld Acetylene Company. 224,828; Feb. 23.

CLASS 16.

Coloring and finishing waterproof materials in the nature of paints or stains. Samuel Cabot, Inc. 225,109; Feb. 23.
Lacquers. Cleveland Varnish Company. 225,114; Feb. 23.
Paints and paint enamels, Ready-mixed. Toch Brothers, Incorporated. 224,482; Feb. 23.
Paste paint or surfacing material. Valentine & Company. 224,220; Feb. 23.
Whitewash preparation. Pacific Lime & Plaster Co. 224,672; Feb. 23.

CLASS 19.

Automobile tops and side curtains. Perfect Fit Manufacturing Co. 223,323; Feb. 23.
Vehicles and for the parts of such covers, Covers for the springs of automotive. Bassick Manufacturing Company. 223,896; Feb. 23.
Vehicles, Rear-view mirrors for. Hide Leather & Belting Company. 224,970; Feb. 23.

CLASS 21.

B power supply units, B battery eliminators, vacuum-tube rectifiers, etc. Acme Apparatus Company. 223,155; Feb. 23.
Batteries, A and B. Bright Star Battery Co. 222,820; Feb. 23.
Batteries and their accessories. Southland Battery Company. 221,856; Feb. 23.
Cut-outs, panel boards, switchboards, etc. Mutual Electric & Machine Company. 220,560; Feb. 23.
Electric cords and cables, Portable. Central Electric Company. 224,549; Feb. 23.
Electric water heaters, air heaters, hot plates, etc. W. W. Hicks. 224,189; Feb. 23.
Grid leaks and condensers. Micamold Radio Corp. 219,830; Feb. 23.
Lamps, Electrical. M. Favish. 221,889; Feb. 23.
Plugs, brush-holder insulation, cable terminals, commutators, etc., Attachment. Bakelite Corporation. 212,529; Feb. 23.
Radio antenna. Lincoln Radio Corporation. 224,874; Feb. 23.
Radio receiving apparatus and adjuncts or portions thereof. W. H. Huth. 217,619; Feb. 23.
Radio receiving sets. Conrad Allen Radio Company. 223,503; Feb. 23.
Radio receiving sets. E. Fleming & Co. 223,778; Feb. 23.
Radio receiving sets. Chas. Freshman Company. 207,006; Feb. 23.
Radio receiving sets and parts. W. F. Kuhn. 210,127; Feb. 23.
Radio receiving sets, Complete. Distantone Radios, Inc. 213,431; Feb. 23.
Radio receiving sets, loud speakers, plugs, etc. Electrical Research Laboratories, Inc. 223,376; Feb. 23.
Radio tuning dials. Radiall Company. 219,557; Feb. 23.

CLASS 22.

Chain stringers for fish. Enterprise Manufacturing Company. 207,714; Feb. 23.
Doll clothes. Mrs. A. V. Harvey. 223,917; Feb. 23.
Fishing line. Asbaway Line & Twine Manufacturing Company. 223,988–9; Feb. 23.
Fishing reels. Enterprise Manufacturing Company. 207,713; Feb. 23.
Fishing reels. Enterprise Manufacturing Company. 207,718; Feb. 23.
Fishing reels. Enterprise Manufacturing Company. 207,721; Feb. 23.
Toy figures. Geo. Borgfeldt & Co. 223,996; Feb. 23.
Toy hobby-horses. F. J. Catterlin. 225,220; Feb. 23.
Toy play balls made of celluloid. L. L. Martin. 224,341; Feb. 23.

CLASS 23.

Cultivators, Heel sweeps for. Columbus Iron Works Co. 225,648; Feb. 23.
Hammers, hatchets, axes, etc. George Tritch Hardware Company. 224,755; Feb. 23.
Pliers and wrenches. Gripastik Co. 204,454; Feb. 23.

CLASS 24.

Laundry machinery. Invincible Laundry Equipment Co. 224,822; Feb. 23.

CLASS 26.

Cinematographic apparatus. J. A. Rignon. 218,033; Feb. 23.

CLASS 27.

Clocks. Montgomery Ward & Co. 224,922; Feb. 23.
Watches, watchcases, and parts of watches. R. H. Jones & Sons. 205,131; Feb. 23.
Watches, watch movements, clocks. Aseba. 223,987; Feb. 23.

CLASS 28.

Jewelry, silver dresser sets, and silver tableware. Best & Co. 223,277; Feb. 23.
Precious stones, necklaces, pearls, etc. Elliot, Greene & Co. 224,505; Feb. 23.
Rings, Finger. R. E. Naumburg. 224,571; Feb. 23.

CLASS 29.

Powder puffs. Maurice Levy Company. 209,043; Feb. 23.

CLASS 30.

Crockery. Nathan Straus & Sons, Inc. 224,436; Feb. 23.

CLASS 31.

Refrigerating units and compressors therefor and parts thereof, Mechanical. Climax Engineering Co. 213,225; Feb. 23.
Refrigerators. L. G. Copeman. 223,689; Feb. 23.
Refrigerators and refrigerating machines. Barber Asphalt Company. 225,860–1; Feb. 23.
Water purifiers of the carbon block and charcoal type. O. Hennings. 222,677; Feb. 23.

CLASS 32.

Desks, drawers, tops, slides. Clemetsen Company. 211,258; Feb. 23.

CLASS 34.

Automobile windshields, Nonglare attachment for. E. Garson. 220,300; Feb. 23.
Boilers, Hot-water. John Tragesser Steam Copper Works. 223,823; Feb. 23.
Fireplaces and grates, Front wall attachment for. J. R. Fisk. 222,737; Feb. 23.
Gas-generating plants and parts thereof. Albert Kreisa Gesellschaft m. b. H. 209,554; Feb. 23.
Heat, Apparatus for the exchange of. La Mont Corporation. 224,770; Feb. 23.

CLASS 35.

Fabric transmission and brake linings, facings, etc. United States Asbestos Company. 219,317; Feb. 23.
Fabric transmission and brake linings and facings, packings, etc. United States Asbestos Company. 219,506; Feb. 23.
Hose, Rubber. Goodyear Tire & Rubber Company. 187,516; Feb. 23.
Rubber tire patches, inner-tube patches, etc. Out West Manufacturing Co. 223,401; Feb. 23.
Tire inner-tube patches, Pneumatic. H. B. Egan & Co. 223,908; Feb. 23.
Tires and inner tubes, Automobile. National Cloak & Suit Co. 225,199; Feb. 23.
Tires and tire patches, Rim flaps for. Dexter Rubber Manufacturing Company. 225,007–8; Feb. 23.
Tires and tubes, Automobile. H. C. Hower. 169,853; Feb. 23.

CLASS 36.

Motors, turntables, tone arms, reproducers, and parts thereof for phonographs. Paragon Phono Parts Manufacturing Co. 223,542; Feb. 23.
Pianos, player pianos, and reproducing pianos. Hardman, Peck & Co. 224,457; Feb. 23.

CLASS 37.

Books, letterheads, note notices, etc., Loan systems sold to the trade as such, comprising pass. Hood Finance Corporation. 205,274; Feb. 23.

Books, Manifold sales. National Sales Book Co. 224,524; Feb. 23.
Paper fabric adapted for skin-cleansing and cosmetic-removing purposes. Fort Howard Paper Company. 218,695; Feb 23.
Pens, pen barrels, penholders, paper weights, etc., Fountain. Bakelite Corporation. 224,431; Feb. 23.
Writing pads, memorandums and account books, diaries, Pencil and ink. Plee-zing Corporation. 215,478; Feb. 23.

CLASS 38.

Book for automotive distributors, jobbers, etc., Classified buyer's guide and reference. Chilton Class Journal Company. 224,805; Feb. 23.
Books of plans and specifications for building. Baby Grand Apartments Company. 225,159; Feb. 23.
Books, Printed. John Rudin & Company. 222,193; Feb. 23.
Cards, Lithographed and printed display. Einson-Freeman Co. 215,334; Feb. 23.
Cartoons, Series of. Bell Syndicate, Inc. 224,074; Feb. 23.
House organ. Enterprise Oil Company. 225,403 Feb. 23.
Letters, booklets, folders, broadsides, and leaflets, Form. Kier Letter Company. 222,126; Feb. 23.
Magazines, Monthly. M. C. Cohn. 224,375; Feb. 23.
Magazines, Quarterly. American Farming Publishing Company. 223,758; Feb. 23.

Aktiengesellschaft der Maschinenfabriken Escher Wyss & Cie. (See Nyffenegger, Hans, assignor.)
Albrecht, John, Kewaunee, Wis. Automatic nailing device. 1,574,061; Feb. 23.
Alden, Richard C. (See Oberfell, G. G., Ballard, Alden, Utsinger, and Lentz.)
Allen, Irving R., Wheaton, Ill. Display device for garters. 1,574,325; Feb. 23.
Allen, Scott E., Los Angeles, Calif., assignor to Swingspout Measure Co. Spring valve for swingspout measures. 1,573,895; Feb. 23.
Allen, William L., Los Angeles, Calif. Sanitary refuse receiver. 1,574,273; Feb. 23.
Allender, Charles W. G., Steamboat Springs, Colo. Pump. 1,574,274; Feb. 23.
Allerton, Robert W., South Orange, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Condenser support. 1,573,792; Feb. 23.
Allis-Chalmers Manufacturing Company. (See Cheney, Herbert W., assignor.)
Allis-Chalmers Manufacturing Company. (See Feind, Robert F., assignor.)
Allis-Chalmers Manufacturing Company. (See Hagmaier, William G., assignor.)
Allis-Chalmers Manufacturing Company. (See Martin, Charles R., assignor.)
Allis-Chalmers Manufacturing Company. (See Williamson, Robert B., assignor.)
Allmon, Joseph G., Melrose, Mass. Antiskid chain. 1,574,014; Feb. 23.
Altgelt, Rudolph J., assignor to Oliver Chilled Plow Works, South Bend, Ind. Draft device for plows and the like. 1,574,351; Feb. 23.
Alton, William H., assignor to R. T. Vanderbilt Company, New York, N. Y. Applying plaster and stucco. 1,573,896; Feb. 23.
Alton, William H., assignor to R. T. Vanderbilt Company, New York, N. Y. Applying plaster or stucco. 1,573,897; Feb. 23.
Altorfer, Alpheus W., assignor to Altorfer Bros. Company, East Peoria, Ill. Washing machine. 1,574,334; Feb. 23.
Altorfer Bros. (See Altorfer, Alpheus W., assignor.)
American Chain Company. (See Benton, Donald L., assignor.)
American Cuptor Corporation. (See Weckbaugh, Joseph V., assignor.)
American Grinder Manufacturing Company. (See Tautz, H., and Dion.)
American Hardware Corporation, The. (See Stone, Elmer B., assignor.)
American Laundry Machinery Company, The. (See Smith, Leonard S., assignor.)
American Magnesium Corporation. (See Keeler, Lewis J., assignor.)
American Telephone and Telegraph Company. (See Bailey, Rand S., assignor.)
American Telephone and Telegraph Company. (See Blauvelt, William G., assignor.)
American Telephone and Telegraph Company. (See Bown, Ralph, assignor.)
American Telephone and Telegraph Company. (See Wright, S. B., and Schott, assignors.)
Anaconda Sales Company. (See Gillis, Julius H., assignor.)
Anaconda Sales Company. (See Robinson, Thomas, assignor.)
Andersen, Peter J., Spokane, Wash. Glare screen. 1,574,227; Feb. 23.
Andersen, Simoni, Deaver, Wyo. Headlight construction. 1,574,543; Feb. 23.
Anderson, Arthur G., Osage, Minn. Air-pressure-gauge attachment for inflating hose. 1,573,793; Feb. 23.
Anderson, Harry F. (See Guyer, Joseph A., assignor.)
Andrews, John S., Hollywood, Calif. Wall furnace. 1,574,145; Feb. 23.
Archer, Louise. (See Light, C. M., and Archer.)
Armstrong, Francis E., Toronto, Ontario, Canada. Advertising medium. 1,573,898; Feb. 23.
Armstrong, George A., Providence, R. I., assignor to William C. Greene Company. Article of jewelry. 1,573,899; Feb. 23.
Arvoy, Blanche S., née Reneaux, Paris, France, and C. L. Marcus, New York, N. Y. Combined stand and holder for perfume bottles. Des. 69,471; Feb. 23.
Ashe, William O., assignor to Commonwealth Steel Company, St. Louis, Mo. Locomotive frame. 1,573,900; Feb. 23.
Astier, Antoine J., Colombes, France. Water meter. 1,574,594; Feb. 23.
Atwood, John D., Marion, Ill. Turbine. 1,574,228; Feb. 23.
Aulson, John W., Lynn, Mass. Leather-graining machine. 1,574,534; Feb. 23.
Autodrive Company, The. (See Gill, Charles H., assignor.)
Automatic Sales Corporation. (See McRee, Hilliary B., assignor.)
Bager, Svante R. W. M., and W. Lehman, South Milwaukee, assignors to Bucyrus Company, South Milwaukee, Wis. Creeping traction mechanism. 1,574,041; Feb. 23.
Bager, Svante R. W. M., and W. Lehman, South Milwaukee, assignors to Bucyrus Company, Milwaukee, Wis. Creeping traction tread and cooperating tumblers. 1,574,042; Feb. 23.
Bahni, Frederick J., Peoria, Ill. Utility tool. 1,573,901; Feb. 23.
Bailey, Rand S., Montclair, N. J., assignor to American Telephone and Telegraph Company. Telephone-exchange system. 1,573,794; Feb. 23.
Baker, Chester A., Omaha, Nebr. Lubrication pump. 1,574,181; Feb. 23.
Baker, Howard E., Roanoke, Va. Gauge. 1,574,352; Feb. 23.

Balk, Joseph J., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y. Electric-light fixture. Des. 69,472; Feb. 23.

Balk, Joseph J., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y. Electric-light fixture. Des. 69,473; Feb. 23.

Balk, Joseph J., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y. Electric-light fixture. Des. 69,474; Feb. 23.

Balk, Joseph J., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y. Wall plate for electric-light fixtures. Des. 69,475; Feb. 23.

Ball, Joseph S., assignor of one-half to A. T. Moore, Denver, Colo. Automatic safety pick-up device for automobiles. 1,573,795; Feb. 23.

Ballard, Albert M. (See Oberfell, G. G., Ballard, Alden, Utsinger, and Lentz.)

Balstad, Emil G., East Cleveland, Ohio. Marking gauge. 1,574,182; Feb. 23.

Bankers Box Company. (See Fellowes, Harry L., assignor.)

Banks, Percy W., and A. N. Burt, assignors to Detachable Heels Limited, Wellington, New Zealand. Heel of footwear. 1,574,595; Feb. 23.

Barber, Harry E., Boston, Mass. Radiator support. 1,574,353; Feb. 23.

Bard, Ralph, trustee. (See Hofmann, George, assignor.)

Barnett, Edward L., New York, N. Y. Golf apparatus. 1,574,596; Feb. 23.

Barnhill, Frank D., et al., executors. (See Hadley, Charles R.)

Barr, Joseph A., Coldwater, N. Y. Liquid-transfer means. 1,573,796; Feb. 23.

Bart, Blasius, East Orange, N. J. Depositing silver. 1,574,344; Feb. 23.

Barth, Henry C., Helena, Mont. Mail box. 1,574,354; Feb. 23.

Bartholomew, John. (See Lyon, John S., assignor.)

Bartholowsky, Johannes, Los Angeles, Calif. Scenery for pictures and producing same. 1,574,464; Feb. 23.

Baskerville, John B., Roanoke, Va. Record sheet. 1,573,902; Feb. 23.

Basmaison, Pierre, San Francisco, Calif. Bit. 1,574,725; Feb. 23.

Bassett, Harry H., Flint, Mich. Headlamp bezel. Des. 69,476; Feb. 23.

Bassick Manufacturing Co., The. (See Davis, Ernest W., assignor.)

Bates, Albert H., Cleveland Heights, Ohio, assignor to Paramount Rubber Consolidated, Incorporated, Little Falls, N. J. Apparatus for forming hollow articles of plastic material. 1,574,015; Feb. 23.

Bates, Arthur, and J. Gouldbourn, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Press. 1,573,903; Feb. 23.

Baumbach, Emil A., Chicago, Ill. Oiler for leader pins. 1,574,355; Feb. 23.

Bay State Optical Company. (See Jones, Percival W., assignor.)

Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Rock-drill front end. 1,574,016; Feb. 23.

Béal, Pierre E., and L. L. E. Fanet, Levallois-Perret, France. Electrovibrator. 1,573,797; Feb. 23.

Bear, Charles H., assignor to Bear Combustion Company, York, Pa. Oil heater. 1,574,545; Feb. 23.

Bear Combustion Company. (See Bear, Charles H., assignor.)

Beardslee Chandelier Manufacturing Company. (See Mettler, John C., assignor.)

Beattie, Daniel S., New York, N. Y., assignor to Nathan Manufacturing Company. Valve. 1,574,017. Feb. 23.

Beck Duplicator Company, The. (See Isaacs, Albert, assignor.)

Becker, Edmund H. (See Martus, M. L., Becker, and Ross.)

Bedack, Michael J., Brooklyn, N. Y. Bridal crown. Des. 69,477; Feb. 23.

Bedack, Michael J., Brooklyn, N. Y. Bridal crown. Des. 69,479; Feb. 23.

Bedack, Michael J., Brooklyn, N. Y. Bridal crown. Des. 69,480; Feb. 23.

Beebe, Murray C., Cincinnati, Ohio, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Light-sensitive medium and producing the same. 1,574,356; Feb. 23.

Beebe, Murray C., Fort Thomas, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Optical copying. 1,574,358; Feb. 23.

Beebe, Murray C., and A. Murray, Cincinnati, Ohio, assignors to The Wadsworth Watch Case Company, Dayton, Ky. Photographic media and process. 1,574,357; Feb. 23.

Beebe, Murray C., and A. Murray, Cincinnati, Ohio, assignors to The Wadsworth Watch Case Company, Dayton, Ky. Photographic medium. 1,574,359; Feb. 23.

Beecher, Philip, Batavia, N. Y. Figure wheeled toy. 1,574,275; Feb. 23.

Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Oil-heating furnace. 1,574,546; Feb. 23.

Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Operation of oil stills. 1,574,547; Feb. 23.

Benjamin Electric Manufacturing Company. (See Warner, Chester E., assignor.)

Benjamin & Johnes. (See Brigham, E. F., and Daniels, assignors.)

Benjamin, Merrill G., Lakewood, Ohio. Method and apparatus for switching. 1,574,548; Feb. 23.

Bennis, Alfred W., Bolton, England. Furnace grate. 1,574,276; Feb. 23.

Bensa, Felice. (See Schöpfer, Hermann, assignor.)

Benton, Donald L., Los Angeles, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn. Bumper. Des. 69,478; Feb. 23.

Berger, Nathan J., assignor to Sandow Tool Co., U. S. A., New York, N. Y. Plate for lighting fixtures. Des. 69,481; Feb. 23.

Berger, Nathan J., assignor to Sandow Tool Co., U. S. A., New York, N. Y. Plate for lighting fixtures. Des. 69,482; Feb. 23.

Bergmann, Christian N., Pittsburgh, Pa., assignor to The Packard Electric Company, Warren, Ohio. Switch-actuating mechanism. 1,573,904; Feb. 23.

Berlin-Karlsruher Industrie-Werke A. G. (See Schall, Josef, assignor.)

Bergstein, Samuel, assignor to The Interstate Folding Box Company, Middletown, Ohio. Making adhesive joints and the like. 1,574,018; Feb. 23.

Bergstein, Samuel, assignor to The Interstate Folding Box Company, Middletown, Ohio. Paper-box-making machine. 1,574,019; Feb. 23.

Bernhardt, Max E. (See Holtzman, John, assignor.)

Bernhart Mercantile Company. (See Skinner, E. R., Renne, and Ostermeyer, assignors.)

Berry, William. (See Macadam, J., and Berry.)

Berseth, Harald K. (See Berseth, H. K., and Berseth.)

Bettendorf Company, The. (See Reck, F. W., and Vetter, assignors.)

Beyer, Otto S., assignor to E. W. Bliss Company, Brooklyn, N. Y. Drawing press. 1,574,465; Feb. 23.

Bleshar, Henry W., Oskaloosa, Iowa. Tire-inflating device. 1,574,549; Feb. 23.

Birkin, Charles W., and E. T. Sands, Broadway, Nottingham, assignors to Birkin and Company, Nottingham, England. Lace. Des. 69,483; Feb. 23.

Birkin, Charles W., and E. T. Sands, Broadway, Nottingham, assignors to Birkin and Company, Nottingham, England. Lace. Des. 69,484; Feb. 23.

Birkin and Company. (See Birkin, C. W., and Sands, assignors.)

Bissell, Carl H., and R. H. Olley, assignors to Crouse-Hinds Company, Syracuse, N. Y. Electric switch for headlights. 1,574,360; Feb. 23.

Black & Decker Manufacturing Company, The. (See Black, S. D., and Decker, assignors.)

Black, John A., Stephen, Minn. Road shoulder and weed attachment for road-scraping machines. 1,573,905; Feb. 23.

Black, Samuel D., and A. G. Decker, Baltimore, assignors to The Black & Decker Manufacturing Company, Towson, Md. Electric-cord protector. 1,574,020; Feb. 23.

Blair, James. (See Haslett, W. W., and Blair.)

Blake, Charles D., Glens Falls, N. Y. Sawmill-head-block cleaner. 1,573,906; Feb. 23.

Blauvelt, William G., New York, N. Y., assignor to American Telephone and Telegraph Company. Telephone-exchange system. 1,573,907; Feb. 23.

Bliss, E. W., Company. (See Beyer, Otto S., assignor.)

Blugerman, Henry, Toronto, Ontario, Canada. Extension-box-cover machine. 1,573,908; Feb. 23.

Blumberg, Ralph, Baltimore, Md. Emergency apparatus for damaged ships. 1,573,909; Feb. 23.

Blydenburgh, Harold L., Detroit, Mich. Sediment trap. 1,574,336; Feb. 23.

Bocchino, Joe, Utica, N. Y. Machine for forming cement blocks. 1,574,597; Feb. 23.

Boddy, Donald W. (See Frazier, R. T., Boddy, and Hamlin.)

Boddy, Howes, assignor to Co-Operative Utilities Co., Inc., Philadelphia, Pa. Spraying apparatus. 1,574,188; Feb. 23.

Boehmer, Rudolph J., Portland, Oreg. Two-cycle gas engines. 1,574,062; Feb. 23.

Bogert, Marston T., New York, N. Y. Dyestuff intermediates. 1,574,337; Feb. 23.

Boggiano, Victor J., Chicago, Ill. Automatic safety emergency valve for oil tanks and other containers of inflammable fluids. 1,573,798; Feb. 23.

Bonell, Lawrence, Chicago, Ill. Percolator. 1,574,021; Feb. 23.

Bosch, Robert, Aktiengesellschaft. (See Hähnle, Walter, assignor.)

Bosch, Robert, Aktiengesellschaft. (See Hähnle, W., and Hazenmaier, assignors.)

Bosworth, Harry J., Company. (See Bosworth, Harry J., assignor.)

Bosworth, Harry J., assignor to Harry J. Bosworth Company, Chicago, Ill. Light bracket. 1,573,799; Feb. 23.

Boullion, George. (See Boullion, John, G., and P.)

Boullion, John, G., and P., Conde, S. Dak. Mulching device for planters. 1,573,800; Feb. 23.

Boullion, Paul. (See Boullion, John, G., and P.)

Bowles, William M., assignor of one-half to Mrs. S. Moses, Shawnee, Okla. Metal melting and pouring device. 1,574,598; Feb. 23.

Bown, Ralph, East Orange, N. J., assignor to American Telephone and Telegraph Company. Trouble-alarm system for radio receiving sets. 1,573,801; Feb. 23.

Bowser, S. F., and Company. (See Bradley, Richard C., assignor.)

Boyd, John S., assignor to John S. Boyd Co., Inc., Williamstown, Mass. Textile fabric. Des. 69,487; Feb. 23.

Boyd, John S., Co. (See Boyd, John S., assignor.)

Boye Needle Company, The. (See Carlson, Gustav A., assignor.)

Bradley, Charles, Los Angeles, Calif. Delivery heater for printing presses. 1,574,535; Feb. 23.

Bradley, Charles, Los Angeles, Calif. Heater for printing presses. 1,574,536; Feb. 23.

Bradley, Richard C., assignor to Emery Automatic Chain Stores, Inc., New York, N. Y. Casing for a vending machine. Des. 69,485; Feb. 23.

Bradley, Richard C., Chicago, Ill., assignor to S. F. Bowser and Company, Incorporated, Fort Wayne, Ind. Fluid meter. 1,574,338; Feb. 23.

Bradley Washfountain Company. (See Schlesinger, L. and Heine, assignors.)

Brandt Automatic Cashier Company. (See Brandt, Edward J., assignor.)

Brandt, Edward J., assignor to Brandt Automatic Cashier Company, Watertown, Wis. Coin-storage tray and supporting means therefor. 1,574,229; Feb. 23.

Braun, William H., assignor to Fallis Inc., Cincinnati, Ohio. Bottle. Des. 69,486; Feb. 23.

Bridges, A. S., et al. (See Nesmith, Samuel D., assignor.)

Brigham, Edward F., and J. N. Daniels, Newark, N. J., assignors to Benjamin & Johnes. Sewing machine. 1,574,184; Feb. 23.

Brigham, Edward F., and J. N. Daniels, Newark, N. J., assignors to Benjamin & Johnes. Automatic work-feed control for sewing machines. 1,574,185; Feb. 23.

Brinkman, Oscar F., assignor of one-half to M. Klivansky, Lancaster, Pa. Attachment for motor vehicles. 1,573,910; Feb. 23.

Briscoe, Walter W., Staunton, Va. Cigar and cigarette light extinguisher. 1,574,599; Feb. 23.

Brown, Clarence N., Colton, Calif. Soldering iron. 1,574,361; Feb. 23.

Brown, David. (See Stern, C., and Brown.)

Brown, Ellis E., Springmont, Pa. Safety connection for power transmission. 1,574,466; Feb. 23.

Brown, Frank W., Fort Dodge, Iowa. Snowplow. 1,574,230; Feb. 23.

Brewer, Fred J. (See Lehman, W., Brewer, Hoar, Johnston, and Fykse.)

Brown-Lipe Gear Company. (See Sweet, Henry W., assignor.)

Brown, Robert, Donaghmore, Ireland. Cooking oven. 1,574,467; Feb. 23.

Browne, Vere B., Brackenridge, Pa. Making magnetic alloys. 1,574,550; Feb. 23.

Brucker, Ferdinand F., assignor to The Miller Rubber Company, Akron, Ohio. Core or mandrel. 1,574,600; Feb. 23.

Brundage, James W., assignor to The Miller Rubber Company, Akron, Ohio. Steering-gear check. 1,574,601; Feb. 23.

Buchanan, Edward R., Pittsburgh, Pa. Windshield. 1,574,022; Feb. 23.

Buck, Sterling P. (See Saurez, Joseph M., assignor.)

Bucyrus Company. (See Bager, S. R. W. M., and Lehman, assignors.)

Bucyrus Company. (See Lehman W., Brewer, Hoar, Johnston, and Fykse, assignors.)

Buda Company, The. (See Gormley, Frank L., assignor.)

Budrow, William A., Pittsfield, Mass. Golf tee. 1,573,911; Feb. 23.

Bullard, Edward P., jr., assignor to The Bullard Machine Tool Co., Bridgeport, Conn. Multiple-spindle-machine tool. 1,574,726; Feb. 23.

Bullard, Edward P., jr., assignor to The Bullard Machine Tool Co., Bridgeport, Conn. Multiple-spindle continuous drilling machine. 1,574,727; Feb. 23.

Bullard Machine Tool Co., The. (See Bullard, Edward P., jr., assignor.)

Bullen, Clare H., assignor to Tuerck Mackenzie Machine Co., Portland, Oreg. Apparatus for making concrete pipe. 1,574,421; Feb. 23.

Bulmer, J. H., et al. (See Nesmith, Samuel D., assignor.)

Bumford, Edward, Birmingham, Ala. Rolling hollow steel. 1,574,551; Feb. 23.

Burch, Allen P., Whittier, Calif. Inset casing float valve. 1,574,537; Feb. 23.

Burdwise, Aaron, Baltimore, Md. Hand pick for string instruments. 1,573,912; Feb. 23.

Burdhard, Frederick A., New York, N. Y. Toilet-flushing device. 1,574,602; Feb. 23.

Burnett, W. J. (See Montgomery, James W., assignor.)

Burns, William. (See Wilke, F. L., and Burns.)

Burt, Alfred N. (See Banks, P. W., and Burt.)

Burtis, William T., Glen Head, N. Y. Cesspool. 1,574,603; Feb. 23.

Bush, John J., Dayton, Ohio. Foldable tent. 1,574,339; Feb. 23.

Buttery, Arthur R. (See Woodward, F. W., and Buttery.)

Buttery, Mabel A. (See Woodward, F. W., and Buttery, assignors.)

Cadenel, Louis, Paris, France. Electric safety combination lock. 1,573,802; Feb. 23.

Cadgène, Ernest, Englewood Cliffs, and G. Dupont, Paterson, N. J. Method and machine for decorating fabrics. 1,574,063; Feb. 23.

Caesar, Frank J., La Grange, assignor to R. Williamson & Co., Chicago, Ill. Candle cup. Des. 69,488; Feb. 23.

Caesar, Frank J., La Grange, assignor to R. Williamson & Co., Chicago, Ill. Ball-lamp adapter. Des. 69,489; Feb. 23.

Caesar, Frank J., La Grange, assignor to R. Williamson & Co., Chicago, Ill. Canopy for lighting fixtures. Des. 69,490; Feb. 23.

Caesar, Frank J., La Grange, assignor to R. Williamson & Co., Chicago, Ill. Canopy for lighting fixtures. Des. 69,491; Feb. 23.

Cahoon, Joseph C. (See Crosby, Frank B., assignor.)

Calder, John A. (See Davis, C. W., and Calder.)

California Canning Machinery Co. (See Wilcox, George, assignor.)

Callahan, E. J., et al. (See Nesmith, Samuel D., assignor.)

Callahan, Isabel G. (See Callahan, John F., assignor.)

Callahan, John F., assignor to I. G. Callahan, Brockton, Mass. Hemostatic forceps. 1,574,362; Feb. 23.

Caloric Gas Stove Works. (See Sulzbach, Louis, assignor.)

Calvert, Robert, Lompoc, assignor to The Celite Company, Los Angeles, Calif. Siliceous alkaline-earth product and making the same. 1,574,363; Feb. 23.

Camp, Percy B., Maywood, Ill., assignor to Universal Draft Gear Attachment Company. Uncoupling device for railway cars. 1,573,803; Feb. 23.

Campbell, Charles W. R., Driehoek, and F. G. A. Roberts, Johannesburg, Transvaal, South Africa. Moving-lens cinematograph apparatus. 1,573,804; Feb. 23.

Campbell, Frank H., Lewisburg, W. Va. Carrier or holder for artificial bait. 1,574,416; Feb. 23.

Campbell Wire Specialty Works. (See Kridler, Bernie C., assignor.)

Carlson, Gustav A., assignor to The Boye Needle Company, Chicago, Ill. Embroidery hoop. 1,574,364; Feb. 23.

Carroll, Andrew L., assignor of one-third to F. D. Johnson, St. Louis, Mo. Car wheel. 1,574,231; Feb. 23.

Cary Manufacturing Co. (See Cary Spencer C., assignor.)

Cary, Melbert B., New York, N. Y. Lamp structure. 1,573,805; Feb. 23.

Cary, Spencer C., assignor to Cary Manufacturing Co., Brooklyn, N. Y. Welding. Re16,276; Feb. 23.

Case, John D., Olean, N. Y. Combined ax and blade guard therefor. 1,574,232; Feb. 23.

Casey, John J., Gloucester, Mass., assignor to Kant Clog Specialty Company. Strainer for gasoline. 1,574,365; Feb. 23.

Casper, William L., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission circuits. 1,573,913; Feb. 23.

Caterpillar Tractor Co. (See Thoen, Lowell H., assignor.)

Celite Company, The. (See Calvert, Robert, assignor.)

Celite Company, The. (See Endres, Herbert A., assignor.)

Chadwick, Lee S., Shaker Heights Village, assignor to Perfection Stove Company, Cleveland, Ohio. Sheet-metal construction. 1,574,186; Feb. 23.

Chamberlain, George L., Chicago, Ill. Electrical connection for transformers and the like. 1,574,064; Feb. 23.

Chamberlain, William T., New York, N. Y. Automatic shifter. 1,574,004; Feb. 23.

Chandler, Orville L., Stamford, N. Y. Log-sawing machine. 1,573,806; Feb. 23.

Chapman, Leslie G., Bangor, Me. Towline for automobiles. 1,574,552; Feb. 23.

Charnock, George H., Buffalo, N. Y. Silencer for gas-engine valve mechanism. 1,573,962; Feb. 23.

Chartier, Frank, Duluth, Minn. Drag. 1,574,605; Feb. 23.

Chase, Charles B., Fall River, Mass. Fabric and in loom employed in the manufacture thereof. 1,573,807; Feb. 23.

Chase, Irwin, Bayonne, N. J., assignor to The Elco Works of the Electric Boat Company. Door mounting. 1,574,553; Feb. 23.

Chein, Julius, New York, N. Y. Toy filling station. Des. 69,492; Feb. 23.

Cheney, Herbert W., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Switch. 1,574,417; Feb. 23.

Chestnut and Smith Corporation. (See Oberfell, G. G., Ballard, Alden, Utsinger, and Lentz, assignors.)

Chicago Carton Company. (See Hayes, Charles G., assignor.)

Chipka, Andrew, Lackawanna, N. Y. Dimmer shade for motor-vehicle headlights. 1,574,554; Feb. 23.

Christopherson, Gautier A., San Francisco, Calif. Paper-hanger's knife attachment. 1,574,641; Feb. 23.

Ciardi, Frank, Dover, N. J. Bottle. Des. 69,493; Feb. 23.

Cimorosi, Alberto, Elkton, Md. Fuse. 1,573,914; Feb. 23.

Cincinnati Milling Machine Company, The. (See Einstein, S., and Isler, assignors.)
Clapp, Robert M., Alhambra, Calif. Spout and seal for containers. 1,573,915; Feb. 23.
Clark-Cutler-McDermott Co. (See McDermott, Thomas S., assignor.)
Clarke, Benjamin. (See Duggan, William H., assignor.)
Clement, Charles G., assignor to Highway Trailer Company, Edgerton, Wis. Trailer hitch. 1,574,468; Feb. 23.
Clement, Charles G., assignor to Highway Trailer Company, Edgerton, Wis. Drawbar lock. 1,574,469; Feb. 23.
Cleveland Brass Manufacturing Company, The. (See Costello, Joseph A., assignor.)
Cleveland Trust Company, The. (See Howdeshell, Roland M., assignor.)
Clift, John H., Fredonia, Ky. Hayfork signaling device. 1,573,808; Feb. 23.
Clum Manufacturing Company. (See Winning, Robert K., assignor.)
Coe, Harrison S., Mound City, Kans., assignor, by mesne assignments, to The Cycle Company, Colorado Springs, Colo. Filter. 1,574,556; Feb. 23.
Coe, Harrison S., Mound City, Kans., assignor, by mesne assignments, to The Cycle Company, Colorado Springs, Colo. Filtering apparatus. 1,574,557; Feb. 23.
Coe, Harrison S., Mound City, Kans., assignor, by mesne assignments, to The Cycle Company, Colorado Springs, Colo. Filtering. 1,574,558; Feb. 23.
Coffee, Bassett M., New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. Bearing construction. 1,574,470; Feb. 23.
Cohn, Leon, Paris, France. Cake of soap or similar article. Des. 69,494; Feb. 23.
Cole, John A., Chicago, Ill. Apparatus for testing water mains. 1,574,366; Feb. 23.
Columbus Dental Manufacturing Company, The. (See Pickering, Lafayette, assignor.)
Commander, Paul P., Doerun, Ga. Printing mechanism. 1,574,367; Feb. 23.
Commonwealth Steel Company. (See Ashe, William O., assignor.)
Commonwealth Steel Company. (See Pflager, Harry M., assignor.)
Condit Electrical Manufacturing Corporation. (See Ainsworth, Chester D., assignor.)
Condit Electrical Manufacturing Corporation. (See O'Keeffe, George W., assignor.)
Coney, James D., assignor to Star Service Hanger Co., Detroit, Mich. Garment hanger. 1,574,065; Feb. 23.
Connelly, James A., Hamilton, Ohio. Brake shoe. 1,574,555; Feb. 23.
Connors, Cornelius J., Los Angeles, Calif. Chain. 1,574,066; Feb. 23.
Conroy, Michael T., Akron, assignor of one-half to H. M. Groue, Cuyahoga Falls, Ohio. Rim and tire construction for vehicle wheels. 1,574,277; Feb. 23.
Consolidated Car-Heating Company. (See Hynes, Lee P., assignor.)
Cook, Adoniram J., Westerlo, N. Y. One-piece rail anchor. 1,574,067; Feb. 23.
Cooke, Harry, jr., Garfield, N. J. Automatically controlling traffic. 1,574,606; Feb. 23.
Cooley, Asa B., Hubbard Woods, assignor to Montgomery Ward & Co., Incorporated, Chicago, Ill. Tire. Des. 69,495; Feb. 23.
Cooley, Asa B., Hubbard Woods, assignor to Montgomery Ward & Co., Incorporated, Chicago, Ill. Tire. Des. 69,496; Feb. 23.
Cooley, Asa B., Hubbard Woods, assignor to Montgomery Ward & Co., Incorporated, Chicago, Ill. Tire. Des. 69,497; Feb. 23.
Co-Operative Utilities Co. (See Bodfish, Howes, assignor.)
Corcoran, George E., Washington, D. C. Headlight lens. 1,574,607; Feb. 23.
Cordley, Henry G., Glen Ridge, N. J., and G. R. Long, Waterbury, Conn. Stand for water coolers. 1,574,608; Feb. 23.
Costello, Joseph A., assignor to The Cleveland Brass Manufacturing Company, Cleveland, Ohio. Faucet. 1,574,368; Feb. 23.
Cover, Monroe A., Okmulgee, Okla. Pen. 1,574,369; Feb. 23.
Coviello, Pasquale, Highland Mills, N. Y. Scalp-tonic applicator. 1,574,418; Feb. 23.
Coxe, William G., Philadelphia, Pa., and G. M. Lagergren, Wilmington, Del. Marine-engine governor. 1,574,559; Feb. 23.
Cramer, William, St. Louis, Mo. Folding bed. 1,573,809; Feb. 23.
Crawford, Thomas A., Sacramento, Calif. Oil burner. 1,574,560; Feb. 23.
Cretney, Thomas G., Madison, Wis. Traffic marker. 1,574,738; Feb. 23.
Crickmer, Charles S., assignor to The Guilberson Corporation, Dallas, Tex. Swivel joint. 1,574,187; Feb. 23.
Crisp, Thomas F. M., assignor of one-half to G. W. Johnson, North Uvalde, Tex. Spring mounting for vehicles. 1,573,916; Feb. 23.
Crites, William D., Duluth, Minn. Gas burner. 1,574,668; Feb. 23.
Crooks, Charles L. (See Crompton, E., and Crooks.)
Crompton, Edwin, and C. L. Crooks, assignors to The Positive Lock Company, Pueblo, Colo. Latch or keeper means. 1,574,023; Feb. 23.
Crompton, Edwin, and C. L. Crooks, assignors to The Positive Lock Company, Pueblo, Colo. Latch. 1,574,024; Feb. 23.
Crompton, George, jr., Worcester, Mass. Loom temple. 1,574,415; Feb. 23.
Crosby, Frank B., assignor of one-half to J. C. Cahoon, Seattle, Wash. Traffic signal. 1,574,538; Feb. 23.
Crouse-Hinds Company. (See Bissell, C. H., and Olley, assignors.)
Cumner, Arthur B., Philadelphia, Pa. Draining motor-vehicle crank cases and the like. 1,574,234; Feb. 23.
Cunningham, Charles A., Boston, Mass. Anchor. 1,574,471; Feb. 23.
Cunningham, Christopher C., assignor to A. G. Mooney Limited, Montreal, Quebec, Canada. Apparatus for making shoe shanks. 1,573,810; Feb. 23.
Currier, Alfred M., Aberdeen, Wash. Insertable saw tooth and holder therefor. 1,574,609; Feb. 23.
Curtiss, Harold E., Monroe, Mich. Centrifugal switch. 1,574,370; Feb. 23.
Cushing, Emily C., Denver, Colo. Display rack. 1,574,371; Feb. 23.
Custer, Ida M., Rahway, N. J. Lubricating composition. 1,574,642; Feb. 23.
Cutler, Elmer D., et al. (See Daugherty, Claude, assignor.)
Cutler, William C., Glendale, Calif. Vending-machine casing. Des. 69,498; Feb. 23.
Cycle Company, The. (See Coe, Harrison S., assignor.)
Czapek, Emil and R. Weingand, Bomlitz, near Walsrode, Germany. Dissolving device. 1,574,561; Feb. 23.
Daae, Reinhardt, Youngstown, Ohio. Fuel feed for gas producers. 1,573,811; Feb. 23.
Dailey, Clyde C., Terra Cotta, assignor to A. S. Wolfe, Washington, D. C. Plunger. 1,573,812; Feb. 23.
Daly, John J. (See Shopneck, Henry P., assignor.)
Dameron, Napoleon, and R. Rhodes, Hamilton, Wash. Choker hook. 1,574,372; Feb. 23.
Damm, Samuel F., assignor to Niagara Wall Paper Company, Niagara Falls, N. Y. Cutting paper. 1,573,813; Feb. 23.
Daniels, James N. (See Brigham, E. F., and Daniels.)
Darbourne, William H. (See Greaves, T., Darbourne, and Warner.)
Daugherty, Claude, assignor of one-fourth to L. A. Woods and one-fourth to E. D. Cutler, Smithville, Mo. Draft appliance. 1,574,539; Feb. 23.
Davis, Charles W. and J. A. Calder, assignors to The Torrington Company, Torrington, Conn. Retainer for radial ball bearings. 1,574,278; Feb. 23.
Davis, David L., assignor to W. A. Sheaffer Pen Company, Fort Madison, Iowa. Fountain pen. Des. 69,499; Feb. 23.
Davis, Ernest W., Oak Park, assignor to The Bassick Manufacturing Co., Chicago, Ill. Lubricant compressor. 1,574,279; Feb. 23.
Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Filling replenishing shuttle. 1,574,643; Feb. 23.
Davis, Lewis C., Baltimore, Md. Boiler-water-level automatic control apparatus. 1,574,235; Feb. 23.
Davis & Turber Machine Company. (See Putnam, Walter T., assignor.)
Davis, William J., Redondo Beach, Calif. Motor-vehicle direction-indicating signal. 1,574,146; Feb. 23.
De Cew, Judson A., Mount Vernon, assignor to Process Engineers, Inc., New York, N. Y. Preventing froth on paper machines. 1,573,814; Feb. 23.
Decker, Alonzo G. (See Black, S. D., and Decker.)
Dedouch, Joseph A., Oak Park, Ill. Medallion mounting. 1,574,373; Feb. 23.
De Haas, Harry A., Mount Lebanon Township, Allegheny County, Pa. Swinging-window structure. 1,573,917; Feb. 23.
De Haven, Joseph C. (See Hogg, M., and De Haven.)
De Jarnette, Henry W., Des Moines, Iowa. Slip-sheeting device. 1,574,148; Feb. 23.
Dekoff, George, Chicago, Ill. Automatic-feed toothpick holder. 1,574,069; Feb. 23.
Delaney, Harry D., Memphis, Tex. Combined shaving and tooth brush. 1,574,610; Feb. 23.
Delliplain, Morse. (See Kolb, Frank A., assignor.)
De Long, George L. (See Hompes, H., and De Long.)
Dembek, Anthony F., Brooklyn, N. Y. Automobile tire. 1,574,611; Feb. 23.
Demetropoulus, Peter, Chicago, Ill. Article of furniture. 1,574,070; Feb. 23.
Dennison, George E. (See Frampton, D. A., and Dennison.)
Derus, Albert E., Chicago, Ill. Vending-machine casing. Des. 69,500; Feb. 23.
Detachable Heels Limited. (See Banks, P. W., and Burt, assignors.)
Detroit Patents Holding Company. (See Haggart, John C., jr., assignor.)
De Vries, Nickolas G. (See Franke, D. H., and De Vries.)
Dewhirst, Walter J., Los Angeles, Calif. Pit tool. 1,573,918; Feb. 23.
Dhunjibhoy, Sorabji, Marha Tal, India. Railway-train-stopping device. 1,573,919; Feb. 23.

Diamond Match Company, The. (See Elder, W. J., and Morehouse, assignors.)
Dickerson, Glenn H., assignor of one-third to D. Hamilton and one-third to H. Riechel, Grand Rapids, Mich. Board-dressing machine. 1,574,419; Feb. 23.
Dickerson, Orman W., Oklahoma City, Okla. Rotary underreamer drill. 1,574,280; Feb. 23.
Dickinson, Neville S. (See Norton, C., Dickinson, and Scott.)
Diederichs, William J., and A. Hayes, Ames, Iowa. Treating iron. 1,574,374; Feb. 23.
Diederichs, William J., and A. Hayes, Ames, Iowa. Treating iron. 1,574,375; Feb. 23.
Diederichs, William J., and A. Hayes, Ames, Iowa. Treating iron. 1,574,376; Feb. 23.
Diederichs, William J., and A. Hayes, Ames, Iowa. Treating iron. 1,574,377; Feb. 23.
Dinkelspiel, Lawrence, West New York, N. J., assignor to Harnapp, Dinkelspiel & Co. Inc. Lace trimming for doily or similar article. Des. 69,501; Feb. 23.
Dion, Frank E. (See Tautz, H., and Dion.)
Dismer, Henry L., Davenport, Iowa. Machine for wrapping bed mattresses. 1,573,920; Feb. 23.
Dobinson, William J., Somerville, assignor of one-half to A. W. Finlay, Brookline, Mass. Collotype printing plate and making the same. 1,574,378; Feb. 23.
Dodge, George W., Knoxville, Tenn. Train-control system. 1,573,921; Feb. 23.
Dolan, James A. (See Strang, S., and Dolan.)
Doran, Mortimer, Waterbury, Conn. Combination shade bracket. 1,573,815; Feb. 23.
Douglas Company, The. (See Hohmeister, Arthur E., assignor.)
Doyle, George H., Holtsville, N. Y. Fountain pen. 1,574,281; Feb. 23.
Draper Corporation. (See Davis, Harry A., assignor.)
Draper Corporation. (See Hollins, Denis M., assignor.)
Draper, Corporation. (See Sorrells, James A., assignor.)
Dreher, Gustave F., Schenectady, N. Y., assignor to General Electric Company. Impregnated insulation. 1,574,562; Feb. 23.
Driver-Harris Company. (See Henderson, John C., assignor.)
Drucklieb, Jeanne L., New York, N. Y. Book end. Des. 69,502; Feb. 23.
Dvorsky, Frank, New York, N. Y. Automatic cigar and cigarette box. 1,574,071; Feb. 23.
Duff, Samuel E., Ben Avon, assignor of one-half to A. W. Heinle, Crafton, Pa. Metallic structure and structural unit. 1,574,563; Feb. 23.
Duffing, Georg, Hamburg, Germany. Apparatus for lubricating the axle bearings of vehicles and the like. 1,574,236; Feb. 23.
Duggan, William H., assignor of one-half to B. Clarke, Chicago, Ill. Battery cell and handle. 1,573,922; Feb. 23.
Duncan, William, Los Angeles, Calif. Scalp-massaging device. 1,574,540; Feb. 23.
Duncan, William M., Alton, Ill. Chain grate. 1,573,816; Feb. 23.
Du-Plex Envelope Corporation. (See Redington, John C., assignor.)
Dupont, George. (See Cadgène, E., and Dupont.)
Dupree, Frederick G. W. (See Smith, A. V., and Dupree.)
Earl, W. D., & Co. (See Fiske, Charles F., assignor.)
Eaton Axle and Spring Company, The. (See Weymouth, Harry G., assignor.)
Eaton, Robert A., Haddon Heights, N. J. Cement-block mold box. 1,574,612; Feb. 23.
Edelson, Samuel, New York, N. Y. Doorlock. Des. 69,503; Feb. 23.
Edler, Hans, Gelsenkirchen, Germany. Apparatus for the electrical purification of gases. 1,574,237; Feb. 23.
Edwards, Beanreguard, Brunswick, Ga. Portable fence. 1,573,817; Feb. 23.
Einstein, Sol, Cincinnati, and H. R. Isler, Norwood, assignor, by mesne assignments, to The Cincinnati Milling Machine Company, Cincinnati, Ohio. Shock-absorbing motion accelerator. 1,573,818; Feb. 23.
Elco Works of the Electric Boat Company, The. (See Chase, Irwin, assignor.)
Elder, William J., and C. N. Morehouse, Oswego, N. Y., assignors to The Diamond Match Company, Chicago, Ill. Impregnating match splints to prevent afterglow. 1,574,238; Feb. 23.
Electric Service Supplies Co. (See Kopprasch, Alexander H., assignor.)
Electro Thermostatic Control Company. (See Goodhue, Julian G., assignor.)
Elevator Supplies Company. (See Norton, C., Dickinson, and Scott, assignors.)
Elevator Supplies Company. (See Weeks, William W., assignor.)
Elliott, Harold F., Palo Alto, assignor, by mesne assignments, to Federal Telegraph Company, San Francisco, Calif. Radiofrequency arc. 1,574,472; Feb. 23.
Elliott, Harold F., and J. A. Miller, Palo Alto, assignors, by mesne assignments, to Federal Telegraph Company, San Francisco, Calif. Radiofrequency system. 1,574,473; Feb. 23.
Ellis, Lawrence E., New York, N. Y. Textile fabric. Des. 69,504; Feb. 23.
Emert, Charles S., Peoria, Ill. Tamping machine. 1,574,379; Feb. 23.
Emery Automatic Chain Stores, Inc. (See Bradley, Richard C., assignor.)
Endebrock, Robert A., assignor to The Trailmobile Company, Cincinnati, Ohio. Lock. 1,574,072; Feb. 23.
Endert, Dirk C. (See Mulder, J., and Endert.)
Endres, Herbert A., Lompoc, assignor to The Celite Company, Los Angeles, Calif. Article of manufacture and process of making same. 1,574,380; Feb. 23.
Englen, Frederick J., Omaha, Nebr., assignor to Toledo Scale Company, Toledo, Ohio. Locking device for scales. 1,574,073; Feb. 23.
Entenmann, Eugene, Stuttgart, Germany. Drawing carriage for drawing machines. 1,574,381; Feb. 23.
Erie City Iron Works. (See Martin, Stanton C., assignor.)
Escofet, Juan O. (See Triana, Rodrigue J. A. and A. E. L., and Escofet.)
Fallis Inc. (See Braun, William H., assignor.)
Falor, Abram E., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for vulcanizing hollow articles. Re16,271; Feb. 23.
Faltus, Edward, New York, N. Y. Printing-press ink fountain. 1,574,474; Feb. 23.
Fanet, Louis L. E. (See Béal, P. E., and Fanet.)
Farnsworth, William Y., Seattle, Wash. Forming machine. 1,574,564; Feb. 23.
Farrow, Valentine G., administratrix. (See Gits, Alphons H.)
Farup, Peder, Slemdal, near Christiania, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Dry reduction of iron ore. 1,574,382; Feb. 23.
Fauser, George, assignor to Fisher Body Corporation, Detroit, Mich. Doorcheck. 1,574,340; Feb. 23.
Federal Telegraph Company. (See Elliott, H. F., and Miller, assignors.)
Federal Telegraph Company. (See Elliott, Harold F., assignor.)
Feind, Robert F., West Allis, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Dust collector or filter. 1,574,422; Feb. 23.
Feldstein, Ben J., New York, N. Y. Baby rattle. 1,574,341; Feb. 23.
Fellowes, Harry L., assignor to Bankers Box Company, Chicago, Ill. Box closure. 1,574,737; Feb. 23.
Ferguson, John A., Orange Park, Fla. Apparatus for molding building blocks. 1,574,565; Feb. 23.
Fern, Oscar, Newburyport, Mass. Shank stiffener for shoes. 1,574,342; Feb. 23.
Ferngren, Enoch T., Toledo, Ohio, assignor to Hartford-Fairmont Company. Method and apparatus for delivering molten glass. 1,574,739; Feb. 23.
Fesler, Milton A., Stamford, Conn., assignor to Petroleum Heat & Power Company, Boston, Mass. Safety device for burners. 1,574,728; Feb. 23.
Fessenden, Reginald A., Chestnut Hill, Mass. Channel pilot. 1,574,074; Feb. 23.
Fields, Joseph A., New York, N. Y. Perfume container. Des. 69,505; Feb. 23.
Fiering, Isidore, et al. (See Fiering, M., and Schneider, assignors.)
Fiering, Mayer, Brooklyn, and I. Schneider, assignors to themselves and I. Fiering, New York, and S. Weintraub, Brooklyn, N. Y. Hand-carried receptacle. 1,574,644; Feb. 23.
Finlay, Albert W. (See Dobinson, William J., assignor.)
Finder & Urbanek. (See Finder, George A., assignor.)
Finder, George A., assignor, by mesne assignments, to Finder & Urbanek, Chicago, Ill. Reed trimmer. 1,574,420; Feb. 23.
Firman, Harry, Woodhaven, N. Y. Lamp shade. 1,574,613; Feb. 23.
Fischer, Joseph C., Milwaukee, Wis. Water-temperature regulator and pressure-control valve. 1,574,075; Feb. 23.
Fish, Frederick K., jr., New York, N. Y. Recovering by-products from plant substances and the like. 1,574,614; Feb. 23.
Fish, Frederick K., jr., Windsor Mills, Canada, assignor to Wood Products & By Products Corporation. Making paper pulp. 1,574,026; Feb. 23.
Fisher Body Corporation. (See Fauser, George, assignor.)
Fisher, Henry W., Perth Amboy, N. J., assignor to Standard Underground Cable Company, Pittsburgh, Pa. High-voltage cable and method of maintenance. 1,574,076; Feb. 23.
Fisk Rubber Company, The. (See Fuller, Everett W., assignor.)
Fiske, Charles F., Leominster, assignor to W. D. Earl & Co., Boston, Mass. Container. 1,574,566; Feb. 23.
Fitzhugh, Champe G., Washington, D. C. Can. 1,574,239; Feb. 23.
Flannery Bolt Company. (See Landgraf, Frederick K., assignor.)
Fleming, Cornelius S., Berkeley, assignor to The Paraffine Companies, Inc., San Francisco, Calif. Roofing material. 1,574,615; Feb. 23.
Fletcher, Harvey, assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,573,924; Feb. 23.
Fletcher, Herbert E., Westford, Mass. Pavement and process of making. 1,573,923; Feb. 23.

Flettner, Anton, The Hague, Netherlands. Device for steering aircraft. 1,574,567; Feb. 23.

Fonty, Henri, assignor to Societe Anonyme des Etablissements Lefaive and J. J. Knecht, Paris, France. Carrier-drive head for lace-braiding machines. 1,574,240; Feb. 23.

Fonty, Henri, assignor to Société Anonyme des Etablissements Lefaive, Jean Jacques Knecht, Paris, France. Bobbin-carrier for luce-braiding machines. 1,574,616; Feb. 23.

Ford Motor Company. (See Paloski, Joseph B., assignor.)

Foster, Ephriam A., Massillon, Ohio. Traction-increasing device for motor vehicles. 1,574,729; Feb. 23.

Foster, Walter L., Whittier, Calif. Shock absorber. 1,574,730; Feb. 23.

Foster, Walter L., Whittier, assignor of one-fourth to W. Meredith, Huntington Beach, and one-fourth to W. H. Taylor, South Pasadena, Calif. Core barrel and rotary bit. 1,574,731; Feb. 23.

Fox, Maud C., New York, N. Y. Clock case. Des. 69,506; Feb. 23.

Fox, Ross, Los Angeles, Calif. Switch. 1,574,475; Feb. 23.

Frampton, David A., and G. E. Dennison, Youngstown, Ohio. Rail joint. 1,574,189; Feb. 23.

Francis, John A., Parkerton, Wyo. Ripper for well casings. 1,574,241; Feb. 23.

Francke, William J., assignor, by mesne assignments, to John Waldron Corporation, New Brunswick, N. J. Flexible coupling. 1,574,568; Feb. 23.

Franke, David H., and N. G. De Vries, Brooklyn, N. Y. Soldering iron. 1,573,925; Feb. 23.

Franklin, William E., Earlham, Iowa. Pole setter. 1,574,147; Feb. 23.

Frantz, Ernst, Newark, N. J. Waterproof pocket. 1,574,077; Feb. 23.

Fraser, John D., Leamington, Ontario, Canada. Motor-vehicle transmission. 1,574,383; Feb. 23.

Frazier, Robert T., D. W. Boddy and C. F. Hamlin, assignors to Tennessee Furniture Corporation, Chattanooga, Tenn. Refrigerator. 1,574,569; Feb. 23.

Frazine, William H., Modesto, Calif. Shock absorber. 1,573,926; Feb. 23.

Fried. Krupp Aktiengesellschaft. (See Akemann, Walther, assignor.)

Friedman, Jacob H., New York, N. Y. Protective device. 1,574,188; Feb. 23.

Frederics, Ernest O., New York, N. Y. Hair-drying machine. 1,574,343; Feb. 23.

Freeburg, Frank M., Philadelphia, Pa. Railway switch. 1,574,027; Feb. 23.

Freiburger, Ignatius P., Fort Wayne, Ind. Rake. 1,573,819; Feb. 23.

Frensdorff, Willy, assignor to Actien-Gesellschaft Weser, Bremen, Germany. Electric driving installation. 1,574,242; Feb. 23.

Francis, John M. (See Ratliff, D. S., Francis, and Reese.)

Friedley-Voshardt Co. (See Wellman, Lester R., assignor.)

Froussard, Albert F., St. Louis, Mo. Shoe-worker's press. 1,574,078; Feb. 23.

Fulford, Lester E., Edgewood, assignor to Fulford Mfg. Co., Providence, R. I. Chain construction. 1,573,927; Feb. 23.

Fulford Mfg. Co. (See Fulford, Lester E., assignor.)

Fuller, Everett W., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Age-resisting rubber compound and making the same. 1,573,928; Feb. 23.

Fykse, Mitchell L. (See Lehman, W., Brewer, Hoar, Johnston, and Fykse.)

G & J Tire Company. (See Null, Ralph G., assignor.)

Gade, Samuel, New York, N. Y. Waste and overflow fixture for bathtubs. 1,573,820; Feb. 23.

Gall, William F., Russellton, Pa. Strainer. 1,573,929; Feb. 23.

Gallagher, Alfred H., assignor to Tanners Products Company, Chicago, Ill. Deodorizing hair, feathers, and the like and product thereof. 1,574,617; Feb. 23.

Gallagher, Alfred H., assignor to Tanners Products Company, Chicago, Ill. Treating apparatus. 1,574,618; Feb. 23.

Gallesio-Piuma, Michele L., Piemonte, Italy. Filling of honeycombs with sweet liquid for the nourishment of bees. 1,574,256; Feb. 23.

Galvin, Wade S., assignor to The Akron Standard Mold Company, Akron, Ohio. Resilient tire. Des. 69,507; Feb. 23.

Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Festooning rack. 1,573,821; Feb. 23.

Gardner, Joseph B., assignor to Hammer-Bray Company, Oakland, Calif. Air feed and vent for closed-top gas stoves. 1,574,079; Feb. 23.

Garner, James C., Houston, Tex. Machine for reginning cotton and other fibrous materials. 1,574,844; Feb. 23.

Garner, James C., Houston, Tex. Mechanism for cleaning cotton fibers. 1,574,384; Feb. 23.

Garrett, Garfield A., Dorrance, Kans. End gate. 1,574,282; Feb. 23.

Gatch, Robert F., Columbus, Ohio. Vehicle light. 1,573,822; Feb. 23.

Gates, Charles C., Altoona, Pa. Roof. 1,574,345; Feb. 23.

Gates, Leroy G., Bakersfield, assignor to Standard Oil Company, San Francisco, Calif. Apparatus for pumping deep wells. 1,574,080; Feb. 23.

Gates, Leroy G., Bakersfield, assignor to Standard Oil Company, San Francisco, Calif. Apparatus for pumping deep wells. 1,574,081; Feb. 23.

Geummill, James L., assignor of one-half to W. A. Ludlow, Pontiac, Mich. Explosive-mixture compressor. 1,574,645; Feb. 23.

General Electric Company. (See Dreher, Gustave F., assignor.)

General Electric Company. (See Hall, John L., assignor.)

General Electric Company. (See Holmes, Charles E., assignor.)

General Electric Company. (See Kern, Carl, assignor.)

General Electric Company. (See Lougee, Norman A., assignor.)

General Electric Company. (See Unger, Magnus, assignor.)

General Motors Corporation. (See Midgley, Thomas, jr., assignor.)

General Railway Signal Company. (See Leake, Richard C., assignor.)

Gerard, Victor, assignor to Mystic Mirror Inc., Los Angeles, Calif. Advertising frame. Des. 69,508; Feb. 23.

Gerasch, Emil, G. m. b. H. (See Oheim, A. C., Syhre, and Hentschel, assignors.)

Gerfin, Paris M., East Petersburg, Pa. Pruning implement. 1,574,283; Feb. 23.

Gibbs, Stanley F. (See Harmon, I. L., and Gibbs.)

Gibson, Felix A., Martin County, Fla. Nut lock. 1,574,619; Feb. 23.

Gill, Charles H., Chicago, Ill., assignor to The Autodrive Company. Differential transmission mechanism. 1,574,620; Feb. 23.

Gillett, Harry. (See Loucks, J. F., and Gillett.)

Gillinder, Edgar A., Philadelphia, Pa. Lighting fixture. Des. 69,509; Feb. 23.

Gillis, John H., Gainesville, Tex. Peeler. 1,574,284; Feb. 23.

Gillis, Julius H., Elizabeth, N. J., assignor, by mesne assignments, to Anaconda Sales Company. Process and apparatus for manufacturing roofing elements. 1,574,285; Feb. 23.

Gilmore, Millard, Oak Park, Ill. Louver. 1,573,930; Feb. 23.

Gilson Manufacturing Company. (See Hansen, Oswald H., assignor.)

Glssendanner, Roy L., et al. (See Wesson, Ernest E., assignor.)

Gits, Alphons H., deceased, Chicago, Ill.; V. G. Farrow, administratrix. Lubricating device. 1,574,386; Feb. 23.

Glahn, George J., Owensboro, Ky. Vehicle bumper. 1,574,243; Feb. 23.

Globe Wernicke Co. (See Ringler, William A., assignor.)

Globe Wernicke Co. (See Yeiser, H. C., and Ringler, assignors.)

Going, George G., Middletown, Conn., assignor to Remington-Nolseless Typewriter Corporation, New York, N. Y. Typewriting machine. 1,574,285; Feb. 23.

Goldsmith, Manning, Atlanta, Ga. Internal-combustion engine. 1,574,244; Feb. 23.

Good, Percy J., Camden, Me. Grave marker. 1,574,621; Feb. 23.

Goodhue, Julian G., Evanston, assignor to Electro Thermostatic Control Company, Chicago, Ill. Thermostat. 1,574,346; Feb. 23.

Goodrich, B. F., Company, The. (See Falor, Abram E., assignor.

Goodrich, B. F., Company, The. (See Gammeter, John R., assignor.)

Goodrich, B. F., Company, The. (See Raber, Nelson E., assignor.)

Gormley, Frank L., Brookline, Mass., assignor to The Buda Company, Harvey, Ill. Lifting jack. 1,574,476; Feb. 23.

Gould, Arodd L., Long Beach, Calif. Toy dog. Des. 69,510; Feb. 23.

Gould, Arodd L., Long Beach, Calif. Toy cat. Des. 69,511; Feb. 23.

Gouldbourn, Joseph. (See Bates, A., and Gouldbourn.)

Goulding, Benjamin J. J., Altrincham, assignor to Linotype and Machinery, Limited, London, England. Apparatus for gumming lithographic printing surfaces. 1,574,570; Feb. 23.

Goyne, Charles H., assignor to Goyne Steam Pump Co., Ashland, Pa. Priming system for centrifugal pumps. 1,573,931; Feb. 23.

Goyne Steam Pump Co. (See Goyne, Charles H., assignor.)

Graber, Harvey J., Kitchener, Ontario, Canada. Cushion sole. 1,574,028; Feb. 23.

Grand Specialties Company. (See Sasgen, M. J., and Simonsen, assignors.)

Granger, Louis, C. Mariller, and C. Prache, Paris, France. Distilling volatile products. 1,574,622. Feb. 23.

Grant, Arthur L., Plainfield, N. J. Water purifier. 1,574,477; Feb. 23.

Grasselli Chemical Company. (See Schweitzer, William K., assignor.)

Grau, Louis, Brooklyn, N. Y. Signal cane. 1,574,623; Feb. 23.

Gray, Ellsworth, Houston, Tex. Pump. 1,573,823; Feb. 23.

Gray, Everett E., Los Angeles, Calif. Circuit controller for lens-drilling machines. 1,574,571; Feb. 23.

Greaves, Thomas, W. H. Darbourne, and V. Warner, assignors to The Littlejack Engineering Co. Limited, Mansfield, England. Timber-drawing appliance. 1,574,624; Feb. 23.

Green, David H., San Francisco, Calif. Signal. Re16,272; Feb. 23.

Greene, William C., Company. (See Armstrong, George A., assignor.)

Griffiths, Charles A., Johannesburg, Transvaal, South Africa. Apparatus for distilling carbonaceous materials. 1,573,824; Feb. 23.

Grimmelsen, Georges E., Paris, France. Hydrocarbon burner. 1,574,625; Feb. 23.

Gringe, Casper H., assignor to Waterloo Saddlery Company, Waterloo, Iowa. Hame holder for horse collars. 1,574,478; Feb. 23.

Groenebaum, Wilhelm, Neu-Babelsberg, near Berlin, Germany, assignor to the Firm Naamlooze Vennootschap Financieele Maatschappij "Prelbergen," Amsterdam, Netherlands. Clutch mechanism for sound-reproducing machines and the like. 1,574,286; Feb. 23.

Grossbard, Barnet, San Francisco, Calif. Motor attachment for sewing machines. 1,573,932; Feb. 23.

Groue, Henry M. (See Conroy, Michael T., assignor.)

Grove, Tracy B., Portland, Oreg. Game. 1,574,572; Feb. 23.

Groves, Bonnie J. (See Groves, Ray H., assignor.)

Groves, Ray H., assignor to B. J. Groves, Portland, Oreg. Building blocks. 1,574,191; Feb. 23.

Grünfeld, Alfred, Vienna, Austria. Apparatus for viewing cinematographic film bands. 1,573,825; Feb. 23.

Guest, Ward E., assignor to Ward Manufacturing Company, Chicago, Ill. Method and means for winding. 1,573,933; Feb. 23.

Gulberson Corporation, The. (See Crickmer, Charles S., assignor.)

Gutterman, Sol, Brooklyn, N. Y. Display pad for barrettes and the like. 1,574,192; Feb. 23.

Guyer, Joseph A., assignor of one-half to H. F. Anderson, Marion, Ind. Thermostatic regulator. 1,574,479; Feb. 23.

Haarnagell, Georges, Paris, France. Vehicle-door window. 1,574,387; Feb. 23.

Haas, Philip, Dayton, Ohio. Frostproof closet valve. 1,573,934. Feb. 23.

Hackman, Henry E., Fort Wayne, Ind. Sliding door. 1,574,347; Feb. 23.

Hackman, Otto E., Fort Wayne, Ind. Polish-applying device. 1,574,626; Feb. 23.

Hadley, Charles R., Company. (See Hadley, Charles R., assignor.)

Hadley, Charles R., deceased, by F. D. Barnhill and Pacific Southwest Trust & Savings Bank, executors, Los Angeles, Calif., assignors to Charles R. Hadley Company. Tray binder. 1,573,935; Feb. 23.

Hageman, Aaron M., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Attaching labels to aluminum ware. 1,573,826; Feb. 23.

Hager, George C., Danbury, Conn. Door hasp and catch. 1,574,348; Feb. 23.

Haggart, John C., jr., Alma, assignor, by mesne assignments, to Detroit Patents Holding Company, Detroit, Mich. Two-range transmission mechanism. 1,574,082; Feb. 23.

Hagmaier, William G., West Allis, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Rift splitter. 1,574,423; Feb. 23.

Hähnle, Walter, Stuttgart-Degerloch, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Magneto electric ignition machine. 1,574,646; Feb. 23.

Hähnle, Walter, and A. Kazenmaier, Stuttgart, assignors to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Dynamo machine. 1,574,647; Feb. 23.

Haines, John W., Chanute, Kans. Attachment for plows. 1,574,627; Feb. 23.

Halda, Joseph, Purcell, Kans. Road-grader attachment. 1,574,628; Feb. 23.

Hale, Jackson T., Fulton County, Ga., assignor of one-third to C. L. Hardwick, Cleveland, Tenn. Internal-combustion engine. 1,574,573; Feb. 23.

Hale, Jackson T., Fulton County, Ga., assignor of one-third to C. L. Hardwick, Cleveland, Tenn. Internal-combustion engine. 1,574,574; Feb. 23.

Hall, John L., Schenectady, N. Y., assignor to General Electric Company. Signal system. 1,574,648; Feb. 23.

Hallwell Electric Co. (See Jancke, Benno F., assignor.)

Hamann, Kurt W. E., Trumbull, Conn. Vapor condenser for automobile radiators. 1,574,629; Feb. 23.

Hamilton, De Forest, et al. (See Dickerson, Glenn H., assignor.)

Hamilton, Harry A., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Display receptacle. 1,574,083; Feb. 23.

Hamilton, Harry A., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Display receptacle for a belt slide with an attached chain. 1,574,084; Feb. 23.

Hamilton, Hubert L., Lowman, Ark. Pill tile. 1,573,827; Feb. 23.

Hamilton, James L., Red Bluff, Calif. Stiffening and protecting device for rugs. 1,573,828; Feb. 23.

Hamilton, Lew W., Indianapolis, Ind. Calendar. 1,574,245; Feb. 23.

Hamlin, Curtis F. (See Frazier, R. T., Boddy, and Hamlin.)

Hammer-Bray Company. (See Gardner, Joseph B., assignor.)

Hammer, Charles, Hollis Court Boulevard, Queens County, N. Y. Metal cap. 1,574,085; Feb. 23.

Hammer, Gerhart, and H. K. Berseth, Colfax, Wis. Statuette. Des. 69,512; Feb. 23.

Handoll, Percy G., Lewisham, London, England. Percussive tool for scaling boiler surfaces. 1,574,190; Feb. 23.

Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Double-drum hoist. 1,574,086; Feb. 23.

Hansen, Oswald H., assignor to Gilson Manufacturing Company, Port Washington, Wis. Chair spring. 1,574,087; Feb. 23.

Hansen, Oswald H., assignor to Gilson Manufacturing Company, Port Washington, Wis. Chair. 1,574,088; Feb. 23.

Hapgood, Clarence H., assignor to Toledo Scale Company, Toledo, Ohio. Scale. 1,574,089; Feb. 23.

Hardwick, Christopher L. (See Hale, Jackson T., assignor.)

Harmon, Inez L., Loma Linda, and S. F. Gibbs, Glendale, Calif. Syringe-holding clip. 1,574,575; Feb. 23.

Harnapp, Dinkelspiel & Co. (See Dinkelspiel, Lawrence, assignor.)

Harnett, John T., Philadelphia, Pa. Combination drain vent and water box. 1,574,480; Feb. 23.

Harris, Henry, London, England. Apparatus for refining or separating metals. 1,573,829; Feb. 23.

Harris, Henry, London, England. Refining lead. 1,573,830; Feb. 23.

Hart, Frederick A., New Britain, Conn. Washing machine. 1,574,630; Feb. 23.

Hart, Ivan, Avondale, near Auckland, New Zealand. Window opening and closing apparatus. 1,574,388; Feb. 23.

Hartford-Empire Company. (See Peller, Karl E., assignor.)

Hartford-Empire Company. (See Willetts, Paul G., assignor.)

Hartford-Fairmont Company. (See Ferngren, Enoch T., assignor.)

Hartley, Ralph V. L., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. System of carrier-wave signaling. 1,573,936; Feb. 23.

Hartman, Harry R., Scottdale, Pa. Water-purifying apparatus. 1,574,389; Feb. 23.

Haslett, Warren W., and J. Blair, Baltimore, Md. Electric paint burner. 1,574,193; Feb. 23.

Hatch, Harry A., assignor to Splitdorf Electrical Company, Newark, N. J. Condenser. 1,574,424; Feb. 23.

Hawley, Charles G., assignor to Locomotive Firebox Company, Chicago, Ill. Locomotive fire box. 1,574,029; Feb. 23.

Hayes, Anson. See Diederichs, W. J., and Hayes.)

Hayes, Charles G., assignor to Chicago Carton Company, Chicago, Ill. Box-blank cutting and scoring form and preparing the same. 1,574,030; Feb. 23.

Hecht, Fred J., Lytton, Iowa. End gate. 1,574,031; Feb. 23.

Hedrick, William R., Roanoke, Va. Demountable rim. 1,574,390; Feb. 23.

Heinle, Albert W. (See Duff, Samuel E., assignor.)

Heine, Herman E. (See Schlesinger, L., and Heine.)

Heizer, Levi L., Muscatine, Iowa. Illuminated sign. 1,574,246; Feb. 23.

Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,574,090; Feb. 23.

Hemje, John, Hildreth, Nebr. Attachment for adjusting the fenders of lister cultivators. 1,574,732; Feb. 23.

Henderson, John C., New York, N. Y., assignor to Driver-Harris Company, Harrison, N. J. Producing cast iron. 1,537,937; Feb. 23.

Henrietta, Vincent M., and B. B. Telley, San Francisco, Calif. Storage-tank emergency valve. 1,573,938; Feb. 23.

Henry, George W., jr., assignor to Soabar Company, Philadelphia, Pa. Ticketing machine. 1,574,391; Feb. 23.

Hemsley, William T., Indianapolis, Ind. Apparatus for and process of making pulley units. 1,574,481; Feb. 23.

Hentschel, Otto. (See Oheim, A. C., Syhre, and Hentschel.)

Hess-Bright Manufacturing Company, The. (See Taylor, John, assignor.)

Heser, John J., Tamora, Nebr. Corn husker. 1,574,392; Feb. 23.

Hessel, Isidor, Brooklyn, N. Y. Violin tone vibrator. 1,574,033; Feb. 23.

Hermann, William A., assignor to MacLaughlin-Sweet, Inc., Auburn, Me. Shoe shank. 1,573,939; Feb. 28.

Hernes, Soren, Chicago, Ill. Saw set. 1,574,032; Feb. 23.

Herr, Herbert T., Merion, Pa., assignor to Westingbouse Electric and Manufacturing Company. Diesel engine. 1,573,831; Feb. 23.

Hewitt, Cooper, Electric Company. (See Hewitt, Peter C., assignor.)

Hewitt, Peter C., Ringwood Manor, assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Electric switch. 1,574,194; Feb. 23.
Hibler, Frank P., Hubbard, Ohio. Compass and mounting. 1,574,649; Feb. 23.
Hickok Manufacturing Company. (See Hamilton, Harry A., assignor.)
Hiers, Franklin E., Anderson, Ind. Grinder. 1,574,650; Feb. 23.
Highway Trailer Company. (See Clement, Charles G., assignor.)
Hildreth, Carson, Lincoln, Nebr. Sleeping garment. 1,574,651; Feb. 23.
Hill, David, assignor to David Hill, Limited, Burton-on-Trent, England. Heel-building and like machine. 1,574,576; Feb. 23.
Hill, David, Limited. (See Hill, David, assignor.)
Hilliard, Perley A., Wollaston, Mass. Machine for preparing chocolate for confection coatings. 1,573,832; Feb. 23.
Hirsch, Richard, Jena, Germany, assignor to The Libbey Glass Company Trust, Toledo, Ohio. Method of and device for drawing tubes. 1,574,482; Feb. 23.
Hirshstein, Joseph, Cleveland, Ohio. Insert and holder for concrete forms. 1,574,483; Feb. 23.
Hoar, Roger S. (See Lehman, W., Brewer, Hoar, Johnston, and Fykse.)
Hochriem, Gustav F., Chicago, Ill. Coin-return weighing scale. 1,573,940; Feb. 23.
Hodge, T. P. (See Lindemann, Ludolf, assignor.)
Hodgson, John L., Eggington House, near Leighton Buzzard, assignor to George Kent, Limited, London, England. Fluid meter. 1,574,577; Feb. 23.
Hoecker, Albert C., Collinsville, Ill. Combined contractor and expander for automobile tire rims. 1,573,833; Feb. 23.
Hoffman, Joseph K., Baltimore, Md. Mute. 1,574,287; Feb. 23.
Hofmann, George, assignor to R. Bard, trustee, Chicago, Ill. Lead-pencil mechanism. 1,574,393; Feb. 23.
Hogan, George F., Chicago, Ill. Envelope machine. 1,574,034; Feb. 23.
Hogg, Millicent, and J. C. De Haven, Los Angeles, Calif. Ornament for motormeters. Des. 69,513; Feb. 23.
Honmeister, Arthur E., assignor to The John Douglas Company, Cincinnati, Ohio. Drain cover. 1,574,288; Feb. 23.
Holder, Albert, Los Angeles, Calif. Sign. 1,574,652; Feb. 23.
Holeka, William F., San Francisco, Calif. Radiator-cap ornament. Des. 69,514; Feb. 23.
Hollins, Denis M., Blackburn, England, assignor to Draper Corporation, Hopedale, Mass. Automatic weft-replenishing loom. 1,573,942; Feb. 23.
Hollman, Peter L., assignor to Geo. D. Roper Corporation, Rockford, Ill. Oven construction. 1,573,941; Feb. 23.
Holm, Einer M., Detroit, Mich. Game. 1,574,653; Feb. 23.
Holme, James H., Tacoma, Wash. Automobile game. 1,574,394; Feb. 23.
Holmes, Abram G., Pittsburgh, Pa. Draining device for meter casings. 1,573,834; Feb. 23.
Holmes, Charles E., Lynn, Mass., assignor to General Electric Company. Self-locking seal nut. 1,574,578; Feb. 23.
Holorib, Incorporated. (See Loucks, J. F., and Gillett, assignors.)
Holtzman, John, assignor of one-half to M. E. Bernhardt, New York, N. Y. Toy. 1,574,035; Feb. 23.
Hompes, Henry, Lincoln, and G. L. De Long, Havelock, Nebr. Cream divider. 1,574,149; Feb. 23.
Hood, Arthur M., Indianapolis, Ind. Excavator. 1,574,247; Feb. 23.
Hood, Arthur M., Indianapolis, Ind. Slack-line excavator. 1,574,248; Feb. 23.
Hook, Russell W., Grand Rapids, Mich. Adding machine. 1,574,249; Feb. 23.
Horsey, Edgar T., Cleveland, Ohio. Device for use with headlights. 1,573,835; Feb. 23.
Horton, Joseph W., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Multiplex signaling system. 1,574,484; Feb. 23.
Horton, Oliver D., Erie, Pa. Apparatus for making carbon or lampblack. 1,574,091; Feb. 23.
Howard, Arthur C., Moss Vale, New South Wales, Australia. Power-driven cultivator. 1,574,654; Feb. 23.
Howard, Lemuel F., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. Re16,277; Feb. 23.
Howard, Lemuel F., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,574,195; Feb. 23.
Howard, Lemuel F., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,574,196; Feb. 23.
Howard, Valgene, Flint, Mich. Shoe-pedestal attachment. 1,574,092; Feb. 23.
Howdeshell, Roland M., Elsberry, Mo., assignor, by mesne assignments, to The Cleveland Trust Company, Cleveland, Ohio. Piston for engine cylinders. Re16,273; Feb. 23.
Howe, Edwin A., Bancroft, Iowa. Vehicle jack. 1,574,395; Feb. 23.
Hoy, Charles B., Cincinnati, Ohio. Folding box. 1,574,396; Feb. 23.
Hoyes, Audley, Belle Vernon, Pa. Car coupling. 1,574,150; Feb. 23.
Hubbard, Arthur O., deceased; N. H. Hubbard, executrix, assignor to Puffer-Hubbard Manufacturing Company, Minneapolis, Minn. Wagon axle. 1,574,036; Feb. 23.
Hubbard, Nellie H., executrix. (See Hubbard, Arthur O.)
Hughes, Robert R., jr., Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Machine for forming concealed stitches. 1,573,836; Feb. 23.
Hunter, Harry W., assignor, by mesne assignments, to Union Trust Company of Maryland, trustee, Baltimore, Md. Gas range. 1,574,655; Feb. 23.
Hurt, Victor H., Fort Madison, Iowa. Tire core. 1,574,093; Feb. 23.
Hylard, John, St. Kilda, Victoria, Australia. Life-saving apparatus for use at sea. 1,574,485; Feb. 23.
Hynes, Lee P., assignor to Consolidated Car-Heating Company, Albany, N. Y. Door-engine control. 1,574,197; Feb. 23.
Ideal Wrapping Machines Company. (See Sergent, Walter H., assignor.)
Iler, Clyde E., Avon, N. Y. Windshield cleaner. 1,574,094; Feb. 23.
Illinois Tool Works. (See Olson, Carl G., assignor.)
Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Slater, Fred M., assignor.)
International Concrete Industries Corporation. (See Wightman, S. H., and Long, assignors.)
International Harvester Company. (See Pearson, Charles, assignor.)
International Motor Company. (See Masury, Alfred T., assignor.)
International Motor Company. (See Midboe, Gabriel, assignor.)
Interstate Folding Box Company, The. (See Bergstein, Samuel, assignor.)
Irving, Edward J. B., Trail, British Columbia, Canada. Automobile lock. 1,574,151; Feb. 23.
Isaacs, Albert, New York, N. Y., assignor to The Beck Duplicator Company. Duplicating roll or sheet and making same. 1,573,963; Feb. 23.
Isgrig, George F., assignor of one-half to W. H. Moore, St. Louis, Mo. Ventilating device. 1,574,656; Feb. 23.
Isler, Herman R. (See Einstein, S., and Isler.)
Ivey, George F., Hickory, N. C. Lock for inkwells. 1,573,943; Feb. 23.
Jack, Robert K., Lansing, Mich. Radiator shell for automobiles. Des. 69,515; Feb. 23.
Jackson, Fleming H., et al. (See Wesson, Ernest E., assignor.)
Jackson, John G., Chatham, Ontario, Canada. Steel-trussed structure. 1,574,657; Feb. 23.
Jancke, Benno F., assignor to Halliwell Electric Co., Inc., New York, N. Y. Switch control for electric hair driers. 1,573,944; Feb. 23.
Jennings, Joseph M., Centralia, Wash. Saw guide for undercutting. 1,574,152; Feb. 23.
Johansen, Berger, Springfield, Mass. Jar-gripping lifter. 1,574,349; Feb. 23.
Johnson, Abraham H. (See Wesson, Ernest E., assignor.)
Johnson, Claes, assignor of one-half to E. G. Johnson, Springfield, Mass. Radiator cap and overflow pipe. 1,574,486; Feb. 23.
Johnson, Eric G. (See Johnson, Claes, assignor.)
Johnson, Fred D. (See Carroll, Andrew L., assignor.)
Johnson, George W. (See Crisp, Thomas F. M., assignor.)
Johnson, John A., College Springs, Iowa. Testing apparatus. 1,573,964; Feb. 23.
Johnson, John B., Elmhurst, assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical testing. 1,574,350; Feb. 23.
Johnson, Peter B., Seattle, Wash. Hydrocarbon burner. 1,573,965; Feb. 23.
Johnston, Benjamin F. (See Lehman, W., Brewer, Hoar, Johnston, and Fykse.)
Johnston, John F., assignor to The Miller Rubber Company, Akron, Ohio. Hard-rubber article and making same. 1,574,658; Feb. 23.
Johnston, Sylvanus K., Bradner, British Columbia, Canada. Folding bed. 1,574,659; Feb. 23.
Jokisch, John, Detroit, Mich. Electric generator for motor vehicles. 1,574,095; Feb. 23.
Jones, Edmund A., West Medford, Mass. Syringe. 1,574,579; Feb. 23.
Jones, Henry J., Sydney, New South Wales, Australia. Necktie. 1,574,198; Feb. 23.
Jones, John G., Marine on St. Croix, Minn. Cultivator. 1,573,966; Feb. 23.
Jones, Percival W., Providence, R. I., assignor to Bay State Optical Company, Attleboro, Mass. Construction for eyeglass parts and the like. 1,574,487; Feb. 23.
Jones, Robert F. (See McKean, J. G., and Jones.)

Jordan, Eugène, assignor to Societe l'Air Liquide (Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude), Paris, France. Separation of gaseous mixtures by liquefaction and rectification and apparatus therefor. 1,574,425; Feb. 23.
Juer, George, Hopewell, Va., assignor to Tubize Artificial Silk Company of America. Bobbin-winding machine. 1,573,837; Feb. 23.
Jurgens, Emil G., assignor to Peters Machinery Company, Chicago, Ill. Package-identification apparatus. 1,574,096; Feb. 23.
Kalman Steel Co. (See White, William E., assignor.)
Kant Clog Specialty Company. (See Casey, John J., assignor.)
Kauffman, Henry, deceased, by M. R. Kauffman, administratrix, Seattle, Wash. Joist-supporting stirrup. 1,573,967; Feb. 23.
Kauffman, Minette R., administratrix. (See Kauffman, Henry.)
Kaunagraph Company. (See Lawrence, Winthrop S., assignor.)
Kay, William M. R., Windsor, Ontario, Canada. Electric-circuit breaker. 1,574,580; Feb. 23.
Kay, William M. R., Windsor, Ontario, Canada. Electric-water heater. 1,574,581; Feb. 23.
Kazenmaier, August. (See Hähnle, W., and Kazenmaier.)
Keeler, Lewis J., assignor to American Magnesium Corporation, Niagara Falls, N. Y. Protective coating for magnesium. 1,574,289; Feb. 23.
Keeler, Lewis J., assignor to American Magnesium Corporation, Niagara Falls, N. Y. Protective coating for magnesium. 1,574,290; Feb. 23.
Keiffer, Harry F., Perrysburg, Ohio. Suction member for washing machines. 1,574,488; Feb. 23.
Keller, Joseph, and H. Künstlich, New York, N. Y. Thermostat. 1,573,838; Feb. 23.
Kelley, Frank C., Long Beach, assignor of one-half to E. W. Riggle, Los Angeles, Calif. Pump. 1,574,291; Feb. 23.
Kelley, Frank C., Long Beach, assignor of one-half to E. W. Riggle, Los Angeles, Calif. Pump. 1,574,292; Feb. 23.
Kellner, Henry F., Silver Lake, Kans. Jetty. 1,574,153; Feb. 23.
Kellogg, David R., Edgewood Borough, assignor to Peterson-Kintner Company, Pittsburgh, Pa. Compound for protecting the hands from the effects of contact with oil, grease, and dirty substances. 1,574,733; Feb. 23.
Kelly, Henry D., Kansas City, Mo. Coffeepot. 1,574,154; Feb. 23.
Kelly-Springfield Tire Company. (See Marshall, Thomas C., assignor.)
Kelly, William M., Westfield, N. J. Type. 1,574,155; Feb. 23.
Kelvinator Corporation. (See Spreen, Charles C., assignor.)
Kemper, Arlie. (See Wiser, O., and Kemper.)
Kent, George, Limited. (See Hodgson, John L., assignor.)
Kern, Carl, Berlin-Tempelhof, Germany, assignor to General Electric Company. Electric sign. 1,574,582; Feb. 23.
Kessler, Clarence A., assignor to Penrod Walnut & Veneer Company, Kansas City, Mo. Offset chuck and adjustable stay log. 1,574,037; Feb. 23.
Kew, Charles E., Chicago, Ill. Shelf and drawer support. 1,574,038; Feb. 23.
Kiesling, Werner, Berlin-Neukolln, Germany, assignor to N. V. Handelmaatschappij, "Mercator", Zandvoort, Netherlands. Manufacturing photographic glass pictures and the like with colored background. 1,574,156; Feb. 23.
Killman, Thomas A., assignor of one-half to T. G. Watkins, Nashville, Tenn. Moving-picture toy. 1,573,968; Feb. 23.
Killman, Thomas A., Nashville, Tenn. Can opener. 1,573,969; Feb. 23.
Kimber, Walter J., Ottawa, Ontario, Canada. Bricklayer's combined hammer and scutch. 1,574,660; Feb. 23.
Kirby Manufacturing Company, The. (See Otterbein, Arthur, assignor.)
Kirsch, Charles W., assignor to Kirsch Manufacturing Company, Sturgis, Mich. Metal-forming machine. 1,574,397; Feb. 23.
Kirsch Manufacturing Company. (See Kirsch, Charles W., assignor.)
Kisner, William C., Watson, W. Va. Poultry-feeding apparatus. 1,574,398; Feb. 23.
Kittel, George P., Union Hill, N. J. Melting tank or kettle. 1,574,489; Feb. 23.
Klein, Simon, Brooklyn, N. Y. Birdcage support or similar article. Des. 69,516; Feb. 23.
Klivansky, Morris. (See Brinkman, Oscar F., assignor.)
Knapp, Archer L., assignor to Packard Motor Car Company, Detroit, Mich. Des. 69,517; Feb. 23.
Knecht, Jean J., et al. (See Fonty, Henri, assignor.)
Knight, Robert C., Pinner, and H. D. Smith, Newcastle-upon-Tyne, England. Separating liquids of different specific gravities. 1,574,157; Feb. 23.
Knowles, Frederick C. S., Freeport, N. Y. Signal device for vehicles. 1,574,293; Feb. 23.
Koenig, Harry M., Milwaukee, Wis. Fountain pen. 1,574,097; Feb. 23.
Kohnle, Frederick, assignor to The Monarch Marking System Company, Dayton, Ohio. Duplicate-tag-printing machine. 1,574,294; Feb. 23.
Kolb, Frank A., assignor of one-half to M. Dellplain, Hammond, Ill. Theftproof device for watt-hour meters. 1,574,039; Feb. 23.
Koll, Louis H., Casper, Wyo. Flytrap. 1,574,426; Feb. 23.
Komorous, Joseph, Riverside, assignor to Parisian Novelty Company, Chicago, Ill. Bank. 1,574,427; Feb. 23.
Komorous, Joseph, assignor to Parisian Novelty Co., Chicago, Ill. Booklet. 1,574,428; Feb. 23.
Kooperstein, Louis, assignor to West Disinfecting Company, New York, N. Y. Soap-dispensing apparatus. 1,573,970; Feb. 23.
Kooperstein, Louis, assignor to West Disinfecting Company, New York, N. Y. Soap-dispensing apparatus. 1,573,971; Feb. 23.
Kopprasch, Alexander H., Chicago, Ill., assignor to Electric Service Supplies Co., Philadelphia, Pa. Coil-forming machine. 1,573,972; Feb. 23.
Koroknay, Paul, Houston, Tex. Signal light for vehicles. 1,574,250; Feb. 23.
Kreisberg, Simon. (See Lutsky, B., and Kreisberg.)
Krejci, Laddie A., assignor of one-third to C. J. Norre and one-third to C. G. Rolin, Chicago, Ill. Multiple jack and switch. 1,574,158; Feb. 23.
Krey, August G. D., Wagner, S. Dak. Animal poke. 1,574,251; Feb. 23.
Kridler, Bernie C., Chicago, Ill., assignor to Campbell Wire Specialty Works, South Bend, Ind. Roofing material. 1,574,098; Feb. 23.
Kridler, Bernie C., Chicago, Ill., assignor to Campbell Wire Specialty Works, South Bend, Ind. Shingle. 1,574,099; Feb. 23.
Kuhnen, Nicholas L., Elkhart, Ind. Chair. Des. 69,518; Feb. 23.
Kumler, Carroll F. (See Kumler, Hervey R. and C. F.)
Kumler, Hervey R. and C. F., Los Angeles, Calif. Box-nailing machine. 1,574,490; Feb. 23.
Künstlich, Henry. (See Keller, J., and Künstlich.)
Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,574,199; Feb. 23.
Lagergren, Gustav M. (See Coxe, W. G., and Lagergren.)
Lamontagne, Antoine, Montreal, Quebec, Canada. Turbine for organs or the like. 1,573,973; Feb. 23.
Lamson Company, The. (See Maclaren, James G., assignor.)
Landgraf, Frederick K., Crafton, assignor to Flannery Bolt Company, Pittsburgh, Pa. Force-feed lubricator. 1,574,583; Feb. 23.
Larkin, Joseph B., Palo Alto, Calif. Punch. 1,574,159; Feb. 23.
Lasher, Alfred W., Oakland, Calif. Drill. 1,574,040; Feb. 23.
Lasker, William W., Brooklyn, assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York, N. Y. Accumulator reciprocator for tabulating machines. 1,573,974; Feb. 23.
Laucks, Samuel F. (See Wilkinson, William E., assignor.)
Laucks, Samuel F., and W. E. Wilkinson, York, Pa., said Wilkinson assignor to said Laucks. Safe. 1,574,295; Feb. 23.
Laurence, Reuben F., Minneapolis, Minn. Valve-operating device. 1,574,661; Feb. 23.
Lautenschlager, William F., Cincinnati, Ohio. Water heater. 1,573,975; Feb. 23.
Lawrence, Winthrop S., Brooklyn, assignor to Kaumagraph Company, New York, N. Y. Transfer-ink composition. 1,573,976; Feb. 23.
Leake, Richard C., Rochester, assignor to General Railway Signal Company, Gates, N. Y. Torque-testing device for semaphore signals. 1,574,491; Feb. 23.
Le Beau, Paula, sole legatee. (See Lea Beau, Victor.)
Le Beau, Victor, deceased, New Orleans, La.; P. Le Beau, sole legatee. Electric-light fixture. 1,574,296; Feb. 23.
Lee, Leif, Youngstown, Ohio. Pickling machine. 1,573,977; Feb. 23.
Leedom, Randolph, Clifton, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Preserving wood. 1,574,662; Feb. 23.
Leggett, William H., Zion, Ill. Fluid motor. 1,574,429; Feb. 23.
Lehman, Werner. (See Bager, S. R., W. M., and Lehman.)
Lehman, Werner, F. J. Brewer, and R. S. Hoar, South Milwaukee, and B. F. Johnston and M. L. Fykse, Milwaukee, assignors to Bucyrus Company, South Milwaukee, Wis. Dipper trip. 1,574,492; Feb. 23.
Leich Electric Co. (See Leich, Oscar M., assignor.)
Leich, Oscar M., assignor to Leich Electric Co., Genoa, Ill. Receiver mounting. 1,573,839; Feb. 23.
Lemon, John T., Columbus, Ohio. Conveying apparatus. 1,574,430; Feb. 23.
Lenn, Walter E., Waterbury, Conn. Elastic cuff link. 1,574,431; Feb. 23.
Lentz, William R. (See Oberfell, G. G., Ballard, Alden, Utsinger, and Lentz.)
Leonard, Elof R., Mountain Lakes, N. J. Sheet-metal door. 1,574,493; Feb. 23.
Leske, Emil, jr., New York, N. Y. Attachment for miter boxes. 1,574,663; Feb. 23.
Levine, Irving W., Westmount, Quebec, Canada. Electric insulating tape. 1,573,978; Feb. 23.

Lewin, Tannie, assignor of one-half to W. Lewin, St. Louis, Mo. Separation and recovery of the copper, tin, and lead content of brass or bronze secondary metals and their residues. 1,574,043; Feb. 23.
Lewin, William. (See Lewin, Tannie, assignor.)
Lewis, Alfred B., assignor to W. R. Stott, Philadelphia, Pa. Bib. 1,574,200; Feb. 23.
Lewis Invisible Stitch Machine Co. (See Moulton, Harley C., assignor.)
Libbey Glass Company Trust, The. (See Hirsch, Richard, assignor.)
Light, Carolyn M., Los Angeles, Calif., and L. Archer, Rochester, N. Y. Sifter. 1,573,979; Feb. 23.
Lilleberg, Charles L., Chicago, Ill. Electric cables. 1,574,297; Feb. 23.
Lindburg, Joseph, Bay Ridge, Brooklyn, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,574,298; Feb. 23.
Lindemann, Ludolf, Altona-Bahrenfeld, Germany, assignor to T. P. Hodge, Park Ridge, Ill. Preserving yeast. 1,574,494; Feb. 23.
Lindner, Wilhelm, Dresden, Germany. Filler. 1,574,584; Feb. 23.
Linehan, Edwin R., River Falls, Wis. Stool-ring cover. 1,574,160; Feb. 23.
Linnig, Charles E., Peru, Ill. Jaw for engravers' clamps. 1,574,585; Feb. 23.
Linotype and Machinery Limited. (See Goulding, Benjamin J. J., assignor.)
Lipman, Carl E. L., assignor to Lipman Refrigeration Company, Beloit, Wis. Heat-exchange apparatus. 1,574,044; Feb. 23.
Lipman Refrigeration Company. (See Lipman, Carl E. L., assignor.)
Lippincott, Fisher H. Philadelphia, Pa. Automatic drive. 1,574,299; Feb. 23.
Liptay, John M., New York, N. Y. Physician's examining table. 1,573,980; Feb. 23.
Littlejack Engineering Company, The. (See Greaves, T., Darbourne, and Warner, assignors.)
Livzey, John L., Middletown, Ohio. Shock absorber. 1,574,432; Feb. 23.
Locomotive Firebox Company. (See Hawley, Charles G., assignor.)
Logan, Charles W., Kenmore, assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y. Electric-light fixture. Des. 69,519; Feb. 23.
Logan, Charles W., Kenmore, assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y. Electric-light fixture. Des. 69,520; Feb. 23.
Logan, Charles W., Kenmore, assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y. Wall plate for electric-light fixtures. Des. 69,521; Feb. 23.
Long, George R. (See Coedley, H. G., and Long.)
Long, John H., Ashtabula, Ohio. Maker for corn planters. 1,574,161; Feb. 23.
Long, Thomas A. (See Wightman, S. H., and Long.)
Long, Walter E., assignor to G. A. Reach, Philadelphia, Pa. Baseball glove. 1,574,664; Feb. 23.
Long, William B. (See Thompson, C. S., and Long.)
Look, Carrol A., Los Angeles, Calif. Beverage dispenser. 1,574,495; Feb. 23.
Loucks, James F., Cleveland, and H. Gillett, Gates Mills, assignors to Holorib, Incorporated, Cleveland, Ohio. Building construction. 1,574,586; Feb. 23.
Lougee, Norman A., Schenectady, N. Y., assignor to General Electric Company. Protective device. 1,574,587; Feb. 23.
Lovell Manufacturing Company. (See Robertson, William, assignor.)
Lovin, Frank J., Mahnomen, Minn. Blade holder. 1,574,665; Feb. 23.
Ludlow, Wm. A. (See Gemmill, James I., assignor.)
Lutsky, Bernard, and S. Kreisberg, Brooklyn, N. Y. Pressure-liquid valve. Des. 69,522; Feb. 23.
Lutsky, Bernard, and S. Kreisberg, Brooklyn, N. Y. Combined pressure-liquid valve and rinser. Des. 69,523; Feb. 23.
Lyday, John, Kansas City, Kans. Foundry truck. 1,573,840; Feb. 23.
Lynch, Edward M., Bloomfield, N. J. Amusement device. 1,574,201; Feb. 23.
Lynch, William B., Brooklyn, N. Y. Surface cleaner. 1,574,666; Feb. 23.
Lyon, John S., assignor to J. Bartholomew, Rochester, N. Y. Compact-powder holder. 1,574,399; Feb. 23.
M S Company. (See Nittel, Frederick W., assignor.)
Maanum, Dedrick A., Minneapolis, Minn. Device for removing water from cream. 1,573,981; Feb. 23.
Macadam, John, and W. Berry, Wilmington, Del. Textile belt. 1,573,982; Feb. 23.
Maeck, John J., jr., Chadron, Nebr. Chisel holder. 1,574,588; Feb. 23.
MacIaren, James G., assignor to The Lamson Company, Syracuse, N. Y. Pneumatic-dispatch apparatus. 1,574,046; Feb. 23.
Macready, George A., Los Angeles, Calif. Method of pumping wells. 1,574,498; Feb. 23.
Mackenzie, Hugh W., Yorkshire, England. Mechanism for imparting to a support, carrier, or the like movements of a determined character. 1,574,667; Feb. 23.
MacKenzie, William J., Portland, Oreg. Concrete-pipe-bend machine. 1,574,433; Feb. 23.
MacLaughlin-Sweet, Inc. (See Hermann, William A., assignor.)
Madsenell Corporation. (See Pedersen, Arthur Z., assignor.)
Mahé, Basile F., Charenton, France. Machine for grinding balls. 1,574,668; Feb. 23.
Majestic Electric Appliance Company. (See Weir, William W., assignor.)
Maloney, Daniel. (See McIlroy, William, assignor.)
Malzacher, Walther, Traisen, Austria. Manufacturing runner bricks. 1,574,589; Feb. 23.
Manning, Benjamin D., Decorah, Iowa. Automobile bed. 1,574,434; Feb. 23.
Manning Manufacturing Company. (See Manning, Roy A., assignor.)
Manning, Roy A., assignor to Manning Manufacturing Company, Rutland, Vt. Bottle-washing machine. 1,573,842; Feb. 23.
Marchi, Umberto, Rivarolo, Ligure, Italy. Tube-rolling mill. 1,574,669; Feb. 23.
Marcus, Charles L. (See Arvoy, B. S., nee Reneaux, and Marcus.)
Marczinczek, Carl, Oakland, Calif. Making light porous walls. 1,574,252; Feb. 23.
Marek, John A., Yoakum, Tex. Plow attachment for tractors. 1,574,670; Feb. 23.
Marek, Martin L., assignor of one-sixth to G. A. Shurtleff and one-sixth to J. M. Niehaus, jr., Peoria, Ill. Combination fence tool. 1,574,671; Feb. 23.
Marilier, Charles. (See Granger, L., Marilier, and Prache.)
Markel Lighting Fitments, Inc. (See Balk, Joseph J., assignor.)
Markel Lighting Fitments, Inc. (See Logan, Charles W., assignor.)
Marks, Meyer M., Chicago, Ill. Lighting fixture. 1,573,843; Feb. 23.
Marshall, Grace W., Binghamton, N. Y. Device for use in playing duplicate whist. 1,574,202; Feb. 23.
Marshall, Thomas C., Mount Savage, assignor to Kelly-Springfield Tire Company, Cumberland, Md. Cushion tire. 1,574,499; Feb. 23.
Marte, John A., Santa Ana, Calif. Safety cap for gasoline tanks. 1,574,500; Feb. 23.
Martin, Charles R., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Valve. 1,574,435; Feb. 23.
Martin, Stanton C., Erie, Pa., assignor, by mesne assignments, to Erie City Iron Works. Pulverizer beater. 1,574,436; Feb. 23.
Martin, Stanton C., Erie, Pa., assignor, by mesne assignments, to Erie City Iron Works. Fuel-treating device. 1,574,437; Feb. 23.
Martus, Martin L., Woodbury, E. H. Becker, and J. G. Ross, Waterbury, Conn. Primary battery. 1,574,300; Feb. 23.
Marvin, Arthur F., Highland Park, Mich. Clothes-drying rack. 1,573,844; Feb. 23.
Mason, Arthur C., Hawthorne, N. J. Fabric-rubbing machine. 1,573,845; Feb. 23.
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Flexible coupling for shafting. 1,574,301; Feb. 23.
Mathes, Robert C., assignor to Western Electric Company, Incorporated, New York, N. Y. Secret signaling. 1,573,983; Feb. 23.
Matthews, Charles, jr. and W. C., Chicago, Ill. Oil-gas-making apparatus. 1,574,502; Feb. 23.
Matthews, William C. (See Matthews, Charles, jr., and W. C.)
Mattice, Royal, Bethlehem, Pa. Welding metallic structures. Re16,274; Feb. 23.
Matushak, Joseph, Garfield, N. J. Doll carriage. 1,574,402; Feb. 23.
Maxfield, Joseph P., Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Radio broadcasting equipment. 1,573,984; Feb. 23.
Maynes, Hyla F., North Tonawanda, N. Y., assignor to Maynes Corporation, Dover, Del. Amusement conveyer belt. 1,574,503; Feb. 23.
Maynes Corporation. (See Maynes, Hyla F., assignor.)
McCallum, Jean. (See Utley, H. H., and McCallum.)
McCarroll-Doull, Clara, Butte, Mont. Safety harness for children. 1,574,672; Feb. 23.
McCarty, George B., Little Rock, Ark. Printing press. 1,574,673; Feb. 23.
McDaniels, Walter W., Waupun, Wis. Combined sign board and washer mechanism. 1,574,674; Feb. 23.
McDermott, Thomas S., assignor to Clark-Cutler-McDermott Co., Franklin, Mass. Making pile fabric. 1,574,496; Feb. 23.
McGraw, Martin B., Beaver Falls, Pa. Windshield. 1,574,400; Feb. 23.
McGregor, Robert R., Chicago, Ill. Front guard for automobiles. 1,574,100; Feb. 23.
McGregor, Robert R., Chicago, Ill. Front guard for automobiles. 1,574,101; Feb. 23.
McGregor, Robert R., Chicago, Ill. Radiator fender for automobiles. 1,574,102; Feb. 23.
McIlroy, William, assignor of two-fifths to D. Maloney, Springfield, Ohio. Floor, ceiling, and roof construction. 1,574,045; Feb. 23.
McKean, John G., Mount Vernon, and R. F. Jones, Glasgow, Scotland. Heat-exchange apparatus. 1,574,675; Feb. 23.

McKeon, Joseph, Independence, Mo. Egg-turning device for incubators. 1,574,401; Feb. 23.
McLaren, Alexander, Brooklyn, N. Y. Signaling apparatus. 1,574,734; Feb. 23.
McLean, Robert J., New York, N. Y., assignor to Sloan & Company. Combination tool. 1,574,497; Feb. 23.
McRee, Hillary B., Palmetto, Fla., assignor to Automatic Sales Corporation, Fort Valley, Ga. Vending machine. 1,573,841; Feb. 23.
Meredith, William, et al. (See Foster, Walter L., assignor.)
Merrick, William L., Halifax, Canada. Traffic signal. 1,574,162; Feb. 23.
Mesinger, Henry, New York, N. Y. Saddle. 1,574,504; Feb. 23.
Metropolitan Sewing Machine Corporation. (See Weis, Albert H., assignor.)
Metropolitan Sewing Machine Corporation. (See Weis, John P., assignor.)
Mettler, John C., Evanston, assignor, to Beardslee Chandelier Manufacturing Company, Chicago, Ill. Lighting fixture. Des. 69,524; Feb. 23.
Meyer, Adolph F., St. Paul, Minn. Valve structure. 1,573,985; Feb. 23.
Meyer, Adolph F., St. Paul, Minn. Spillway. 1,573,986; Feb. 23.
Meyer, Stephen E., Hayden, Ariz. Flotation machine. 1,574,403; Feb. 23.
Michael, Warren E., Buffalo, N. Y. Automatic draining device. 1,574,103; Feb. 23.
Midboe, Gabriel, Brooklyn, assignor to International Motor Company, New York, N. Y. Drive for motor vehicles. 1,574,047; Feb. 23.
Midgley, Thomas, jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Using motor fuel. 1,573,846; Feb. 23.
Mikaelson, Erik W., assignor to Treadwell Engineering Company, Easton, Pa. Pipe-cutting machine. 1,574,048; Feb. 23.
Miles, Isaac, Bonesteel, S. Dak. Wave motor. 1,573,987; Feb. 23.
Miles, James, Los Angeles, Calif. Agitating device. 1,574,104; Feb. 23.
Miller, George F., Chicago, Ill. Chalk holder. 1,574,590; Feb. 23.
Miller, Henry A., and R. H. Rhoades, assignors to Vaco Manufacturing Corporation, New York, N. Y. Vacuum fuel-feeding apparatus. 1,574,049; Feb. 23.
Miller, James A. (See Elliott, H. F., and Miller.)
Miller Rubber Company, The. (See Johnston, John F., assignor.)
Miller Rubber Company, The. (See Brucker, Ferdinand F., assignor.)
Miller Rubber Company, The. (See Brundage, James W., assignor.)
Miller Rubber Company, The. (See Morton, Harold A., assignor.)
Miller Rubber Company, The. (See Radabaugh, Eli H., assignor.)
Millers Falls Company. (See Wilder, Fred H., assignor.)
Milner, Burt S., Los Angeles, assignor to Regan Forge & Engineering Company, San Pedro, Calif. Deflector for sheave blocks. 1,573,945; Feb. 23.
Mirfield, George E., Youngstown, Ohio. Method and apparatus for threading metal articles. 1,574,631; Feb. 23.
Moller, Carl E., Jamestown, N. Y. Curtain rod. 1,574,632; Feb. 23.
Monarch Marking System Company, The. (See Kohnle, Frederick, assignor.)
Montgomery, Hugh E., Chicago, Ill. Automobile spotlight. 1,574,050; Feb. 23.
Montgomery, James W., assignor to W. J. Burnett, Thomasville, Ga. Plow. 1,573,988; Feb. 23.
Montgomery Ward & Co. (See Cooley, Asa B., assignor.)
Moody, Joseph P., Ranger, Tex. Gripping device. 1,574,404; Feb. 23.
Mooney, A. G., Limited. (See Cunningham, Christopher C., assignor.)
Moore, Alice T. (See Ball, Joseph S., assignor.)
Moore, William H. (See Isgrig, George F., assignor.)
Morehouse, Charles N. (See Elder, W. J., and Morehouse.)
Morgan, Porter S., Norwalk, Conn., assignor to Rotary Brake Company, Inc., New York, N. Y. Power brake. 1,574,253; Feb. 23.
Morgan & Wright. (See Abbott, Adrian O., jr., assignor.)
Morimura Bros. Inc. (See Tomita, Urasaburo, assignor.)
Morris, George L., Bonsall, Calif. Honey extractor. 1,574,051; Feb. 23.
Morter, Earl W., Washington Court House, Ohio. Receptacle-distributing device. 1,573,847; Feb. 23.
Morton, Harold A., assignor to The Miller Rubber Company, Akron, Ohio. Producing a rubber compound. 1,574,676; Feb. 23.
Moses, Mrs. Sarah. (See Bowles, William M., assignor.)
Moulton, Harley C., Medford, Mass., assignor, by mesne assignments, to Lewis Invisible Stitch Machine Co. Garment and like article of manufacture. 1,574,405; Feb. 23.
Muck, John., Milwaukee, Wis. Machine for making ice-cream cones. 1,573,989; Feb. 23.
Mueller, Adolph, trustee. (See Mueller, Philip, assignor.)
Mueller, Leonard J., Detroit, Mich. Toy. 1,573,990; Feb. 23.
Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Slip-joint coupling. 1,574,052; Feb. 23.
Mulder, Jakob, and D. C. Endert, Rotterdam, Netherlands. Ejector for the delivery of gas and air in large quantities. 1,574,677; Feb. 23.
Munning, A. P., & Co. (See Zucker, Henry L., assignor.)
Munroe, Treadway B., Forest Glen, Md. Treating bagasse for fiber-making purposes. 1,574,254; Feb. 23.
Murphy, Paul B., Nyack, assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,573,991; Feb. 23.
Murray, Alexander. (See Beebe, M. C., and Murray.)
Murray, Thomas B., Glasgow, Scotland. Gudgeon-pin mounting for pistons. 1,573,848; Feb. 23.
Myover, Elijah G., Independence, Kans. Printing-press attachment. 1,574,633; Feb. 23.
Myslinski, Stanley H., Brooklyn, N. Y. Trundle and hoop. 1,574,255; Feb. 23.
Mystic Mirror Inc. (See Gerard, Victor, assignor.)
N. V. Handelmaatschappij, "Mercator". (See Kiesling, Werner, assignor.)
Naamlooze Vennootschap Financieele Maatschappij "Driebergen." (See Groenebaum, Wilhelm, assignor.)
Nablo, Ephraim R., Fort Wayne, Ind. Hose supporter. 1,574,505; Feb. 23.
Nagot, Charles, La Plaine St.-Denis, France. Elastic suspension for bicycles. 1,573,849; Feb. 23.
Naiman, Julius M., Chicago, Ill. Logarithmic resistance circuit for mensuring combinations of different factors. 1,573,850; Feb. 23.
Nall, Harry G., Sydney, New South Wales, Australia. Apparatus for adjusting lithographic-machine damping rollers. 1,574,208; Feb. 23.
Nathan Manufacturing Company. (See Beattie, Daniel S., assignor.)
National Air Moistener Company. (See Weidenbach, Michael F., assignor.)
National Supply Company, The. (See Wright, C. S., and Schweinmer, assignors.)
Neal, Curtis C., Marmet, assignor, by mesne assignments, to Tiregage Valve Corporation, Charleston, W. Va. Pressure-gauge cap. 1,574,204; Feb. 23.
Nelson, Charles G., assignor to Zouri Drawn Metals Company, Chicago Heights, Ill. Metallic window sash. 1,574,506; Feb. 23.
Nelson, Gustaf A., New York, N. Y. Composition for cleaning stone. 1,574,406; Feb. 23.
Nelson, Gustaf A., New York, N. Y. Cleaning composition for granite, stone, etc. 1,574,407; Feb. 23.
Nesmith, Mrs. Mary E., et al. (See Nesmith, Samuel D., assignor.)
Nesmith, Samuel D., assignor of thirty per cent to A. S. Bridges, San Diego, Calif.; ten per cent to R. Welles, ten per cent to R. R. Richardson, two per cent to E. J. Callahan, Guadalajara, Mexico; five per cent to J. B. Osborn, five per cent to Mrs. K. Osborn, five per cent to J. H. Bulmer, and thirty-three per cent to Mrs. M. E. Nesmith (wife), San Diego, Calif. Electric water heater. 1,574,053; Feb. 23.
Nesmith, Samuel D., assignor of thirty per cent to A. S. Bridges, five per cent to J. B. Osborn, five per cent to Mrs. K. Osborn, five per cent to J. H. Bulmer, thirty-three per cent to Mrs. M. E. Nesmith, San Diego, Calif.; two per cent to E. J. Callahan, Guadalajara, Mexico; ten per cent to R. Welles, and ten per cent to R. R. Richardson. Electric water heater. 1,574,054; Feb. 23.
New Idea Spreader Co. (See Oppenheim, T. H., and Selhorst, assignors.)
Niagara Wall Paper Company. (See Damm, Samuel F., assignor.)
Nibler, Jake, La Grand, Oreg. Signal device. 1,574,678; Feb. 23.
Nicolson, Alexander M., assignor to Western Electric Company, Incorporated, New York, N. Y. Piezo-electric loud speaker. 1,574,302; Feb. 23.
Niehaus, John M., jr., et al. (See Marek, Martin L., assignor.)
Nilsson, Fritz A., Karlsoga, Sweden. Supporting and propelling mechanism for motor vehicles. 1,574,679; Feb. 23.
Nittel, Frederick W., Attleboro Falls, assignor to M S Company, Attleboro, Mass. Separable-link bracelet or chain. 1,574,680; Feb. 23.
Noore, Charles J., et al. (See Krejci, Laddie A., assignor.)
Norsk Hydro-Elektrisk Kvaelstofaktieselskab. (See Farup, Peder, assignor.)
Norton, Clifford, Orange, N. S. Dickinson, Glen Ridge, and R. W. Scott, Montclair, assignors to Elevator Supplies Company, Inc., Hoboken, N. J. Gate-operating mechanism for elevators. 1,574,681; Feb. 23.
Null, Ralph G., assignor to G & J Tire Company, Indianapolis, Ind. Machine for calendering and cutting sheets formed from plastic materials. 1,574,682; Feb. 23.
Nyffenegger, Hans, assignor to the firm of Aktiengesellschaft der Maschinenfabriken Escher Wyss & Cie., Zurich, Switzerland. Steam-turbine installation. 1,573,851; Feb. 23.

Oberfell, George G., A. M. Ballard, R. C. Alden, E. L. Utsinger, and W. R. Lentz, assignors to Cheatnut and Smith Corporation, Tulsa, Okla. Process and apparatus for the continuous treatment of natural-gas gasolines. 1,574,507; Feb. 23.

O'Brien, John H., assignor to Adams Equipment Company, Inc., Watertown, N. Y. Removable body for hand trucks. 1,574,501; Feb. 23.

Ogren, Carl F., Trenton, assignor to Thermoid Rubber Company, Hamilton Township, N. J. Mold. 1,574,683; Feb. 23.

Oheim, Alfred C., A. Syhre, and O. Hentachel, assignors to the Firm Emil Gerasch G. m. b. H., Leipzig, Germany. Method and apparatus for the production of prints. 1,574,163; Feb. 23.

O'Keeffe, George W., Dorchester, assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass. Thermal Electric-Circuit Controller. 1,574,508; Feb. 23.

O'Leary, William J., Montreal, Quebec, Canada. High-frequency oscillation device. 1,573,852; Feb. 23.

Oliver Chilled Plow Works. (See Altgelt, Rudolph J., assignor.)

Oliver, Edgar, Wisner, La. Riding plow. 1,574,684; Feb. 23.

Olley, Raymond H. (See Bissell, C. H., and Olley.)

Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Process and machine for dressing abrasive elements. 1,574,303; Feb. 23.

Oppenhamer, Eugene J., Fort Wayne, Ind. Self-closing container. 1,574,509; Feb. 23.

Oppenheim, Theodore H., and B. Selhorst, assignors to New Idea Spreader Co., Coldwater, Ohio. Ear conveyer for corn-husking machines. 1,574,164; Feb. 23.

Optische Anstalt C. P. Goerz Aktiengesellschaft. (See Richter, Robert, assignor.)

Oreggia, Vittorio, San Remo, Italy. Smoke pump. 1,574,408; Feb. 23.

Orrock, John W., Montreal, Quebec, Canada. Weather-proof rail stand for track scales. 1,573,853; Feb. 23.

Osborn, J. B., et al. (See Nesmith, Samuel D., assignor.)

Osborn, Mrs. Kathryn, et al. (See Nesmith, Samuel D., assignor.)

Ostermeyer, Edward O. (See Skinner, E. R., Renne, and Ostermeyer.)

Otterbein, Arthur, assignor to The Kirby Manufacturing Company, Middletown, Conn. Toy cap. 1,574,510; Feb. 23.

Overholt, Aaron B., Three Rivers, Mich. Rim-cut tire clamp. 1,574,105; Feb. 23.

Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)

Pacific Southwest Trust & Savings Bank, et al., executors. (See Hadley, Charles R.)

Packard Electric Company, The. (See Bergmann, Christian N., assignor.)

Packard Motor Car Company. (See Knapp, Archer L., assignor.)

Pacorek, Lawrence, Chicago, Ill. Garbage receptacle. 1,574,685; Feb. 23.

Paloski, Joseph B., assignor to Ford Motor Company, Detroit, Mich. Gauge. 1,574,735; Feb. 23.

Paraffine Companies, The. (See Fleming, Cornelius S., assignor.)

Paramount Rubber Consolidated, Incorporated. (See Bates, Albert H., assignor.)

Paramount Rubber Consolidated, Inc. (See Roberts, Fred T., assignor.)

Parisian Novelty Company. (See Komorous, Joseph, assignor.)

Parquette, Archibald W., Watertown, Mass. Automatic air-pressure signal device. 1,573,854; Feb. 23.

Partridge, Walter, Chadwell Heath, England. Locking device for motor cars, motor cycles, and cycles for prevention of theft. 1,573,855; Feb. 23.

Patent Button Company, The. (See Purinton, Forrest G., assignor.)

Pathe Exchange, Incorporated. (See Adatte, Albert L., assignor.)

Pauker, Frances, New York, N. Y. Combined spool holder and pincushion. Des. 69,525; Feb. 23.

Pawling, George F., Philadelphia, Pa. Metal bath. 1,574,304; Feb. 23.

Pearson, Charles, assignor to International Harvester Company, Chicago, Ill. Stacker. 1,574,305; Feb. 23.

Pease, Isaac M., Cincinnati, Ohio. Truss pad. 1,573,856; Feb. 23.

Pedersen, Arthur Z., West Orange, N. J., assignor to Madsenell Corporation, New York, N. Y. Fabrication of metal sheets by electrodeposition. 1,574,055; Feb. 23.

Peebles, David D., Eureka, Calif. Milk product and making the same. 1,574,165; Feb. 23.

Peek Frean & Company Limited. (See Rondolin, Laurent, assignor.)

Peerless Pamp Company. (See Wintroath, John A., assignor.)

Peiler, Karl E., Hartford, Conn., assignor, by mesne assignments, to Hartford-Empire Company. Feeder for molten glass. 1,574,736; Feb. 23.

Pelletier, Peter, Lawrence, Mass. Filling tension device. 1,573,857; Feb. 23.

Pengilly, Lewis, Stockton, Calif. Cigar lighter. 1,573,992; Feb. 23.

Penrod Walnut & Veneer Company. (See Kessler, Clarence A., assignor.)

Perfection Stove Company. (See Chadwick, Lee S., assignor.)

Perrot, Henri, Paris, France. Vehicle wheel brake shoe. 1,574,106; Feb. 23.

Peters, Arthur W., assignor to The Surface Combustion Co., Incorporated, New York, N. Y. Method of and apparatus for mixing and proportioning gases. 1,574,107; Feb. 23.

Peters, Henry W., Boston, Mass. Ring or the like. 1,574,166; Feb. 23.

Peters Machinery Company. (See Jurgens, Emil G., assignor.

Peterson, Fredolf J., Detroit, Mich. Electric furnace. 1,574,108; Feb. 23.

Peterson-Kintner Company. (See Kellogg, David R., assignor.)

Petroleum Heat & Power Company. (See Fesler, Milton A., assignor.)

Petticore, Anthony, Sedro Woolley, Wash. Engine. 1,574,686; Feb. 23.

Pezoid, George J., Buffalo, N. Y. Filter. 1,574,409; Feb. 23.

Pflager, Harry M., assignor to Commonwealth Steel Company, St. Louis, Mo. Locomotive bed. 1,573,993; Feb. 23.

Pflager, Harry M., assignor to Commonwealth Steel Company, St. Louis, Mo. Booster motor support. 1,573,994; Feb. 23.

Philips, William E., assignor to The Stearns Conveyor Company, Cleveland, Ohio. Belt-conveyor support. 1,574,511; Feb. 23.

Phoenix Glass Company, The. (See Villaret, Gustave E., assignor.)

Pickering, Lafayette, assignor to The Columbus Dental Manufacturing Company, Columbus, Ohio. Carding device for artificial teeth. 1,573,858; Feb. 23.

Pierce, Frank M., assignor to Pierce Wrapping Machine Company, Chicago, Ill. Wrapping machine. 1,574,438; Feb. 23.

Pierce Wrapping Machine Company. (See Pierce, Frank M., assignor.)

Pigors, William O., Ferney, S. Dak. Gasoline-engine-starting device. 1,573,995; Feb. 23.

Pillsbury, Arthur C., Yosemite, Calif. Photographic-printing machine. 1,574,687; Feb. 23.

Pinel, Adrien, Rouen, France. Process and apparatus for washing artificial silk. 1,573,859; Feb. 23.

Pitney-Bowes Postage Meter Company. (See Sheldrick, George E., assignor.)

Plummer, Charles O., Geary, Okla. Gate fastener. 1,574,688; Feb. 23.

Pollinkowsky, Lipa, Antwerp, Belgium, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,574,205; Feb. 23.

Pollard, Walter S., Philadelphia, Pa. Swimming pool. 1,574,512; Feb. 23.

Pool, Elmer C., New Castle, Pa., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,574,109; Feb. 23.

Positive Lock Company, The. (See Crompton, E., and Crooks, assignors.)

Positive Lock Company, The. (See Vandervoort, Francis M., assignor.)

Powell, Claude L., Alamo, Tenn. Lubricating system for internal-combustion engines. 1,574,410; Feb. 23.

Powers Accounting Machine Corporation. (See Lasker, William W., assignor.)

Powers, Earle C., Stratford, N. J., assignor to B. F. Sturtevant Company, Boston, Mass. Drying hosiery. 1,574,056; Feb. 23.

Powers, Earle C., Stratford, N. J., assignor to B. F. Sturtevant Company, Boston, Mass. Hosiery drier. 1,574,057; Feb. 23.

Prache, Charles. (See Granger, L., Mariller, and Prache.)

Preddey, George H., San Francisco, Calif. Rotary filing device. 1,573,996; Feb. 23.

Price, Albert O., Coshocton, Ohio. Pedestal-mounted radioreproducer. Des. 69,526; Feb. 23.

Prince-Smith, William, and D. Waterhouse, Keighley, England. Flyer bearing. 1,574,689; Feb. 23.

Pringle, Wayne, Lincoln, Nebr. Pile construction. 1,574,439; Feb. 23.

Process Engineers, Inc. (See De Cew, Judson A., assignor.)

Prokop, Joseph, Newark, N. J. Defleshing-machine cylinder. 1,574,440; Feb. 23.

Puffer-Hubbard Manufacturing Company. (See Hubbard, Arthur O., assignor.)

Purinton, Forrest G., assignor to The Patent Button Company, Waterbury, Conn. Button. 1,573,860; Feb. 23.

Purinton, Forrest G., assignor to The Patent Button Company, Waterbury, Conn. Seal or tag and applying the same. 1,573,861; Feb. 23.

Putnam, Walter T., assignor to Davis & Furber Machine Company, North Andover, Mass. Tape condenser. 1,574,441; Feb. 23.

Raber, Nelson E., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Vulcanizing apparatus. 1,573,862; Feb. 23.

Radabaugh, Eli H., assignor to The Miller Rubber Company, Akron, Ohio. Acid-proof container. 1,574,690; Feb. 23.

Ragsdale, William W., Mesa, Wash. Attachment for harvesters. 1,574,691; Feb. 23.

Raine, James M. (See Stogdale, Joseph S., assignor.)

Ramsey, William A., Charlotte, N. C. Garment drier. 1,574,306; Feb. 23.

Rankin, Julian, Louisa, Ky. Vehicle radiator ornament. Des. 69,527; Feb. 23.

Rappaport, Jacob A., assignor to Reliance Fireproof Door Company, Brooklyn, N. Y. Window construction and the like. 1,574,110; Feb. 23.

Rardon, Elmer B., Columbus, and H. H. Rardon, Newark, Ohio. Waterproof container for burial caskets. 1,574,111; Feb. 23.

Rardon, Henry H. (See Rardon, Elmer B. and H. H.)

Rasmussen, Aage, Milwaukee, Wis. Mechanical movement. 1,574,442; Feb. 23.

Ratliff, Douglass S., Cleveland Heights, J. M. Francis, Lakewood, and T. E. Reese, Cleveland, Ohio. Vehicle signal. 1,574,513; Feb. 23.

Raynor, John R., Greenport, N. Y. Cutting device. 1,574,740; Feb. 23.

Reach, George A. (See Long, Walter E., assignor.)

Reach, Milton B., Springfield, Mass., assignor to A. G. Spalding & Bros., New York, N. Y. Golf club. 1,573,863; Feb. 23.

Reade, Albert E., Petersburg, Va. Window and sash. 1,574,167; Feb. 23.

Ream, Albert E., assignor of one-half to E. Ream and one-half to E. A. Ream, Raymer, Mo. Antiskid chain. 1,574,692; Feb. 23.

Ream, Edward A., et al. (See Ream, Albert E., assignor.)

Ream, Ella, et al. (See Ream, Albert E., assignor.)

Reck, Peter W., Bettendorf, and W. G. Vetter, Davenport, assignor to The Bettendorf Company, Bettendorf, Iowa. Hammer. 1,574,693; Feb. 23.

Redington, John C., assignor to Du-Plex Envelope Corporation, Quincy, Ill. Duplex mailing envelope. 1,574,058; Feb. 23.

Redner, Frank A., Menominee, Mich. Toy block and producing the same. 1,574,257; Feb. 23.

Reed, Frank E., Glenwood, Minn. Insect-destroying machine. 1,573,997; Feb. 23.

Rees Blow Pipe Manufacturing Company. (See Rees, Claude, assignor.)

Rees, Claude, assignor to Rees Blow Pipe Manufacturing Company, San Francisco, Calif. Charger. 1,574,168; Feb. 23.

Reese, Thomas E. (See Ratliff, D. S., Francis, and Reese.)

Reeves, Orwell C., assignor to Toledo Scale Company, Toledo, Ohio. Scale casing. Des. 69,528; Feb. 23.

Reeves, Orwell C., assignor to Toledo Scale Company, Toledo, Ohio. Frame. 1,574,112; Feb. 23.

Regan Forge & Engineering Company. (See Minor, Burt S., assignor.)

Reichel, Henry, et al. (See Dickerson, Glenn H., assignor.)

Reichmann, Frank J., Chicago, Ill. Loud speaker. 1,574,514; Feb. 23.

Reid, James C., jr., assignor to J. C. Reid, sr., Cleveland, and W. C. Taylor, East Cleveland, Ohio. Toe-plate setter. 1,574,443; Feb. 23.

Reid, James C., sr., et al. (See Reid, James C., jr., assignor.)

Reiner, Robert, Incorporated. (See Zahn, Hans, assignor.)

Reliance Die & Stamping Company. (See Webster, Bester R., assignor.)

Reliance Fireproof Door Company. (See Rappaport, Jacob A., assignor.)

Remington-Noiseless Typewriter Corporation. (See Going, George G., assignor.)

Renne, John H. (See Skinner, E. R., Renne, and Ostermeyer.)

Reuter-Lorenzen, Paul, Detroit, Mich. Portable combined mantel, fireplace, and hearth unit. 1,573,864; Feb. 23.

Reynolds, Charles D., Cranston, R. I., assignor to Universal Winding Company, Boston, Mass. Coil-winding machine. 1,574,059; Feb. 23.

Reynolds, Harry N., Detroit, Mich. Clean-out plug. 1,574,169; Feb. 23.

Reynolds, Nazro H., Oakland, Calif. Lip and teeth for excavating buckets. 1,574,444; Feb. 23.

Rhoades, Robert H. (See Miller, H. A., and Rhoades.)

Rhodes, Roy. (See Dameron, N., and Rhodes.)

Ribbans, Edgar S., Hampton, N. J. Stone gatherer. 1,573,998; Feb. 23.

Richards, William, Warren, Pa. Syringe. 1,574,694; Feb. 23.

Richardson, R. R., et al. (See Nesmith, Samuel D., assignor.)

Richter, Robert, assignor to Optische Anstalt C. P. Goerz Aktiengesellschaft, Berlin-Friedenau, Germany. Teleobjective. 1,573,999; Feb. 23.

Riggle, Elmer W. (See Kelley, Frank C., assignor.)

Riley, Walter A., New York, N. Y. Lamp-socket holder. 1,574,695; Feb. 23.

Ringler, William A., Philadelphia, Pa., assignor to Globe Wernicke Co., Cincinnati, Ohio. Article file. 1,574,515; Feb. 23.

Ringler, William A. (See Yeiser, H. C., and Ringler.)

Risser, Arthur I., assignor to U. S. Bottlers Machinery Co., Chicago, Ill. Bottle adapter for bottle-filling machines. 1,574,307; Feb. 23.

River Smelting and Refining Company. (See Utley, H. H., and McCallum, assignors.)

Robbins, Charles W., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for testing the elastic properties of metals. 1,573,865; Feb. 23.

Roberts, Charles A., Butte, Mont. Bed. 1,574,696; Feb. 23.

Roberts, Charles R., Ashland, Oreg. Shock absorber. 1,574,000; Feb. 23.

Roberts, Frank G. A. (See Campbell, C. W. R., and Roberts.)

Roberts, Fred T., Philadelphia, Pa., assignor to Paramount Rubber Consolidated, Inc., Tuckahoe, N. Y. Making hollow rubber articles. 1,574,060; Feb. 23.

Roberts, Fred T., Yonkers, assignor to Paramount Rubber Consolidated, Inc., Tuckahoe, N. Y. Apparatus for making hollow rubber articles. 1,574,113; Feb. 23.

Robertson, William, assignor to Lovell Manufacturing Company, Erie, Pa. Wringer. 1,574,206; Feb. 23.

Robinson, James T. (See Smothers, Robert J., assignor.)

Robinson, Jonathan J., Philadelphia, Pa. Saw gauge. 1,574,445; Feb. 23.

Robinson, Thomas, New York, N. Y., assignor to Anaconda Sales Company. Method and apparatus for producing roofing elements. 1,574,446; Feb. 23.

Rogach, Joseph J., Brooklyn, N. Y. Sawing machine. 1,574,001; Feb. 23.

Rogers, James B., Chicago, Ill. Latch construction. 1,573,866; Feb. 23.

Rohdick, John, New York, N. Y. Scooter. 1,574,516; Feb. 23.

Rohdick, John, New York, N. Y. Propelling mechanism for children's vehicles. 1,574,517; Feb. 23.

Rolin, Carl G., et al. (See Krejci, Laddie A., assignor.)

Rolland, Samuel, Flint, Mich. Gas-cock shield. 1,574,002; Feb. 23.

Rondolin, Laurent, Bermondsey, assignor to Peek Frean & Company Limited, London, England. Machine for applying cream and like materials to biscuits and the like. 1,573,867; Feb. 23.

Roper, Geo. D., Corporation. (See Hollman, Peter I., assignor.)

Rosenau, Frank L., San Francisco, Calif. System for recovering used laundry materials. 1,574,170; Feb. 23.

Rosenblatt, Isidor, New York, N. Y. Chandelier or article of similar nature. Des. 69,529; Feb. 23.

Ross, Andrew J., Los Angeles, Calif. Window lock. 1,574,258; Feb. 23.

Ross, Carl L., Wilson, N. C. Tape-dispensing machine. 1,574,697; Feb. 23.

Ross, James G. (See Martus, M. L., Becker, and Ross.)

Rotary Brake Company. (See Morgan, Porter S., assignor.)

Rousselle, Augustin, Montreal, Quebec, Canada. Engine-base oil reservoir. 1,573,868; Feb. 23.

Royall, Clifford V., Richmond, Va. Blowtorch. 1,574,698; Feb. 23.

Rutenber, Edwin A., Milwaukee, Wis. Electric heating unit. 1,574,308; Feb. 23.

Ruth, Omer, Racine, Wis. Tire holder. 1,574,447; Feb. 23.

Ryan, James T., Frankfort, Ky. Windmill. 1,574,171; Feb. 23.

Ryan, James T. Frankfort, Ky. Rotary pump or the like. 1,574,172; Feb. 23.

Ryder, Henry, assignor to Wire Fibrous Products Company, New York, N. Y. Spinning machine. 1,574,003; Feb. 23.

Ryder, Henry, assignor to Wire Fibrous Products Company, New York, N. Y. Multiple-wire fibrous yarn. 1,574,004; Feb. 23.

Safety Car Heating and Lighting Company, The. (See Coffee, Bassett M., assignor.)

Sager, Sidmoor S., Buffalo, N. Y. Fruit jar. 1,574,114; Feb. 23.

Sanders, William M., Eagle Creek, Oreg. Weighing scale. 1,573,809; Feb. 23.

Sandow Tool Co., U. S. A. (See Berger, Nathan I., assignor.)

Sands, Edwin T. (See Birkin, C. W., and Sands.)

Sanford, Henry, New York, N. Y. Material receptacle. 1,573,870; Feb. 23.

Sarff, Austin O., Walker, Minn. Shell disb. 1,574,259; Feb. 23.

Sargent Engineering Corporation. (See Sargent, Sumner B., assignor.)

Sargent, Sumner B., Los Angeles, Calif., assignor to Sargent Engineering Corporation. Pump-plunger rotor. 1,574,618; Feb. 23.

Sartory, Peter, Bayswater, London, England. Steaming tube. 1,574,005; Feb. 23.

Sasgen, Michal J., and L. Simonsen, assignors to Grand Specialties Company, Chicago, Ill. Window lock. 1,574,115; Feb. 23.

Saunders, Edward W., St. Louis, Mo. Storm front for vehicles. 1,574,309; Feb. 23.

Saunders, Edward W., St. Louis, Mo. Speed-pedal-locating device for automobiles. 1,574,310; Feb. 23.

Saunders, Edward W., St. Louis, Mo. Foot accelerator for carburetors. 1,574,311; Feb. 23.

Savidge, Albert C., assignor to R. G. Thompson, trustee, Indianapolis, Ind. Shock absorber. 1,574,699; Feb. 23.
Schaefer, Frederic, Pittsburgh, Pa. Forged brake lever. 1,574,207; Feb. 23.
Schaeffer, Charles M., Allentown, Pa. Automatic pressure-operated fuel valve. 1,574,260; Feb. 23.
Schall, Josef, Berlin-Neukolln, assignor to Berlin-Karlsruher Industrie-Werke A. G., Berlin, Germany. Free-wheel hub. 1,574,173; Feb. 23.
Schaper, Harry C., assignor to The Weight-O-Graph Company, St. Louis, Mo. Scale. Des. 69,530; Feb. 23.
Schlesinger, Louis, and H. E. Heine, assignor to Bradley Washfountain Company, Milwaukee, Wis. Foot-controlled wash fountain. 1,574,700; Feb. 23.
Schmeisser, Hans, Suhl, Germany. Small arm with tubular cartridge magazine. 1,574,701; Feb. 23.
Schmidt, Henry F., Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Condenser. 1,573,871; Feb. 23.
Schneider, Isidor. (See Fiering, M., and Schneider.)
Schoch, Eugene P., Austin, Tex. Dehydrated lignite and producing same. 1,574,174; Feb. 23.
Schöpfer, Hermann, Graz, Styria, Austria, assignor to F. Bensa, Genova, Italy. Manufacturing improved vat dyes. 1,574,116; Feb. 23.
Schott, John T. (See Wright, S. B., and Schott.)
Schranz, Frederick G., assignor to Southwark Foundry & Machine Company, Philadelphia, Pa. Steam platen. 1,574,175; Feb. 23.
Schruth, Albert E., E., and J., Pepin, Wis. Neck yoke. 1,574,006; Feb. 23.
Schruth, Edward. (See Schruth, A. E., E., and J.)
Schruth, John. (See Schruth, A. E., E., and J.)
Schuldt, Otto F., Glendale, Calif. Brush. 1,574,519; Feb. 23.
Schumacher, John, Los Angeles, Calif. Spacer for plastic wall board. 1,574,117; Feb. 23.
Schutt, Bernhard F. J., Brooklyn, N. Y. Interlocking device for laundry machines. 1,574,702; Feb. 23.
Schwantes, Clyde M., Winfield, Kans. Sewing cabinet 1,574,007; Feb. 23.
Schwartz, Alfred, Schlachtensee, near Berlin, Germany. Portable heating device. 1,573,872; Feb. 23.
Schweitzer, William K., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Preparation of insecticides. 1,574,118; Feb. 23.
Schwimmer, Fredrick J. (See Wright, C. S., and Schwimmer.)
Schwind, Frank W., assignor to Weber Showcase & Fixture Company, Los Angeles, Calif. Ice chest. 1,574,008; Feb. 23.
Scogin, Orven A., Wichita, Kans. Combination lister, cultivator, and ridge worker. 1,574,009; Feb. 23.
Scott and Williams, Inc. (See Scott, Robert W., assignor.)
Scott, Robert W., Babylon, assignor to Scott and Williams, Inc., New York, N. Y. Latch opener for knitting. 1,574,703; Feb. 23.
Scott, Rumsey W. (See Norton, C., Dickinson, and Scott.)
Seabrook, William H., jr., Savannah, Ga. Hairdressing implement. 1,574,704; Feb. 23.
Search, Charles E., Milwaukee, Wis. Process of and oven for heat treating objects. 1,573,873; Feb. 23.
Seibt, Georg, Berlin-Schoneberg, Germany. Apparatus for the reproduction of sounds. 1,573,874; Feb. 23.
Selhorst, Bernard. (See Oppenheim, T. H., and Selhorst.)
Seligmann, Arthur, Bremen, Germany. Liquefaction and separation of gases with the aid of external work. 1,574,119; Feb. 23.
Sergent, Walter H., Middletown, N. Y., assignor to Ideal Wrapping Machine Company. Caramel-wrapping machine. 1,574,120; Feb. 23.
Sergent, Walter H., Middletown, N. Y., assignor to Ideal Wrapping Machine Company. Forming mechanism. 1,574,121; Feb. 23.
Sessions, Albert L., Bristol, Conn. Wardrobe hanger. 1,574,705; Feb. 23.
Sharaf, R. M., Machine Co. (See Sharaf, Ralph M., assignor.)
Sharaf, Ralph M., New York, N. Y., assignor to R. M. Sharaf Machine Co., Boston, Mass. Shuttle-shifting means for sewing machines. 1,574,122; Feb. 23.
Sharpe, Harry, Watertown, Mass. Interlocking multiple brick. 1,574,123; Feb. 23.
Shatto, James W., Lorimor, Iowa. Road scraper. 1,574,261; Feb. 23.
Shaw, James E., Germantown, Pa. Knife sharpener. 1,573,875; Feb. 23.
Sheaffer, W. A., Pen Company. (See Davis, David L., assignor.)
Sheet Metal Specialty Company. (See Smith, Oscar T., assignor.)
Sheldrick, George E., Detroit, Mich., assignor, by mesne assignments, to Pitney-Bowes Postage Meter Company, Stamford, Conn. Mail-stamping machine. 1,574,262; Feb. 23.
Sheremeteff, Alekcei E., Osnabruck, Germany. Operating and controlling railway points, signals, barriers, and the like. 1,573,876; Feb. 23.
Sherwood, Charles F., San Francisco, Calif., assignor of one-half to L. E. Adams, Philadelphia, Pa. Process and apparatus for making gaskets. 1,574,124; Feb. 23.
Shimwell, Oliver, Gawsworth, England. Weft carrier. 1,574,125; Feb. 23.
Shopneck, Henry P., Dorchester, assignor to J. J. Daly, West Newton, Mass. Water-laid felt. 1,574,126; Feb. 23.
Shopneck, Henry P., Dorchester, assignor to J. J. Daly, West Newton, Mass. Felted box-toe stock and making the same. 1,574,208; Feb. 23.
Short, William J., Heber Springs, Ark. Automatic carburetor adjustment. 1,574,448; Feb. 23.
Shurtleff, George A., et al. (See Marek, Martin L., assignor.)
Siegel, Jacob, Philadelphia, Pa. Wearing apparel. 1,574,127; Feb. 23.
Sieger, John R., Minneapolis, Minn. Wrench. 1,574,176; Feb. 23.
Simons, George S., Plainfield, N. J. Traffic-control signal. 1,574,449; Feb. 23.
Simonsen, Louis. (See Sasgen, M. J., and Simondsen.)
Sinclair Refining Company. (See Bell, John E., assignor.)
Singer, Ettie, executrix. (See Singer, Joseph B.)
Singer, Joseph B., deceased, New York, N. Y., E. Singer, executrix. Collapsible case. 1,574,520; Feb. 23.
Skinner, Edgar R., J. H. Renne and E. O. Ostermeyer, St. Louis, Mo., assignors to Bernhart Mercantile Company. Nut-shelling machine. 1,574,450; Feb. 23.
Slater, Fred M., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Water guard for rock drills. 1,574,128; Feb. 23.
Sloan & Company. (See McLean, Robert J., assignor.)
Smith, Arthur V., and F. G. W. Dupree, Coventry, England. Collapsible top. 1,573,877; Feb. 23.
Smith, Bee B. (See Smith, Lucius A., assignor.)
Smith, Chetwood, Worcester, assignor to Stack Heater Company, Boston, Mass. Indirect water-heating apparatus. Re16,275; Feb. 23.
Smith, Edmund S. (See Smith, Joshua W., S. W., and E. S.)
Smith, Elden L., Marshfield, Oreg. Hoisting sling. 1,573,878; Feb. 23.
Smith, Hugh D. (See Knight, R. C., and Smith.)
Smith, Ira E., Stockton, Calif. Safety switch for oil-burning systems. 1,574,129; Feb. 23.
Smith, Jay M., San Francisco, Calif. Manifold and method of supplying explosive mixture to internal-explosion engines. 1,574,130; Feb. 23.
Smith, Joshua W., S. W., and E. S., Springville, Iowa. Automatic weighing machine. 1,574,706; Feb. 23.
Smith, Lee S., & Son Manufacturing Company. (See Vogt, Clarence C., assignor.)
Smith, Leonard S., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Finishing shirts. 1,574,312; Feb. 23.
Smith, Lucius A., assignor of one-half to B. B. Smith, Buffalo, N. Y. Truss pad. 1,574,451; Feb. 23.
Smith, Oscar T., Wellsburg, W. Va., assignor to Sheet Metal Specialty Company, Pittsburgh, Pa. Sheet-metal churn top. 1,574,707; Feb. 23.
Smith, Preston M., East Orange, assignor to U. S. Tool Company, Inc., Newark, N. J. Stator for variable condensers. 1,574,209; Feb. 23.
Smith, Samuel T. C., St. Louis. Making steel, iron, and other metal plates. 1,574,131; Feb. 23.
Smith, Sheldon W. (See Smith, Joshua W., S. W., and E. S.)
Smothers, Robert J., assignor to J. T. Robinson, Holyoke, Mass. Multicolor printing press. 1,574,708; Feb. 23.
Smyser, Elmer D., Fellows, Calif. Temperature regulator. 1,574,132; Feb. 23.
Snyder, Daniel E., Roseland, Nebr. Antiskid device for vehicle wheels. 1,574,177; Feb. 23.
Soabar Company. (See Henry, George W., jr., assignor.)
Societe Anonyme des Etablissements Lefaive, et al. (See Fonty, Henri, assignor.)
Société Anonyme des Etablissements Lefaive, Jean Jacques Knecht. (See Fonty, Henri, assignor.)

Solenberger, Dean M., Kansas City, Mo. Piston ring. 1,574,634; Feb. 23.
Sorrells, James A., Gainesville, Ga., assignor to Draper Corporation, Hopedale, Mass. Thread cutter for looms. 1,574,635; Feb. 23.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Apparatus for delivering charges of molten glass. 1,574,709; Feb. 23.
South, Wilbert L., Ontario, Calif. Dishwashing machine. 1,574,452; Feb. 23.
Southwark Foundry & Machine Company. (See Schranz, Frederick G., assignor.)
Spalding, A. G., & Bros. (See Reach, Milton B., assignor.)
Spaulding, Horace R., San Francisco, Calif. Method and apparatus for steaming grain and the like. 1,574,210; Feb. 23.
Splitdorf Electrical Company. (See Hatch, Harry A., assignor.)
Spreen, Charles C., assignor to Kelvinator Corporation, Detroit, Mich. Cover. 1,574,710; Feb. 23.
Stack Heater Company. (See Smith, Chetwood, assignor.)
Stafford, John W., Portland, Oreg. Automobile bumper. 1,574,133; Feb. 23.
Standard Chemical Company. (See Viol, Charles H., assignor.)

Standard Oil Company. (See Gates, Leroy G., assignor.)
Standard Underground Cable Company. (See Fisher, Henry W., assignor.)
Star Seal & Closure Company, The. (See Vessy, Sidney C., assignor.)
Star Service Hanger Co. (See Coney, James D., assignor.)
Stearns Conveyor Company, The. (See Philips, William E., assignor.)
Steele, Edwin G. (See Sutton, H. M., and Steele.)
Steele, Ira E., Sioux City, Iowa. Automatic draft control. 1,574,711; Feb. 23.
Steele, Walter L. (See Sutton, H. M., and Steele.)
Stern, Charles, and D. Brown, New York, N. Y. Rheostat. 1,574,521. Feb. 23.
Stern, Julius, Brooklyn, N. Y. Match holder. 1,573,946; Feb. 23.
Sterzing, Carl, Burlington, Iowa. Coating machine. 1,574,178; Feb. 23.
Stevenson, Winfield S., Zanesville, Ohio. Butt-welding pipe. 1,574,411; Feb. 23.
Stewart, Sidney V., Corry, Pa., and E. Timbs, Los Angeles, assignors of one-half to Union Tool Company, Torrance, Calif., and one-half to Ajax Iron Works, Corry, Pa. Cathead attachment for drilling engines. 1,574,313; Feb. 23.
Still, Ernest H., and A. G. Adamson, London, England. Steam trap. 1,573,879; Feb. 23.
Stobie, John A., Malta Bend, Mo. Baling press. 1,574,263; Feb. 23.
Stogdale, Joseph S., Dunbar, Pa., assignor of one-half to J. M. Ralne, Rainelle, W. Va. Grate. 1,574,134; Feb. 23.
Stone, Elmer B., assignor to The American Hardware Corporation, New Britain, Conn. Cabinet lock. 1,574,712; Feb. 23.
Stone, Nathan M., Chicago, Ill. Receptacle. 1,574,314; Feb. 23.
Stone, Wallace E. C., Los Angeles, Calif. Gas lock. 1,574,522; Feb. 23.
Stott, William R. (See Lewis, Alfred B., assignor.)
Strang, Seeley, and J. A. Dolan, Dover Plains, N. Y. Milk cooler. 1,574,179; Feb. 23.
Strauss, Joseph B., Chicago, Ill. Automobile body. 1,574,180; Feb. 23.
Sturtevant, B. F., Company. (See Powers, Earle C., assignor.)
Suarez, Joseph M., assignor of one-tenth to S. P. Buck, Baltimore, Md. Articulated car joint. 1,574,453; Feb. 23.
Sublette, William M., Huntington Park, Calif. Coin-controlled lock. 1,574,264; Feb. 23.
Sucha, William L., Omaha, Nebr. Emergency brake. 1,573,947; Feb. 23.
Sulter, Harold R., Red Lodge, Mont. Concrete form. 1,574,636; Feb. 23.
Sullivan, Michael H., Poughkeepsie, N. Y. Piston. 1,574,135; Feb. 23.
Sulzbach, Louis, assignor to Caloric Gas Stove Works, Philadelphia, Pa. Grease absorber. 1,574,713; Feb. 23.
Surface Combustion Co., The. (See Peters, Arthur W., assignor.)
Sutton, Henry M., and W. L. and E. G. Steele, Dallas, Tex. Air baffle. 1,574,637; Feb. 23.
Sutherland, Angus, Vancouver, British Columbia, Canada. Teat cup. 1,574,265; Feb. 23.
Sweet, Henry W., assignor to Brown-Lipe Gear Company, Syracuse, N. Y. Mounting for gear-shifting levers. 1,574,315; Feb. 23.
Swingspout Measure Co. (See Allen, Scott E., assignor.)
Switzer, Elmer E., assignor to G. D., R. E., and T. T. Switzer, Beaumont, Tex. Metallic packing. 1,574,412; Feb. 23.
Switzer, George D., et al. (See Switzer, Elmer E., assignor.)
Switzer, Richard E., et al. (See Switzer, Elmer E., assignor.)
Switzer, Thomas T., et al. (See Switzer, Elmer E., assignor.)
Syhre, Alfred. (See Oheim, A. C., Syhre, and Hentschel.)
Tagliabue, Charles J., Mfg. Co. (See Wilhelm, Robert M., assignor.)
Tamanaha, Katsunaga, Toyotama-gun, Tokyo-fu, Japan. Preserving powder of konjac to be used for manufacturing paste or sizing material. 1,574,638; Feb. 23.
Tandy, Maybel E., Hanford, Calif. Piston core chill and mold. 1,574,454; Feb. 23.
Tanners Products Company. (See Gallagher, Alfred H., assignor.)
Tantz, Herbert, and F. E. Dion, assignors to American Grinder Manufacturing Company, Milwaukee, Wis. Tool grip. 1,574,130; Feb. 23.
Taylor Instrument Companies. (See Winn, Herbert J., assignor.)
Taylor, John, Bronxville, N. Y., assignor to The Hess-Bright Manufacturing Company, Philadelphia, Pa. Submerged bearing mounting. 1,574,211; Feb. 23.
Taylor, William C., et al. (See Reid, James C., jr., assignor.)
Taylor, William H., et al. (See Foster, Walter L., assignor.)
Telley, Bronson B. (See Henrietta, V. M., and Telley.)
Tennessee Furniture Corporation. (See Frazier, R. T., Boddy, and Hamlin, assignors.)
Terry, Donald M., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Producing oscillations. 1,573,948; Feb. 23.
Tetétleni, Ármin, Budapest, Hungary. Hand press. 1,573,949; Feb. 23.
Thamm, Paul, New York, N. Y., assignor, by mesne assignments, to C. B. Woodrow. Oil filler and breather. 1,574,639; Feb. 23.
Thermoid Rubber Company. (See Ogren, Carl F., assignor.)
Thoen, Lowell H., Stockton, Calif., assignor, by mesne assignments, to Caterpillar Tractor Co. Leveling mechanism for combined harvesters. 1,574,212; Feb. 23.
Thompson, Charles S., Park Ridge, and W. B. Long, Chicago, assignors to Union Special Machine Company, Chicago, Ill. Filled-bag-closing machine. 1,573,880; Feb. 23.
Thompson, Robert G., trustee. (See Savidge, Albert C., assignor.)
Timbs, Edward. (See Stewart, S. V., and Timbs.)
Tiregage Valve Corporation. (See Neal, Curtis C., assignor.)
Toledo Scale Company. (See Englen, Frederick J., assignor.)
Toledo Scale Company. (See Hapgood, Clarence H., assignor.)
Toledo Scale Company. (See Hem, Halvor O., assignor.)
Toledo Scale Company. (See Pool, Elmer C., assignor.)
Toledo Scale Company. (See Reeves, Orwell C., assignor.)
Tomita, Urasaburo, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 69,531; Feb. 23.
Tomita, Urasaburo, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 69,532; Feb. 23.

Waterloo Saddlery Company. (See Grings, Casper H., assignor.)
Watkins, Thomas G. (See Killman, Thomas A., assignor.)
Weatherell, Reginald D., London, England. Light, portable, collapsible baby car. 1,573,884; Feb. 23.
Weber Showcase & Fixture Company. (See Schwind, Frank W., assignor.)
Webster, Bester R., assignor to Reliance Die & Stamping Company, Chicago, Ill. Electrical condenser. 1,574,268; Feb. 23.
Weckbaugh, Joseph V., New York, N. Y., assignor to American Cuptor Corporation. Machine for manufacturing paper cups. 1,574,324; Feb. 23.
Weeks, Francis H., New York, N. Y. Hoisting bucket. 1,574,269; Feb. 23.
Weeks, William W., Brooklyn, N. Y., assignor to Elevator Supplies Company, Inc. Elevator-door closer and switch. 1,574,717; Feb. 23.
Weidenbach, Michael F., Minneapolis, Minn., assignor to National Air Moistener Company. Air-moistening device. 1,573,956; Feb. 23.
Weight-O-Graph Company, The. (See Schaper, Harry C., assignor.)
Weingand, Richard. (See Czapek, E., and Weingand.)
Weintraub, Sigmund, et al. (See Flering, M., and Schneider, assignors.)
Weir, William W., Alameda, assignor to Majestic Electric Appliance Company, Incorporated, San Francisco, Calif. Waffle iron. 1,574,141; Feb. 23.
Weis, Albert H., assignor to Metropolitan Sewing Machine Corporation, Nyack, N. Y. Multiple-needle sewing machine. 1,574,270; Feb. 23.
Weis, John P., assignor to Metropolitan Sewing Machine Corporation, Nyack, N. Y. End cap for sewing-machine horns. 1,574,524; Feb. 23.
Weisbaum, Edward J., Cincinnati, Ohio. Necktie. 1,573,885; Feb. 23.
Weiser Hardware Manufacturing Company. (See Wensel, Louis, assignor.)
Welch, John M., Houston, Tex. Device for swimming-belt construction. 1,574,221; Feb. 23.
Welles, Roger, et al. (See Nesmith, Samuel D., assignor.)
Wellman, Lester R., assignor to Friedley-Voshardt Co., Chicago, Ill. Plate for lighting fixtures. Des. 69,549; Feb. 23.
Wellman, Lester R., assignor to Friedley-Voshardt Co., Chicago, Ill. Lantern. Des. 69,550; Dec. 23.
Wendel, Ada B., Smithland, Iowa. Fruit-jar cover. 1,574,458; Feb. 23.
Wensel, Louis, assignor to Weiser Hardware Manufacturing Company, Los Angeles, Calif. Door and window bolt. 1,574,222; Feb. 23.
Wesson, Ernest E., Blair Station, assignor of one-sixth to A. H. Johnson, Blair Station, one-sixth to F. H. Jackson, and one-sixth to R. L. Gissendanner, Clairton, Pa. Check-operated radio receiving set. 1,573,886; Feb. 23.
Wesson, Henry N., Attalla, Ala. Automobile signal. 1,573,887; Feb. 23.
West Disinfecting Company. (See Kooperstein, Louis, assignor.)
West, Franklin G., Deerfield, Kans. Ladder kiddie slide. 1,573,957; Feb. 23.
West, James, Ballston Spa, N. Y. Support. 1,574,010; Feb. 23.

Westendarp, Henry O., Saugus, Mass. Rudder for steering and controlling vessels. 1,574,718; Feb. 23.
Western Electric Company. (See Casper, William L., assignor.)
Western Electric Company. (See Fletcher, Harvey, assignor.)
Western Electric Company. (See Hartley, Ralph V. L., assignor.)
Western Electric Company. (See Horton, Joseph W., assignor.)
Western Electric Company. (See Johnson, John B., assignor.)
Western Electric Company. (See Mathes, Robert C., assignor.)
Western Electric Company. (See Maxfield, Joseph P., assignor.)
Western Electric Company. (See Murphy, Paul B., assignor.)
Western Electric Company. (See Nicolson, Alexander M., assignor.)
Western Electric Company. (See Polinkowsky, Lipa, assignor.)
Western Electric Company. (See Robbins, Charles W., assignor.)
Western Electric Company. (See Terry, Donald M., assignor.)
Western Electric Company. (See Vennes, Harald J., assignor.)
Western Electric Company. (See Williams, Samuel B., jr., assignor.)
Western Union Telegraph Company, The. (See Leedom, Randolph, assignor.)
Westinghouse Electric and Manufacturing Company. (See Herr, Herbert T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schmidt, Henry F., assignor.)
Westinghouse Lamp Company. (See Hageman, Aaron M., assignor.)
Weston, William S., Columbia, S. C. Gyratory crushing machine. 1,574,142; Feb. 23.
Weymouth, Harry G., assignor to The Eaton Axle and Spring Company, Cleveland, Ohio. Bumper. 1,574,325; Feb. 23.
Whall, Richard A., Athol, Mass. Folding boat. 1,573,958; Feb. 23.
White, Clarence, San Francisco, Calif. Conveyer system. 1,574,143; Feb. 23.
White, Herbert, Hanover, Ill. Fishing reel. 1,574,719; Feb. 23.
White, Oliver C., Gardena, Calif. Eye shade. 1,574,144; Feb. 23.
White, William E., assignor to Kalman Steel Co., Chicago, Ill. Rib chair. 1,574,326; Feb. 23.
White, William E., Chicago, Ill. Bar spacer. 1,574,327; Feb. 23.
White, William E., assignor to Kalman Steel Co., Chicago, Ill. Nailing-strip anchor. 1,574,328; Feb. 23.
White, William E., Chicago, Ill. Cross bracing for structural members. 1,574,329; Feb. 23.
Wiggins, John H., Bartlesville, Okla. Floating deck for liquid-storage tanks. 1,574,011; Feb. 23.
Wiggins, John H., Bartlesville, Okla. Liquid-storage tank. 1,574,012; Feb. 23.
Wiggins, John H., Bartlesville, Okla. Floating deck for liquid-storage tanks. 1,574,013; Feb. 23.
Wightman, Sherburne H., and T. A. Long, Chicago, Ill., assignors to International Concrete Industries Corporation, Chicago, Ill. Block-shaping machine. 1,574,720; Feb. 23.
Wilcox, George, Riverside, Calif., assignor to California Canning Machinery Co. Can-arranging machine. 1,574,224; Feb. 23.
Wilcox, George L., Escalon, Calif. Capri-fig basket. 1,574,223; Feb. 23.
Wilcox, Lewis T., Peekskill, N. Y. Heat intensifier. 1,574,525; Feb. 23.
Wilcox, Raymond G., Hannibal, N. Y. Turntable. 1,574,271; Feb. 23.
Wilder, Fred H., Brattleboro, Vt., assignor to Millers Falls Company, Millers Falls, Mass. Screw jack. 1,574,331; Feb. 23.
Wilhelm, Robert M., Brooklyn, assignor to Charles J. Tagliabue Mfg. Co., New York, N. Y. Thermometer. 1,574,459; Feb. 23.
Wilke, Fred L., and W. Burns, Chicago, Ill. Vending-machine casing. Des. 69,551; Feb. 23.
Wilkinson, William E. (See Laucks, S. F., and Wilkinson.)
Wilkinson, William E., assignor to S. F. Laucks, York, Pa. Joint. 1,574,330; Feb. 23.
Willetts, Paul G., Berlin, assignor to Hartford-Empire Company, Hartford, Conn. High-temperature cement. 1,573,888; Feb. 23.
Williams, Samuel B., jr., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Carrier-wave communicating system. 1,573,959; Feb. 23.
Williamson, R., & Co. (See Caesar, Frank J., assignor.)
Williamson, Robert B., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Flow indicator. 1,574,460; Feb. 23.
Wilson, Archibald. (See Wilson, Thomas and A.)
Wilson, Maximus L., Wichita, Kans. Coaster. 1,574,225; Feb. 23.
Wilson, Thomas and A., Dongh, Ireland. Support for bobbins, cops, pirns, or the like, when unwinding thread, yarn, or the like therefrom. 1,574,721; Feb. 23.
Winn, Herbert J., assignor to Taylor Instrument Companies, Rochester, N. Y. Incubator thermometer. 1,574,413; Feb. 23.
Winning, Robert K., Wauwatosa, assignor to Clum Manufacturing Company, Milwaukee, Wis. Control-shaft mounting. 1,573,960; Feb. 23.
Wintroath, John A., Los Angeles, Calif., assignor to Peerless Pump Company. One-way coupling. 1,574,462; Feb. 23.
Wire Fibrous Products Company. (See Ryder, Henry, assignor.)
Wiser, Orion, and A. Kemper, Martinsville, Ill. Collapsible egg crate. 1,573,889; Feb. 23.
Witsberger, William, Wheeling, W. Va. Universal trailer hitch. 1,574,461; Feb. 23.
Wolf, Augustus, Chambersburg, Pa. Bran duster. 1,574,722; Feb. 23.
Wolfe, Allan S. (See Dailey, Clyde C., assignor.)
Wood Products & By Products Corporation. (See Fish, Frederick K., jr., assignor.)
Woods, Lee A., et al. (See Daugherty, Claude, assignor.)
Woodrow, C. Blair. (See Thamm, Paul, assignor.)
Woodward, Frederick W., and A. R. Buttery, Sheffield, assignors to M. A. Buttery, Walkley, Sheffield, England. Cinematograph projection apparatus. 1,573,890; Feb. 23.
Worthington Pump and Machinery Corporation. (See Allerton, Robert W., assignor.)
Wright, Clyde S., and F. J. Schwimmer, assignors to The National Supply Company, Toledo, Ohio. Bull wheel. 1,574,332; Feb. 23.
Wright, Sumner B., East Orange, N. J., and J. T. Schott, Brooklyn, N. Y., assignors to American Telephone and Telegraph Company. Gain-controlling circuits. 1,573,891; Feb. 23.
Wuchert, Friedrich, Astoria, N. Y. Automobile signal. 1,574,463; Feb. 23.
Yeiser, Henry C., Cincinnati, Ohio, and W. A. Ringler, Philadelphia, Pa., assignors to Globe Wernicke Co., Cincinnati, Ohio. Tray for machine posting. 1,574,526; Feb. 23.
Yelcic, Thomas, assignor of one-half to G. Verbonic, Republic, Pa. Railway-crossing signal. 1,574,723; Feb. 23.
Yelm, Peter G., Genoa, Nebr. Animal trap. 1,573,892; Feb. 23.
Young, John C., Pittsburgh, Pa. Hairpin. 1,574,527; Feb. 23.
Youngman, Maximilian R. (See Youngman, Otto J. and M. R.)
Youngman, Otto J. and M. R., Los Angeles, Calif. Workbench. 1,574,528; Feb. 23.
Zahn, Hans, Union, assignor to Robert Reiner, Incorporated, Weehawken, N. J. Warp beam for knittting machinese. 1,574,724; Feb. 23.
Zifferer, Lothar R., Columbia, Pa. Adjustable pipe hanger. 1,573,893; Feb. 23.
Zima, Vaclav, Horice, Czechoslovakia. Change-speed gear for motor vehicles. 1,573,894; Feb. 23.
Zouri Drawn Metals Company. (See Nelson, Charles G., assignor.)
Zucker, Henry L., Matawan, N. J., assignor to A. P. Munning & Co., New York, N. Y. Buff wheel and spacing device therefor. 1,573,961; Feb. 23.
Zwierzina, Alois J. (See Ackerman, E. L., and Zwierzina.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 23D DAY OF FEBRUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). Includes patents, reissues, and designs.

Abrasive elements, Process and machine for dressing. C. G. Olson. 1,574,303; Feb. 23.
Acid-proof container. E. H. Radabaugh. 1,574,690; Feb. 23.
Adding machine. R. W. Hook. 1,574,249; Feb. 23;
Adhesive joints and the like, Making. S. Bergstein. 1,574,018; Feb. 23.
Advertising frame. V. Gerard. Des. 69,508; Feb. 23.
Advertising medium. F. E. Armstrong. 1,573,898; Feb. 23.
Agitating device. J. Miles. 1,574,104; Feb. 23.
Air baffle. H. M. Sutton, W. L. Steele, and E. G. Steele. 1,574,637; Feb. 23.
Aircraft, Steering device for. A. Flettner. 1,574,567; Feb. 23.
Air-moistening device. M. F. Weidenbach. 1,573,956; Feb. 23.
Air-pressure gauge attachment for inflating hose. A. G. Anderson. 1,573,793; Feb. 23.
Air-pressure signal device, Automatic. A. W. Parquette. 1,573,854; Feb. 23.
Alloys, Making magnetic. V. B. Browne. 1,574,550; Feb. 23.
Amusement device. E. M. Lynch. 1,574,201; Feb. 23.
Anchor. C. A. Cunningham. 1,574,471; Feb. 23.
Animal poke. A. G. D. Krey. 1,574,251; Feb. 23.
Animal trap P. G. Yelm. 1,573,892; Feb. 23.
Antiskid chain. A. E. Ream. 1,574,692; Feb. 23.
Article of manufacture and process of making same. H. A. Endres. 1,574,380; Feb. 23.
Automatic drive. F. H. Lippincott. 1,574,299; Feb. 23.
Automobile body. J. B. Strauss. 1,574,180; Feb. 23.
Automobile bumper. J. W. Stafford. 1,574,133; Feb. 23.
Automobile lock. E. J. B. Irving. 1,574,151; Feb. 23.
Automobile radiators, Vapor condenser for. K. W. E. Hamann. 1,574,629; Feb. 23.
Automobile signal. H. N. Wesson. 1,573,887; Feb. 23.
Automobile signal. F. Wuchert. 1,574,463; Feb. 23.
Automobile spotlight. H. E. Montgomery. 1,574,050; Feb. 23.
Automobiles, Automatic safety pick-up device for. J. S. Ball. 1,573,795; Feb. 23.
Automobiles, Front guard for. R. R. McGregor. 1,574,100-1; Feb. 23.
Automobiles, Radiator fender for. R. R. McGregor. 1,574,102; Feb. 23.
Automobiles, Radiator shell for. R. K. Jack. Des. 69,515; Feb. 23.
Automobiles, Speed-pedal-locating device for. E. W. Saunders. 1,574,310; Feb. 23.
Automobiles, Towline for. L. G. Chapman. 1,574,552; Feb. 23.
Ax and blade guard therefor, Combined. J. D. Case. 1,574,232; Feb. 23.
Axle, Wagon. A. O. Hubbard. 1,574,036; Feb. 23.
Baby car, Light, portable, collapsible. R. D. Weatherell. 1,573,884; Feb. 23.
Baby rattle. B. J. Feldstein. 1,574,341; Feb. 23.
Bag-closing machine, Filled-. C. S. Thompson and W. B. Long. 1,573,880; Feb. 23.
Bagasse for fiber-making purposes, Treating. T. B. Munroe. 1,574,254; Feb. 23.
Bait, Carrier or holder for artificial. F. H. Campbell. 1,574,416; Feb. 23.
Baling press. J. A. Stobie. 1,574,263; Feb. 23.
Ball-lamp adapter. F. J. Caesar. Des. 69,489; Feb. 23.
Bank. J. Komorous. 1,574,427; Feb. 23.
Bar spacer. W. E. White. 1,574,327; Feb. 23.
Barrettes and the like, Display pad for. S. Gutterman. 1,574,192; Feb. 23.
Bassinet. A. R. Ackermann. 1,574,226; Feb. 23.
Bathtubs, Waste and overflow fixtures for. S. Gade. 1,573,820; Feb. 23.
Battery: *See*—
Primary battery.
Battery cell and handle. W. H. Duggan. 1,573,922; Feb. 23.
Bearing construction. B. M. Coffee. 1,574,470; Feb. 23.
Bearing, Flyer. W. Prince-Smith and D. Waterhouse. 1,574,689; Feb. 23.
Bearing mounting, Submerged. J. Taylor. 1,574,211; Feb. 23.
Bearings and the like, Apparatus for lubricating the axle. G. Duffing. 1,574,236; Feb. 23.
Bearings, Retainer for radial ball. C. W. Davis and J. A. Calder. 1,574,278; Feb. 23.

Bed. C. A. Roberts. 1,574,696; Feb. 23.
Bed, Automobile. B. D. Manning. 1,574,434; Feb. 23.
Bed, Folding. W. Cramer. 1,573,809; Feb. 23.
Bed, Folding. S. K. Johnston. 1,574,659; Feb. 23.
Belt, Amusement conveyer. H. F. Maynes. 1,574,508; Feb. 23.
Belt-conveyer support. W. E. Philips. 1,574,511; Feb. 23.
Belt, Textile. J. Macadam and W. Berry. 1,573,982; Feb. 23.
Beverage dispenser. C. A. Look. 1,574,495; Feb. 23.
Bib. A. B. Lewis. 1,574,200; Feb. 23.
Bicycles, Elastic suspension for. C. Nagot. 1,573,849; Feb. 23.
Birdcage support or similar article. S. Klein. Des. 69,516; Feb. 23.
Bit. P. Basmaison. 1,574,725; Feb. 23.
Blade holder. F. J. Lovin. 1,574,665; Feb. 23.
Blowtorch. C. V. Royall. 1,574,698; Feb. 23.
Board-dressing machine. G. H. Dickerson. 1,574,419; Feb. 23.
Boat, Folding. R. A. Whall. 1,573,958; Feb. 23.
Bobbin carrier for lace-braiding machines. H. Fonty. 1,574,616; Feb. 23.
Bobbins, cops, pirns, or the like when unwinding thread, yarn, or the like therefrom, Support for. T. and A. Wilson. 1,574,721; Feb. 23.
Boiler surfaces, Percussive tool for scaling. P. G. Handoll. 1,574,190; Feb. 23.
Book end. J. L. Druckleb. Des. 69,502; Feb. 23.
Booklet. J. Konorous. 1,574,428; Feb. 23.
Bottle. W. H. Braun. Des. 69,486; Feb. 23.
Bottle. F. Ciardi. Des. 69,493; Feb. 23.
Bottle-filling machines, Bottle adapter for. A. I. Risser. 1,574,307; Feb. 23.
Bottle-washing machine. R. A. Manning. 1,573,842; Feb. 23.
Box: *See*—
Cement-block-mold box. Locomotive fire box.
Cigar and cigarette box. Mail box.
Folding box.
Box-blank cutting and scoring form and preparing the same. C. G. Hayes. 1,574,030; Feb. 23.
Box closure. H. L. Fellowes. 1,574,737; Feb. 23.
Box-cover machine, Extension-. H. Blugerman. 1,573,908; Feb. 23.
Box-making machine, Paper-. S. Bergstein. 1,574,019; Feb. 23.
Bracelet or chain, Separable-link. F. W. Nittel. 1,574,680; Feb. 23.
Bracket: *See*—
Light bracket. Shade bracket.
Braiding machines, Carrier-drive head for lace-. H. Fonty. 1,574,240; Feb. 23.
Brake: *See*—
Emergency brake. Power brake.
Brake lever, Forged. F. Schaefer. 1,574,207; Feb. 23.
Brake shoe. J. A. Connelly. 1,574,555; Feb. 23.
Brake shoe, Vehicle wheel. H. Perrot. 1,574,106; Feb. 23.
Bran duster. A. Wolf. 1,574,722; Feb. 23.
Brick, Interlocking multiple. H. Sharpe. 1,574,123; Feb. 23.
Brush. O. F. Schuldt. 1,574,519; Feb. 23.
Brush, Combined shaving and tooth. H. D. Delaney. 1,574,610; Feb. 23.
Brush, Rotary. J. Adams. 1,574,530; Feb. 23.
Bucket, Hoisting. F. H. Weeks. 1,574,269; Feb. 23.
Buckets, Lip and teeth for excavating. N. H. Reynolds. 1,574,444; Feb. 23.
Buff wheel and spacing device therefor. H. L. Zucker. 1,573,961; Feb. 23.
Building blocks. R. H. Groves. 1,574,191; Feb. 23.
Building blocks, Apparatus for molding. J. A. Ferguson. 1,574,565; Feb. 23.
Building construction. J. F. Loucks. 1,574,586; Feb. 23.
Bull wheel. C. S. Wright and F. J. Schwimmer. 1,574,332; Feb. 23.
Bumper. D. L. Benton. Des. 69,478; Feb. 23.
Bumper. H. G. Weymouth. 1,574,325; Feb. 23.
Burner: *See*—
Gas burner. Oil burner.
Hydrocarbon burner. Paint burner.
Burners, Safety device for. M. A. Fesler. 1,574,728; Feb. 23.
Button. A. A. Ahlquist. 1,574,414; Feb. 23.
Button. F. G. Purinton. 1,573,860; Feb. 23.

By-products from metal treated in retorts, Method of and apparatus for collecting, refining, and utilizing. H. W. Tuttle. 1,574,137; Feb. 23.
By-products from plant substances and the like, Recovering. F. K. Fish, jr. 1,574,614; Feb. 23.
Cabinet lock. E. B. Stone. 1,574,712; Feb. 23.
Cabinet, Sewing. C. M. Schwantes. 1,574,007; Feb. 23.
Calendar. L. W. Hamilton. 1,574,245; Feb. 23.
Can. C. G. Fitzhugh. 1,574,239; Feb. 23.
Can-arranging machine. G. Wilcox. 1,574,224; Feb. 23.
Candle cup. F. J. Caesar. Des. 69,488; Feb. 23.
Can opener. T. A. Killman. 1,573,969; Feb. 23.
Capri-fig basket. G. L. Wilcox. 1,574,223; Feb. 23.
Carbon or lampblack, Apparatus for making. O. D. Horton. 1,574,091; Feb. 23.
Carburetor adjustment, Automatic. W. J. Short. 1,574,448; Feb. 23.
Carburetors, Foot accelerator for. E. W. Saunders. 1,574,311; Feb. 23.
Car coupling. A. Hoyes. 1,574,150; Feb. 23.
Car joint, Articulated. J. M. Suarez. 1,574,453; Feb. 23.
Car wheel. A. L. Carroll. 1,574,231; Feb. 23.
Cars, Uncoupling device for railway. P. B. Camp. 1,573,803; Feb. 23.
Carrier: *See*—
Weft carrier.
Cartridge magazine, Small arm with tubular. H. Schmeisser. 1,574,701; Feb. 23.
Case: *See*—
Collapsible case.
Caskets, Waterproof container for burial. E. B. and H. H. Rardon. 1,574,111; Feb. 23.
Cast iron, Producing. J. C. Henderson. 1,573,937; Feb. 23.
Cement-block-mold box. R. A. Eaton. 1,574,612; Feb. 23.
Cement blocks, Machine for forming. J. Bocchino. 1,574,597; Feb. 23.
Cement, High-temperature. P. G. Willetts. 1,573,888; Feb. 23.
Centrifugal switch. H. E. Curtiss. 1,574,370; Feb. 23.
Cesspool. W. T. Burtis. 1,574,603; Feb. 23.
Chain. C. J. Connors. 1,574,066; Feb. 23.
Chain, Antiskid. J. G. Allmon. 1,574,014; Feb. 23.
Chain construction. L. E. Fulford. 1,573,927; Feb. 23.
Chair. O. H. Hansen. 1,574,088; Feb. 23.
Chair. N. L. Kuhnen. Des. 69,518; Feb. 23.
Chair spring. O. H. Hansen. 1,574,087; Feb. 23.
Chalk holder. G. F. Miller. 1,574,590; Feb. 23.
Chandelier or article of similar nature. I. Rosenblatt. Des. 69,529; Feb. 23.
Charger. C. Rees. 1,574,168; Feb. 23.
Chisel holder. J. J. Macek, jr. 1,574,588; Feb. 23.
Chocolate for confection coatings, Machine for preparing. P. A. Hilliard. 1,573,832; Feb. 23.
Choker hook. N. Dameron and R. Rhodes. 1,574,372; Feb. 23.
Chuck and adjustable stay log, Offset. C. A. Kessler. 1,574,037; Feb. 23.
Churn top, Sheet-metal. O. T. Smith. 1,574,707; Feb. 23.
Cigar and cigarette box, Automatic. F. Dvorsky. 1,574,071; Feb. 23.
Cinematograph apparatus, Moving-lens. C. W. R. Campbell and F. G. A. Roberts. 1,573,804; Feb. 23.
Cinematograph projection apparatus. F. W. Woodward and A. R. Buttery. 1,573,890; Feb. 23.
Cinematographic film bands, Apparatus for viewing. A. Grünfeld. 1,573,825; Feb. 23.
Circuit interrupter. C. D. Ainsworth. 1,574,531; Feb. 23.
Circuits, Gain-controlling. S. B. Wright and J. T. Schott. 1,573,891; Feb. 23.
Cigar and cigarette light extinguisher. W. W. Briscoe. 1,574,599; Feb. 23.

Honey extractor. G. L. Morris. 1,574,051; Feb. 23.
Honeycombs with sweet liquid for the nourishment of bees, Filling of. M. L. Gallesio-Piuma. 1,574,256; Feb. 23.
Hook: *See*—
Choker hook.
Horse collars, Hame holder for. C. H. Grings. 1,574,478; Feb. 23.
Hose supporter. E. R. Nablo. 1,574,505; Feb. 23.
Hosiery drier. E. C. Powers. 1,574,057; Feb. 23.
Hosiery, Drying. E. C. Powers. 1,574,056; Feb. 23.
Hub, Free-wheel. J. Schall. 1,574,173; Feb. 23.
Huller and sheller, Almond. L. K. Vaughan. 1,574,138; Feb. 23.
Hydrocarbon burner. G. E. Grimmeisen. 1,574,625; Feb. 23.
Hydrocarbon burner. P. B. Johnson. 1,573,965; Feb. 23.
Ice chest. F. W. Schwind. 1,574,008; Feb. 23.
Ice-cream cones, Machine for making. J. Muck. 1,573,989; Feb. 23.
Ignition machine, Magneto-electric. W. Hähnle. 1,574,646; Feb. 23.
Incubators, Egg-turning device for. J. McKeon. 1,574,401; Feb. 23.
Index, Visible. H. A. Van Houten. 1,574,523; Feb. 23.
Indicator: *See*—
Flow indicator.
Induction apparatus, Stationary. M. Unger. 1,574,640; Feb. 23.
Ink composition, Transfer-. W. S. Lawrence. 1,573,976; Feb. 23.
Inkwell lock. G. F. Ivey. 1,573,943; Feb. 23.
Insect-destroying machine. F. E. Reed. 1,593,997; Feb. 23.
Insecticides, Preparation of. W. K. Schweitzer. 1,574,118; Feb. 23.
Insulating tape, Electric. I. W. Levine. 1,573,978; Feb. 23.
Insulation, Impregnated. G. F. Dreher. 1,574,562; Feb. 23.
Iron ore, Dry reduction of. P. Farup. 1,574,382; Feb. 23.
Internal-combustion engine. M. Goldsmith. 1,574,244; Feb. 23.
Internal-combustion engine. J. T. Hale. 1,574,573–4; Feb. 23.
Iron: *See*—
Soldering iron. Waffle iron.
Iron, Treating. W. J. Diederichs and A. Hayes. 1,574,374–7; Feb. 23.
Jack: *See*—
Lifting jack. Vehicle jack.
Jack and switch, Multiple. L. A. Krejci. 1,574,158; Feb. 23.
Jar cover, Fruit-. A. B. Wendel. 1,574,458; Feb. 23.
Jar-gripping lifter. B. Johanson. 1,574,349; Feb. 23.
Jaw for engravers' clamps. C. E. Linnig. 1,574,585; Feb. 23.
Jetty. H. F. Kellner. 1,574,153; Feb. 23.
Jewelry, Article of. G. A. Armstrong. 1,573,899; Feb. 23.
Joint: *See*—
Rail joint. Swivel joint.
Joint. W. E. Wilkinson. 1,574,330; Feb. 23.
Joist-supporting stirrup. H. Kauffman. 1,573,967; Feb. 23.
Knife attachment, Paper-hanger's. G. A. Christopherson. 1,574,641; Feb. 23.
Knitting machines, Latch opener for. R. W. Scott. 1,574,703; Feb. 23.
Knitting machines, Warp beam for. H. Zahn. 1,574,724; Feb. 23.
Labels to aluminum ware, Attaching. A. M. Hageman. 1,573,826; Feb. 23.
Lace. C. W. Birkin and E. T. Sands. Des. 69,483–4; Feb. 23.
Lamp shade. H. Firman. 1,574,613; Feb. 23.
Lamp shade or similar article. G. E. Villaret. Des. 69,548; Feb. 23.
Lamp-socket holder. W. A. Riley. 1,574,695; Feb. 23.
Lamp structure. M. B. Cary. 1,573,805; Feb. 23.
Lantern. L. R. Wellman. Des. 69,550; Feb. 23.
Latch. E. Crompton and C. L. Crooks. 1,574,024; Feb. 23.
Latch. F. M. Vandervoort. 1,574,025; Feb. 23.
Latch construction. J. B. Rogers. 1,573,866; Feb. 23.
Latch or keeper means. E. Crompton and C. L. Crooks. 1,574,023; Feb. 23.
Lath, Metal. G. F. Pawling. 1,574,304; Feb. 23.
Laundry machines, Interlocking device for. B. F. J. Schutt. 1,574,702; Feb. 23.
Laundry materials, System for recovering used. F. L. Rosenau. 1,574,170; Feb. 23.
Lead, Refining. H. Harris. 1,573,830; Feb. 23.
Leather-graining machine. J. W. Aulson. 1,574,534; Feb. 23.
Lens-drilling machines, Circuit controller for. E. E. Gray. 1,574,571; Feb. 23.
Life-saving apparatus for use at sea. J. Hylard. 1,574,485; Feb. 23.
Lifter: *See*—
Jar-gripping lifter.
Lifting jack. F. L. Gormley. 1,574,476; Feb. 23.
Light: *See*—
Vehicle light.

Light-sensitive medium and producing the same. M. C. Beebe. 1,574,356; Feb. 23.
Lighter, Cigar. L. Pengilly. 1,573,992; Feb. 23.
Lighting fixture. E. A. Gillinder. Des. 69,509; Feb. 23.
Lighting fixture. M. M. Marks. 1,573,843; Feb. 23.
Lighting fixture. J. C. Mettler. Des. 69,524; Feb. 23.
Lighting-fixture canopy. F. J. Caesar. Des. 69,490–1; Feb. 23.
Lighting-fixture plate. N. J. Berger. Des. 69,481–2; Feb. 23.
Lighting fixtures, Plate for. L. R. Wellman. Des. 69,549; Feb. 23.
Lignite and producing same, Dehydrated. E. P. Schoch. 1,574,174; Feb. 23.
Liquid-depth gauge. H. C. Warner. 1,574,267; Feb. 23.
Liquid dispensers, Vending machine for. I. Waldsmith. 1,574,218; Feb. 23.
Liquid-storage tank. J. H. Wiggins. 1,574,012; Feb. 23.
Liquid-transfer means. J. A. Barr. 1,573,796; Feb. 23.
Liquids of different specific gravities, Separating. R. C. Knight and H. D. Smith. 1,574,157; Feb. 23.
Lister, cultivator, and ridge worker, Combination. O. A. Scogin. 1,574,009; Feb. 23.
Lithographic-machine damping rollers, Apparatus for adjusting. H. G. Nall. 1,574,203; Feb. 23.
Lithographic-printing surfaces, Apparatus for gumming. B. J. J. Goulding. 1,574,570; Feb. 23.
Lock: *See*—
Automobile lock. Gas lock.
Cabinet lock. Inkwell lock.
Coin-controlled lock. Nut lock.
Electric safety combination lock. Window lock.
Lock. R. A. Endebrock. 1,574,072; Feb. 23.
Locking device for motor cars, motor cycles, and cycles for prevention of theft. W. Partridge. 1,573,855; Feb. 23.
Locomotive bed. H. M. Pflager. 1,573,993; Feb. 23.

Locomotive fire box. C. G. Hawley. 1,574,029; Feb. 23.
Locomotive frame. W. O. Ashe. 1,573,900; Feb. 23.
Logarithmic resistance circuit for measuring combinations of different factors. J. M. Nalman. 1,573,850; Feb. 23.
Loom, Automatic weft-replenishing. D. M. Hollins. 1,573,942; Feb. 23.
Loom temple. G. Crompton, jr. 1,574,415; Feb. 23.
Loud speaker. F. J. Reichmann. 1,574,514; Feb. 23.
Loud speaker, Piezo-electric. A. M. Nicolson. 1,574,302; Feb. 23.
Louver. M. Gilmore. 1,573,930; Feb. 23.
Lubricating composition. I. M. Custer. 1,574,642; Feb. 23.
Lubricating device. A. H. Gits. 1,574,386; Feb. 23.
Lubricators, Force-feed. F. K. Landgraf. 1,574,583; Feb. 23.
Magnesium, Protective coating for. L. J. Keeler. 1,574,289–90; Feb. 23.
Mail box. H. C. Barth. 1,574,354; Feb. 23.
Mail-stamping machine. G. E. Sheldrick. 1,574,262; Feb. 23.
Mantel, fireplace, and hearth unit, Portable. P. Reuter-Lorenzen. 1,573,864; Feb. 23.
Marking gauge. E. G. Balstad. 1,574,182; Feb. 23.
Massaging device, Scalp-. W. Duncan. 1,574,540; Feb. 23.
Match holder. J. Stern. 1,573,946; Feb. 23.
Match splints to prevent afterglow, Impregnating. W. J. Elder and C. N. Morehouse. 1,574,238; Feb. 23.
Mattresses, Machine for wrapping bed. H. L. Dismer. 1,573,920; Feb. 23.
Mechanical movement. A. Rasmussen. 1,574,442; Feb. 23.
Medallion mounting. J. A. Dedouch. 1,574,373; Feb. 23.
Metal articles, Method and apparatus for threading. G. E. Mirfield. 1,574,631; Feb. 23.
Metal cap. C. Hammer. 1,574,085; Feb. 23.
Metal-forming machine. C. W. Kirsch. 1,574,397; Feb. 23.
Metal melting and pouring device. W. M. Bowles. 1,574,598; Feb. 23.
Metal sheets by electrodeposition, Fabrication of. A. Z. Pedersen. 1,574,055; Feb. 23.
Metals, Apparatus for refining or separating. H. Harris. 1,573,829; Feb. 23.
Meter: *See*—
Fluid meter. Water meter.
Meter casings, Draining device for. A. G. Holmes. 1,573,834; Feb. 23.
Meters, Theftproof device for watt-hour. F. A. Kolb. 1,574,039; Feb. 23.
Milk cooler. S. Strang and J. A. Dolan. 1,574,179; Feb. 23.
Milk, Manufacture of powdered. N. H. Christensen. 1,574,233; Feb. 23.
Milk producer and making the same. D. D. Peebles. 1,574,165; Feb. 23.
Mill: *See*—
Tube-rolling mill.
Miter boxes, Attachment for. E. Leske, jr. 1,574,663; Feb. 23.
Mold. C. F. Ogren. 1,574,683; Feb. 23.
Motor: *See*—
Fluid motor. Wave motor.
Motor support, Booster. H. M. Pflager. 1,573,994; Feb. 23.

Typewriting machine. J. Waldheim. 1,574,323; Feb. 23.
Underreamer drill, Rotary. O. W. Dickerson. 1,574,280; Feb. 23.
Vacuum fuel-feeding device. H. A. Miller and R. H. Rhoades. 1,574,049; Feb. 23.
Valve. C. R. Martin. 1,574,435; Feb. 23.
Valve. D. S. Beattie. 1,574,017; Feb. 23.
Valve and ringer, Combined pressure-liquid. B. Lutsky and S. Kreisberg. Des. 69,523; Feb. 23.
Valve, Automatic pressure-operated fuel. C. M. Schaeffer. 1,574,260; Feb. 23.
Valve for oil tanks and other containers of inflammable fluids, Automatic safety emergency. V. J. Boggiano. 1,573,798; Feb. 23.
Valve for swingspout measures, Spring-. S. E. Allen. 1,573,895; Feb. 23.
Valve, Frostproof closet. P. Haas. 1,573,934; Feb. 23.
Valve, Inset casing float. A. P. Burch. 1,574,537; Feb. 23.
Valve-operating device. R. F. Laurence. 1,574,661; Feb. 23.
Valve, Pressure-liquid. B. Lutsky and S. Kreisberg. Des. 69,522; Feb. 23.
Valve, Storage-tank emergency. V. M. Henrietta and B. B. Telley. 1,573,938; Feb. 23.
Valve structure. A. F. Meyer. 1,573,985; Feb. 23.
Vehicle bumper. G. J. Glahn. 1,574,243; Feb. 23.
Vehicle direction-indicating signal, Motor-. W. J. Davis. 1,574,146; Feb. 23.
Vehicle door window. G. Haarnagell. 1,574,387; Feb. 23.
Vehicle jack. E. A. Howe. 1,574,395; Feb. 23.
Vehicle light. R. F. Gatch. 1,573,822; Feb. 23.
Vehicle signal. D. S. Ratliff, J. M. Francis, and T. E. Reese. 1,574,513; Feb. 23.
Vehicle transmission, Motor-. J. D. Fraser. 1,574,383; Feb. 23.
Vehicle wheels, Antiskid device for. D. E. Snyder. 1,574,177; Feb. 23.
Vehicles, Attachment for motor. O. F. Brinkman. 1,573,910; Feb. 23.
Vehicles, Change-speed gear for motor. V. Zima. 1,573,894; Feb. 23.
Vehicles, Dimmer shade for motor. A. Chipka. 1,574,554; Feb. 23.
Vehicles, Drive for motor. G. Midboe. 1,574,047; Feb. 23.
Vehicles, Electric generator for motor. J. Joklsch. 1,574,095; Feb. 23.
Vehicles, Propelling mechanism for children's. J. Rohdiek. 1,574,517; Feb. 23.
Vehicles, Signal device for. F. C. S. Knowles. 1,574,293; Feb. 23.
Vehicles, Signal light for. P. Koroknay. 1,574,250; Feb. 23.
Vehicles, Spring mounting for. T. F. M. Crisp. 1,573,916; Feb. 23.
Vehicles, Spring suspension for. F. L. O. Wadsworth. 1,574,139; Feb. 23.
Vehicles, Storm front for. E. W. Saunders. 1,574,309; Feb. 23.
Vehicles, Supporting and propelling mechanism for motor. F. A. Nilsson. 1,574,679; Feb. 23.
Vehicles, Traction-increasing device for motor. E. A. Foster. 1,574,729; Feb. 23.
Vending machine. H. B. McKee. 1,573,841; Feb. 23.
Vending-machine casing. R. C. Bradley. Des. 69,485; Feb. 23.
Vending-machine casing. W. C. Cutler. Des. 69,498; Feb. 23.
Vending-machine casing. A. E. Derus. Des. 69,500; Feb. 23.
Vending-machine casing. F. L. Wilke and W. Burns. Des. 69,551; Feb. 23.
Vending machine, Pencil-. W. Waldron. 1,573,955; Feb. 23.
Ventilating device. G. F. Isgrig. 1,574,656; Feb. 23.
Violin tone vibrator. I. Hessel. 1,574,033; Feb. 23.
Vulcanizing apparatus. N. E. Raber. 1,573,862; Feb. 23.
Vulcanizing hollow articles, Method and apparatus for. A. E. Falor. Re16,271; Feb. 23.
Vulcanizing strip material containing rubber or the like, Machine for forming and. A. O. Abbott, jr. 1,574,542; Feb. 23.
Waffle iron. W. W. Weir. 1,574,141; Feb. 23.
Wall board, Spacer for plastic. J. Schumacher. 1,574,117; Feb. 23.
Wall furnace. J. S. Andrews. 1,574,145; Feb. 23.
Walls, Making light porous. C. Marczinczek. 1,574,252; Feb. 23.
Wardrobe hanger. S. L. Sessions. 1,574,705; Feb. 23.
Wash fountain, Foot-controlled. L. Schlesinger and H. E. Helne. 1,574,700; Feb. 23.
Washing machine. A. W. Altorfer. 1,574,334; Feb. 23.
Washing machine. F. A. Hart. 1,574,630; Feb. 23.
Washing machines, Suction member for. H. F. Keiffer. 1,574,488; Feb. 23.
Water from cream, Device for removing. D. A. Maanum. 1,573,981; Feb. 23.
Water heater. W. F. Lautenschlager. 1,573,975; Feb. 23.
Water heater, Electric. S. D. Nesmith. 1,574,053–4; Feb. 23.
Water-heating apparatus, Indirect. C. Smith. Re16,275; Feb. 23.
Water-level automatic control apparatus, Boiler-. L. C. Davis. 1,574,235; Feb. 23.
Water mains, Apparatus for testing. J. A. Cole. 1,574,366; Feb. 23.
Water meter. A. J. Astler. 1,574,594; Feb. 23.
Waterproof pocket. E. Frantz. 1,574,077; Feb. 23.
Water purifier. A. L. Grant. 1,574,477; Feb. 23.
Water-purifying apparatus. H. B. Hartman. 1,574,389; Feb. 23.
Water-temperature regulator and pressure-control valve. J. C. Fischer. 1,574,075; Feb. 23.
Wave communicating system, Carrier-. S. B. Williams, jr. 1,573,959; Feb. 23.
Wave motor. I. Miles. 1,573,987; Feb. 23.
Wave transmission, Current-. H. J. Vennes. 1,573,954; Feb. 23.
Wearing apparel. J. Siegel. 1,574,127; Feb. 23.
Weft carrier. O. Shimwell. 1,574,125; Feb. 23.
Weighing machine, Automatic. J. W., S. W., and E. S. Smith. 1,574,706; Feb. 23.
Welding. S. C. Cary. Re16,276; Feb. 23.
Welding metallic structures. R. Mattice. Re16,274; Feb. 23.
Welding pipe, Butt-. W. S. Stevenson. 1,574,411; Feb. 23.
Well casings, Ripper for. J. A. Francis. 1,574,241; Feb. 23.
Wells, Apparatus for pumping deep. L. G. Gates. 1,574,080–81; Feb. 23.
Wheel: See—
Bull wheel.
Car wheel.
Steering wheel.
Wheels, Rim and tire construction for vehicle. M. T. Conroy. 1,574,277; Feb. 23.
Whist, Device for use in playing duplicate. G. W. Marshall. 1,574,202; Feb. 23.
Winding machine, Bobbin-. G. Juer. 1,573,837; Feb. 23.

Winding, Method and means for. W. E. Guest. 1,573,933; Feb. 23.
Windmill. J. T. Ryan. 1,574,171; Feb. 23.
Windshield. E. R. Buchanan. 1,574,022; Feb. 23.
Windshield. M. B. McGraw. 1,574,400; Feb. 23.
Windshield cleaner. C. E. Iler. 1,574,094; Feb. 23.
Window and sash. A. E. Reade. 1,574,167; Feb. 23.
Window construction and the like. J. A. Rappaport. 1,574,110; Feb. 23.
Window lock. A. J. Ross. 1,574,258; Feb. 23.
Window lock. M. J. Sasgen and L. Simonsen. 1,574,115; Feb. 23.
Window opening and closing apparatus. I. Hart. 1,574,388; Feb. 23.
Window regulator. E. L. Ackerman and A. J. Zwierzina. 1,574,333; Feb. 23.
Window structure, Swinging-. H. A. De Haas. 1,573,917; Feb. 23.
Wire fibrous yarn, Multiple-. H. Ryder. 1,574,004; Feb. 23.
Wood, Preserving. R. Leedom. 1,574,662; Feb. 23.
Workbench. O. J. and M. R. Youngman. 1,574,528; Feb. 23.
Wrapping machine. F. M. Pierce. 1,574,438; Feb. 23.
Wrapping machine, Caramel-. W. H. Sergent. 1,574,120; Feb. 23.
Wrench. J. R. Sieger. 1,574,176; Feb. 23.
Wringer. W. Robertson. 1,574,206; Feb. 23.
Yeast, Preserving. L. Lindemann. 1,574,494; Feb. 23.
Yoke, Neck. A. E., E., and J. Schruth. 1,574,006; Feb. 23.
Zinc oxide, Manufacture of. H. H. Utley and J. McCallum. 1,574,317; Feb. 23.

CLASSIFICATION OF PATENTS

ISSUED FEBRUARY 23, 1926.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 10: 1,574,061
1,574,490
21: 1,574,443
2— 13: 1,574,144
19: 1,574,664
93: 1,574,127
97: 1,574,651
145: 1,573,985
146: 1,574,198
156: 1,574,322
200: 1,574,510
252: 1,574,077
4— 42: 1,573,796
106: 1,574,288
116: 1,574,339
172: 1,574,512
191: 1,574,700
203: 1,573,930
243: 1,574,160
275: 1,573,870
5— 101: 1,574,226
112: 1,574,696
119: 1,574,434
179: 1,573,809
288: 1,574,659
6— 12: 1,574,256
7— 1: 1,574,497
9— 2: 1,573,958
14: 1,574,485
10— 132: 1,574,631
12— 42: 1,574,576
51: 1,574,078
15-104. 07: 1,574,190
139: 1,574,626
181: 1,574,530
203: 1,574,519
245: 1,574,666
267: 1,574,092
16— 85: 1,574,340

THE OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 344—No. 1. TUESDAY, MARCH 2, 1926. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $5.00 per annum; single numbers, 10 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,402,792, P. Pierce, Bead and guide rolls for tire-wrapping machine, decided January 23, 1926, claim 9.

Pat. 1,465,252, R. Craig, Weighing scale, decided January 18, 1926, claims 1, 2, 3, 4, and 13.

Pat. 1,513,324, S. M. Kintner, Polyphase plate-circuit-excitation system, decided January 22, 1926, claims 1, 6, 7, 8, and 10.

Pat. 1,556,633, S. Ruben, Electrical control method, decided January 18, 1926, claims 1 and 4.

Final decisions in interferences have been rendered against the following registered trade-marks:

T. M. 61,438, Cotton piece goods, C. C. Copeland & Co., New York, N. Y. Registered March 19, 1907. Decided January 19, 1926.

T. M. 61,700, Certain cotton piece goods, C. C. Copeland & Co., New York, N. Y. Registered April 2, 1907. Decided January 19, 1926.

T. M. 92,571, Candy, Novelty Candy Company, Jersey City, N. J. Registered July 15, 1913. Decided January 25, 1926.

T. M. 102,799, Powdered milk, sweetened condensed milk, unsweetened evaporated milk, lactated tissue food, cheese, butter, and sugar, Hudson Condensed Milk Co., Inc., New York, N. Y. Registered February 23, 1915. Decided January 23, 1926.

T. M. 134,651, Hosiery, Fulfashon Hosiery Company, New York, N. Y. Registered September 14, 1920. Decided January 19, 1926.

ADJUDICATED PATENTS.

(C. C. A. Ill.) The Doster patent, No. 986,698, for railway-tie plate, claims 1, 2, and 5 *Held* invalid. *Lundie Engineering Co.* v. *Railroad Supply Co.*, 8 F. (2d) 995.

(C. C. A. Minn.) The Davis and Helfman patent, No. 1,381,172, for davenport bed, *Held* valid and infringed. *Davis Mfg. Co.* v. *Levin Bros.*, 8 F. (2d) 972.

Notice Regarding Payment of Fees.

All fees must be paid in advance. Payment of money required for Office fees *must* be made in specie, Treasury notes, national-bank notes, post-office money orders, or certified checks. Money orders and checks must be made payable to the "Commissioner of Patents." Money sent by mail to the Patent Office will be at the risk of the sender. (See Rule 194.)

Certified checks, bank drafts, express and foreign money orders must be immediately negotiable in this country and for the full amount of the fee required by the Patent Office. No allowance can be made by this Office for any charge for their collection or exchange. Postage stamps will not be accepted. Failure to comply with the above instructions will cause delay.

Renewal of Forfeited Cases.

A petition for the renewal of a forfeited application need not be signed by the inventor or assignee, but may be signed by the attorney.

A power of attorney in the original application authorizing an attorney to transact all business in the Patent Office in connection with the application construed to be of sufficient scope to include the signing of a petition for renewal and the subsequent prosecution of the application. (*Ex parte Agee*, 101 O. G., 1609.)

103

Condition of Applications Under Examination at Close of Business February 19, 1926.

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 40,548; Trade-Mark Division, 2,085. Oldest new case, Aug. 7, 1925; oldest amended, Aug. 7, 1925. The dates given are 1925 except where † indicates 1926.) DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTIONS.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Harrows and Diggers; Plant Husbandry; Plows; Planting; Scattering Unloaders.	Nov. 27	Dec. 1	456
126	2. HADEN, C. F., Bee Culture; Dairy; Preserving; Presses; Tobacco	Oct. 31	Oct. 24	587
331	3. RICH, WM. J., Electric Heating; Electrochemistry; Heating; Metal Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working.	Nov. 23	Nov. 23	760
234	4. MERRITT, A. D., Conveyers, Chutes, Skids, Guides, and Ways; Conveyers, Fluid Current; Conveyers, Power Driven; Excavating; Handling—Hand and Hoist-Line Implements; Material or Article Handling; Pushing and Pulling Implements; Traversing Hoists.	Nov. 19	Nov. 30	525
108*	5. MACNAB, J. F., Harvesters; Jewelry; Music; Acoustics; Sound Recording and Reproducing; Tying Cords or Strands.	Sept. 22	Sept. 22	854
318	6. LEWERS, A. M., Bleaching and Dyeing; Chemistry; Chemistry—Carbon Compounds; Explosive, Pyrotechnic, and Match Compositions; Fertilizers; Substance Preparation; Hides, Skins and Leather; Sugar and Starch; Concentrating Evaporators.	Nov. 14	Nov. 3	1,037
106	7. JARBOE, C. G., Amusement and Exercising Devices; Toys; Optics; Photography	Dec. 2	Dec. 5	776
133	8. HENRY, C. C., Beds; Chairs and Seats; Furniture; Kitchen and Table Articles; Stove Furniture	Nov. 27	Dec. 2	1,044
221	9. TRYON, F. M., Air and Gas Pumps; Hydraulic Motors; Injectors and Ejectors; Motors, Fluid; Motors, Fluid Current; Pumps.	Dec. 1	Oct. 23	551
118	10. HUNTER, O. F. (Acting), Motor Vehicles; Land Vehicles—Animal Draft Appliances, Bodies and Tops, Dumping.	Oct. 30	Nov. 4	976
148*	11. ARMSTRONG, H. C., Boot and Shoe Making; Boots, Shoes, and Leggings; Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Whips and Whip Apparatus; Cutting and Punching Sheets and Bars; Driven, Headed, and Screw-Threaded Fastenings.	Nov. 30	Dec. 1	730
390	12. PIERCE, P. P., Machine Elements	Nov. 25	Nov. 19	643
154*	13. CLIFT, J. W., Bolt, Nail, Nut, Rivet, and Screw Making; Chain, Staple, and Horseshoe Making; Gear Cutting, Milling, and Planing; Metal Drawing; Metal Forging and Welding; Metal Rolling; Metal Working; Needle and Pin Making; Turning.	Nov. 23	Dec. 21	619
102*	14. BRUMBAUGH, N. J., Compound Tools; Farriery; Metal Bending; Metal Tools and Implements, Making; Sheet-Metal Ware, Making; Tools; Wire Fabrics and Structure; Wire Working; Metal Working, Assembling, and Blanks and Processes.	Oct. 19	Nov. 19	863
329	15. REDROW, W. L., Glass; Paper Making; Plastic Block and Earthenware Apparatus; Plastics	Nov. 30	Nov. 30	594
242*	16. SPENCER, C. J., Batteries; Resistances and Rheostats; Telegraphy; Telephony	Oct. 28	Oct. 20	921
307	17. RAFTER, G. S., Label Pasting and Paper Hanging; Nut and Bolt Locks; Ornamentation; Paper Manufactures; Printing; Type Casting; Sheet-Material Associating or Folding; Sheet or Web Feeding or Delivering; Type Setting.	Nov. 11	Nov. 5	380
229	18. PORTER, M. E., Motors, Expansible-Chamber Type; Power Plants; Speed-Responsive Devices	Oct. 19	Oct. 19	798
238	19. GLASCOCK, E. S., Furnaces; Heating Systems; Liquid and Gaseous Fuel Burners; Stoves and Furnaces.	Oct. 15	†Jan. 2	545
179	20. GROVE, S. D., Miscellaneous Hardware; Closure Fasteners; Locks and Latches; Safes; Undertaking.	Nov. 27	Nov. 30	758
212	21. THURBER, W. L., Winding and Reeling; Textiles; Cloth Finishing	Nov. 16	Nov. 25	457
244*	22. COLWELL, J. H., Aeronautics; Amusement Devices, Games; Firearms; Ordnance; Ammunition and Explosive Devices; Ammunition and Explosive-Charge Making; Air Guns, Catapults, and Targets; Boats and Buoys; Ships; Marine Propulsion.	Dec. 5	Dec. 5	526
217	23. GROESBECK, W. D., Coin Handling; Recorders; Registers; Horology; Time-Controlling Mechanism.	Oct. 2	Sept. 29	280
147*	24. DURAS, C. O., Apparel; Apparel Apparatus; Garment Supporters; Sewing Machines	Dec. 8	Dec. 8	492
314	25. LIGHTFOOT, J. H., Agitating; Butchering; Centrifugal-Bowl Separators; Cutlery; Mills; Threshing; Vegetable and Meat Cutters and Comminutors; Gas Separation.	Nov. 24	Nov. 30	752
228*	26. HODGES, J. S., Electricity, Generation; Motive Power; Prime-Mover Dynamo Plants	Aug. 26	Aug. 28	737
214	27. ANDERSON, L. S., Brush, Broom, and Mop Making; Brushing, Scrubbing, and General Cleaning; Laundry; Washing Apparatus.	Dec. 21	Dec. 16	516
225	28. BENSON, A. R., Internal-Combustion Engines	Dec. 14	Dec. 18	679
160*	29. MORRIS, B. N., Abrading; Boring and Drilling; Button Making; Chucks or Sockets; Coopering; Tool-Handle Fastenings; Wheelwright Machines; Wood Sawing; Wood Turning; Woodworking; Woodworking Tools.	Aug. 7	Aug. 7	1,089
248	30. SULLIVAN, M. R., Automatic Temperature and Humidity Regulation; Illuminating Burners; Illumination; Typewriting Machines; Thermostats and Humidostats.	Nov. 19	Nov. 13	819
312	31. HOLMES, W. N., Alcohol; Ammonia, Water, and Wood Distillation; Charcoal and Coke; Gas, Heating and Illuminating; Hydraulic Cement and Lime; Mineral Oils; Oils, Fats, and Glue.	Dec. 24	Dec. 23	735
249	32. BARTHOLOMEW, J. A., Gas and Liquid Contact Apparatus; Heat Exchange	Nov. 7	Oct. 16	589
152	33. WYMAN, W. I., Bridges; Hydraulic and Earth Engineering; Masonry and Concrete Structures; Metallic Building Structures; Roads and Pavements; Roofs; Wooden Buildings.	Dec. 21	Dec. 21	613
304	34. SIMPSON, G. R., Electricity-Transmission to Vehicles; Pneumatic Dispatch; Railways; Railway Rolling Stock; Railway Switches and Signals; Railways, Surface Track; Railway Wheels and Axles; Store Service; Track Sanders; Vehicle Fenders.	Sept. 19	Sept. 17	698
116*	35. REYNOLDS, E. C., Buckles, Buttons, Clasps, Etc.; Card, Picture, and Sign Exhibiting; Signals and Indicators; Toilet.	Dec. 4	Dec. 30	527
105	36. MORTON, G. L., Automatic Weighers; Geometrical and Measuring Instruments; Force Measuring	Nov. 12	Nov. 24	1,054
224*	37. TAYLOR, E. C., Electricity, Circuit Makers and Breakers	Nov. 16	Nov. 18	864

DECISIONS IN PATENT AND TRADE-MARK CASES.

Supreme Court of the United States.

INDEPENDENT WIRELESS TELEGRAPH COMPANY *v.* RADIO CORPORATION OF AMERICA.

Decided January 11, 1926.

1. LICENSEE AS PLAINTIFF IN EQUITY—OWNER AS COPLAINTIFF—CONSTRUCTION OF SECTION 4921, REVISED STATUTES.

There is no express authority given to the licensee under section 4921, Revised Statutes, to use the name of the patent owner in equity as he can under section 4919 at law.

2. SAME—SAME.

Both the owner and the exclusive licensee are generally necessary parties in the action in equity.

3. SAME—SAME—REFUSAL OF OWNER WITHIN THE JURISDICTION TO JOIN AS PLAINTIFF.

If the owner of a patent, being within the jurisdiction, refuses or is unable to join an exclusive licensee as coplaintiff, the licensee may make him a party defendant by process, and he will be lined up by the court in the party character which he should assume.

4. SAME—SAME—USE OF OWNER'S NAME AS COPLAINTIFF.

The owner of a patent who grants to another the exclusive right to make, use, or vend the invention, which does not constitute a statutory assignment, holds the title in trust for such a licensee, to the extent that he must allow the use of his name as plaintiff in any action brought at the instance of the licensee in law or in equity to obtain damages for the injury to his exclusive right by an infringer or to enjoin infringement.

5. SAME—SAME—SAME—SUIT IN EQUITY.

In an equity suit under section 4921, where otherwise justice to the exclusive licensee would fail, he may make the owner of the patent a coplaintiff in his bill, in analogy to the remedy given him in an action on the case at law for damages under section 4919.

6. SAME—SAME—SAME—MUST BE REQUESTED.

The owner beyond the reach of process may be made coplaintiff by the licensee, but not until after he has been requested to become such voluntarily.

7. SAME—SAME—SAME—SAME—REFUSAL OF REQUEST.

If the owner declines to take any part in the case, though he knows of its imminent pendency and of his obligation to join, he will be bound by the decree which follows.

ON WRIT of certiorari of the United States Circuit Court of Apppeals for the Second Circuit.

Mr. Wm. H. Davis for Independent Wireless Telegraph Company.

Mr. John W. Davis for Radio Corporation of America.

Mr. Chief Justice TAFT delivered the opinion of the Court.

The Radio Corporation, a corporation of Delaware, filed a bill in equity in the southern district of New York, joining with itself the De Forest Radio Telephone & Telegraph Company also of Delaware, as coplaintiff, against the Independent Wireless Telegraph Company of Delaware, and the American Telephone & Telegraph Company of New York. The case made in the bill was this:

Lee De Forest invented and received Patents Nos. 841,387 and 879,532, dated in 1908 and 1909, for devices for amplifying feeble electric currents and certain new and useful improvements in space telegraphy. After giving limited licenses to the American Telephone & Telegraph Company, he assigned the patents to the De Forest Radio Telephone and Telegraph Company. On March 16, 1917, the De Forest Company, by writing duly recorded, gave an exclusive license to make, use and sell the devices for the life of the patents to the Western Electric Company, reserving to itself nonexclusive, nontransferable and personal rights to make, use and sell them for defined purposes. The Western Electric Company then assigned all that it thus received from the De Forest Company to the American Telephone Company. The American Telephone Company, on July 1, 1920, made a contract with the General Electric Company, by which they exchanged rights in various patents owned or controlled by each, including these rights in the De Forest patents. Some seven months prior, on November 20, 1919, the General Electric Company had granted to the Radio Corporation, the plaintiff, an exclusive license to use and sell for "radio purposes", i. e., "for transmission or reception of communication by what are known as electric magnetic waves except by wire", all inventions owned by the General Electric Company or thereafter acquired by it. The American Telephone Company subsequently confirmed in the Radio Corporation these after-acquired rights in the De Forest patents. Thus there came from the De Forest Company to the Radio Corporation, exclusive rights to use and sell in the United States, for radio purposes, apparatus for transmission of messages, and especially for use between ship and shore for pay.

The defendant, the Independent Wireless Company, has bought the same apparatus with the lawful right to use it in the amateur and experimental field only. The apparatus thus bought bears a label with such a limitation on its use. The charge in the bill is that the Independent Company is using the apparatus, or the part of it called "radio-tubes", in the commercial radio field between ship and shore for pay and thus is violating the Radio Corporation's rights in this field. An injunction is prayed and an accounting of profits and all damages to the plaintiffs and the American Telephone Company as their interests shall appear.

The twenty-fifth averment of the bill is that—

the plaintiff, the De Forest Radio Telephone & Telegraph Company, as hereinbefore alleged, has certain rights in the patents in suit herein; that before filing this bill of complaint, said De Forest Radio Telephone & Telegraph Company, was requested to consent to join, as a co-plaintiff, herein, but declined; that said De Forest Radio Telephone & Telegraph Company is not within the jurisdiction of the Court and therefore can not be made a de-

fendant herein; and that therefore to prevent a failure of justice, and to enable the plaintiff Radio Corporation of America to protect its exclusive rights under the patents in suit, said De Forest Radio Telephone & Telegraph Company, is made a plaintiff herein without its consent.

After securing an order for a bill of particulars compliance with which disclosed the various agreements referred to in the bill and facts relevant thereto, the Independent Wireless Telegraph Company, defendant, moved that the Court dismiss the bill of complaint, upon the following ground:

That the De Forest Radio Telephone & Telegraph Company, the owner of the patent in suit, has not joined in this litigation as a party plaintiff by duly signing and verifying the bill of complaint herein, and the plaintiff Radio Corporation of America is not such a licensee under the patents as to permit it to sue alone in its own name, in the name of the owner of the patents in suit, or to sue in the name of the owner of the patents joining itself as a licensee under the patents.

The district court sustained the motion and dismissed the bill, in the view that it was bound by decisions of this Court to hold that the De Forest Company was the owner of the patent and an indispensable party and being out of the jurisdiction could not be made a party defendant by service or joined as a party plaintiff against its will—297 Fed. 518. The circuit court of appeals on appeal reversed the district court, held that the De Forest Company was properly made coplaintiff by the Radio Corporation, and remanded the case for further proceedings. 297 Fed. 521. We have brought the case here on certiorari. Section 240, Judicial Code.

The respondent in its argument to sustain the ruling of the circuit court of appeals presses two points. The first is that by the contract between the De Forest Company and the Western Electric Company title to the patent was vested in the Western Electric Company and from it by assignment in the American Telephone & Telegraph Company; that the latter is a party defendant, having declined to be a plaintiff, and so satisfies the requirement of the presence in such a suit as a party of the owner of the patent. The difficulty the respondent meets in this suggestion is that its bill avers that what the American Telephone Company acquired from the De Forest Company was a license, so called in the contract creating it, and the making of the De Forest Company a party plaintiff to the bill was necessarily on the theory that it, and not the American Telephone Company is the owner of the patent. The contracts between the corporations involved in the transfer of rights under the patent are long and complicated and in order to be fully understood require some knowledge of the new radio field. The Court is loath to depart, if it could, from the theory on which the bill was framed and both courts have acted, unless required to do so.

The question for our consideration then is, Can the Radio Company make the De Forest Company a coplaintiff against its will under the circumstances of the case?

Section 4919, Revised Statutes, is as follows:

Damages for the infringement of any patent may be recovered by action on the case, in the name of the party interested, either as patentee, assignee, or grantee. And whenever in any such action a verdict is rendered for the plaintiff, the court may enter judgment thereon for any sum above the amount found by the verdict as the actual damages sustained, according to the circumstances of the case, not exceeding three times the amount of such verdict, together with the costs.

In *Goodyear* v. *Bishop*, 10 Fed. Cases 642, case No. 5558, a suit for damages for infringement had been brought in the name of the patentee by a licensee under the 14th section of the Patent Act of 1836, c. 357, 5 Stat. 357, which contained language similar to section 4919. The defendant moved with the consent of the patentee to discontinue the suit. It was contended that as the patentee had stipulated with the licensee to sue infringers, his remedy was on the covenant. Mr. Justice Nelson at the circuit denied the motion. He said that a suit at law to protect the patent right was properly brought in the name of the patentee, that the license was sufficient to give the protection sought, and that the covenant by the patentee did not take from the licensee the remedy by use of the patentee's name to proceed directly against the wrongdoer. The same ruling was made in *Goodyear* v. *McBurney*, 10 Fed. Case 699, case No. 5574.

These cases were decided in 1860 by a Justice of this Court, and no case is cited to us questioning their authority. Indeed the cases have been since referred to a number of times with approval by distinguished patent judges. Mr. Justice Blatchford while circuit judge in *Nelson* v. *McMann*, 17 Fed. Cases, 1325, 1329, case No. 10109; Mr. Justice Gray while Chief Justice of the supreme judicial court of Massachusetts in *Jackson* v. *Allen*, 120 Mass. 64, 77; Judge Lowell in *Wilson* v. *Chickering*, 23 O. G., 1730; 14 Fed. 917, 918; Judge Shipman in *Brush Swan Company* v. *Thompson Company*, 58 O. G. 807; 48 Fed. 224, 226. The terms "action on the case" and the phrase "in the name of the party in interest, either as patentee, assignee or grantee" in section 4919 were evidently construed to constitute a remedy at law like the suit at common law on a chose in action in the name of the assignor in which the assignment gave the assignee the right as attorney of the assignor to use the latter's name. Lectures on Legal History, Ames, 213. See also *Eastman* v. *Wright*, 6 Pick. 312, 316; *Pickford* v. *Ewington*, 4 Dowling P. C. 458; *McKinney* v. *Alvis*, 14 Ill. 33.

But section 4919 applied by its terms only to actions on the case at law to which the licensee was not a necessary and hardly a proper party. This is a bill in equity. The remedy for violation of an exclusive licensee's interest in equity under the patent laws is found in section 4921, Revised Statutes, which is as follows:

The several courts vested with jurisdiction of cases arising under the patent laws shall have power to grant injunctions according to the course and principles of courts of equity, to prevent the violation of any right secured by patent, on such terms as the court may deem reasonable; and upon a decree being rendered in any such case for an infringement, the complainant shall be entitled to recover, in addition to the profits to be accounted for by the defendant, the damages the complainant has sustained thereby; and the court shall assess the same or cause the same to be assessed under its direction. And the court shall have the same power to increase such damages, in its discretion, as is given to increase the damages found by verdicts in actions in the nature of actions of trespass upon the case.[1]

[1, 2] There is no express authority given to the licensee to use the name of the patent owner in equity as we have seen that he can under section 4919 in suits at law. The presence of the patentee or his assignee in the equity suit however, it has been held, is just as essential to obtaining an injunction or an accounting of profits or damages under the patent laws as it is in an action on the case for damages at law. Indeed both the owner and the exclusive licensee are generally necessary parties in the action in equity. *Waterman* v. *Mackenzie*, 54 O. G. 1562; 138 U. S. 252, *Littlefield* v. *Perry*, 21 Wall, 205, 223; *Paper Bag Cases*, 21 O. G. 1275; 105 U. S. 766; *Birdsell* v. *Shaliol*, 30 O. G. 261; 112 U. S. 485,486.

It is urged on behalf of the respondent that in equity the real party in interest, the exclusive licensee whose contract rights are being trespassed upon by the infringer, should be able without the presence of the owner of the patent to obtain an injunction and damages directly against the infringer. We recognize that there is a tendency in courts of equity to enjoin the violation of contract rights which are invaded by strangers in a direct action by the party injured, instead of compelling a roundabout resort to a remedy through the covenant, express or implied, of the other contracting party. But such a short cut however desirable is not possible in a case like this. A suit without the owner of the patent as a plaintiff if maintainable would not be a suit under section 4921 of the patent laws but only an action in equity based on the contract rights of the licensee under the license and a stranger's violation of them. There would be no jurisdiction in courts of the United States to entertain it unless by reason of diverse citizenship of the parties which does not exist in this case. *Hill* v. *Whitcomb*, 12 Fed. Cases, 182, 185, case No. 6502; *Wilson* v. *Sandford*, 10 How. 99, 101; *Albright* v. *Feas*, 106 U. S. 613, and cases cited.

What remedies then can equity afford in a case like this? *Waterman* v. *Mackenzie*, 54 O. G. 1562; 138 U. S. 252, involved the question whether a grant from the owner of the patent of the exclusive right to make and sell but not to use was an assignment under the statute entitling the grantee in his own name to sue an infringer in equity, and it was held that it was not. Mr. Justice Gray, speaking for the Court, at page 255 said:

In equity, as at law, when the transfer amounts to a license only, the title remains in the owner of the patent; and suit must be brought in his name, and never in the name of the licensee alone, unless that is necessary to prevent an absolute failure of justice, as where the patentee is the infringer, and cannot sue himself. Any rights of the licensee must be enforced through or in the name of the owner of the patent, and perhaps, if necessary to protect the rights of all parties, joining the licensee with him as a plaintiff. Revised Statutes, section 4921. *Littlefield* v. *Perry*, 21 Wall. 205, 223; *Paper Bag Cases*, 21 O. G. 1275; 105 U. S. 766, 771; *Birdsell* v. *Shallol*, 30 O. G. 261; 112 U. S. 485–487. And see *Renard* v. *Levinstein*, 2 Hem. & Mil. 628.

Littlefield v. *Perry*, 21 Wallace 205, was a suit for infringement by one to whom was granted an exclusive right to make, use and vend by the patent owner. The Court held that it was an assignment under the statute, but further held that even if it were only an exclusive license, the suit might be maintained under the patent laws, because the patentee who had been privy to the alleged infringement had been made a party defendant with the infringer. This Court said at page 223:

A mere licensee can not sue strangers who infringe. In such case redress is obtained through or in the name of the patentee or his assignee. Here, however, the patentee is the infringer, and as he can not sue himself, the licensee is powerless, so far as the courts of the United States are concerned, unless he can sue in his own name. A court of equity looks to substance rather than form. When it has jurisdiction of parties it grants the appropriate relief without regard to whether they come as plaintiff or defendant. In this case the person who should have protected the plaintiff against all infringements has become himself the infringer. He held the legal title to his patent in trust for his licensees. He has been faithless to his trust, and courts of equity are always open for the redress of such a wrong. This wrong is an infringement. Its redress involves a suit, therefore, arising under the patent laws, and of that suit the circuit court has jurisdiction.

The presence of the owner of the patent as a party is indispensable not only to give jurisdiction under the patent laws but also in most cases to enable the alleged infringer to respond in one action to all claims of infringement for his act and thus either to defeat all claims in the one action, or by satisfying one adverse decree to bar all subsequent actions.

[3] If the owner of a patent being within the jurisdiction refuses or is unable to join an exclusive licensee as coplaintiff, the licensee may make him a party defendant by process and he will be lined up by the court in the party character which he should assume. This is the necessary effect of the decision in *Littlefield* v. *Perry*, *supra*. See also *Brammer* v. *Jones*, 4 Fed. Cases 11, case No. 1806; *Gamewell Telegraph Company* v. *Brooklyn*, 22 O. G. 1978; 14 Fed. 255; *Waterman* v. *Shipman*, 64 O. G. 713; 55 Fed. 982, 986; *Libbey Glass Company* v. *McKee Glass Company*, 216 Fed. 172; affirmed 220 Fed. 672; *Hurd* v. *Goold*, 208 Fed. 998. This would seem to be in accord with general equity practice. *Waldo* v. *Waldo*, 52 Mich. 91, 94. A cestui que trust may make an unwilling trustee a defendant in a suit to protect the subject of the trust. *Porter* v. *Sabin*, 149 U. S. 473, 478; *Brun* v. *Mann*, 151 Fed. 145, 153; *Monmouth Company* v. *Means*, 151 Fed. 159, 165. *Eastman* v. *Wright*, 6 Pick. 312, 316.

[4] It seems clear then on principle and authority that the owner of a patent who grants to another the exclusive right to make, use or vend the invention, which does not constitute a statutory assignment, holds the title to the patent in trust for such a licensee, to the extent that he must allow the use of his name as plaintiff in any action brought at the instance of the licensee in law or in equity to obtain damages for the injury to his exclusive right by an infringer or to enjoin infringement of it. Such exclusive licenses fre-

[1] Section 4921 was amended by act of March 3, 1897, 29 St. 694, c. 391, sec. 6, adding a six years' limitation on actions under it, and by act of February 18, 1922, 42 St. 392, c. 58, sec. 8, allowing expert evidence as to damages and requiring notice of litigation to Commissioner of Patents for record by endorsement on file wrapper of patents involved. The amendments do not affect the question here.

quently contain express covenants by the patent owner and licensor to sue infringers that expressly cast upon the former the affirmative duty of initiating and bearing the expense of the litigation. But without such express covenants, the implied obligation of the licensor to allow the use of his name as indispensable to the enjoyment by the licensee of the monopoly which by personal contract the licensor has given. Inconvenience and possibly embarrassing adjudication in respect to the validity of the licensor's patent rights, as the result of suits begun in aid of the licensee, are only the equitable and inevitable sequence of the licensor's contract, whether express or implied.

But suppose the patentee and licensor is hostile and is out of the jurisdiction where suit for infringement must be brought, what remedy is open to the exclusive licensee? The matter has been given attention by the courts dealing with patent cases. In *Wilson* v. *Chickering*, *supra*, at p. 918, an exclusive licensee brought a bill in equity to enjoin infringement without joining the owner of the patent. A demurrer was sustained with 30 days to amend. Judge Lowell after saying that a mere licensee can not generally in equity sue in equity without joining the patentee, said:

> I do not, however, intend to be understood that plaintiff will be without remedy if he can not find the patentee, or if the latter is hostile. The statute does not abridge the power of a court of equity to do justice to the parties before it if others who can not be found are not absolutely necessary parties, as in this case the patentee is not. At law the plaintiff could use the name of a patentee in an action and perhaps he may have the right in equity under some circumstances. The bill gives no explanation of his absence; but it was said in argument that he is both out of the jurisdiction and hostile. If so, no doubt there are methods known to a court of equity by which the suit may proceed for the benefit of the only person who is entitled to damages.

In *Renard* v. *Levinstein*, 2 Hem. & Mil. 628, before Vice Chancellor Page Wood, afterwards Lord Hatherly, an exclusive licensee brought suit to enjoin infringement by a stranger and made the patentees who were a foreign firm coplaintiffs. There was no objection to this action. No specific authority for this appeared, but it seems to have been implied from the relation of the exclusive licensee and the owner of the patent. It has some significance here in the fact that it was apparently referred to by Mr. Justice Gray, in *Waterman* v. *Mackenzie*, *supra*, as indicating what could be done in an English court of equity to enable the licensee to secure protection in the name of the owner of the patent.

In the case of *Brush Swan Electric Company* v. *Thompson & Houston*, 58 O. G. 807; 48 Fed. 124, the Brush Swan Company in Connecticut sued the Thompson-Houston Company in equity for infringing the former's rights as an exclusive licensee for the sale of a device made under a patent owned by the Brush Electric Company of Cleveland, Ohio. The Brush-Swan Company made the Brush Electric Company a coplaintiff. The Cleveland Company appeared for the purpose of asking that its name be stricken out as a party complainant, because the bill had been filed without its consent. The motion to strike out the coplaintiff's name was denied by Judge Shipman, on the ground that as the patent owner, being without the jurisdiction, could not be served with process, there would otherwise be absolute failure of justice. The judge said that prima facie there was an implied power in the exclusive licensee under such circumstances to make the patent owner a party plaintiff. The same conclusion was approved by the Ninth Circuit Court of Appeals in *Brush Electric Company* v. *California Electric Company*, 52 Fed. 945, before McKenna and Gilbert, circuit judges, and Knowles, the district judge, affirming the same case in 49 Fed. Rep. 73, and by the same court in *Excelsior Company* v. *Allen*, 104 Fed. 553, and in *Excelsior Company* v. *The City of Seattle*, 117 Fed. 140, 143, 144. In *Hurd* v. *Goold Co.*, 203 Fed. 998, before the Circuit Court of Appeals of the Second Circuit (Lacombe, Coxe and Noyes, judges), Hurd, who was the exclusive licensee, joined with himself two corporations who held the legal title to the patent. The corporations had been enjoined in the sixth circuit from maintaining suits for infringement. The second circuit court held that Hurd was entitled to present his licensors, that is the owners of the patent, as coplaintiffs, even against their will and in spite of their protests. This doctrine was approved by the same court in *Radio Corporation* v. *Emerson*, 296 Fed. 51, 54. See also *McKee Glass Co.* v. *Libbey Glass Co.*, 220 Fed. 672 (3d C. C. A.), affirming same, 216 Fed. 172; *Chisholm* v. *Johnson*, 106 Fed. 191, 212; *Owatonna Mfg. Co.* v. *Fargo*, 94 Fed. 519, 520.

It is objected to the relevancy of these authorities that not one of them actually presents the case here. In all of them it is said the owner or patentee was within the jurisdiction of the court and could be served, or else had come into the jurisdiction voluntarily to move for leave to withdraw as a party. As the court had the owner before it, and the owner was in duty bound to become a party, the court could prevent the withdrawal. Here the owner is not in the jurisdiction and does not come in. It is the defendant, the alleged infringer, which objects to using the name of the owner as plaintiff without its consent.

[5] We think the cases cited go beyond the defendant's interpretation of them and do hold that if there is no other way of securing justice to the exclusive licensee, the latter may make the owner without the jurisdiction a coplaintiff without his consent in the bill against the infringer. Equity will not "Suffer a wrong without a remedy." 1 Pomeroy's Equity Jurisprudence, 4th edition, sections 423, 424. While this maxim is of course not of universal application, it justifies the short step needed to hold that in an equity suit under section 4921, where otherwise justice to the exclusive licensee would fail, he may make the owner of the patent a coplaintiff in his bill under section 4921, in analogy to the remedy given him in an action on the case at law for damages under section 4919, for the two sections are plainly in pari materia.

In so doing, equity does no more than courts of law did, at one period in their history, as we have seen, in implying in the assignee of a chose in action, a power of attorney to maintain an action in the name of the assignor in order to assure to the assignee the benefits of his assignment. Where the assignor attempted to interfere with the exercise of the power of attorney by collection of the assignee's claim or where for any technical reason the remedy through the exercise of implied power of attorney was unavailable, equity intervened to lend its aid to the assignee and secure a recovery for his benefit. See *Lenox* v. *Roberts*, 2 Wheat. 373; *Hammond* v. *Messenger*, 9 Sim. 327; *Roberts* v. *Lloyd*, 1 DeG. & J. 208; *Hodge* v. *Cole*, 140 Mass. 116; *Hughes* v. *Nelson*, 29 N. J. Eq. 547; *Hayes* v. *Hayes*, 45 N. J. Eq. 461.

The objection by the defendant that the name of the owner of the patent is used as a plaintiff in this suit without authority is met by the obligation the owner is under to allow the use of his name and title to protect all lawful exclusive licensees and sublicensees against infringers, and by the application of the maxim that "Equity regards that as done which ought to be done." *Camp* v. *Boyd*, 229 U. S. 530, 559; *United States* v. *Colorado Anthracite Company*, 225 U. S. 219, 223; *Craig* v. *Leslie*, 3 Wheat. 563, 578. The Court should on these grounds refuse to strike out the name of the owner as coplaintiff put in the bill under proper averment by the exclusive licensee.

[6, 7] The owner beyond the reach of process may be made coplaintiff by the licensee, but not until after he has been requested to become such voluntarily. If he declines to take any part in the case, though he knows of its imminent pendency and of his obligation to join, he will be bound by the decree which follows. We think this result follows from the general principles of res judicata. In *American Bell Telephone Company* v. *National Telephone Company*, 27 Fed. 663, heard before Judges Pardee and Billings, the question was whether the National Telephone Company was bound by a decree in favor of the Bell Company for infringement against a Pittsburgh company claiming under a license from the National Company. The National Company under a contract upon notice to defend its license took control of the case but becoming dissatisfied with a preliminary ruling of the court withdrew its counsel and evidence from the case. The National Company was held bound on the authority of the case of *Robbins* v. *Chicago*, 4 Wall. 657. When Robbins was building a store in Chicago by an independent contractor, an areaway adjoining the street was left open. A passerby fell in and was injured. He sued the city and recovered judgment for $15,000. Robbins had been previously warned by the city of the danger of the unprotected area and had notice of the accident and of the pendency of the suit but did not become a party. The city then sued Robbins and was given a judgment against him for the amount of the recovery against the city. This court in sustaining the result held that parties bound by the judgment in such a case included all who were directly interested in the subject matter who had knowledge of the pendency of the suit and a right to take part therein, even if they refused or neglected to appear and avail themselves of this right. *Lovejoy* v. *Murray*, 3 Wall. 1, 19; *Plumb* v. *Goodnow*, 123 U. S. 560; *Robertson* v. *Hill*, 4 O. G. 132; 20 Fed. Cases, 944, case No. 11925; *Miller* v. *Liggett*, 19 O. G. 1138; 7 Fed. 91.

By a request to the patent owner to join as coplaintiff, by notice of the suit after refusal and the making of the owner a coplaintiff, he is given a full opportunity by taking part in the cause to protect himself against any abuse of the use of his name as plaintiff, while on the other hand the defendant charged with infringement will secure a decree saving him from multiplicity of suits for infringement. Of course a decree in such a case would constitute an estoppel of record against the patent owner if challenged only after evidence of the exclusive license, the request to join as coplaintiff and the notice of the suit.

There is nothing in the case of *Crown Company* v. *The Nye Tool Works*, 312 O. G. 400; 261 U. S. 24, which conflicts with this conclusion. That case was brought by the plaintiff, a licensee, to establish as a principle of patent practice that a transfer by an owner of a patent to another conferring only the right to sue a third for past and future infringements of the patent, without the right to make, use and vend the patented article, was an assignment of the patent under section 4898, Revised Statutes. We declined so to hold. There was no offer to make the owner of the patent a party, nor were there any facts showing that the owner would not joint as coplaintiff or was not in the jurisdiction. The appellant stood solely upon his right to sue as an assignee of the patent and was defeated.

We hold that the De Forest Company was properly joined as a coplaintiff by the Radio Corporation upon the 25th averment of the bill. This makes it unnecessary for us to consider the argument on behalf of the appellee that the American Telephone Company was the owner of the patent instead of the De Forest Company.

Decree affirmed.

PATENT SUITS.

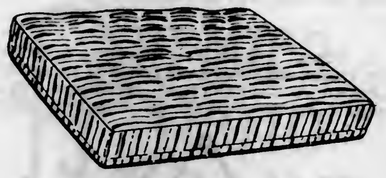
TRADE-MARKS

OFFICIAL GAZETTE, MARCH 2, 1926.



[VOL. 344. No. 1.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 183,935. (CLASS 32. FURNITURE AND UPHOLSTERY.) MYRTLE MATTRESS COMPANY, Brooklyn, N. Y. Filed Aug. 1, 1923.

BEST FOR THE WORLD'S REST

Applicant disclaims the representation of a mattress except as associated with the other features of its mark.

Particular description of goods.—Mattresses, Pillows, and Box Springs.

Claims use since on or about June 1, 1923.

Ser. No. 188,527. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) BROGDEX COMPANY, Winter Haven, Fla., and Los Angeles, Calif. Filed Nov. 19, 1923.

BROGDEX

Particular description of goods.—Protective Compositions for Treating Fruit Comprising a Waxy Material Such as Paraffin and an Oily Vehicle.

Claims use since on or about Oct. 1, 1921.

Ser. No. 188,629. (CLASS 39. CLOTHING.) THE HOWARD A. GEIGER COMPANY, Cleveland, Ohio. Filed Nov. 21, 1923.

Dan D. Dresser Says—

Particular description of goods.—Work, Dress, Negligee, Night, and Under Shirts, Pyjamas and Union Suits, Collars, Neckties, Woven and Knitted Hosiery, Sweaters, Men's Hats and Caps, Garters, Suspenders, Gloves of Leather, Rubber, Textile Fabrics and Combinations Thereof; Mittens Composed of Leather, Fabrics, Rubber and Combinations Thereof; Smoking Jackets, Bathrobes, Scarfs, Football and Basketball Uniforms, Gymnasium Suits, Including Pants, Shirts, and Accessories Such as Belts.

Claims use since Oct. 1, 1922.

Ser. No. 192,212. (CLASS 39. CLOTHING.) ELDER MANUFACTURING COMPANY, St. Louis, Mo. Filed Feb. 13, 1924.

SKOOKUM

Particular description of goods.—Flannel, Wool, Work, and Dress Shirts.

Claims use since Jan. 2, 1924.

Ser. No. 192,655. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WILSON-HUGHES DRUG CO. INC., Memphis, Tenn. Filed Feb. 21, 1924.

EUREKA

Particular description of goods.—Medicinal Preparation for the Treatment of Diseases of the Kidneys.
Claims use since about 1895.

Ser. No. 194,593. (CLASS 39. CLOTHING.) ELDER MFG. CO., St. Louis, Mo. Filed Mar. 28, 1924.

ATLAS

Particular description of goods.—Men's and Boys' Dress, Negligee, and Work Shirts; Men's and Boys' Undershirts of Textile Material, and Boys' and Children's Blouses, Play Suits, Flapper Suits, and Wash Suits.
Claims use since Dec. 1, 1923.

Ser. No. 196,041. (CLASS 12. CONSTRUCTION MATERIALS.) THE WHITNEY COMPANY, Detroit, Mich., and Garibaldi, Oreg. Filed Apr. 23, 1924.

GREEN TIED

Particular description of goods.—Bundled Lumber, Including Flooring, Siding, Ceiling, Lath, Molding, Finish, and Door Stock.
Claims use since Feb. 1, 1924.

Ser. No. 198,512. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) THE ELECTRIC RAILWAY EQUIPMENT COMPANY, Cincinnati, Ohio. Filed June 13, 1924.

Particular description of goods.—Electric Trolley Line Materials—Namely, Tubular Poles, Ornamental Lighting Poles, Lamp Standards, Lighting Brackets, Cross Arms, Cross-Arm Supports, Pole Tops, Pole Bases, Pole Steps, Insulator Pins, Pole Bands, Flexible and Rigid Trolley Brackets, Fittings for Trolley Brackets, Insulated and Noninsulated Trolley Hangers, Strain Plates, Feed-In Hangers, Straight-Line Suspensions, Single Curve Suspensions, Double Curve Suspensions, Horizontal and Combination Pipe Adapters for Supporting Trolley Hangers, Extension Adapters for Trolley Hangers, I-Beam Clamps for Attaching Trolley Hangers to I-Beams, Trolley Clamps, Feeder Clamps, Double Strain Clamps, Trolley Ears, Strain Ears, Splicing Ears, Trolley-Wire Splicers, Splicing Tubes, Feed-Wire Splicers, Two-Way Semisplit and Split T Connectors, Section Insulators, Trolley Frogs, Noninsulated and Insulated Cross-Overs, Mine Feeder-Wire Insulators, Mine Feeder Suspensions, Feeder-Wire-Supporting Clamps, Trolley-Wheel Bushings, Trolley wheels, Trolley Harps, Knife Switches, Insulators, Strain Insulators, Insulated Turnbuckles, Wedge Grips, Armored Suspension Insulators, and Bonding Sleeves.
Claims use since Nov. 28, 1922.

Ser. No. 202,079. (CLASS 39. CLOTHING.) GUSTAV J. REQUARDT, Baltimore, Md. Filed Aug. 30, 1924.

RECORD
RUNNING SUITS

No claim is made herein to the words "Running Suits" apart from the mark shown in the drawing.
Particular description of goods.—Knitted and Textile Underwear.
Claims use since July 1, 1924.

Ser. No. 202,142. (CLASS 34. HEATING, LIGHTING, AND VENTILATING APPARATUS, NOT INCLUDING ELECTRICAL APPARATUS.) PITTSBURG WATER HEATER COMPANY, Pittsburgh, Pa. Filed Sept. 2, 1924.

Particular description of goods.—Gas Hot-Water Heaters and Gas-Hot-Water-Storage Systems.
Claims use since Mar. 1, 1924.

Ser. No. 202,925. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) CAST-O-JELL CHEMICAL COMPANY, San Francisco, Calif. Filed Sept. 23, 1924.

CAST-O-JELL

Particular description of goods.—Cathartic Preparation.
Claims use since July 10, 1924.

Ser. No. 203,774. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE A. B. C. STORES, INCORPORATED, Houston, Galveston, and Beaumont, Tex. Filed Oct. 13, 1924.

A
B C

Particular description of goods.—Eggs and Coffee.
Claims use since July, 1919.

Ser. No. 203,908. (CLASS 26. MEASURING AND SCIENTIFIC APPLIANCES.) JAMES V. SMITH, doing business as Premier Photo Plays, New York, N. Y. Filed Oct. 15, 1924.

PREMIER
PHOTO
PLAYS

No claim is made for the words "Photo Plays" and the said words are disclaimed apart from the mark shown in the drawing.
Particular description of goods.—Photographic Film and Announcement Slides for Projector Machines.
Claims use since January, 1924.

Ser. No. 205,071. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) THE KLEARFLAX LINEN LOOMS, INC., Duluth, Minn. Filed Nov. 10, 1924.

KLEARFLAX Picwick Rugs

No claim is made to the exclusive use of the word "Rugs."
Particular description of goods.—Rugs and Carpets of Textile Material.
Claims use since Sept. 15, 1924.

Ser. No. 205,925. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) APOLLO RADIO HORN COMPANY, Chicago, Ill. Filed Nov. 28, 1924.

APOLLO

Particular description of goods.—Sound-Amplifying Devices Known as Loud Speakers for Use With Radio Receiving sets.
Claims use since Feb. 1, 1924.

Ser. No. 205,995. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) DENZER & NATHAN, INC., New York, N. Y. Filed Nov. 29, 1924.

NONEFASTER

"As Fast as Dey Make Em."

The picture is fanciful.
Particular description of goods.—Cotton Piece Goods.
Claims use since Nov. 24, 1924.

Ser. No. 206,509. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) BERSTED MANUFACTURING COMPANY, Chicago, Ill. Filed Dec. 10, 1924.

LIGHTNING

Particular description of goods.—Electrically-Heated Flatirons, Waffle Molds, and Toasters.
Claims use since Oct. 1, 1924.

Ser. No. 206,530. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) THE KLEARFLAX LINEN LOOMS, INC., Duluth, Minn. Filed Dec. 10, 1924.

KLEARFLAX ANTUFT RUGS

No claim is made to the exclusive use of the word "Rugs."

Particular description of goods.—Rugs and Carpets of Textile Fabrics.

Claims use since Aug. 19, 1924.

Ser. No. 206,543. (CLASS 12. CONSTRUCTION MATERIALS.) SAFFERT CEMENT CONSTRUCTION COMPANY, New Ulm, Minn. Filed Dec. 10, 1924.

ARTSTONE

Particular description of goods.—Artificial-Stone Products—Namely, Building Blocks, Door and Window Frames, Piping, and Molded Ornamental Concrete Articles.

Claims use since Aug. 1, 1923.

Ser. No. 206,670. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) KELLOGG COMPANY, Battle Creek, Mich. Filed Dec. 13, 1924.

NEW OATA

Particular description of goods.—Prepared Food, Consisting of a Combination of Oats and Bran.

Claims use since Nov. 21, 1924.

Ser. No. 206,967. (CLASS 39. CLOTHING.) GIRL SCOUTS, New York, N. Y. Filed Dec. 19, 1924.

GIRL SCOUTS

Particular description of goods.—Belts and Scarfs for Personal Wear, Shoulder Straps, Chevrons, Arm Bands, Lapels, Ponchos, Sweaters, Blouses, Bloomers, Skirts, Stockings, Raincoats, Rain Capes, Suits and Coats for Women and Girls, and Shoes of Leather, Rubber, Fabric, and Combinations Thereof.

Claims use since April, 1921, on belts, blouses, bloomers, skirts, suits, and coats; on sweaters and shoes since November, 1922; on stockings since April, 1923; and on shoulder straps, chevrons, arm bands, ponchos, raincoats, rain capes, and uniform make up sets since November, 1924.

Ser. No. 206,976. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE E. RAUH AND SONS COMPANY, Dayton, Ohio. Filed Dec. 19, 1924.

ECONOMY

Particular description of goods.—Fatty Acids Such as Made from Linseed Oil, Corn Oil, and Soy-Bean Oil, Greases and Tallow.

Claims use since November, 1923.

Ser. No. 207,164. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) AMERICAN BEVERAGE & CANDY CO., also doing business as A. B. C. Candy Co., Tacoma, Wash. Filed Dec. 24, 1924.

SHENANDOA

Particular description of goods.—Candy Bars.

Claims use since Nov. 1, 1924.

Ser. No. 207,352. (CLASS 44. DENTAL, MEDICAL, AND SURGICAL APPLIANCES.) CARL H. HARTMANN, New York, N. Y. Filed Dec. 29, 1924.

ASTMOLATOR

Particular description of goods.—Atomizers.

Claims use since Oct. 2, 1924.

Ser. No. 207,475. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) GEORGIA GEORGE ROLOFF, San Francisco, Calif. Filed Dec. 30, 1924.

Georgia George

The name "Georgia George" is a facsimile signature of the applicant.

Particular description of goods.—Scalp and Hair Shampoo.

Claims use since July, 1911.

Ser. No. 207,609. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) BEACON MANUFACTURING COMPANY, New Bedford, Mass., and Providence, R. I. Filed Jan. 3, 1925.

Rainbow

The trade-mark consists of the word "Rainbow."

Particular description of goods.—Cotton Blankets.

Claims use since Nov. 28, 1922.

Ser. No. 208,005. (CLASS 40. FANCY GOODS, FURNISHINGS, AND NOTIONS.) CECIL DEARDEN NIXON, London, England. Filed Jan. 12, 1925.

MET-A-LACE

Particular description of goods.—Metal Fasteners for Footwear, Leggings, and Gaiters.

Claims use since Feb. 18, 1921.

Ser. No. 208,291. (CLASS 17. TOBACCO PRODUCTS.) E. GOSS & COMPANY, San Francisco, Calif. Filed Jan. 19, 1925.

The representation of a male figure shown in the drawing is a fanciful creation of the artist.

Particular description of goods.—Cigars.

Claims use since Mar. 1, 1904.

Ser. No. 208,311. (CLASS 29. BROOMS, BRUSHES, AND DUSTERS.) PLOUGH CHEMICAL COMPANY, Memphis, Tenn. Filed Jan. 19, 1925.

BLACK AND WHITE

Particular description of goods.—Toothbrushes.

Claims use since March, 1924.

Ser. No. 208,700. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) B. EDMUND DAVID, INC., New York, N. Y. Filed Jan. 27, 1925.

(David's) MELLOW FAILLE

No registration rights are claimed in the word "(David's)" except in association with the other features of the mark.

Particular description of goods.—All-Silk Woven Cloth in the Piece.

Claims use since Dec. 1, 1924.

Ser. No. 209,091. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) LANGENDORF BAKING COMPANY, San Francisco, Calif. Filed Feb. 4, 1925.

ROYAL

Particular description of goods.—Bread.

Claims use since January, 1921.

Ser. No. 209,269. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JOHN BAALMANN, doing business as Baljon Co., San Francisco, Calif. Filed Feb. 9, 1925.

Particular description of goods.—Cold Cream, Cleansing Cream, Face Powder, and Rouge.

Claims use since Jan. 5, 1925.

Ser. No. 210,593. (CLASS 36. MUSICAL INSTRUMENTS AND SUPPLIES.) MAY WATERSON, doing business as The Sportrola Phonograph Manufacturing Company, New York, N. Y. Filed Mar. 5, 1925.

The SPORTROLA PHONOGRAPH MANUFACTURING CO.

Particular description of goods.—Phonographs.

Claims use since Dec. 9, 1923.

Ser. No. 210,982. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) PLANKINTON PACKING COMPANY, Milwaukee, Wis. Filed Mar. 13, 1925.

BADGER Brand

No claim is made to the word "Brand" apart from the mark as shown in the drawing.

Particular description of goods.—Fresh and Cold-Storage Eggs.

Claims use since September, 1914.

Ser. No. 211,216. (CLASS 39. CLOTHING.) LEVI STRAUSS & Co., San Francisco, Calif. Filed Mar. 18, 1925.

SUNSET

Particular description of goods.—Jumper Shirts, Blouse Shirts, Dress Shirts, Negligee Shirts, Work Shirts, Overalls, Pants, Sweaters, Pyjamas, Night Shirts and Underwear of Knitted and Textile Fabric for Men, Women, and Children.
Claims use since Jan. 1, 1897.

Ser. No. 211,688. (CLASS 32. FURNITURE AND UPHOLSTERY.) LIBRARY BUREAU, Cambridge, Mass. Filed Mar. 26, 1925.

LB

Particular description of goods.—Filing Cabinets, Followers and Bases Therefor; Bookcases, Cupboards, Stands, Desks, Household or Office Tables and Chairs.
Claims use since 1890.

Ser. No. 212,022. (CLASS 39. CLOTHING.) THE NU BONE CORSET COMPANY, Los Angeles, Calif. Filed Apr. 1, 1925.

"CORSET-LESS" CORSET

The mark consists of the word "Corset-less" and the exclusive right to the use of the word "Corset" is disclaimed.
Particular description of goods.—Ladies' Corsets.
Claims use since Feb. 1, 1923.

Ser. No. 212,397. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) SCOTT H. PERRY, Batavia, N. Y. Filed Apr. 8, 1925.

TORRIDGE

Particular description of goods.—Breakfast Food.
Claims use since Feb. 26, 1925.

Ser. No. 212,398. (CLASS 50. MERCHANDISE NOT OTHERWISE CLASSIFIED.) THE PIERCE-ARROW MOTOR CAR COMPANY, Buffalo, N. Y. Filed Apr. 8, 1925.

PIERCE

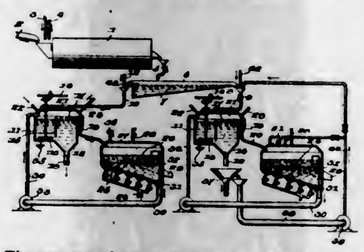
REISSUES

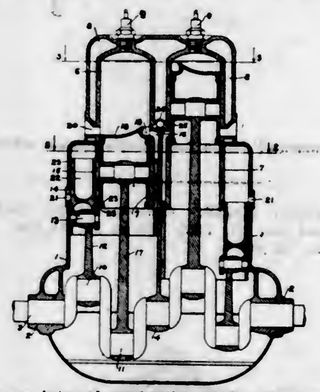


MARCH 2, 1926.

16,278. SUPPLY INSTALLATION FOR CENTRAL CHASSIS LUBRICATION. EDGAR J. BLOOM, Tiffin, Ohio, assignor, by mesne assignments, to Auto Research Corporation, a Corporation of New York. Filed Apr. 17, 1925. Serial No. 23,982. Original No. 1,451,861, dated Apr. 17, 1923, Serial No. 533,476, filed Feb. 1, 1922. 10 Claims. (Cl. 184—28.)

4. A supply installation for a chassis lubricating system including a pump cylinder structure having means serving for attachment thereof against the dashboard of a motor vehicle, a reservoir supported upon said pump structure in lubricant-tight communication therewith and extending thereabove, a check valve, a support for the latter carried by said cylinder structure, said valve permitting flow of lubricant from the reservoir toward the pump, and a seat above said valve against which said valve is raised and held by pressure exerted during pump discharge.

16,279. SEPARATING PROCESS. RIDSDALE ELLIS, Oak Park, Ill., assignor to Ellis Flotation Company, Inc., New York, N. Y., a Corporation of New York. Filed Aug. 1, 1924. Serial No. 729,623. Original application filed Apr. 15, 1918, Serial No. 228,623. Divided and this application filed Apr. 2, 1919, Serial No. 287,030. Original No. 1,425,186, dated Aug. 8, 1922. 28 Claims. (Cl. 209—166.)

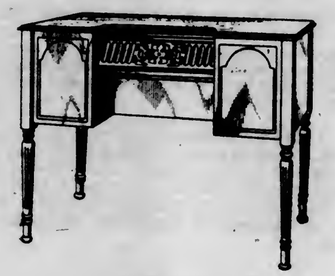


1. The process of concentrating ores which inclues mixing the comminuted ore with oil in the presence of an acid, then aerating the so-oiled ore pulp to form a collective froth and separating the froth from the remainder by flotation and which further includes the addition subsequent to the oiling treatment of material adapted to change the contact potential of the oil to a potential more negative than before for aiding the formation of a collective froth.

16,280. DENTAL MOLD CUP. CHARLES A. PALMER, Seattle, Wash., assignor, by mesne assignments, to Vincent B. Vaughan. Filed Aug. 30, 1922. Serial No. 585,320. Original No. 1,351,584, dated Aug. 31, 1920, Serial No. 340,893. filed Nov. 26, 1919. 8 Claims. (Cl. 22—97.)

1. A dental mold cup consisting of a cylindrical body made of porous material, having water absorbent characteristics, said cup being provided in each end with a conoidal cavity which cavities are communicatively connected by a small hole wherein a sprue wire can be supported by the cup structure.

16,281. INTERNAL-COMBUSTION ENGINE. LOUIS L. LUCE and LEROY MATTSON, Oakland, Calif., assignors to Luce-Mattson Engine Company, San Francisco, Calif., a Corporation of California. Filed Dec. 7, 1925. Serial No. 73,897. Original No. 1,482,519, dated Feb. 5, 1924, Serial No. 504,546, filed Oct. 1, 1921. 9 Claims. (Cl. 123—59.)

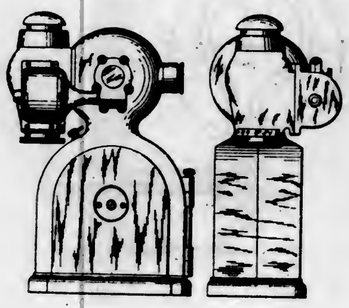


8. In an internal combustion engine, the combination of a crank case and a cylinder casing extending outwardly therefrom, stationary cylindrical walls within the casing providing a charging cylinder near the crank case and a smaller firing cylinder further removed from the crank case, the firing cylinder wall having a portion thereof extending into the charging cylinder in a manner providing a separating wall between the firing and charging cylinders, a charging piston in the charging cylinder between the charging cylinder wall and the said extension of the firing cylinder wall, the charging piston having an opening for receiving the said extension thereinto, a firing piston in the firing cylinder, a fuel supply port through the cylinder casing adapted to be opened and closed by the charging piston, a port connecting the charging and firing cylinders, an exhaust port from the firing cylinder, the last two ports being adatped to be opened and closed by the firing piston, a crank shaft, a pitman connection from the shaft to the charging piston, and a pitman connection from the shaft to the firing piston, the arrangement being such that in operation a charge of gas is received through the intake port into the charging cylinder, compressed by the charging piston and forced through the said connecting port into the firing cylinder and outwardly through the exhaust port after the explosion thereof.

DESIGNS

MARCH 2, 1926.

69,552. RADIO CONSOLE CABINET. CYRUS L. ADLER, Louisville, Ky. Filed Dec. 21, 1925. Serial No. 15,802. Term of patent 3½ years.

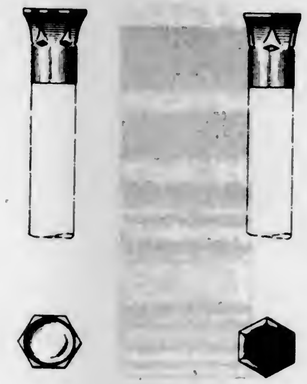


The ornamental design for a radio console cabinet as shown.

69,553. HALL CLOCK. GUST ANDERSON, Rockford, Ill. Filed Dec. 21, 1925. Serial No. 15,806. Term of patent 14 years.

The ornamental design for a hall clock, as shown.

69,554. CASING FOR MOTION-PICTURE PROJECTORS. GERALD J. BADGLEY, Brooklyn, N. Y., assignor to Duplex Motion Picture Industries, Inc., a Corporation of Delaware. Filed May 23, 1924. Serial No. 9,691. Term of patent 14 years.

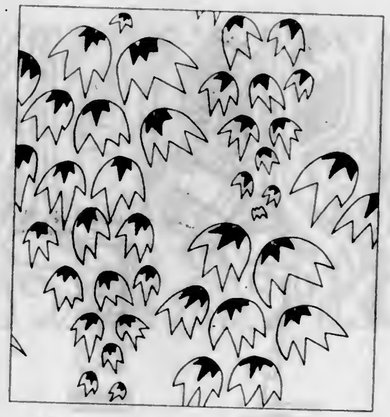


The ornamental design for casing for motion picture projectors, as shown.

69,555. TEXTILE FABRIC. NEVSA MCMEIN BARAGWANATH, New York, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,068. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,556. CAP FOR A PENCIL OR SIMILAR ARTICLE. GEORGE H. BARTLE, New York, N. Y., assignor to Arthur L. Kugel, Brooklyn, N. Y. Filed Nov. 17, 1923. Serial No. 7,808. Term of patent 14 years.

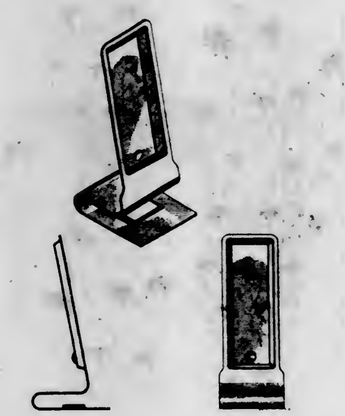


The ornamental design for a cap for a pencil or similar article as shown.

69,557. TEXTILE FABRIC. RALPH BARTON, New York, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,098. Term of patent 3½ years.

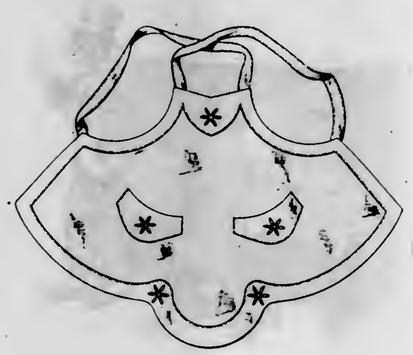
The ornamental design for a textile fabric as shown.

69,558. TEXTILE FABRIC. RALPH BARTON, New York, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,099. Term of patent 3½ years.



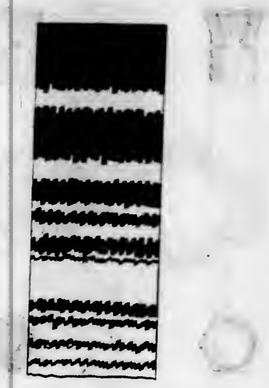
The ornamental design for a textile fabric as shown.

69,559. TOY. SAMUEL BERGER, Newark, N. J. Filed May 17, 1924. Serial No. 9,635. Term of patent 14 years.



The ornamental design for a toy as shown.

69,560. THERMOMETER MOUNTING. HENRY B. BROWN, Rochester, N. Y., assignor to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed June 14, 1922. Serial No. 2,687. Term of patent 14 years.



The ornamental design for a thermometer mounting, as shown.

69,561. APRON. VELMA MILLER CLARK, Brea, Calif. Filed Jan. 12, 1926. Serial No. 16,032. Term of patent 3½ years.

The ornamental design for an apron, as shown.

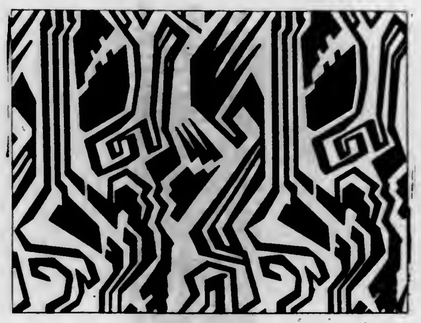
69,562. TEXTILE FABRIC. RENÉ CLARKE, Yonkers, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,075. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,563. TEXTILE FABRIC. RENÉ CLARKE, Yonkers, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,076. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,564. TEXTILE FABRIC. RENÉ CLARKE, Yonkers, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,077. Term of patent 3½ years.



The ornamental design for a textile fabric as shown.

69,565. TEXTILE FABRIC. RENÉ CLARKE, Yonkers, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,078. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,566. TEXTILE FABRIC. RENÉ CLARKE, Yonkers, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,079. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,567. TEXTILE FABRIC. RENÉ CLARKE, Yonkers, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,080. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,568. TEXTILE FABRIC. RENÉ CLARKE, Yonkers, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,081. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,569. FLOWER HOLDER. R. GUY COWAN, Lakewood, Ohio. Filed Dec. 12, 1925. Serial No. 15,725. Term of patent 7 years.

The ornamental design for a flower holder, as shown.

69,570. LIGHTING FIXTURE. STANLEY CHAPEK, Detroit, Mich., assignor to Radiant Specialty Co., a Corporation of Michigan. Filed Oct. 29, 1925. Serial No. 15,285. Term of patent 3½ years.

The ornamental design for a lighting fixture, as shown.

69,571. COAT. TAUBE DAVIS, New York, N. Y., assignor to Franklin Simon & Co., Inc., New York, N. Y., a Corporation of New York. Filed Jan. 16, 1926. Serial No. 16,131. Term of patent 3½ years.

The ornamental design for a coat, substantially as shown and described.

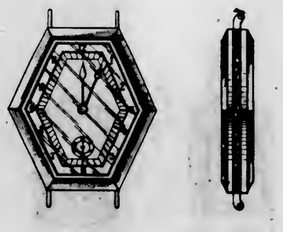
69,572. COAT. TAUBE DAVIS, New York, N. Y., assignor to Franklin Simon & Co., Inc., New York, N. Y., a Corporation of New York. Filed Jan. 16, 1926. Serial No. 16,132. Term of patent 3½ years.

The ornamental design for a coat, substantially as shown and described.

69,573. DRESS. TAUBE DAVIS, New York, N. Y., assignor to Franklin Simon & Co., Inc., New York, N. Y., a Corporation of New York. Filed Jan. 16, 1926. Serial No. 16,135. Term of patent 3½ years.

The ornamental design for a dress, substantially as shown and described.

69,574. DRESS. TAUBE DAVIS, New York, N. Y., assignor to Franklin Simon & Co., Inc., New York, N. Y., a Corporation of New York. Filed Jan. 16, 1926. Serial No. 16,138. Term of patent 3½ years.



The ornamental design for a dress, substantially as shown and described.

69,575. OVERSHOE. CHESTER A. EMERSON, Wakefield, Mass., assignor to Converse Rubber Shoe Company, Malden, Mass. Filed Jan. 18, 1926. Serial No. 16,047. Term of patent 3½ years.

The ornamental design for an overshoe, as shown.

69,576. WATCHCASE. LOUIS A. EPPENSTEIN, Elgin, Ill., assignor to Illinois Watch Case Company, Elgin, Ill., a Corporation of Illinois. Filed Jan. 18, 1926. Serial No. 16,154. Term of patent 3½ years.

The ornamental design for a watchcase as shown.

69,577. WATCHCASE. SOLOMON C. EPPENSTEIN, Elgin, Ill., assignor to Illinois Watch Case Company, Elgin, Ill., a Corporation of Illinois. Filed Jan. 18, 1926. Serial No. 16,155. Term of patent 3½ years.

The ornamental design for a watchcase as shown.

69,578. TEXTILE FABRIC. CHARLES B. FALLS, New York, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,071. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,579. TEXTILE FABRIC. CHARLES B. FALLS, New York, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,073. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,580. TEXTILE FABRIC. CHARLES B. FALLS, New York, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,074. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,581. TEXTILE FABRIC. GUSTAVE M. FAUSER, Ardsley-on-Hudson, N. Y. Filed Oct. 13, 1924. Serial No. 11,064. Term of patent 7 years.

The ornamental design for a textile fabric as shown and described.

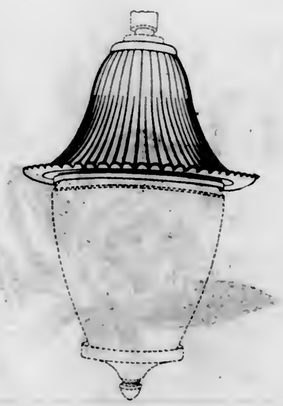
69,582. STATUETTE. DUDLEY TYNG FISHER, Jr., Columbus, Ohio. Filed Oct. 3, 1925. Serial No. 15,019. Term of patent 14 years.

The ornamental design for a statuette as shown.

69,583. TOY RABBIT. GEORGE C. HEISLER, Wooster, Ohio. Filed Dec. 29, 1925. Serial No. 15,895. Term of patent 7 years.

The ornamental design for a toy rabbit, as shown.

69,584. BOTTLE. ORIN A. HENDERSON, Shreveport, La. Filed Dec. 18, 1925. Serial No. 15,781. Term of patent 7 years.



The ornamental design for a bottle, as shown.

69,585. FLOOR LAMP. FRANK S. JARRETT, Upper Darby Township, Delaware County, Pa. Filed Dec. 19, 1925. Serial No. 15,796. Term of patent 3½ years.

The ornamental design for a floor lamp, substantially as shown.

69,586. LAMP CANOPY. HOWARD L. JOHNSTON, Forest Hills Borough, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 16, 1925. Serial No. 12,072. Term of patent 3½ years.

The ornamental design for a lamp canopy as shown in the drawing.

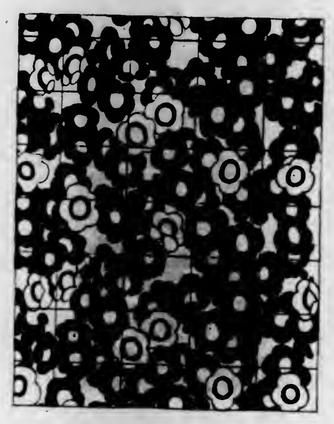
69,587. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,082. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,588. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,083. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,589. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,084. Term of patent 3½ years.



The ornamental design for a textile fabric as shown.

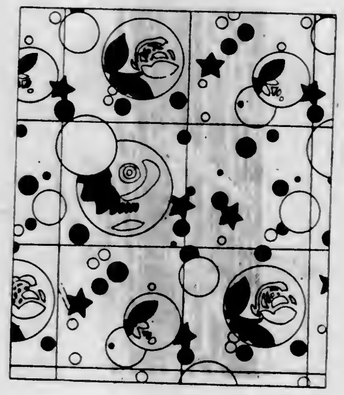
69,590. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,085. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,591. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,087. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,592. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,088. Term of patent 3½ years.

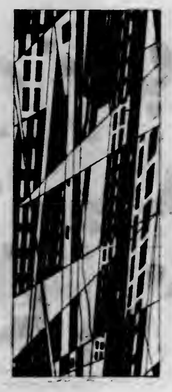


The ornamental design for a textile fabric as shown.

69,593. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,089. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,594. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,090. Term of patent 3½ years.



The ornamental design for a textile fabric as shown.

69,595. TEXTILE FABRIC. KATHARINE STURGES KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,091. Term of patent 3½ years.

The ornamental design for a textile fabric as shown

69,596. TEXTILE FABRIC. CLAYTON KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,092. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,597. TEXTILE FABRIC. CLAYTON KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926 Serial No. 16,093. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

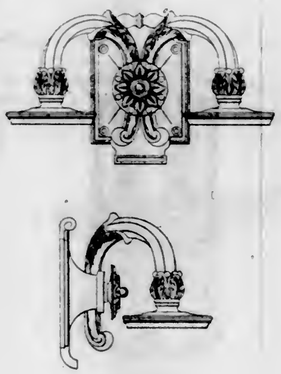
69,598. TEXTILE FABRIC. CLAYTON KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,094. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,599. TEXTILE FABRIC. CLAYTON KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,095. Term of patent 3½ years.

The ornamental design for a textile fabric as shown.

69,600. TEXTILE FABRIC. CLAYTON KNIGHT, Roslyn, N. Y., assignor to Stehli Silks Corporation, a Corporation of New York. Filed Jan. 15, 1926. Serial No. 16,096. Term of patent 3½ years.

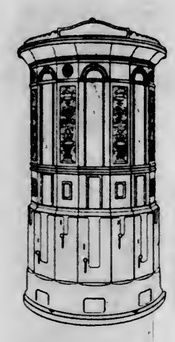


The ornamental design for a textile fabric as shown.

69,601. CHANDELIER. ISAAC LEVY, New York, N. Y., assignor to Metropolitan-Columbia Mfg. Co., Inc., a Corporation of New York. Filed Jan. 8, 1926. Serial No. 16,006. Term of patent 3½ years.

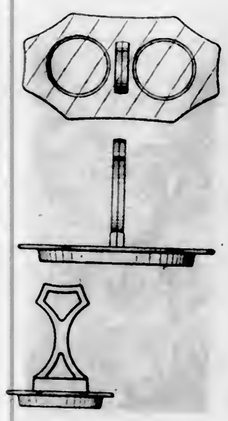
The ornamental design for a chandelier substantially as shown.

69,602. BRACKET PLATE FOR LIGHTING FIXTURES. FRANK L. LINDEN, Chicago, Ill. Filed Dec. 21, 1925. Serial No. 15,805. Term of patent 3½ years.



The ornamental design for a bracket plate for lighting fixtures, as shown.

69,603. LEMON REAMER. VIRGIL V. LOOMIS, Pittsburgh, Pa. Filed Jan. 12, 1926. Serial No. 16,027. Term of patent 14 years.



The ornamental design for a lemon reamer, substantially as shown.

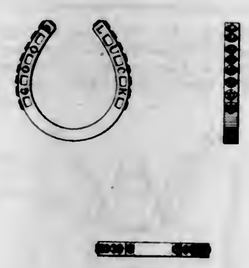
69,604. VENDING-MACHINE CASING. LANDON C. MANNING, New York, N. Y. Filed Nov. 16, 1925. Serial No. 15,431. Term of patent 14 years.

The ornamental design for a vending machine casing as shown.

69,605. COMBINATION CREAM AND SUGAR TRAY. WILL CAMERON MCCARTNEY, Cambridge, Ohio. Filed Jan. 6, 1926. Serial No. 15,974. Term of patent 7 years.

The ornamental design for a combination cream and sugar tray, as shown.

69,606. TRAFFIC SIGNAL FOR AUTOMOBILES. JAMES LEROY MOUNT, Chicago, Ill. Filed Sept. 18, 1925. Serial No. 14,814. Term of patent 7 years.

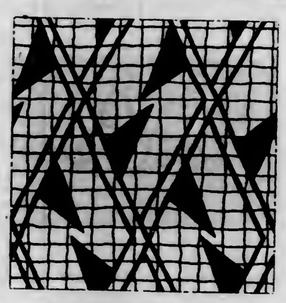


The ornamental design for traffic signal for automobiles, substantially as shown.

69,607. LACE. SAMUEL H. PAGE, Stratford, Conn., assignor to The American Fabrics Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Oct. 26, 1925. Serial No. 15,250. Term of patent 14 years.

The ornamental design for lace substantially as shown.

69,608. RING OR THE LIKE. JOSEF PEJCHAR, Brooklyn, N. Y. Filed Sept. 30, 1925. Serial No. 14,982. Term of patent 14 years.

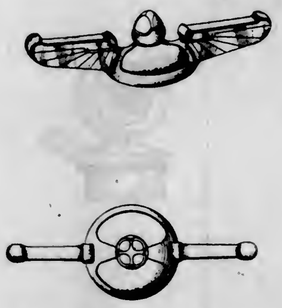


The ornamental design for a ring or the like, as shown.

69,609. TEXTILE FABRIC. ROBERT SCHEY, New York, N. Y., assignor to Max Kaufmann & Co. Inc., New York, N. Y., a Corporation of New York. Filed Dec. 21, 1925. Serial No. 15,813. Term of patent 8½ years.

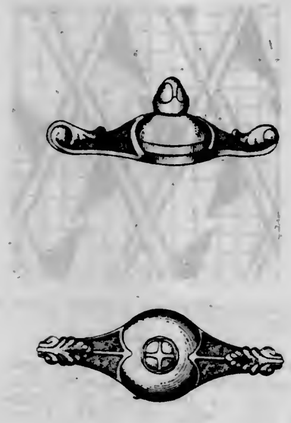
The ornamental design for a textile fabric as shown and described.

69,610. TEXTILE FABRIC. ROBERT SCHEY, New York, N. Y., assignor to Max Kaufmann & Co. Inc., New York, N. Y., a Corporation of New York. Filed Dec. 21, 1925. Serial No. 15,814. Term of patent 8½ years.



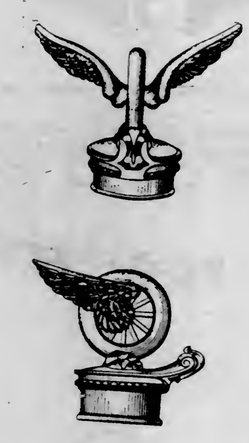
The ornamental design for a textile fabric as shown and described.

69,611. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,858. Term of patent 7 years.



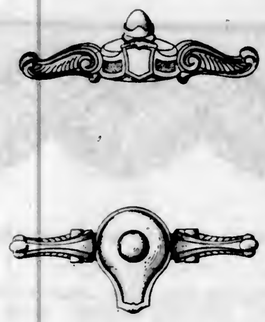
The ornamental design for a radiator cap as shown.

69,612. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,859. Term of patent 7 years.



The ornamental design for a radiator cap as shown.

69,613. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,860. Term of patent 7 years.

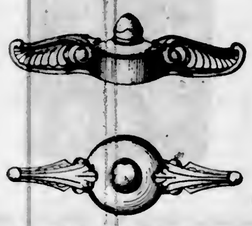


The ornamental design for a radiator cap as shown.

69,614. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,863. Term of patent 7 years.

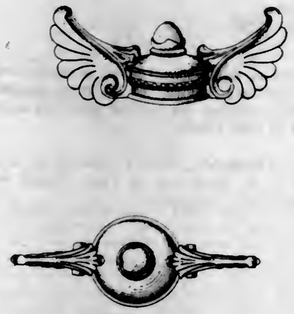
The ornamental design for a radiator cap substantially as shown.

69,615. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,864. Term of patent 7 years.



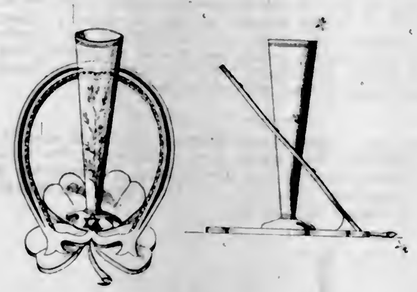
The ornamental design for a radiator cap substantially as shown.

69,616. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,865. Term of patent 7 years.



The ornamental design for a radiator cap as shown.

69,617. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,868. Term of patent 7 years.

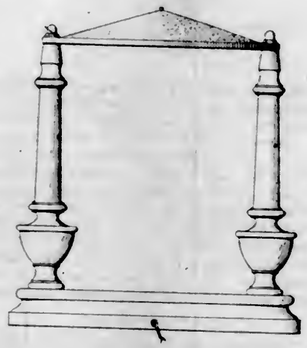


The ornamental design for a radiator cap as shown.

69,618. RADIATOR CAP. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1925. Serial No. 15,870. Term of patent 7 years.

The ornamental design for a radiator cap substantially as shown.

69,619. VASE. FRANK ADAM SILAJ, Chicago, Ill. Filed Sept. 15, 1924. Serial No. 10,781. Term of patent 8½ years.

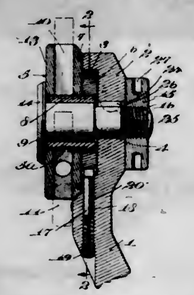


The ornamental design for a vase as shown.

69,620. COVER PAPER OR THE LIKE. THOMAS L. STONE, Newark, N. J., assignor to Hampden Glazed Paper & Card Company, Holyoke, Mass., a Corporation of Massachusetts. Filed Jan. 6, 1926. Serial No. 15,972. Term of patent 14 years.

The ornamental design for cover paper or the like as shown.

69,621. RADIO LOUD SPEAKER. LOUIS WULKAN, Cedarhurst, N. Y. Filed Nov. 12, 1925. Serial No. 15,407. Term of patent 8½ years.

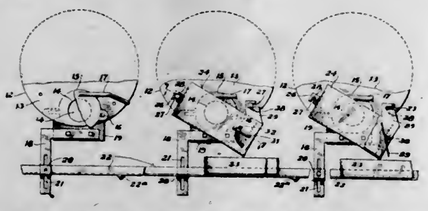


The ornamental design for a radio loud speaker, substantially as shown.

PATENTS

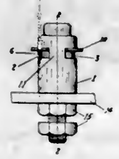
GRANTED MARCH 2, 1926.

1,574,741. TURRET-TOOL HOLDER. HERBERT BEAUMONT DAY, Detroit, Mich.; Eva Alexander administratrix of said Herbert Beaumont Day, deceased. Filed Oct. 24, 1924. Serial No. 745,683. 1 Claim. (Cl. 29—48.)



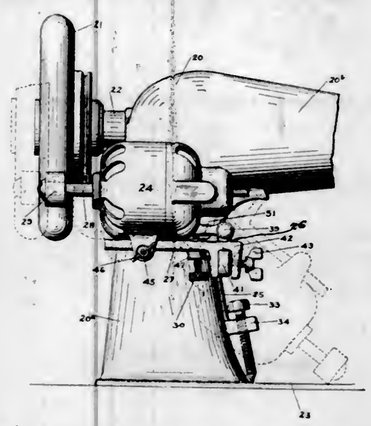
The combination with a supporting shank having substantially cylindrical portion recessed on one of its faces and apertured centrally of said recess, of a turret having means for supporting a plurality of radially extending tools, a ratchet plate rigidly secured to the turret and disposed within the said recess, a bushing traversing said turret and plate, a bolt traversing said bushing and shank with its head in engagement with the outer face of said turret, a nut threaded on the bolt for maintaining the parts in assembled relation, means preventing rotation of said bolt with respect to said shank, and means permitting rotation of the turret in one direction and preventing continued rotation in the opposite direction.

1,574,742. PROCESS OF REFINING AND DECOLORIZING BITUMENS. GEORGE W. ACHESON, Caldwell, N. J. Filed Oct. 8, 1924. Serial No. 742,429. 10 Claims. (Cl. 196—147.)



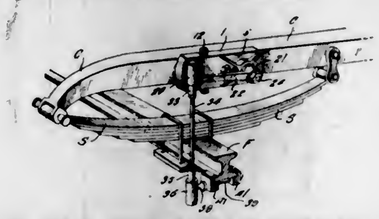
1. Process of refining and decolorizing bitumens comprising reacting thereon with a solid reflocculated adsorbent material in conjunction with an acid reagent, separating the refined bitumen from the acid sludge, and further treating the same with an anhydrous oxid having a decolorizing action thereon.

1,574,743. GAUGE BOX FOR ICE-CREAM FREEZERS. ALBERT ERNEST ALCHIN, Perth Amboy, N. J. Filed July 3, 1924. Serial No. 724,046. 9 Claims. (Cl. 226—100.)



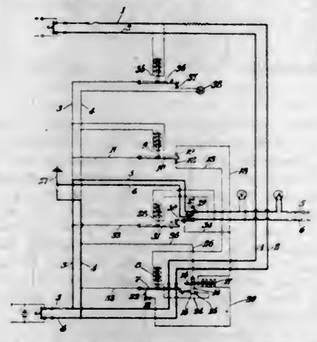
1. The combination with a freezer having a head provided with a discharge opening, of a gauge box secured to said head and having a portion of its rear side wall cut away so as to fit beneath and partially around said opening, said box having an inclined bottom, and a pivoted gate forming the end of said box adjacent the lower end of said bottom.

1,574,744. TERMINAL POST. EDWARD L. AIKEN, East Orange, N. J. Filed Aug. 3, 1925. Serial No. 47,995. 6 Claims. (Cl. 173—259.)



1. A terminal post comprising; a thimble having means for mounting, said thimble having a pair of substantially opposite horizontal slots cutting through the wall of the thimble, a plunger held within the thimble but having an end protruding therefrom, said plunger having a pair of flanges disposed to form an annular groove therebetween of substantially the width of the thimble slot and a spring within the thimble cooperating with the thimble to normally hold the plunger so the lower flange thereon closes the slots in the thimble.

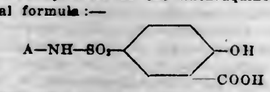
1,574,745. SEWING-MACHINE MOTOR. EDWARD N. ANKETELL, New Haven, Conn., assignor to The A. C. Gilbert Company, New Haven, Conn., a Corporation of Connecticut. Filed June 10, 1919. Serial No. 303,142. 35 Claims. (Cl. 74—26.)



1. The combination with a sewing machine head having a wheel at one end, of a motor member having a shaft with a friction drive pulley thereon, and means mounting said motor member so that it is movable in an approximately vertical plane upwardly into engagement with the lower portion of the machine wheel, and non-yielding means for varying the friction between the drive pulley and the machine wheel.

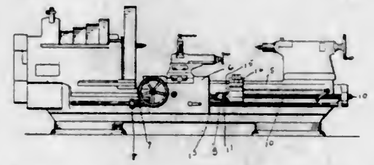
1,574,746. DOUBLE-ACTING SPRING SNUB. ALBERT N. ANTHES, Quincy, Ill., assignor of one-half to Robert F. Gunther, Quincy, Ill. Filed Jan. 15, 1924. Serial No. 686,444. 7 Claims. (Cl. 267—9.)

1. In a double acting shock absorbing device for vehicles, a link connection comprising an arm, said arm having a ball end, a second ball arm clamped to the axle portion of the vehicle, ball joint sockets in which the respective ball arms are mounted, reversely threaded sleeve extensions on the ball-joint socket, a link having reversely threaded ends adjustably connecting said reversely threaded sleeve extensions and means for attaching the link connection to the vertical frame.



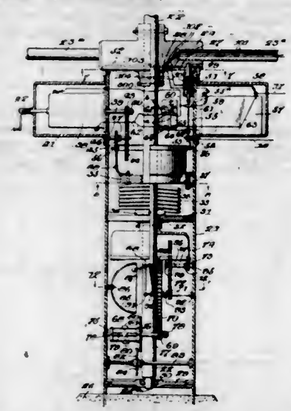
1,574,747. AUTOMATIC BATTERY-CHARGING SYSTEM. CHARLES AUTH, New York, N. Y., assignor to Emma Louise Auth, Brooklyn, N. Y. Filed July 19, 1923. Serial No. 652,484. 2 Claims. (Cl. 175—294.)

1. A battery charging system comprising a power circuit, a charging circuit, a service circuit, a switch member for shifting the power circuit into and out of connection with the charging circuit, a locking device adapted to hold said switch member in closed position against minor voltage fluctuations in the battery circuit, a circuit breaker in said service circuit, and means for releasing said locking device upon the actuation of said circuit breaker.



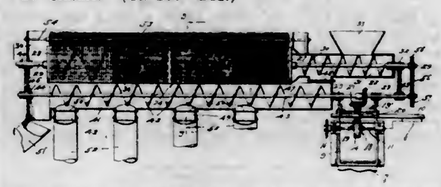
1,574,748. DYESTUFF OF THE ANTHRAQUINONE SERIES AND PROCESS OF MAKING SAME. JAMES BADDILEY and WILLIAM WYNDHAM TATUM, Manchester, England, assignors to British Dyestuffs Corporation Limited, Manchester, England. Filed Apr. 18, 1923. Serial No. 632,088. 3 Claims. (Cl. 260—60.)

1. The new dyestuffs of the anthraquinone series of the general formula:—



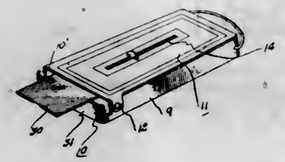
in which "A" represents an anthraquinone residue, which can be suitably substituted, which are acid dyestuffs dyeing wool directly and also dye on a chrome mordant and possess considerable affinity for acetyl silk.

1,574,749. BACKING-OFF ATTACHMENT FOR LATHES. ALBERT BAILEY, Brightwood, Mass. Filed Mar. 25, 1922. Serial No. 546,788. 4 Claims. (Cl. 82—19.)



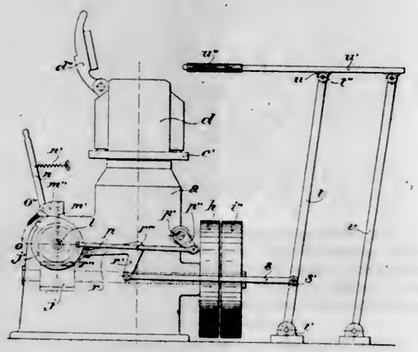
1. The combination with a lathe having a bed, a carriage movable on the bed, a spindle and a carriage propelling screw having gear connection with the spindle of a cam having driving connection with the screw, and means carried by the carriage to engage said cam, said cam being arranged to propel the carriage in one direction, the carriage being movable in a direction parallel to the axis of the screw.

1,574,750. CROSSING PROTECTOR. ANDREW J. BAKER, Tucson, Ariz. Filed Mar. 27, 1923. Serial No. 628,097. 28 Claims. (Cl. 246—126.)



27. A crossing protector comprising a rotatable gate, spring means for operating said gate, means for winding said spring means, said gate remaining stationary during the winding operation, and means for controlling the operation of said winding means.

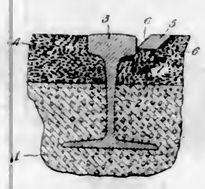
1,574,751. COMBINED GRAIN CROSS CONVEYER AND DOCKAGE REMOVER. ANSON S. BARKER, Minneapolis, Minn. Filed Dec. 31, 1924. Serial No. 759,044. 17 Claims. (Cl. 209—241.)



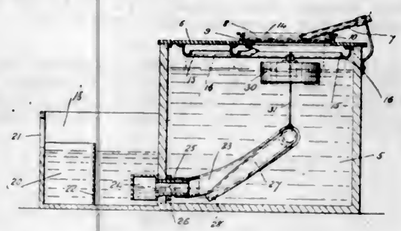
1. A combined conveyer and dockage remover comprising a screen, sectional conveying means for delivering grain to the screen and for receiving the dockage from the screen, and a gate operative, at will, to cause one section of the conveying means to by-pass the grain in the direction of the screen.

1,574,752. TICKET HOLDER. ERNEST BERNIER, Detroit, Mich., assignor of one-half to Jean B. Charette, Detroit, Mich. Filed Jan. 24, 1925. Serial No. 4,422. 1 Claim. (Cl. 206—40.)

A ticket holder of the class described, comprising a compartment adapted for the reception of a plurality of tickets; said walls on said compartments, the opposite side walls each having a slot formed therein; a cover swingably mounted on said side walls and adapted for engaging at its lower edge in said slots upon movement to open position, said cover being slightly shorter than said compartment the space extending between said slots being open; a spring held follower mounted in said compartment and adapted for normally retaining tickets placed therein in closed engagement with said cover; and slidable means mounted on said cover for projecting said tickets from said compartment individually at the end bearing said slots.



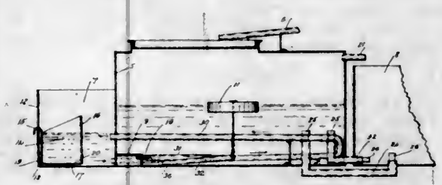
1,574,753. MACHINE FOR MOLDING BUILDING BLOCKS AND THE LIKE. FRANÇOIS BONNET, Villefranche-sur-Saone, France. Filed Apr. 29, 1924. Serial No. 709,869. 3 Claims. (Cl. 25—45.)



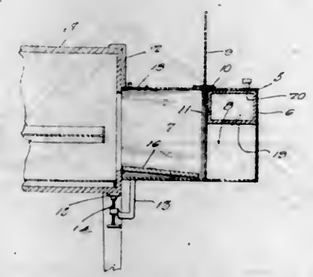
1. In a molding apparatus of the character described, an ejector plate for the molded block, a crank disc, means for rotating said crank disc, means for governing the rotation of said crank disc, means operated by said crank disc for raising said ejector plate and thereby said block from the molding box of the apparatus, recesses in the upper surface of said ejector plate, rollers adapted to rotate in said recesses and means for introducing said rollers into said recesses or withdrawing them therefrom.

1,574,754. METHOD OF MAKING PAVEMENT CONFORMATION. MATTHEW F. BRAMLEY, Cleveland, Ohio. Filed Jan. 8, 1925. Serial No. 1,297. 4 Claims. (Cl. 238—9.)

2. The method of making a rail-adjoining pavement which consists in laying an asphalt pavement adjoining a rail, pressing a symmetrically shaped and reversible metal member into said pavement while soft, allowing the pavement to harden against said member and finally removing said member to leave a channel between said rail and the pavement for the passage of a car wheel flange.

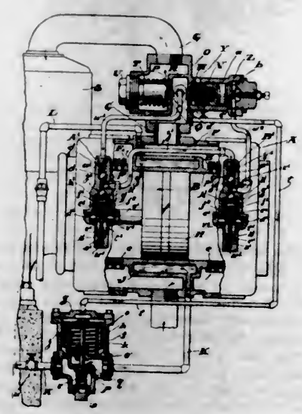


1,574,755. STOCK WATERER. REUBEN G. PETERSON, Wessington Springs, S. Dak. Filed Mar. 27, 1924. Serial No. 702,233. 9 Claims. (Cl. 119—78.)



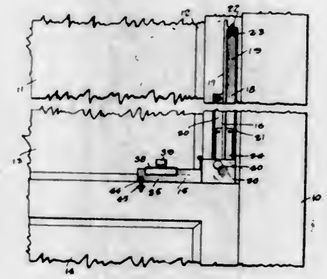
1. In a stock waterer, a supply tank, a drinking trough for cattle having at one side a drinking opening for hogs, means for automatically regulating the delivery of water from the tank to the drinking trough, and a compartment for hogs to drink from arranged inside the drinking trough below and adjacent to the said opening and having a water inlet opening in its lower part which communicates with the drinking trough, said tank and compartment having one side common to both and the top edges of the said compartment being extended above the level of the bottom edge of the said drinking opening for hogs.

1,574,756. STOCK WATERER. REUBEN G. PETERSON, Wessington Springs, S. Dak. Filed Sept. 27, 1924. Serial No. 740,298. 2 Claims. (Cl. 119—73.)



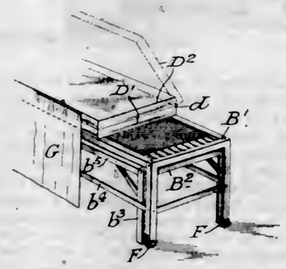
1. A drinking trough for cattle having a drinking opening for hogs on one side, a detachable receptacle for the water for the hogs having an inlet openings for water at its lower part, hooks on the front edge of the receptacle which hook onto the adjacent side of the trough and suspend the said receptacle in the trough, and overlapping projections on the adjacent sides of the said trough and receptacle which prevent the receptacle from being displaced by the hogs.

1,574,757. INCUBATOR ATTACHMENT. KATIE POMMER, Bemidji, Minn. Filed Aug. 18, 1925. Serial No. 50,988. 5 Claims. (Cl. 119—35.)



5. An attachment for an incubator, wherein the incubator is provided with an end wall having an opening and a hinged closure for said opening, comprising a box-like structure having an open end and a closed end, the latter end including a transparency, a hot water tank located in the casing adjacent the transparency, a partition slidable transversely across the interior of the casing, a door hingedly mounted adjacent the open end of the casing, and means for attaching the open end of the casing over the opening in the incubator.

1,574,758. WATER VALVE FOR COMPRESSORS. SNOWDEN B. REDFIELD, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed May 16, 1923. Serial No. 639,260. 6 Claims. (Cl. 230—6.)

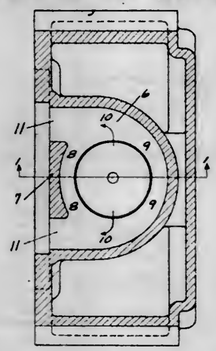


1. In a compressor, the combination with a valve adapted to be conected to a compressor for controlling the supply of cooling water to the compressor cylinder, of a plurality of pilot valves in communication with the discharge line of the compressor and connected in series with the water valve, whereby cooling water is admitted to the compressor cylinder after the compressor has attained a predetermined speed, and shut off as the compressor stops.

1,574,759. WINDOW-SASH LOCK. TREMONT W. BICKEL, McAllen, Tex. Filed Aug. 6, 1925. Serial No. 48,676. 5 Claims. (Cl. 292—14.5.)

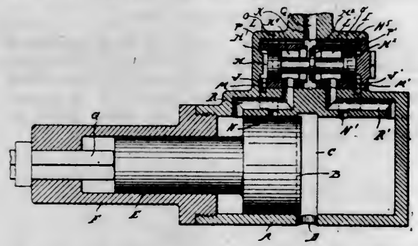
1. A window sash lock comprising, in combination, a mechanism adapted to be mounted on the lower sash of a window, a guide frame adapted to be mounted on the upper sash in co-acting position with the locking mechanism, a bar spring secured to the lower end of the guide frame engageable with the locking mechanism, and means for disengaging the bar spring from the said locking mechanism.

1,574,760. COUCH BED. GEORGE F. SISBOWER, Flushing, and LOUIS E. PITTONI, New York, N. Y., assignors to Manhattan-Rome Company, Branch of Rome Metallic Bedstead Co., Long Island City, N. Y., a Corporation of New York. Filed Apr. 27, 1921. Serial No. 464,906. 3 Claims. (Cl. 5—333.)



1. A folding mattress for telescoping couch beds comprising two sections hinged together along one longitudinal edge, a valance secured to the free edge of one section and having a portion extended upwardly over and normally covering the free edge of the other section when the mattress is folded, said valance having a portion draping downwardly from the first mentioned section, whereby when the mattress is placed upon a couch with the draped portion of the valance hanging down, the mattress may be unfolded without disturbing the valance.

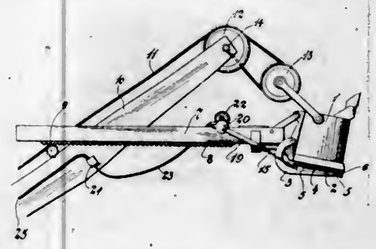
1,574,761. VALVE MECHANISM. ALLAN D. SKINNER, Erie, Pa., assignor to Skinner Engine Company, Erie, Pa., a Corporation of Pennsylvania. Filed Dec. 8, 1920. Serial No. 429,247. 5 Claims. (Cl. 121—185.)



1. In a valve mechanism, the combination of a poppet valve; and a valve chest having a port extending lat-

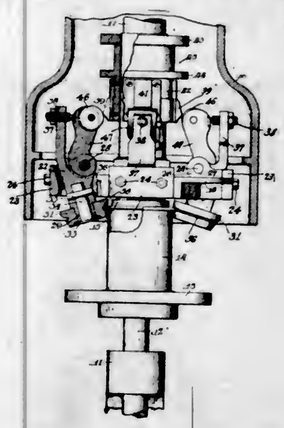
erally from the axis of the valve and to one side of the valve, said port having a bridge dividing the flow

through the port and approximately balancing the side thrust on the valve.



1,574,762. PNEUMATIC TOOL. WILLIAM A. SMITH and CLARENCE H. DOCKHAM, Detroit, Mich., assignors to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed May 2, 1921. Serial No. 466,189. 10 Claims. (Cl. 121—18.)

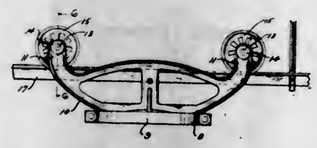
1. In a fluid pressure operated tool, a cylinder, a piston reciprocable therein, said cylinder having a main exhaust port overrun by said piston, motion fluid inlet passages opening into said cylinder adjacent the ends thereof, a valve controlling the movements of said piston and arranged to admit motive fluid in alteration to said passages, means for shifting said valve in timed relation with the movements of said piston including a passage supplying motive fluid continuously in limited amount to one pressure area of said valve, a valve controlling exhaust passage extending from said area to said cylinder intermediate said main exhaust port and one end of said cylinder, and auxiliary exhaust means controlled by said valve for said end of the cylinder whereby the full stroke of the piston is secured and any tendency of the valve to shift prior to the closing of said valve controlling exhaust passage by said piston is avoided.



1,574,763. DIPPER TRIP. PAUL S. STEVENS, South Milwaukee, Wis., assignor to Bucyrus Company, South Milwaukee, Wis. Filed Nov. 21, 1925. Serial No. 70,565. 12 Claims. (Cl. 214—146.)

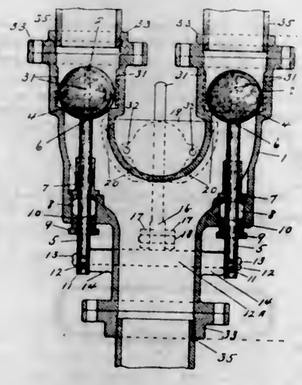
1. In a dipper trip, the combination of a dipper-handle, an excavating dipper on said handle, a dump-door to said dipper, a latch for said door, a latch-keeper for said latch, a drum journally mounted in said handle, a chain to retract said latch from said latch-keeper and extending from said latch to said drum and wound about said drum, a lever to rotate said drum, an electric motor mounted on said dipper-handle, a wheel rotated by said motor, and a connecting-rod connecting said wheel and said lever; the radius distance from the point of connection of the connecting-rod and wheel to the center of said wheel being appreciably less than the radius distance from the point of connection of the connecting-rod and lever to the center of rotation of said lever; and the

difference between the length of the connecting-rod and the distance from the center of said wheel to the center of rotation of said lever being appreciably less than the difference of said radii.



1,574,764. SEAMING HEAD. SWAN N. TEVANDER, Maywood, Ill., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 16, 1920. Serial No. 403,908. 23 Claims. (Cl. 113—24.)

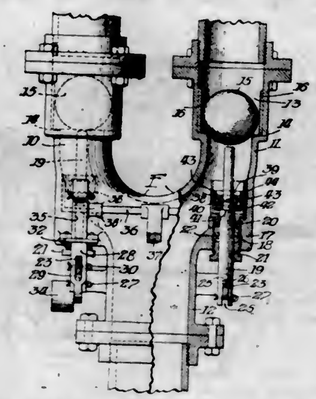
1. A double seaming head, comprising in combination, a set of can holding members, and a set of roll carrying members mounted for relative rotation and rolls carried by said roll carrying members, and means causing said rolls to successively move inward and engage and bend the cover flange and body flange of the can in said holding members, the roll which is caused first to so operate being formed with an upper relatively long groove wall which engages on top of and depresses said flanges and with a lower relatively short groove wall which curls the extremity of the cover flange under the body flange.



1,574,765. CARRIAGE FOR CARRIERS. RUSSELL G. THOMPSON, Janesville, and ELMER T. ABENDROTH, De Pere, Wis., assignors to Hudson Manufacturing Company, Minneapolis, Minn., a Corporation of Wisconsin. Filed May 15, 1925. Serial No. 30,572. 7 Claims. (Cl. 105—154.)

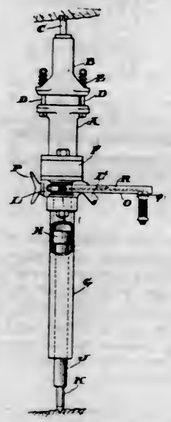
3. A carriage of the class described, comprising a frame formed with a pair of spaced apart side members, wheels for said carriage, bolt means for connecting the wheels to the carriage, and washer members carried by said bolts on either side of the side frame members for varying the proximity of the wheels to the side frame mem-

bers thereby permitting the utilization of the same length of bolt means for all adjustments of the wheels and frame with respect to each other.



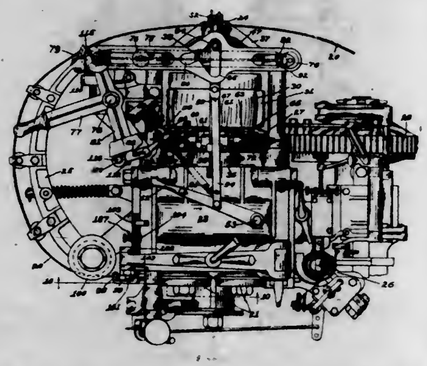
1,574,766. VALVE FOR LIQUIDS. BENJAMIN W. THURTELL, Chicago, Ill. Filed June 16, 1924. Serial No. 720,333. 5 Claims. (Cl. 277—20.)

1. In a valve structure, the combination of a valve body having a plurality of intake passageways and an outlet passageway, valve seats formed in said intake passagewnys and a ball valve for each seat, a vertically slidable stem below each ball valve, an actuating lever for each stem pivoted to the valve body and connected at its inner end with the lower end of the stem, the outer ends of said levers being connected by a bar, and an actuating member engaging with said bar to cause simultaneous movement of said levers and raising of the stems to unseat the ball valves.



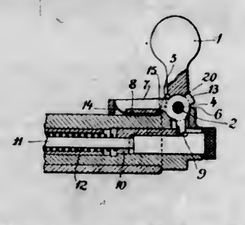
5. In a valve structure, the combination of a valve body having parallel inlet passageways, and a common outlet passageway, each inlet passageway having a valve seat and a ball valve therefor, a vertical stem axially below each ball valve and slidable in said body, a bar, arms extending from the ends of said bar and pivoted to the valve body, the inner end of each bar being connected with the lower end of the corresponding stem, an actuating lever pivoted to said valve body over said bar, said actuating lever having a flat surface and the weight of said ball valve on said stem normally holding said bar against said flat surface, said lever having a cam surface for engagement with said bar to swing said arm to cause vertical movement of said stem and raising of said ball valves from their seats, said actuating lever tending to be thrown back suddenly when moved toward normal position, and cushioning means for retarding such return movement, whereby said ball valves will be reseated slowly and injury to their valve seats prevented.

1,574,767. VALVE. BENJAMIN W. THURTELL, Chicago, Ill. Filed Apr. 20, 1925. Serial No. 24,338. 6 Claims. (Cl. 277—20.)



6. In a valve structure, the combination of a plurality of valve members, means for independently opening any number of such valve members to any degree desired, independent locking mechanism for each member for locking it in its open position, and a common means for releasing the locking mechanisms of the open valve members, whereby said members may simultaneously return to closed positions.

1,574,768. HANDLE FOR ROCK DRILLS. GROVER G. TUTTLE, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Mar. 5, 1923. Serial No. 622,748. 2 Claims. (Cl. 121—9.)

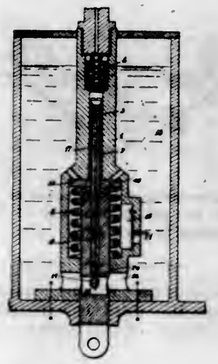


1. In a rock drill, the combination with an element to be controlled, of a handle, a passage through the handle leading from the element to be controlled to the atmosphere, a valve through said handle for controlling the passage, a sleeve forming a grip mounted loosely on said handle for controlling the valve, a dished portion in said sleeve constantly in contact with the valve whereby the valve may be opened upon movement of the sleeve with respect to the handle, and springs in each end of the sleeve for holding the sleeve normally in balanced suspension and for automatically returning the sleeve to its mean position.

1,574,769. AUTOMATIC MACHINE-CONTROL MEANS. BERT L. VAN ORMAN, Highland Park, Mich., assignor to L. A. Young Industries, Inc., Detroit, Mich. Filed Oct. 15, 1923. Serial No. 668,677. 15 Claims. (Cl. 192—144.)

9. The combination with the machine to be controlled and the stock operated upon by the machine, of a variable speed driving means for said machine, a manually adjustable control member for said driving means, a spring actuated releasing member for said control member, a manually adjusted locking means for said releasing member, a circuit closing means held normally in open position by the stock and a means for releasing said locking means including an electromagnet in the circuit of said circuit closing means.

1,574,770. FIREARM. RUDOLF VON FROMMER, Budapest, Hungary. Filed Apr. 24, 1924. Serial No. 708,764. 3 Claims. (Cl. 42—16.)



1. In a firearm, the combination of a breech-bolt, an operating handle therefor swingably connected to said breech-bolt, a coupling member movably connected to said operating handle for coupling the same with a part of the firearm, means on said handle for operating said coupling member in one direction, and a spring for operating the coupling member in the opposite direction independently of the swinging movements of the handle relatively to the breech-bolt.

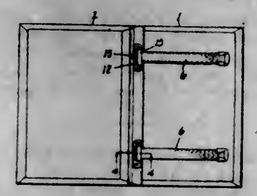
1,574,771. PLASTIC COMPOSITION MATERIAL AND METHOD OF PRODUCING THE SAME. GEORGE J. VOTAPEK, Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed July 10, 1922. Serial No. 574,077. 16 Claims. (Cl. 106—22.)

1. The process of treating a binder to improve the properties thereof for use in plastic composition material, said binder comprising the reaction product of a phenolic body and a halogen derivative of sulphur, which comprises incorporating in such binder a small quantity of stearine pitch.

1,574,772. FUEL-FEED PUMP FOR INTERNAL-COMBUSTION ENGINES. RUDOLF WALKER, Vienna, Austria. Filed Jan. 25, 1924. Serial No. 688,526. 11 Claims. (Cl. 103—178.)

1. In a liquid fuel pump for internal combustion engines, a pump piston, a suction valve on said piston having complete freedom of movement within its limited stroke, said valve being of such weight as to be caused to open and close quickly by the action of its large inertia at each reversal of the stroke of the fast moving piston and being carried along in its open and closed positions respectively.

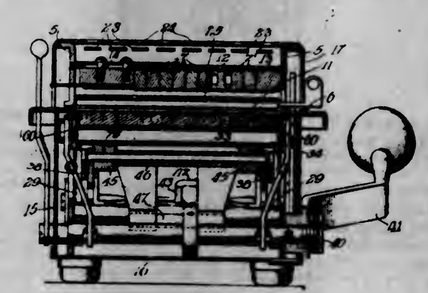
1,574,773. WATERPROOF GAITER. EDWARD R. WHARTON, Medford, Mass. Filed July 2, 1925. Serial No. 41,020. 2 Claims. (Cl. 36—2.)



1. A waterproof article of the character stated, comprising a plurality of laminated parts each including a relatively stiff inner layer and an outer layer of limp waterproof material coextensive with and superimposed on the inner layer, said parts having meeting edges and marginal edges, the meeting edges being united to each other to form a gaiter and secure the outer layers to the inner layers at the meeting edges, the outer layers being united to the inner layers at the marginal edges, the inner layers collectively constituting a form-maintaining body portion, while the outer layers collectively constitute a continuous waterproof veneer backed and maintained in gaiter form by the body portion.

2. A waterproof article as specified by claim 1, the body portion being of skeleton form and provided with sight openings, the material of the said veneer being transparent so that portions of stockings, within the gaiter, are visible through the sight openings.

1,574,774. TEMPORARY BINDER. GEORGE P. WIGGINTON, Kalamazoo, Mich., assignor to Kalamazoo Loose Leaf Binder Company, Kalamazoo, Mich. Filed Apr. 11, 1925. Serial No. 22,287. 6 Claims. (Cl. 129—41.)



6. In a temporary binder, the combination of top and bottom binding bars, the top binding bar having binding strip openings therein, binding strips connected to the bottom binding bar and disposed through said openings in said top binding bar, clamping plates mounted on the outer side of said top binding bar and having openings

therein registering with the openings of said top binding bar, the front edges of the openings of said clamping plates having upwardly directed teeth, and clamping mem-

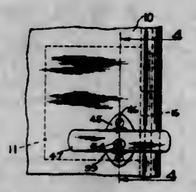
bers pivotally mounted on said clamping plates so that said clamping members may be swung forwardly to clamp the binding strips upon said teeth.

1,574,775. CHECK WRITER. GEORGE M. WILLIS, Chicago, Ill., assignor to Checkometer Sales Co., a Corporation. Filed Mar. 3, 1924. Serial No. 696,421. 9 Claims. (Cl. 101—19.)

1. In a check writer, the combination of a platen having a plurality of parallel grooves across its impression face in the direction of its least dimension, a plurality of type bearing bars mounted for longitudinal shifting movement parallel with the grooves in the impression face of the platen and normal to the length of said platen, said type bearing bars each having a plurality of printing characters for selective registration with the platen to impress different amounts, said printing characters being defined by grooves in the impression faces of each type bar parallel with each other and parallel with the shifting movement of the type bars, said grooves being parallel with the grooves in the impression face of the platen and the grooves in each type bar being common to all of the printing characters thereon so that the same grooves cooperate with the grooves in the platen in all of the selective printing positions of each bar.

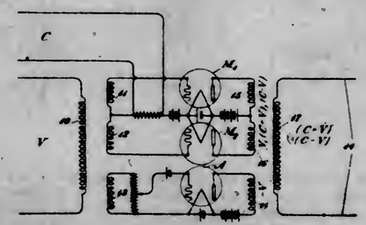
1,574,776. PROCESS FOR PRODUCING A YEAST PREPARATION. RICHARD WILLSTÄTTER, Munich, Germany, and Harry Sobotka, New York, N. Y. Filed Jan. 16, 1925. Serial No. 2,921. 7 Claims. (Cl. 99—11.)

1. The process of producing a yeast preparation rich in vitamines and enzymes, which consists in mixing with yeast at least one-third of its weight of a disaccharide other than cane sugar to initiate plasmolysis of the yeast, and continuing and completing the plasmolysis by heating the mixture.



4. An article of manufacture for use as a baking or brewing preparation, consisting of yeast and a disaccharide other than cane-sugar mixed therewith with application of heat in a proportion which produces liquefaction but not fermentation.

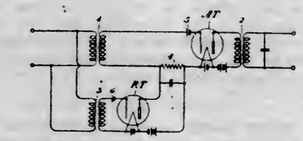
1,574,777. HATCH COVER AND MEANS FOR OPERATING AND LOCKING THE SAME. WILLIAM H. WINS, Toledo, Ohio. Filed Mar. 31, 1924. Serial No. 703,168. 5 Claims. (Cl. 292—282.)



1. In combination with a hatch frame, a hatch cover pivotally mounted on said frame, a supporting link pivoted to one of said members and a supporting arm pivotally secured to the other of said members, and said link frictionally engaging said arm when in one position tightly locking the hatch cover on said hatch frame, and allowing the hatch cover to be supported in a partly open position when said link and said arm are operated, and cooperating means on the said supporting link and the said supporting arm so that a movement of the said supporting arm will release the hatch cover from its seat, and a lug formed on the supporting link, the said supporting arm also provided with a notch for cooperating with the lug so that a movement of the arm will partly lift the hatch cover from its seat.

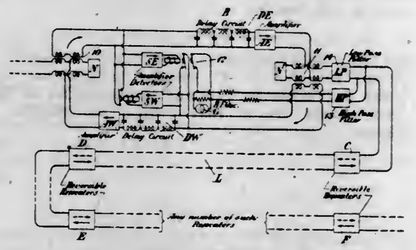
1,574,778. DOOR LOCK. ARTHUR E. WOODRUFF, Mount Carmel, Conn., assignor to The W. W. Woodruff & Sons Co., Mount Carmel, Conn. Filed Apr. 25, 1922. Serial No. 556,517. 36 Claims. (Cl. 70—91.)

1. In a door lock, a bolt, manually operable means projecting from the door for withdrawing the bolt, means manually movable into engagement with said operable means for dogging said means against movement while allowing the retraction of said bolt, and key controlled means carried by said manually operable means for rendering said dogging means inoperative.



1,574,779. TRANSLATING CIRCUITS. HERMAN A. AFFEL, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Oct. 5, 1921. Serial No. 505,529. 9 Claims. (Cl. 179—171.)

1. In a translating system in which two translating devices are employed, one having a characteristic which is chiefly non-linear and the other having a character-

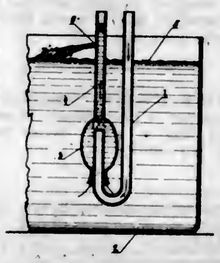


istic which is chiefly linear, the method of transmission which consists in subjecting energy to the action of the device whose characteristic is chiefly non-linear, thereby producing in the output of said device energy components due to its non-linear characteristic and other energy components due to the linear component of its characteristic, and subjecting a portion of the energy applied to said first mentioned translating device to the action of the translating device having the linear characteristic, the amount of energy so subjected being of such value as to produce translated energy equal in value to the components resulting from the linear action of said first translating device, and impressing the translated energy upon a transmission medium carrying said components resulting from the linear action of said first translating device but in opposite phase relation thereto.

1,574,780. MEANS FOR AND METHOD OF MODULATION. HERMAN A. AFFEL, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Oct. 5, 1921. Serial No. 505,530. 19 Claims. (Cl. 179—171.)

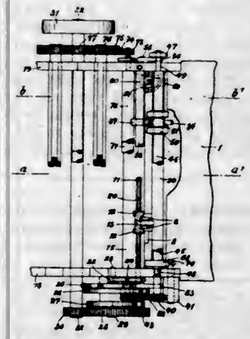
1. The method of varying the amplification of a vacuum tube amplifier which consists in producing a current whose amplitude is proportional to the envelope of the alternating input energy applied to the tube and in adjusting the static grid potential in accordance with the amplitude of the current so produced.

1,574,781. VOICE-OPERATED REPEATER SYSTEM. HENRY A. BARTON, Princeton, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Oct. 23, 1923. Serial No. 670,313. 8 Claims. (Cl. 179—170.)



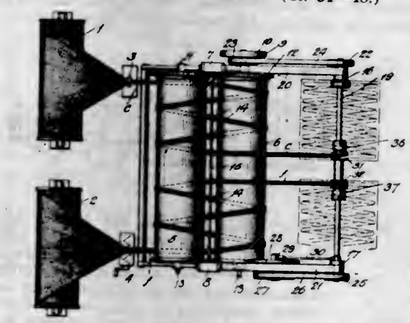
1. A repeater system comprising reversible repeaters at points along a transmission line, means associated with each repeater to reverse the direction of such repeater in response to an alternating control current, a terminal control station, and means at said control station responsive to voice currents to transmit an alternating control current to the reversible repeaters.

1,574,782. NONMAGNETIC STEEL. ERICH BECKER, Kladno, Czechoslovakia, assignor to Poldihütte, Praha-Vinohrady, Czechoslovakia, a Joint Stock Company. Filed May 25, 1925. Serial No. 32,830. 2 Claims. (Cl. 75—1.)



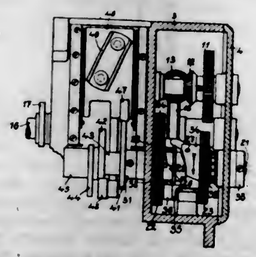
1. A non-magnetic steel having a high yield point and elongation in its normal condition, such steel containing from 6 to 15 per cent of manganese; from 17 to 4 per cent of nickel; and at least one metal having similar properties to chromium in appreciable quantity up to 10 per cent.

1,574,783. PROCESS AND DEVICE FOR REGENERATING WATER OF AQUARIA. EVERT WILLEM BETH, The Hague, Netherlands. Filed June 23, 1925. Serial No. 39,144. 3 Claims. (Cl. 119—5.)



1. A process for regenerating water of aquaria, whereby the water of the aquarium is conveyed by means of compressed air above the water level and is then allowed to flow back in the aquarium, characterized by the fact that the vitiated air with the carbonic acid and other gases on the one hand and the regenerated water on the other hand are expelled along separate ways, said regenerated water being spouted in the shape of a long and powerful jet through the air, without interposition of any other device, direct in the water of the aquarium.

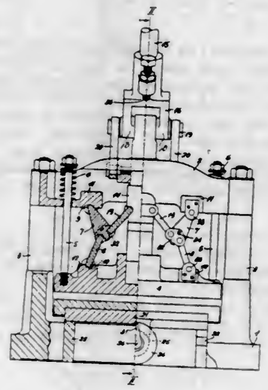
1,574,784. MECHANISM FOR THE MARGINING AND THE FEEDING OF SHEETS TO ROTARY MACHINES. HENRI BOBST, Lausanne, Switzerland, assignor to Etablissements Marinoni, Société Anonyme, Paris, France, a Corporation of France. Filed Feb. 29, 1924. Serial No. 696,015. 7 Claims. (Cl. 271—53.)



1. A mechanism for margining and feeding the sheets to rotary machines for working the paper, the cardboard and other sheet-material, comprising, in combination, margining members, a device for the introduction of margined sheets and presenting rotary feeding members between which the sheets are caused to pass in order to arrive at the margining members, at least one of said rotary members being adapted to become vertically adjusted with regard to the others, members for periodically operating the margining and the feeding members, these latter at least for the purpose of separating them one from the other in order to enable a sheet to arrive in front of the margining members and for stopping the rotation of the feeding members in such a manner that the sheet may be pinched during such a stoppage of rotation, a toothed sector to cause the rotation of one of the rotary members producing the advance of the sheet, a braking device provided for suspending the motion of this rotary member when the toothed sector which operates it is made to return, for the purpose of avoiding shocks in the working of the mechanism.

1,574,785. METHOD OF AND APPARATUS FOR TREATING YARN. JOHN BRANDWOOD and JOSEPH BRANDWOOD, Bury, England. Filed July 12, 1922. Serial No. 574,498. 11 Claims. (Cl. 34—48.)

11. An apparatus for the treatment of yarn comprising, in combination with a holder for a dye beam or the like, two power-driven, oppositely rotative drying cans adjacent said holder, a relatively narrow guide for the yarn in advance of said cans, a plurality of guides for the yarn disposed between the two cans at intervals along the length thereof, and means after said cans and driven in conjunction therewith for disposing of said dried yarn.

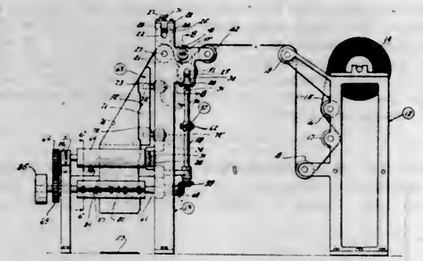


1,574,786. SPEED-CHANGING CAM-DRIVING MECHANISM. LORENZ KONRAD BRAREN, Munich, Germany, assignor to the Firm Friedrich Deckel, Fabrik für Präzisionsmechanik und Maschinenbau, Munich, Germany. Original application filed Nov. 28, 1922, Serial No. 603,871. Divided and this application filed June 4, 1924. Serial No. 717,713. 12 Claims. (Cl. 29—64.)

1. In combination a shaft rotating at a constant slow speed, a member rotating at a constant fast speed, a second rotating member in engagement during each revolution alternately with said slow speed shaft and said fast rotating member and controlling means for causing said second rotating member to complete each revolution in the same time as said slow speed shaft.

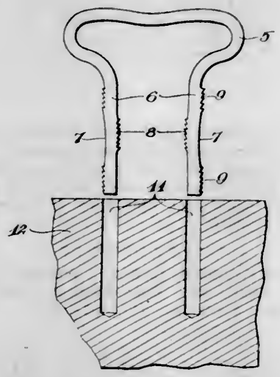
10. In turning and screw cutting machines a main cam shaft, a driving shaft, an auxiliary cam shaft being alternately driven by said cam shaft and said drive shaft and completing each revolution in the same period of time as the main cam shaft, cams for controlling the feeding movement of the material and the cut off operation being mounted on said auxiliary cam shaft and other cams mounted on and turning with said main cam shaft for controlling different operations necessary for completing a part.

1,574,787. HAND-OPERATED PRESS. WILLIAM HENRY BRECKNELL, Weston-Super-Mare, England. Filed June 25, 1925. Serial No. 39,630. 11 Claims. (Cl. 101—3.)



1. A hand operated toggle press comprising a frame, a presser member guided therein, a plunger guided in said frame and in said presser member, a hand lever, and toggle gear connecting said hand lever and said plunger, and toggle gear connecting said plunger and said presser member.

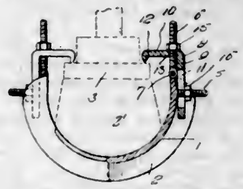
1,574,788. ICE-CREAM LADLE. WILLIAM H. BRUESKE, St. Louis, Mo. Filed Sept. 25, 1922. Serial No. 590,242. 3 Claims. (Cl. 107—48.)



1. A device of the character described, comprising a handle, a scoop rotatably mounted at one end of said handle, a driven shaft geared to said scoop to rotate the same and extending longitudinally of said handle, a driving shaft extending in said handle in alinement with the driven shaft, said handle having a chamber therein at the adjacent ends of said shafts, and clutch means in said chamber for connecting and disconnecting said shafts and provided with operating means projecting laterally from the handle.

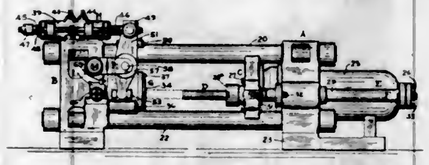
1,574,789. VERTICAL-FILE-FOLDER MACHINE. ROY H. BURGESS, Glen Ellyn, Ill., assignor of one-third to William R. Burgess, Glen Ellyn, Ill. Filed Dec. 2, 1924. Serial No. 753,425. 13 Claims. (Cl. 93—1.)

6. In a machine for producing vertical file folders, the combination with means for moving along an endless web of paper, of mechanism for producing die cut tops on said web comprising a die cutting roll contacting with said web and actuated thereby, a shaft, a knife mounted on the shaft and cooperating with said roll, said shaft being relatively adjustable with respect to said roll, and means for driving said shaft in synchronism to the travel of said web, substantially as described.



1,574,790. HANDLE. LEO F. CARROLL, Chicago, Ill. Filed Feb. 23, 1924. Serial No. 694,753. 1 Claim. (Cl. 16—125.)

A handle comprising an arch formed of resilient wire having the end portions thereof disposed in substantially parallel relation to form attaching shanks, the shank portions of said handle member being each provided with a single bowed portion intermediate the ends thereof and with straight portions on each of said bowed portions whereby to impart a spring tension to the shank when received in a socket larger than the diameter of said shanked portions, and socket engaging teeth formed at spaced points on said shanks.

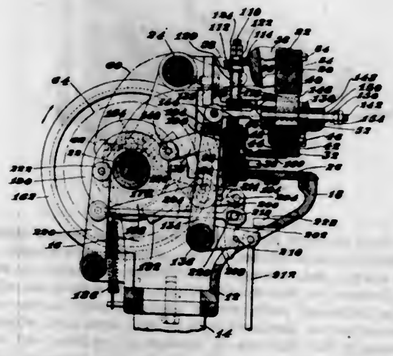


1,574,791. ANTISLIPPING ATTACHMENT FOR VEHICLE WHEELS. GEORGE W. CLARK, Larryville, Pa. Filed May 6, 1925. Serial No. 28,414. 1 Claim. (Cl. 152—14.)

A device of the class described including a body plate, studs extending laterally from the body plate, bolts pivoted to the ends of the body plate, and lugs each including a pair of rectangularly disposed portions, one

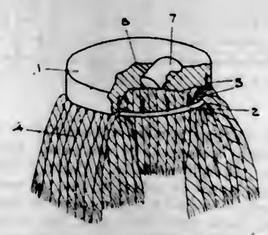
of which is provided with an aperture for receiving one of the bolts and the other with a slot for receiving one of the studs, and nuts on the bolts and studs.

1,574,792. METAL-EXTRUDING MACHINE. WALTER R. CLARK, Bridgeport, Conn., assignor to Bridgeport Brass Company, Bridgeport, Conn. Filed Feb. 25, 1921. Serial No. 447,666. 61 Claims. (Cl. 207—2.)



5. In a metal extruding machine, end frames, horizontal tie rods securing said frames together, a billet container supported and guided in the space between the rods for horizontal movement, and means for shifting the billet container into and out of abutment with one of said end frames, comprising a fluid pressure device mounted on top of said end frame and operatively connected by a lever to the billet container.

1,574,793. STABILIZER FOR SAFETY-RAZOR BLADES. HENRY B. COHEN, New York, N. Y., assignor to Razor Products Corporation, Long Island City, N. Y., a Corporation of New York. Filed Mar. 5, 1925. Serial No. 13,070. 6 Claims. (Cl. 30—12.)

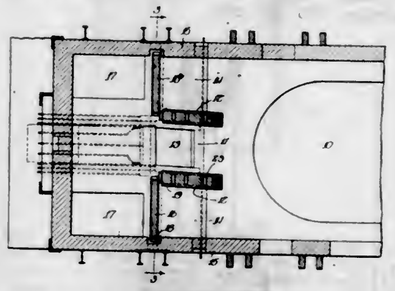


1. A blade stabilizing attachment for safety razors of the type employing a flexible blade clamped between a base and a cap; said attachment comprising spacing means constructed for interposition between the base of the razor and the blade to be mounted thereon, and to thereby elevate the blade upon the surface of the base; said spacing means having at its ends means for embracing the ends of the razor base to prevent displacement thereon.

1,574,794. MACHINE FOR SHAPING LIPPED SOLES. JOHN W. COSGROVE, Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 28, 1920. Serial No. 392,389. 22 Claims. (Cl. 12—22.)

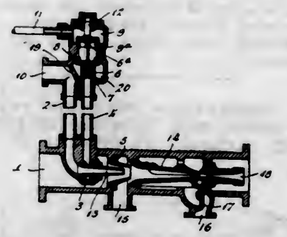
3. A machine for shaping soles, already provided with lips having, in combination, a support for the sole, a form for engaging the outer side of the lip and the adjacent portion of the feather of the sole, a second form for engaging the inner side of the lip, means for relatively actuating the support and the outer form in a direction perpendicular to said support to press the feather against the support and means for then relatively actuating the forms transversely of the support to shape the lip between the forms.

1,574,795. MOP. ALBERT HENRY CROLLY, Auckland, New Zealand. Filed Jan. 2, 1925. Serial No. 66. 1 Claim. (Cl. 152—29.)



As an article of manufacture, a mop comprising a head, an inverted channeled annulus, mop strands looped over the annulus and retaining means passing through the annulus and into the head for clamping the strands between the annulus and head.

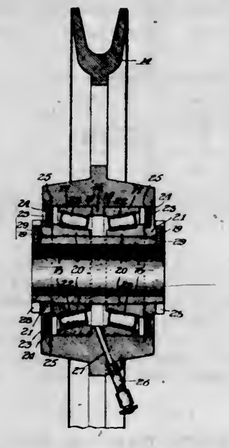
1,574,796. PROCESS FOR THE RAPID FIXING OF ETHYLENE BY MEANS OF SULPHURIC ACID FOR THE PURPOSE OF OBTAINING ETHYL SULPHURIC ESTERS. AUGUSTIN AMÉDÉE LOUIS JOSEPH DAMIENS, Arcueil-Cachan, MARIE CHARLES JOSEPH ELISÉE DE LOISY, Paris, France, and OLIVIER JOSEPH GISLAIN PIETTE, Brussels, Belgium. Filed Apr. 13, 1922. Serial No. 552,306. 4 Claims. (Cl. 260—98.)



1. A process for the rapid fixing of ethylene by sulphuric acid for the purpose of the industrial production of sulphuric esters $C_2H_5SO_4$ (ethyl sulphuric acid) and $(C_2H_5)_2SO_4$ (neutral ethyl sulphate), which consists: in adding to sulphuric acid of about 66° Baumé, as catalyzer, a cuprous compound containing copper in the monovalent state, in causing a gaseous current containing ethylene to pass through this acid, maintaining during the reaction a temperature of from 0° to 50° C.—separating the catalyzer from the acid, diluting the latter, and collecting, on the one hand the neutral ethyl sulphate which floats to the surface of the sulphuric acid and, on the other hand, the ethyl sulphuric acid which remains in solution in this acid.

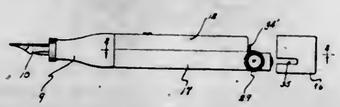
1,574,797. OPEN-HEARTH FURNACE. GEORGE L. DANFORTH, Jr., Chicago, Ill., assignor to Open Hearth Combustion Company, Chicago, Ill., a Corporation of Delaware. Filed July 5, 1924. Serial No. 724,362. 5 Claims. (Cl. 158—7.5.)

1. In an open hearth furnace, a centrally located gas uptake opening into the furnace end at a point in advance of the end wall, vertically extending longitudinal walls located adjacent the side of the gas uptake opening, dampers adapted to close the side ports formed between the longitudinal walls and the furnace side walls, and air uptakes opening into the furnace in the rear of the dampers.



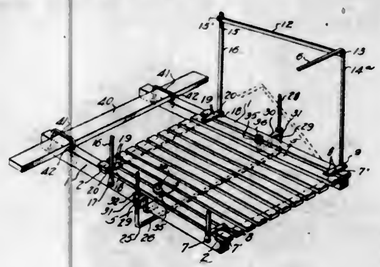
1,574,798. STEAM INJECTOR WITH AUTOMATIC SHIFTING VALVE. HANS DEUTSCH, Vienna, Austria. Filed Feb. 9, 1925, Serial No. 7,898. Renewed Nov. 19, 1925. 11 Claims. (Cl. 162—1.)

1. An apparatus of the class described, comprising a valve chamber and means for connecting said chamber with a part containing steam substantially under boiler pressure only when the engine is in operation, a valve located in said chamber and adapted to be urged toward its seat by such pressure, an inlet for high pressure steam, a nozzle in permanent communication with said inlet, an inlet for exhaust steam, a second nozzle in permanent communication with said exhaust inlet, a conduit for conveying high pressure steam coming from the high pressure steam inlet to said second nozzle, a second chamber the communication of which with the first named chamber is controlled by said valve, and a shifting valve having seating surfaces of different sizes, the larger seating surface controlling the communication of said second chamber with the high pressure steam inlet, while the smaller seating surface of said shifting



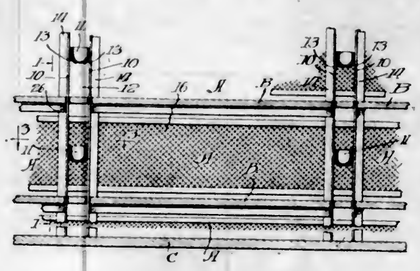
valve controls the communication of said high pressure steam inlet with the conduit leading to said second nozzle, whereby the shifting valve will be seated on its larger seating surface whenever the high pressure prevailing at the high pressure steam inlet exceeds by a predetermined amount, the pressure existing in the first mentioned valve chamber, thereby admitting high pressure steam to said second nozzle, whereas in the absence of such pressure difference the shifting valve will shut off high pressure steam from said second nozzle.

1,574,799. ROLLER-BEARING STRUCTURE. LOUIS E. DIERKS, Oak Park, Ill., assignor, by mesne assignments, to Sauerman Bros., Inc., Chicago, Ill., a Corporation of Illinois. Filed Jan. 17, 1924. Serial No. 686,792. 4 Claims. (Cl. 308—208.)



1. A pulley block comprising, in combination, a sleeve having threaded extremities, a pair of raceways mounted upon said sleeve, screw-threaded nuts coacting with the threaded extremities of the sleeve and having integral concentric flanges extending along the sleeve, and means extending through said flanges to lock the nuts and sleeve together.

1,574,800. COMBINATION FOUNTAIN PEN. CLYDE DUNCAN, Detroit, Mich. Filed May 23, 1925. Serial No. 32,427. 3 Claims. (Cl. 120—43.)

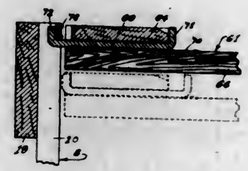


1. A combination fountain pen of the class described, comprising a neck having a passage formed therein; an ink reservoir mounted on said neck and communicating with said passage; a housing mounted on said neck; a roller mounted in said housing; an endless belt mounted on said roller and carrying on its outer surface printing symbols; gears mounted in said housing and adapted for effecting the movement of said belt, said gears being positioned adjacent an opening formed in said housing for projecting said printing symbols exteriorly of said housing individually; and an inking pad adapted for engaging said belt upon movement of said belt, an opening communicating said reservoir with said housing, said pad being inked from said reservoir through said opening.

1,574,801. WINDOW JACK. JOHN J. EDDINGTON, Utica, N. Y. Filed Aug. 3, 1925. Serial No. 47,740. 2 Claims. (Cl. 304—24.)

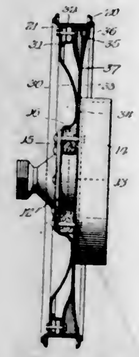
1. In a window jack, a platform having beams, clamps mounted on said beams, a bar disposed transversely to said beams and through said clamps, whereby to hold the platform to the window frame, a U-shaped standard having threaded ends, means engaging said beams and mounted on the threaded ends of said standard, whereby to support the platform in horizontal position, and said means being adjustable vertically on said threaded ends, and longitudinally relative to said beams.

1,574,802. POULTRY CAR. ISRAEL V. EDGERTON, Chicago, Ill. Filed Oct. 18, 1924. Serial No. 744,520. 3 Claims. (Cl. 119—12.)



1. A poultry car comprising a plurality of tiers of superimposed coops arranged in alignment and having open end walls, the end walls of adjoining tiers being fixed at distances apart to afford spaces to receive feed troughs and each comprising a plurality of spaced vertically disposed bars extending past the intermediate coops of the tier, and a plurality of feed troughs mounted in said spaces between the end walls of the coops.

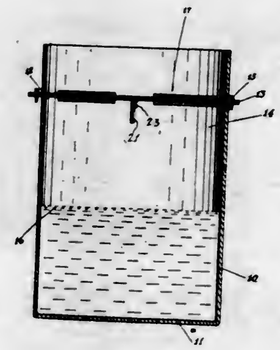
1,574,803. FRICTION GEAR. RICHARD ERBAN, Vienna, Austria. Filed June 21, 1924. Serial No. 721,541. 6 Claims. (Cl. 74—34.)



1. A friction gear including running surfaces, a plurality of rolling bodies for effecting the transmission of power between the running surfaces, a cage associated with the rolling bodies, and bearing cushions freely adjustable in the cage and engaging said rolling bodies, the transmission of the peripheral force from the rolling bodies to the cage taking place through said cushions.

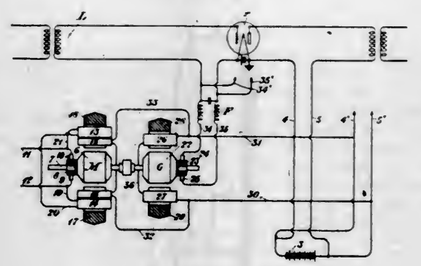
1,574,804. COLLAPSIBLE CARRIER. CORNELL FLAGSTAD, Minneapolis, Minn., assignor of ninety-five one-hundredths to The Folding Crate and Box Company, Minneapolis, Minn., a Corporation. Filed Jan. 5, 1925. Serial No. 589. 11 Claims. (Cl. 217—47.)

1. A crate having side and end sections, a cover for closing the crate and adapted to rest with its ends on opposite of said sections, said cover consisting of longitudinal and transverse slats all of which are rigidly connected and being arranged between the upper ends of the other of said sections, and locking devices slidably arranged on the cover for engagement with said other sections for locking the cover in place, said locking devices being movable only when the cover is depressed at a point intermediate its ends.



1,574,805. DISK WHEEL. GEORGE H. FORSYTH, Chicago, Ill., assignor to Motor Wheel Corporation, Lansing, Mich., a Corporation of Michigan. Filed May 4, 1922. Serial No. 558,495. 2 Claims. (Cl. 301—63.)

1. In a wheel of the class described, a main supporting front disk and a secondary reinforcing rear disk, the two disks aligned together in the region immediately outside of the hub zone, and the secondary or reinforcing disk having stiffening relatively short corrugations disposed annularly at intervals between the hub and rim.

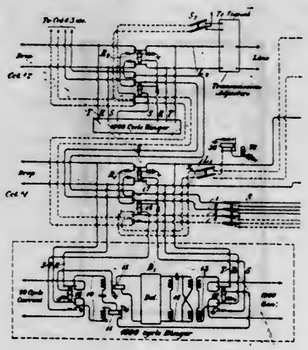


1,574,806. ANIMAL TRAP. ALBERT FRIESENHAHN, Bracken, Tex. Filed Feb. 25, 1925. Serial No. 11,396. 1 Claim. (Cl. 43—70.)

A trap comprising a cylinder having a bottom thereon and adapted to be partly filled with liquid, an annular disk in said cylinder, a rod supporting said disk, a stem slidable beneath said disk, a lug on said cylinder, said stem being adapted to engage the lug to lock the disk in horizontal position, said lug having a recess therein adapted to receive the end of said stem, a bell crank pivotally connected to said stem, said bell crank when lifted being adapted to release the stem from the recess to permit rotation of the disk, said bell crank comprising an obtuse angled lever having a bifurcated end, a bracket mounted on the underside of said disk and adapted to

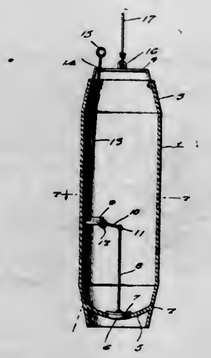
pivotally support said lever, and bait adapted to be pinched in the bifurcated end of said bell crank, said disk having an opening above the bifurcated end of the bell crank to permit visibility of the bait.

1,574,807. MEANS FOR REGULATING VOLTAGES. DANFORTH K. GANNETT, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 21, 1923. Serial No. 664,065. 5 Claims. (Cl. 179—111.)



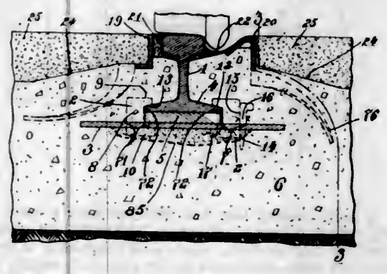
1. A vacuum tube having grid and plate circuits, a source for supplying potential to said plate circuit, a motor generator set for supplying potential to said grid circuit, means for connecting said motor generator set with said source, and means in said motor generator set responsive to the variations in potential of said source for controlling the output potential of said motor generator set.

1,574,808. REGULATION OF TRANSMISSION. DANFORTH K. GANNETT, Jackson Heights, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Nov. 24, 1923. Serial No. 676,836. 23 Claims. (Cl. 178—44.)



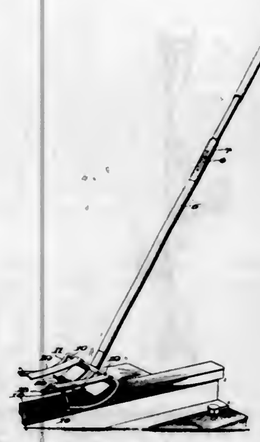
1. In a signaling system, a plurality of transmission lines, a transmission responsive device common to said lines and responsive to changes in the transmission

equivalent of a line when connected thereto, means to connect said device with any one of said lines and means associated with said transmission responsive device for



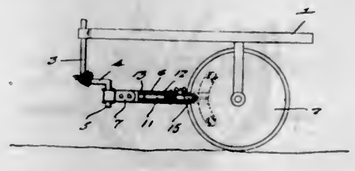
producing an indication in response to an abnormal transmission condition of a line to which the transmission responsive device is connected.

1,574,809. WELL BUCKET. JOHN R. GILBREATH, Stillwell, Okla. Filed Apr. 8, 1925. Serial No. 21,620. 1 Claim. (Cl. 294—69.)



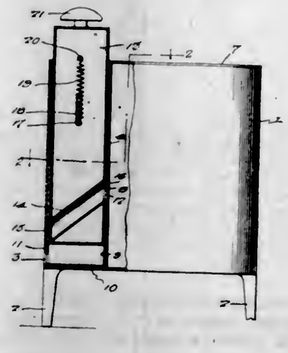
In a well bucket, a body having a bottom and a central discharge opening therein, a flanged valve movable downwardly into and adapted to control said opening and rest on said bottom and having an upstanding central stem, a curvilinear bracket spaced from the wall of the bucket body and having its ends affixed to said wall and also having an aperture at its middle, a guide carried at the top of the bucket body, a rod movable vertically in said guide, and a lever having arms connected to the valve stem and said rod, respectively, and also having an intermediate coil extending through the aperture in said bracket, whereby the lever and the bracket are connected of themselves and the lever is enabled to swing vertically on a portion of the bracket as a fulcrum.

1,574,810. PAVED RAILWAY STRUCTURE AND METHOD. WILLIAM S. GODWIN, Baltimore, Md. Filed Jan. 15, 1924. Serial No. 686,275. 36 Claims. (Cl. 238—9.)



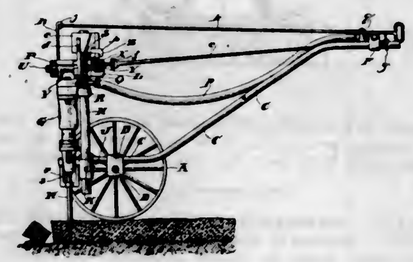
1. A railway structure comprising rails, continuous longitudinal supporting plates beneath each rail, means securing the rails to the plates, and a concrete bed in which the supporting plate and rails are embedded.

1,574,811. TORPEDO APPLICATOR. GEORGE P. GONYER, Boston, Mass. Filed Nov. 19, 1925. Serial No. 70,141. 4 Claims. (Cl. 246—216.)



3. A torpedo adjuster comprising a handle, a transversely extending head connected to the handle and having forwardly directed longitudinally curved inner and outer arms, the upper sides of which are provided near the terminals thereof with sockets for the reception of the terminals of a plurality of railway torpedoes, a plurality of leaf springs secured to the upper side of said head and adapted to flatly engage the upper sides of a plurality of torpedoes to hold the springs thereof in said sockets, and a plurality of longitudinally curved leaf springs secured to the under side of said head and underlying said first-named springs to avoid the premature release of the torpedoes and to promptly urge said head to elevated position upon the release of a torpedo, said second-named springs terminating short of the first-named springs.

1,574,812. DISK SHARPENER. JOHN M. GREEN and ABE THOMAS, San Benito, Tex. Filed Feb. 2, 1925. Serial No. 6,315. 4 Claims. (Cl. 97—221.)



1. A disk sharpener comprising an arm pivotally supported at one end to the beam of an agricultural implement, guide rollers supported on the opposite end of the arm and engaging the face of a disk supported by said beam, a block secured on the arm and extending laterally therefrom, a sharpener, a substantially U-shaped member, the free ends of the arms thereof being pivotally secured on said block, means for securing a sharpener in the closed end of the member, and means associated with said arm and said member for holding the sharpener in engagement with the cutting edge of the disk.

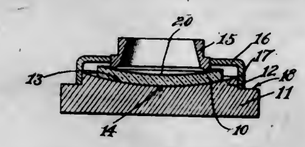
1,574,813. SUGAR-DISPENSING DEVICE. CARL HAFNER, Rock Springs, Wyo. Filed Apr. 28, 1924. Serial No. 709,526. 1 Claim. (Cl. 221—104.)

A sugar dispenser comprising a casing provided at its side and in the vicinity of its bottom with an opening, a partition wall located within the casing and dividing the interior thereof into compartments, said partition wall being provided at a point spaced above the bottom of the casing with an opening, the said openings being located opposite each other but at different altitudes with relation to the bottom of the casing, a tubular member housed within one of the compartments in the casing and of a size to fit snugly between the partition and the wall of the casing, said tube having diametrically opposite openings which register with the openings in the partition wall and in the casing, a pin carried by the tubular member, a cylindrical plunger slidably received in the tubular member and provided with a slot which receives said pin, a spring connected at one end with the pin and at its other end with the plunger and housed within the plunger, the plunger being provided at its opposite side with openings adapted to register alternately with the openings in the tubular member, the partition wall and the casing and a tube located within the plunger and disposed in an inclined position and communicating at its opposite ends with the openings in the plunger.

1,574,814. MOUNTING FOR CONCRETE BREAKERS. CHARLES C. HANSEN, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 10, 1925. Serial No. 42,643. 10 Claims. (Cl. 262—13.)

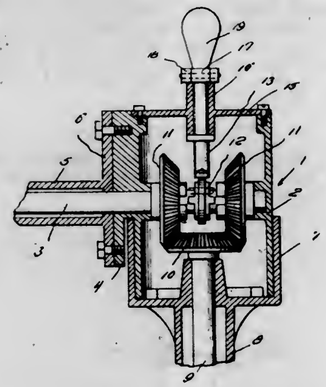
1. A concrete breaker comprising a pair of wheels, an axle for the wheels, handle bars supported by the axle, posts secured to the handle bars, a yoke mounted on said posts, a fluid actuated percussive tool secured pivotally to said yoke, and a working implement to receive the hammer blows of the tool.

1,574,815. HANDLE-SECURING DEVICE. HARRY HARVEY, San Benito, Tex. Filed Oct. 25, 1923. Serial No. 670,675. 2 Claims. (Cl. 306—35.)



1. In a device of the class described, the combination with a tool head having a tapering socket, the one end of said socket being flush with the one face of the tool and a handle member having an enlarged tapering end adapted to fit within the tapering socket to permit the extreme end to extend a short distance beyond the last mentioned end of said socket; of means for removably securing the handle to the tool head comprising an elongated plate applied to the flat end of the extended portion of the tapered end of said handle in spaced relation to the tool head, the ends of said plate projecting beyond the periphery of said end of the handle and provided with apertures, a ring member applied to the handle and abutting the opposite end of the socket on the tool head, said ring member being provided with diametrically opposed ears having apertures therein adapted for registration with the apertures in said plate, tie bolts extending through the registering openings of said plate and ring having the heads thereof in abutment with the outer face of said plate and the threaded ends extended beyond the apertures in said ring, and nuts engaged with the threaded ends of said bolts and adapted to contact with the one face of said ears on the ring to secure the elements together, as and for the purposes described.

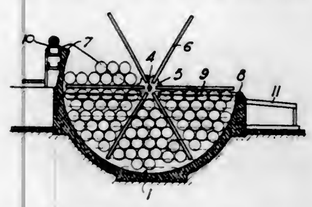
1,574,816. LENS-BLOCK-CENTERING JIG. HARRY W. HILL, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed May 12, 1924. Serial No. 712,738. 4 Claims. (Cl. 51—277.)



1. A device for centering a lens block on a lens to be blocked, comprising a base support having a lens seat

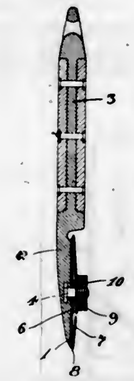
and a portion adapted to hold a lens block positioning member; a lens block positioning member held by the

support and projecting therebeyond, and having an opening beyond the lens seat of the same contour as the lens block which it is adapted to position over the lens seat.



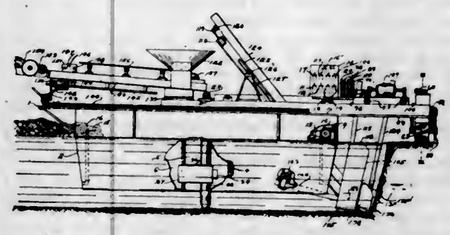
1,574,817. WRINGER MOUNTING AND CONTROL DEVICE. EDWARD R. HODGMAN, Dwight, Ill. Filed Mar. 19, 1925. Serial No. 16,718. 2 Claims. (Cl. 74—101.)

1. In a structure of the class described, a relatively stationary support having a cup at its top, a vertical shaft provided with a pinion located in said cup, a cylinder rotatably mounted in said cup, said cup being provided with circumferentially spaced segments spaced apart to provide a plurality of keeper seats, a driven shaft journaled in a bearing in said cylinder, gears on said shaft cooperable with said pinion, and a clutch for connecting said gears with the driven shaft, an oscillatory member for operating said clutch, said member being carried by said cylinder, a horizontal handle for said operating member, a spring pressed latch bolt carried by said cylinder, and having its lower end normally positioned in one of said seats, means for lifting said bolt to disengage it from said seat, said means comprising a pivotally mounted lever, and a reciprocatory member, said reciprocatory member being adapted to be depressed by said handle when it is in a position to dispose said clutch in neutral condition.



1,574,818. BASIN FOR SOFTENING OR COOKING IN WATER OR OTHER LIQUID STOCKS PREPARATORY TO THE MANUFACTURE OF VENEER, MECHANICAL PULP, OR THE LIKE THEREOF. AXEL EMANUEL HOLMBERG, Ljusne, Sweden, assignor to Ljusne-Woxna Aktiebolag, Ljusne, Sweden, a Corporation of Sweden. Filed June 1, 1925. Serial No. 34,093. 1 Claim. (Cl. 92—7.)

The combination of a basin of the kind set forth having an approximately semicylindrical bottom surface and a freely rotatable wing or shovel wheel journalled in said basin the shaft of said wheel substantially coinciding with the axis of the curved bottom surface of the basin, and the radial length of the wings or shovels of said wheel being such as to prevent the stocks from passing

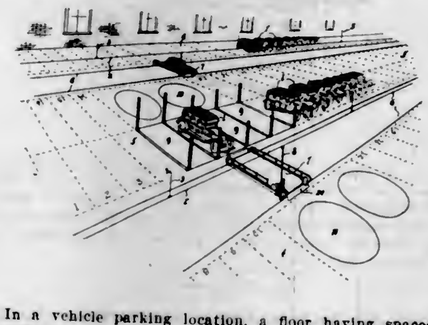


between the bottom surface of the basin and the free ends of the wings of said wheel, substantially as and for the purpose set forth.

1,574,819. SKINNING TOOL. HUBERT JEZLER, Zurich, Switzerland, assignor to Carl Klaiber and Emil Hahnloser, both of Zurich, Switzerland. Filed Apr. 7, 1925. Serial No. 21,272. 9 Claims. (Cl. 17—21.)

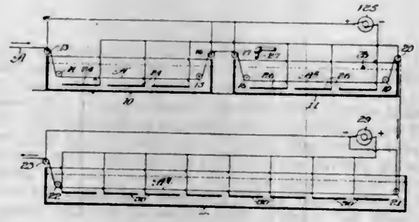
1. A skinning tool including a support, a circular knife non-rotatably secured to said support, and a rotatable protecting member coaxial with said knife.

1,574,820. EXCAVATOR. WILLIAM W. JONES, Toledo, Ohio. Filed Feb. 9, 1922. Serial No. 535,356. 25 Claims. (Cl. 37—88.)



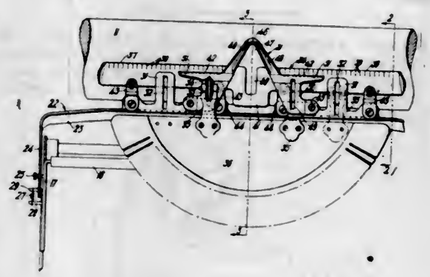
1. A support, an endless conveyor provided with flights, a frame for the conveyor carried by the support and projecting therebelow into position for working, and shield providing means for holding the frame downward away from the support and into the position for working.

1,574,821. APPARATUS FOR THE MANUFACTURE OF BUTTER. STEPHAN KARPINSKY, Sevres, and JAMES STEWART ANDERSON, St.-Ouen, France. Filed Apr. 2, 1924. Serial No. 703,818. 4 Claims. (Cl. 99—2.)



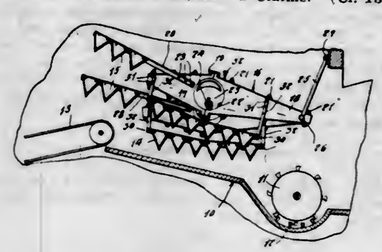
4. The combination of a tube, a rod in the said tube, leaving between them a very narrow annular space, and means for forcing through this space cream charged with air for the purpose of transforming the same into butter.

1,574,822. TROLLEY PARKING GARAGE FOR MOTOR VEHICLES. FREDERICK J. KOCH, Dallas, Tex. Filed June 15, 1925. Serial No. 37,406. 1 Claim. (Cl. 214—16.)



In a vehicle parking location, a floor having spaced parallel track ways, a transfer truck for each of said ways, parking spaces arranged longitudinally of areas between the track ways, elevators arranged at certain points in said areas to transfer vehicles from and to the floor, turntables disposed at opposite sides of the elevators to receive the cars, one of said track ways being positioned between the elevators and the turn tables at one side of the elevators.

1,574,823. METHOD OF AND APPARATUS FOR TREATING METAL. WILLIAM C. KRONQUEST, Chicago, Ill., assignor to Acme Steel Company, Chicago, Ill., a Corporation of Illinois. Filed May 27, 1925. Serial No. 33,149. 11 Claims. (Cl. 204—11.)



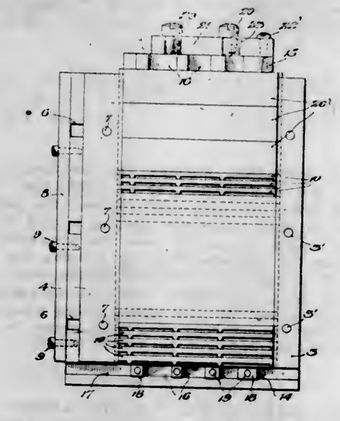
1. The method of pickling metal consisting of immersing the metal in a solution of acid and water, and passing an electric current through said metal while so immersed, the metal forming the anode plate of an electrolytic cell thereby decreasing the amount of hydrogen adsorbed thereby the cathode being a material which does not combine chemically with said acid under ordinary conditions.

1,574,824. TYPEWRITING MACHINE. ALFRED G. F. KUROWSKI, Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 4, 1924. Serial No. 696,748. 10 Claims. (Cl. 197—135.)

1. In a typewriting machine, the combination with a platen and a wing-scale, of a card-holding device associated with the wing-scale adjacent the printing field and including means for engaging a card to hold the same against the platen above the wing-scale, and means engaging the wing-scale for pressing the same toward the platen, said last-named means being interchangeable from engagement with the wing-scale to engagement against the card-holding device whereby to press directly against said card-holding device, to move the same and the wing-scale toward the platen.

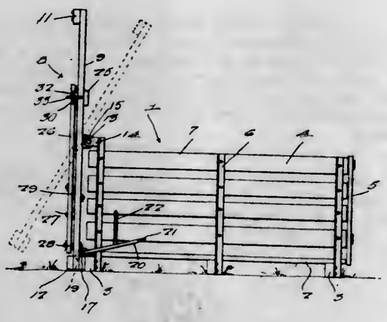
1,574,825. SELF-FEEDER FOR THRASHING MACHINES. MARTIN LEACH, Bozeman, Mont. Filed Apr. 16, 1925. Serial No. 23,661. 2 Claims. (Cl. 130—1.)

1. A thrashing machine having a feeder knife, an arm comprising sections carrying said knife, said sections being relatively wide at and abutting each other at adjacent ends, on a line transverse to the longitudinal axis of the arm, said ends being cut away to form an annular opening, and a drive eccentric for the arm occupying said opening.



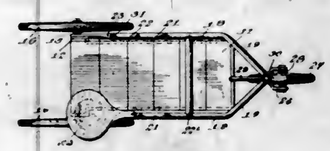
1,574,826. FINGER RING. LOUIS LEHR, Brighton Heights, N. Y., assignor to Simon Bruner, Far Rockaway, N. Y. Filed May 15, 1925. Serial No. 30,437. 5 Claims. (Cl. 63—29.)

2. A finger ring having a mount, a stone having an aperture, said stone being secured in said mount, an initial member comprising an initial and a stem integral



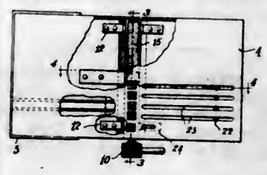
with said initial, said stem being provided with notches and disposed in said aperture, a resilient crosspiece integral with said mount, a member embracing said crosspiece and slidable thereon to engage with said notches to hold said initial in a given relation to said stone.

1,574,827. LOCKUP GALLEY OR CHASE. ISAAC W. LITCHFIELD, Newtonville, Mass., assignor to Litchfield Linoplate Co., Boston, Mass., a Corporation of Massachusetts. Filed July 24, 1920. Serial No. 398,646. 23 Claims. (Cl. 90—59.)



1. Means for securely holding a plate, or a plurality of type bars in plate formation, comprising a lock-up galley or chase having sides of reduced height and provided with means for interlocking with shoulders adjacent the type faces on the ends of said type bars or the sides of said plate and together with the ends of said galley or chase positively preventing displacement of said plate or bars in all directions.

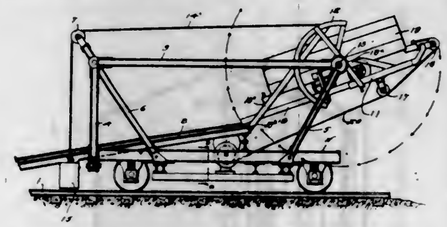
1,574,828. HOG TRAP. JOSEPH CLAUD LUCAS, Blandinsville, Ill. Filed Aug. 10, 1925. Serial No. 49,348. 3 Claims. (Cl. 119—99.)



3. A hog trap comprising a pen open at its forward end, an upwardly swinging head stock pivotally supported at the top of the forward end of the pen, means for holding the head stock in a closed position, said head stock comprising a frame, a pair of coacting clamping jaws pivotally supported at their upper ends on the frame, a lever pivotally supported adjacent its lower end on the frame, a crank connecting the lower end of the lever with the lower end of one of said clamping jaws, and additional cranks connecting the intermediate portion of the other clamping jaw with the intermediate portion of said lever whereby said clamping jaws are adapted for simultaneous operation when the lever is actuated, and means for actuating said lever, said means comprising an operating member pivotally connected at one end to the upper end of the lever, said operating member extending transversely across the front of the frame, and a handle provided on the free end of the actuating member.

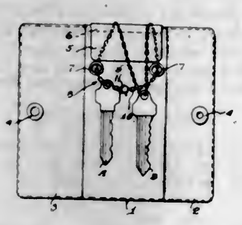
1,574,829. CHILD'S VEHICLE. MARMADUKE C. LYSTAD, Chicago, Ill. Filed Apr. 30, 1925. Serial No. 26,999. 4 Claims. (Cl. 208—165.)

1. A vehicle of the character described including a body, a lower frame supporting said body, wheels supporting said frame, an upper frame disposed in superposed relation to said lower frame and including a pair of parallel side members, and a seat attachable to either of said members.



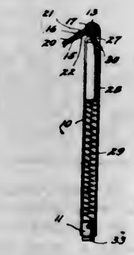
1,574,830. POCKET CHECK PROTECTOR. CHARLES C. MCCOMAS, Sherman, Tex., assignor of one-third to W. R. Duffey, Fort Worth, Tex., and one-third to John D. Killough, Stephenville, Tex. Filed Apr. 20, 1925. Serial No. 24,432. 3 Claims. (Cl. 101—20.)

1. A check protector of the character described comprising a casing having a slot therein dividing the casing into an upper and lower section, an inking pad arranged within and extending transversely of said lower section, a plurality of printing and perforating trays arranged within said upper section, one of said trays extending parallel with said inking pad, the other of said trays being slidably mounted transversely to and adapted to extend over said inking pad, and means for moving said pad towards that portion of the tray extending thereover.



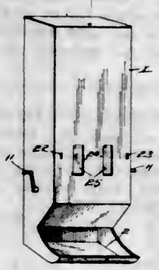
1,574,831. PORTABLE UNLOADING MACHINE. WILLIAM E. S. MCCORMICK, Rush Run, W. Va. Filed Apr. 4, 1924. Serial No. 704,187. 3 Claims. (Cl. 214—104.)

1. In combination with a dumping tipple for unloading cars and the like, and having an inclined runway leading thereto, an angular cross beam secured to the end of the tipple and adapted to rest on the end of said runway, a grooved segment secured to said tipple.



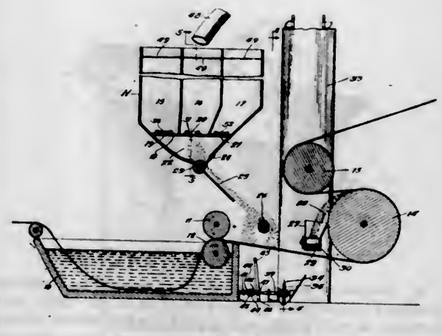
a counterweight, a flexible member connecting said segment and counterweight, and a beam secured to said segment and engaging the angular cross beam aforesaid.

1,574,832. KEY RETAINER. REX DE ORE MCDILL, Cienfuegos, Cuba. Filed Mar. 27, 1925. Serial No. 18,863. 1 Claim. (Cl. 150—40.)



In a key retainer, the combination of a flexible folder comprising a back and foldable flaps, a snap fastener on the flaps, apertures in the back spaced apart from each other, a chain passing through the apertures and having one loop thereof inside the back and another loop on the outside of the back, a chain of sufficient length to permit of the outside loop being swung over the edge of the folder and inside thereof, and a metal guard strip having a portion thereof over the edge of the back on which the outside loop of the chain will rest when swung inside the folder.

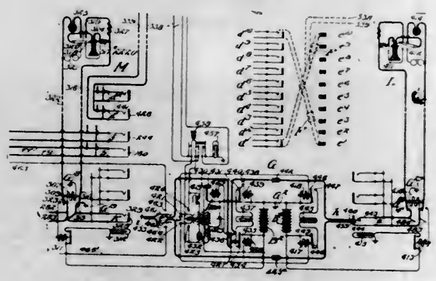
1,574,833. SAFETY RAZOR. ROBERT W. MCGARVEY, Philadelphia, Pa. Filed May 20, 1922. Serial No. 562,487. 12 Claims. (Cl. 30—12.)



12. A safety razor, comprising in combination, a handle, a fixed guard, a blade holder mounted to swing in relation to said guard, a blade in said holder, and means associated with said handle to positively adjust the angular relation of said guard and blade toward and from each other.

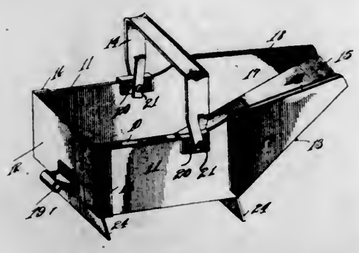
1,574,834. INDIVIDUAL TOWEL AND SOAP VENDING MACHINE. DAVID R. MACGREGOR, Rochester, Minn. Filed July 23, 1924. Serial No. 727,740. 1 Claim. (Cl. 211—8.)

In a vending machine of the class described, a casing which is substantially rectangular in cross section and has its bottom fashioned to receive the article to be dispensed, an article containing compartment disposed centrally in said casing, said compartment being of a cross sectional area to snugly confine said article, being open at its bottom, having inturned supporting ledges at its bottom and having its front wall spaced from the corresponding wall of the casing a distance less than the cross sectional area of said compartment so that the lowermost article will be forced against the front wall of the casing and temporarily suspended during the period of ejection, and an ejecting member mounted for oscillation in the casing in a position to swing through the open bottom of the chamber, said member being of right angular form and being limited in its swinging movement by said temporarily suspended article.



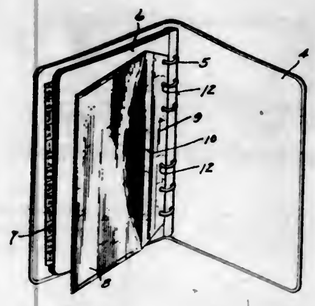
1,574,835. MEANS FOR COATING ROOFING AND OTHER SIMILAR MATERIALS FOR COVERING BUILDING SURFACES. ROBERT MACLEAN, Chicago, Ill., assignor to Amalgamated Roofing Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 23, 1924. Serial No. 733,773. 10 Claims. (Cl. 91—43.)

1. A machine for coating roofing with surfacing materials comprising means for drawing a paper strip through said machine, a hopper comprising a plurality of different compartments for holding surfacing materials of different colors, and an equalizing chamber located beneath and communicating with said compartments, said equalizing chamber being provided with a



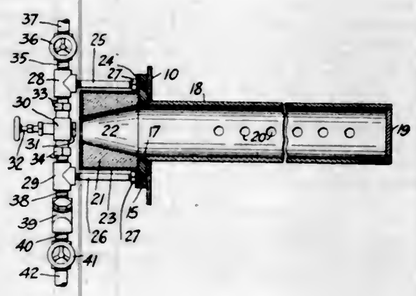
controllable outlet for discharging the surfacing materials upon said strip, means for controlling the passage of surfacing materials from said compartments to said equalizing chamber, a conveyor having an adjustable discharge for supplying surfacing material to any one of said compartments, a second conveyor for receiving the excess surfacing materials fed to said strip, said second conveyor discharging into said first named conveyor, and means for reversing the direction of movement of said second conveyor.

1,574,836. TELEPHONE-EXCHANGE SYSTEM. TALBOT G. MARTIN, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., a Corporation of Delaware. Filed Oct. 20, 1906. Serial No. 339,833. Renewed Aug. 26, 1916. Serial No. 117,067. 100 Claims. (Cl. 179—27.)



1. In a telephone exchange system, the combination of a subscriber's line, trunk lines, an automatic trunk-selecting switch, means by which said switch is controlled over the line, a spring jack alloted to said line, an operator's connecting cord provided with a plug adapted for insertion in said jack, a subscriber's telephone, and a centralized source of talking current connected for supplying current over the subscriber's line to charge said telephone.

1,574,837. RECEPTACLE. JOHN B. MASERANG, Belleville, Ill. Filed Aug. 17, 1925. Serial No. 50,744. 1 Claim. (Cl. 220—94.)

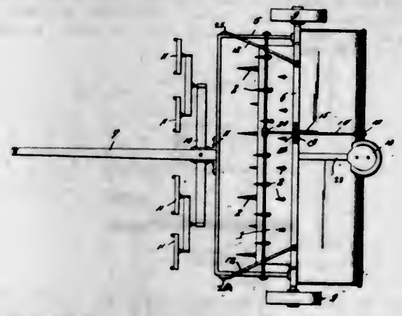


A receptacle including vertical side walls, channel members secured in straddling relation to the upper edge portions of said walls, and a yoke shaped handle having its ends bifurcated and said bifurcations being disposed in straddling relation to said channel members and twisted whereby to aline their terminals with respect to a line transversely of the receptacle, and pivot members disposed through the walls, the channel members, and the furcations, whereby said bifurcations will have wedging action with the channel members to prevent the handle falling to any great distance in either direction.

1,574,838. LOOSE POCKET FOR LOOSE-LEAF BOOKS. LEWIS S. MOORE, Minneapolis, Minn. Filed Oct. 5, 1923. Serial No. 666,693. 3 Claims. (Cl. 129—20.)

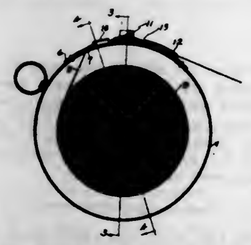
1. A loose pocket for a loose leaf book having an attaching flap with a normally straight flat spring metallic reinforcing strip imbedded therein near the opening in said pocket, said flap and strip having eyes formed therein, and a hinge joint between the attaching flap and pocket.

1,574,839. OIL-BURNING UNIT. ALBERT W. MORSE, Long Island City, N. Y. Filed Mar. 3, 1923. Serial No. 622,707. 8 Claims. (Cl. 158—1.)



1. In an oil burning unit for low temperature ovens, an oil burner, a combustion chamber, and a heat diffusing tube, in continuation of the said chamber, projecting into the oven, said tube being provided with perforations of relatively large size and being closed at one end.

1,574,840. ALFALFA CULTIVATOR. LOID E. MURPHREE, Chandler, Ariz. Filed June 13, 1923. Serial No. 645,071. 1 Claim. (Cl. 55—24.)



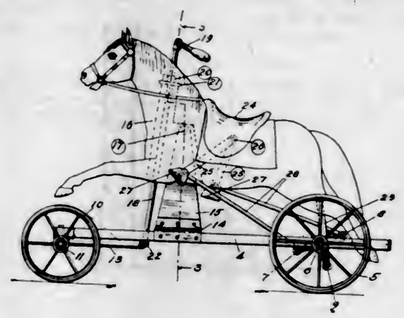
A cultivator comprising a wheel mounted axle, the axle having an arched intermediate portion, forwardly and downwardly disposed braces mounted upon the arched portion of the axle, a frame including a draft tongue pivotally connected with the forward lower ends of the braces, said frame having a rear end portion which is disposed under the arch of the axle, a drum journaled for rotation at the rear end portion of the frame and

provided with radially disposed spikes, a lever fulcrumed upon the arched portion of the axle and a link rod pivot-

ally connected at one end with the working end of the lever and pivotally connected at its other end with the frame at a point in advance of the axis of the drum.

1,574,841. WAITER'S PUNCH. ROY A. MYERS, St. Paul, Minn. Filed Nov. 12, 1923. Serial No. 674,324. 3 Claims. (Cl. 164—86.)

1. In a check punch the combination of a container adapted to carry therein a ribbon of checks in a roll, means for leading said ribbon from said container, and straightening means for taking the roll out of the ribbon as it is led from said container and means carried by said container for notching said checks.



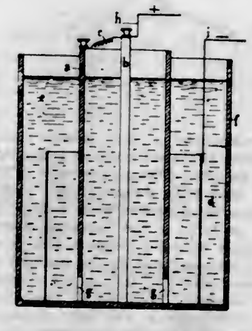
1,574,842. PLASTIC COMPOSITION MATERIAL AND METHOD OF PRODUCING THE SAME. CLARENCE A. NASH, Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed July 13, 1922. Serial No. 574,790. 14 Claims. (Cl. 18—55.)

8. The process of producing hardened shapes, which comprises incorporating in a resinous product of incomplete condensation of a phenolic body and methylene substance, a quantity of stearine pitch and a lesser quantity of sulphur to produce a binder, impregnating a relatively inert filler material with such binder, forming the material under pressure and also heat curing the material to promote hardening of the stearine pitch with the sulphur and to complete the condensation reaction.

9. A binder for plastic composition material, comprising a resinous product of incomplete condensation reaction between substantially equal numbers of phenolic and methylene groups, having incorporated therein substantially one-tenth part by weight of stearine pitch.

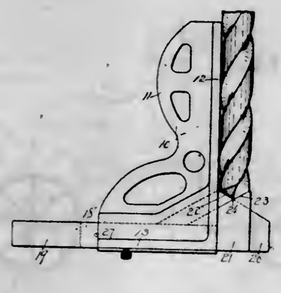
1,574,843. VELOCIPEDE. JOSEPH A. NOWAK and WILLIAM C. JOHNSON, Minneapolis, Minn. Filed Jan. 24, 1925, Serial No. 4,385. Renewed Jan. 6, 1926. 3 Claims. (Cl. 208—42.)

1. A velocipede consisting of a frame having front steering wheels and rear drive wheels, an animal figure tiltably mounted upon the frame and having a saddle for a rider, stirrup members pivotally secured to the figure and arranged to be operated by a rider in said saddle,



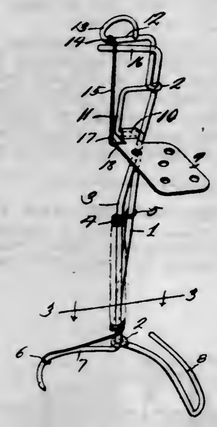
operative connection between said stirrup members and the drive wheels, and means for controlling the steering wheels, said means including handle members carried by the figure so as to tilt with it.

1,574,844. PROCESS FOR PROTECTING GAS-ABSORBING SUBSTANCES FROM PENETRATION BY LIQUID. RENÉ OPPENHEIM, Levallois-Perret, France, assignor to Societe Anonyme le Carbone, Levallois-Perret, Seine, France. Filed Apr. 26, 1923. Serial No. 634,857. 4 Claims. (Cl. 136—80.)



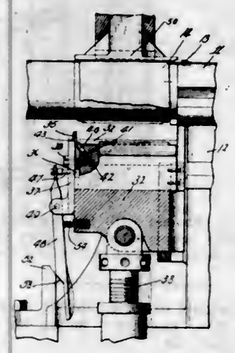
1. A process for protecting gas absorbing substances against liquid penetration and particularly the porous substances of batteries and electrolyzers consisting in covering the porous bodies with a pectized colloid in the form of a sheet, such for example as cellophane, such pectized colloid sheet having the two-fold property of being impenetrable to liquids and permitting the passage of gases.

1,574,845. ELECTRIC BATTERY. RENÉ OPPENHEIM, Levallois-Perret, France, assignor to Societe Anonyme Le Carbone, Levallois-Perret, Seine, France. Filed Sept. 6, 1924. Serial No. 736,363. 7 Claims. (Cl. 136—136.)



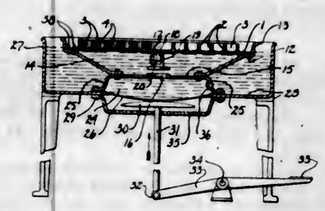
1. A positive electrode for electric batteries formed of a porous conductor substance, of tubular shape, the outer and inner surfaces being intended to be in contact with the electrolyte, said porous substance being rendered impermeable to liquid while remaining permeable to gases, so as to perform the function of a dialyzer.

1,574,846. TOOLMAKER'S GAUGE. NEHEMIAH W. ORDWAY, Hartford, Conn. Filed Nov. 28, 1924. Serial No. 752,616. 6 Claims. (Cl. 33—201.)



1. A stock having a straight edge with a slot extending thereinto with its lengthwise dimension at right angles to such edge, and two blades fitting said slot and extending lengthwise therein and having cooperating tapered edges.

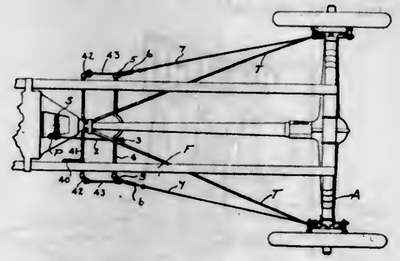
1,574,847. GOPHER TRAP. ALBERT M. PALMER, Sr., and ALBERT M. PALMER, Jr., Logan, Iowa. Filed July 2, 1925. Serial No. 41,071. 3 Claims. (Cl. 43—91.)



1. A trap comprising a body member having spaced eyes, an angularly U-shaped gripping arm carried by said body member, an offset U-shaped member carried by said body member, said body member, eyes, arm and offset U-shaped member being formed from a single piece of rod material bent to form, a rod rockably mounted in the eyes, an angularly disposed gripping arm carried by the rod, a coiled spring surrounding the rod and anchored to the body member and the last named gripping arm, a tripping plate hingedly connected to the offset U-shaped member at a right angle to the body member, said body member being provided with an angularly disposed arm in substantially the same plane as the offset U-shaped member, said rod being provided with an angularly disposed arm, a latching member carried by the angularly disposed portion of the body member and adapted to engage across the arm of the rod and a shoulder carried by the pivoted tripping plate with which the pivoted arm is adapted to engage.

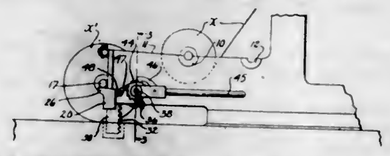
1,574,848. REGISTERING DEVICE FOR CAN-BODY MAKERS. CARL FREDERICK PECK, Fairport, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 21, 1922, Serial No. 595,902. Renewed July 20, 1925. 9 Claims. (Cl. 113—12.)

1. In a machine for making can bodies, a horn upon which the bodies are formed, a seam closing hammer, means associated with the hammer for causing registration of the body blank edges prior to the action of the hammer, and means for holding said last-mentioned means out of the path of the can body during initial retracting movement of the hammer.



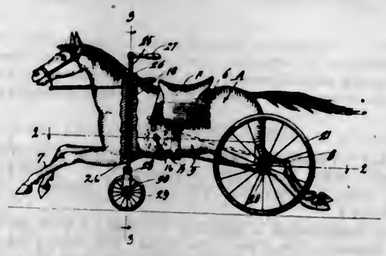
1,574,849. MEANS FOR COOLING PHOTOMECHANICAL PRINTING PLATES. FRANK T. POWERS, New York, N. Y. Filed Mar. 31, 1921. Serial No. 457,381. 3 Claims. (Cl. 62—11.)

1. A device for cooling photo-mechanical printing plates including a base plate provided with openings therein and having thereon a plurality of upstanding, spaced apart plate supports with open, unobstructed space thereabove, and means for causing a cooling fluid to pass through the openings in said base plate.



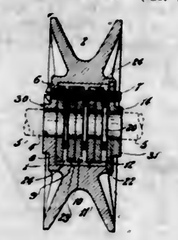
1,574,850. BRAKE. GEORGE W. ROSS, Huntington Park, Calif., assignor to F. L. Hetzel and A. H. Hetzel, both of Los Angeles, Calif. Filed May 25, 1922. Serial No. 563,627. 8 Claims. (Cl. 188—77.)

1. In a brake device for vehicles having fixed housings and drums secured to driven wheels, a frame member adapted to be secured to each brake housing and having forwardly and rearwardly arranged rock shaft bearings, rock shafts provided in said bearings and having lever arms diametrically arranged on respective shafts, brake



straps arranged above and below the brake drum of each wheel and respectively connected to said lever arms of the rock shafts.

1,574,851. PRINTING PRESS. RALPH C. SEYMOUR, Larchmont, N. Y., assignor to Schwartz, Seymour & Company, Inc., a Corporation of New York. Original application filed Aug. 24, 1920, Serial No. 405,638. Divided and this application filed May 16, 1921. Serial No. 469,845. 22 Claims. (Cl. 242—58.)

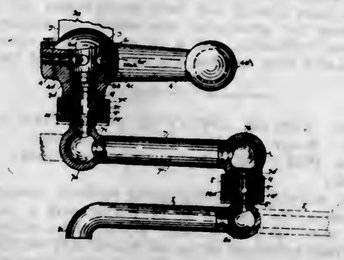


1. In combination in a printing press, bearings in fixed position on the press side frames rotatively supporting the mandrel of a paper roll, and means for elevating a paper roll and delivering it to said bearings including traveling saddles extending rearwardly from the ends of the press frame and slidably associated therewith and adapted to engage beneath the ends of the mandrel of a paper roll resting on the floor and to lift the roll.

1,574,852. TOY. JAMES O. SMITH, Kiefer, Okla., assignor of one-half to Lincoln E. Harshburger, Kiefer, Okla. Filed Jan. 13, 1925. Serial No. 2,211. 1 Claim. (Cl. 208—42.)

In a toy vehicle, a solid body shaped to simulate the appearance of a horse including a pair of forwardly extending and a pair of rearwardly extending spaced legs, the body having a longitudinally extending slot formed therein on the lower surface thereof and a transverse opening communicating with the forward end of the slot and opening out through the sides of the body, a drive shaft rotatably mounted in the opening, pedals secured to the terminals of the shaft, a drive sprocket wheel keyed to the shaft and arranged in the slot, a drive axle rotatably carried by the rear pair of legs, drive ground wheels secured to the terminals of the axle, a drive sprocket wheel secured to the drive axle and arranged directly in rear of said slot, a sprocket chain trained about said sprocket wheels, a steering shaft rotatably carried by the body forwardly of the drive shaft, and a steering wheel carried by said steering shaft.

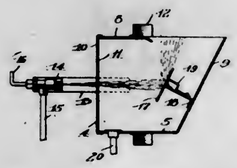
1,574,853. TROLLEY-WHEEL CONSTRUCTION. LEWIS J. TETLOW, Holyoke, Mass. Filed Mar. 14, 1924. Serial No. 699,245. 12 Claims. (Cl. 191—61.)



1. In a trolley wheel construction, the combination with the hub portion which is formed with a recess therein and an annular ledge part, a series of wheel supporting disks located in the recess, said disks each being formed with an opening to receive a wheel supporting shaft and having laterally located recesses communicating with the said opening to provide a space or pocket to receive a semi-solid lubricant, said lubricant possessing the property of readily conducting the electric current from the wheel to the supporting shaft and means for securing the said disks in place in the recess comprising a plate located in the annular pan, and threaded screws passing through the disks, the plate and the hub.

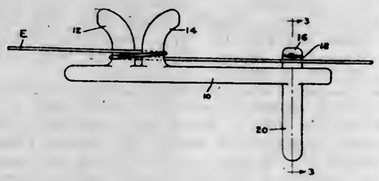
1,574,854. METHOD OF PREPARING A PAINTING MATERIAL OF POWDER FORM FOR USE WITH EITHER WATER OR OIL. MICHIHIKO TSUBATA, Tachibana-Gori, Japan. Filed July 24, 1923. Serial No. 653,587. 1 Claim. (Cl. 134—59.)

The process of manufacturing a painting material of powder form capable of use either with water or oil, comprising the step of drying and powdering a mass comprising pigments for drying oils, gelatin formalin and alcohol and the step of mixing, drying and powdering the mixture of the powder above produced with a mixture comprising gelatin, drying oil and alcohol.



1,574,855. SWING SPOUT FOR SINK FAUCETS. ORVIS W. VALLIER, Watertown, N. Y., assignor to J. B. Wise Incorporated, Watertown, N. Y., a Corporation of New York. Filed Mar. 2, 1925. Serial No. 12,766. 1 Claim. (Cl. 285—166.)

In a combination with a swing spout, a chambered casing having a depending externally threaded and counterbored neck, an upwardly extending neck on the spout engaged with the bottom of the chamber above the

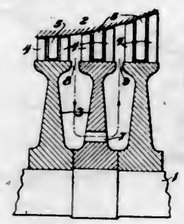


counterbored part of the neck of the casing, a collar surrounding the upper end of the spout neck and threaded thereon, the counterbored part of the casing neck forming a shoulder, against which latter said collar abuts, a sleeve surrounding the spout neck and abutting the collar, packing engaged with the bottom end of the casing neck and a gland nut threaded over the casing neck and engaged with the packing and with the outer end of the sleeve.

1,574,856. HUMIDIFIER FOR HOT-AIR FURNACES. FREDERICK W. ARMBRUSTER, Jr., and GERARD C. BETLEM, Rochester, N. Y. Filed Feb. 19, 1924. Serial No. 693,915. 4 Claims. (Cl. 126—113.)

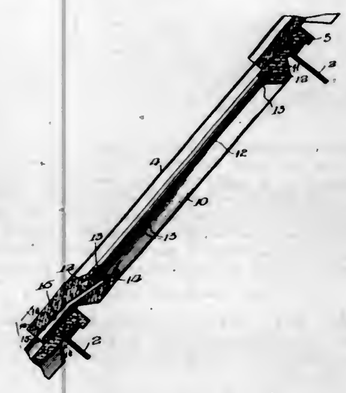
1. A humidifier for hot-air furnaces comprising a housing adapted to project into the heating chamber of the furnace and having an opening communicating with the chamber, means for projecting a jet of water into the housing, a baffle in said housing for atomizing the jet and adjustable to vary the amount of atomization, and means for securing the baffle in adjusted position.

1,574,857. TIGHTENING DEVICE FOR FLEXIBLE ELEMENTS. RUSSELL E. BARNECK, St. Paul, Minn. Filed Apr. 9, 1924. Serial No. 705,248. 1 Claim. (Cl. 24—71.3.)



A tightening device for flexible elements comprising a longitudinal body member, two spaced lugs extending out from said body member near one end thereof and upon which the flexible element may be wound after it has been placed between the same, said lugs being longitudinally disposed and curving divergently from each other a shorter transversely curved lug extending out from the same side of said body member near the other end thereof for preventing the wound up flexible element from unwinding, and a handle member extending out from said body member opposite said curved lug.

1,574,858. ART OF APPLYING DECORATIVE COATINGS. RALPH E. BATEMAN, Dayton, Ohio. Filed Feb. 4, 1924. Serial No. 690,652. 11 Claims. (Cl. 91—68.)

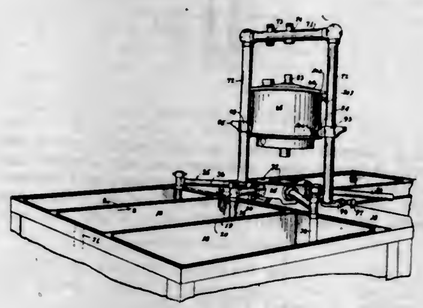


1. The method of coating metal surfaces comprising: first priming the surface to be coated with a priming coating, then applying a rapid drying paint mixture to said surface by means of an air brush, said mixture being of such consistency that it flows from the air brush in globules and forms a pebble effect upon said surface, and then drying said last coating before it has sufficient time to become smooth.

1,574,859. STEAM TURBINE. KARL BAUMANN, Urmston, England, assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 5, 1922. Serial No. 527,123. 4 Claims. (Cl. 253—69.)

1. A turbine of the reaction type having blade carrying discs, defining pockets therebetween, said discs being provided with means for causing a circulation of steam into and through said pockets.

1,574,860. SKYLIGHT AND ROOFING CONSTRUCTION. LEROY BAUMGARTL, Chicago, Ill., assignor to Federal Cement Tile Company, Chicago, Ill., a Corporation of Illinois. Filed July 2, 1925. Serial No. 41,090. 2 Claims. (Cl. 108—10.)



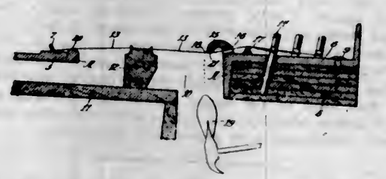
1. In a cementitious window frame, a passageway for the discharge of moisture, said passageway being flared downwardly and outwardly and having a coating to prevent the interlocking of an ice core in said passageway.

1,574,861. COOLING HOLDER FOR MILK AND THE LIKE. EMIL BEHRINGER, Brooklyn, N. Y. Filed Dec. 16, 1924. Serial No. 756,259. 58 Claims. (Cl. 137—21.)

1. In combination, a plurality of tanks; a base having ports communicating with the tanks; and rotary means resting on and upwardly removable from said base and adapted to be advanced from port to port and to withdraw liquid from one tank and then to fill the emptied tank with other liquid.

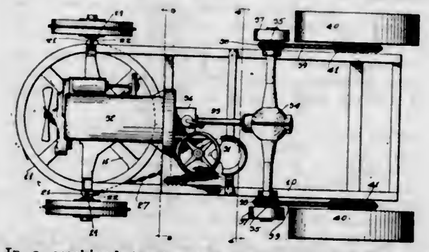
47. In combination, a plurality of tanks; means for emptying and filling the tanks including a rotary member adapted to assume successive positions relative to the tanks; means for moving said rotary member to said successive positions; and means for holding said member stationary in said positions to give full time for the filling and emptying.

53. In combination, a plurality of tanks; means including a rotary member adapted to successively withdraw treated liquid from one tank and then to fill the emptied tank with liquid to be treated; yieldable drive



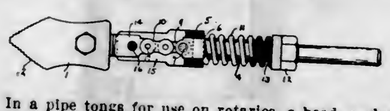
means for driving said rotary member; an adjustable timing means timed independently of said drive means for timing the period of rotation of said rotary member for adjustably timing the period between the filling and emptying of a tank.

1,574,862. COATING COMPOSITION. AUGUST BENSON, Chicago, Ill. Filed July 19, 1924. Serial No. 727,059. 6 Claims. (Cl. 134—47.)



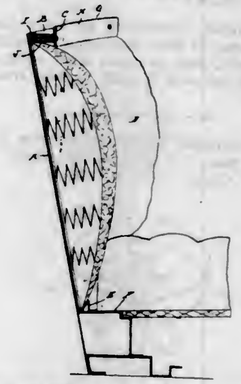
1. A semi-transparent surface coating comprising a powdered mass consisting of equal parts of magnesite, silica and infusorial earth fused together, and a solution of magnesium chloride.

1,574,863. STRING PLATE FOR GRAND PIANOS. WILLIAM G. BETZ, Hammond, Ind., assignor to Straube Piano Co., Hammond, Ind., a Corporation of Indiana. Filed July 17, 1922. Serial No. 575,554. 1 Claim. (Cl. 84—210.)



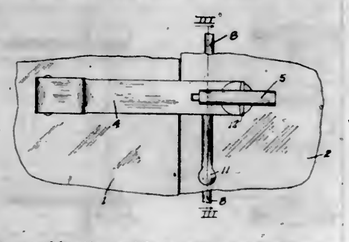
A string plate for grand pianos made up of an integral casting including a main frame having an opening therethrough with a tuning pin section and a hitch pin section on opposite sides of the opening and with an orificed pressure bar extending along above the hammer opening so as to support the strings across the opening and permit their extension beneath the bar then through the orifice and then along over the top of the frame to the tuning pins, said frame being shaped to be positioned above the sounding board of the piano and said hammer opening being wide enough to permit placing a bridge piece over the sounding board over which the strings pass from the hitch pins to the pressure bar, and a support between the pressure bar and tuning pins over which the strings pass, said tuning pins being angularly disposed so as to slightly lean, and said support being positioned so as to lead the strings into the tuning pins substantially at right angles to the axis of rotation of the pins.

1,574,864. COMBINED TRACTOR AND POWER PLANT. WALTER BILLINS, Violn, Ark. Filed Aug. 30, 1924. Serial No. 735,116. 1 Claim. (Cl. 280—110.)



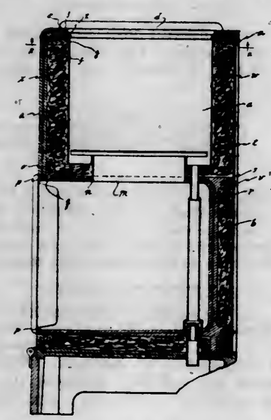
In a combined tractor and power plant, a frame, a front axle for the said tractor, a circular platform for supporting the front of the frame, means for oscillatably mounting the platform on the front axle, apertured ears projecting laterally of the frame from the said platform, a bolt extending through each ear, a spring encircling each bolt above the ear, means on each bolt for forcing a spring into contact with the ear, and flexible elements connecting the bolts to the axle whereby the platform is held in normal position.

1,574,865. PIPE TONGS FOR ROTARIES. BURWELL BOYKIN, Jr., Beaumont, Tex. Filed Mar. 9, 1925. Serial No. 14,114. 5 Claims. (Cl. 81—53.)



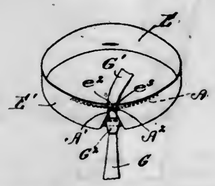
1. In a pipe tongs for use on rotaries, a head, a shank thereon, a handle shaft, a chain conection between said shank and shaft, a collar slidable on said shaft, plates on said collar pivoted to said shank, and a spring on said handle shaft acting to force said collar toward said head.

1,574,866. ATTACHABLE UPHOLSTERY FOR VEHICLE BODIES. PAUL E. GRENEMAN, Detroit, Mich., assignor to C. R. Wilson Body Company, Detroit, Mich., a Corporation of Michigan. Filed Sept. 20, 1920, Serial No. 411,457. Renewed Oct. 31, 1922. Serial No. 598,178. 11 Claims. (Cl. 155—184.)



1. The combination with a vehicle body and an attachable upholstery unit therefor, retaining means for said unit comprising an attachable rail, pockets formed on said body, wood inserts in said pockets, and securing members for said rail engaging said wood inserts.

1,574,867. THREE-POINT REAR-DOOR LOCK. HIRAM WILLIAM COOLEY, Chicago, Ill. Filed Feb. 9, 1924. Serial No. 691,605. 3 Claims. (Cl. 292—5.)

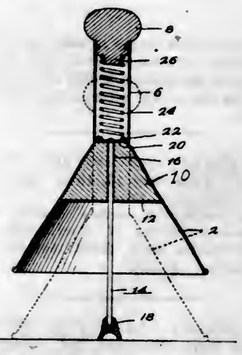


1. The combination with a pair of swinging doors, of a latch bar hinged upon one door adapted for engaging a rotatable catch bolt upon the other door and prevent rotation thereof, a disk secured upon said latch bolt, locking bolts pivoted to said disk and means for rotating said latch bolt when said latch bar is released.

1,574,868. REFRIGERATOR CONSTRUCTION. LLOYD G. COPEMAN, Flint, Mich. Filed Jan. 17, 1924. Serial No. 686,883. 10 Claims. (Cl. 217—3.)

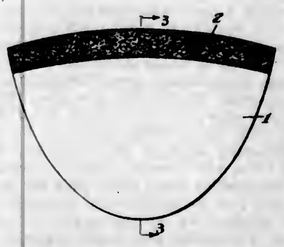
1. A refrigerator, comprising an outer shell of cast material, a frame of heat insulating material united to the cast material, and an inner shell within the outer shell supported at least in part by said frame of insulating material.

1,574,869. HOLDING DEVICE. ARTHUR S. CROWLEY, Cambridge, Mass. Filed June 29, 1923. Serial No. 648,563. 1 Claim. (Cl. 2—155.)



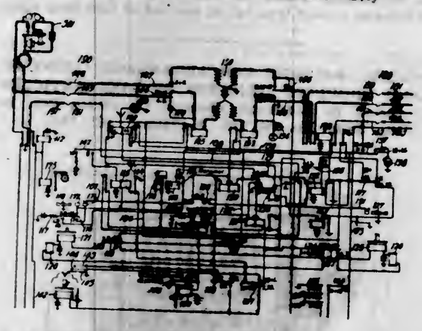
The combination of a collar, an annular holding member having end portions interlocked to each other when said member is in use; and a tie having a portion encircling said interlocked ends to hold the tie in position with relation to the collar.

1,574,870. SAFETY FUSE. CLIFFORD D. CUNY and HOWARD W. JOHNSON, Washington, D. C. Filed Apr. 8, 1924. Serial No. 704,992. 2 Claims. (Cl. 200—117.)



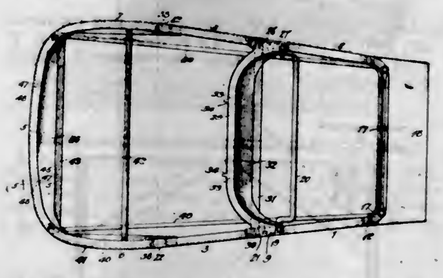
1. In combination with a terminal and its corresponding socket, a fuse comprising a tubular body of insulating material arranged in said socket, fusible material extending from said socket to said terminal, and resilient means for positively disengaging said terminal from electrical contact with said socket when said fusible material becomes fused.

1,574,871. VACUUM WASHER. LILLIAN M. DABNEY, Rosedale, Kans. Filed Aug. 6, 1923. Serial No. 655,882. 1 Claim. (Cl. 68—5.)



A device of the character described consisting of a conical vacuum cup, a tubular shank fixed to the upper end of said vacuum cup, a knob fixed to the upper end of said shank and having an upper portion overlapping said shank, a solid plunger extending axially through said vacuum cup and into the shank, a solid conical guide having a central bore for the passage of said plunger and fixed in the vacuum cup to reinforce the same, a cushion fixed to the lower end of said plunger, a disk fixed to the upper end of said plunger, and a coil spring seated at its ends against said disk and the knob, substantially as shown and described.

1,574,872. SHOE. CHARLES LEO DALY, Brockton, Mass. Filed Apr. 4, 1925. Serial No. 20,647. 2 Claims. (Cl. 36—77.)

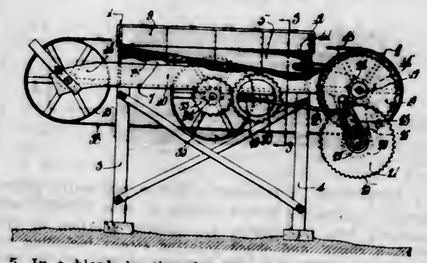


1. As a new article of manufacture, a box toe blank impregnated with thermo-plastic material throughout substantially its entire extent, and an external band of thermo-adhesive material applied to said blank adjacent its tip line independently of and additionally to the original impregnation of the blank with the thermo-plastic material, said thermo-adhesive band being substantially different in composition and thermo-adhesiveness from the thermo-plastic impregnant, softening more quickly than said impregnant under the usual heat treatment of the blank, being stickier than said impregnant when softened, and after cooling adhering tenaciously to the toe tip and vamp of the shoe whereby to of itself adhesively connect the blank along its tip line only to said parts.

1,574,873. TELEPHONE-EXCHANGE SYSTEM. GERALD DRAKIN, Antwerp, Belgium, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Feb. 25, 1922. Serial No. 539,121. 16 Claims. (Cl. 179—27.)

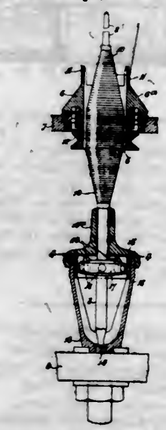
1. In a telephone system, a plurality of lines divided into a plurality of groups, automatic switches arranged in a plurality of groups, each group of switches serving a different group of lines as first choice, means for allowing each group of switches to serve other lines as second choice, means for operating a switch in any of said groups to select and extend one of said lines, and means variably operable in accordance with the operation of said switch for controlling said switch directively.

1,574,874. VEHICLE BODY. HERMAN H. DOEHLER, New Rochelle, and MARC STERN, Brooklyn, N. Y., assignors to Doehler Die-Casting Co., a Corporation of New York. Filed Mar. 6, 1923. Serial No. 623,117. 21 Claims. (Cl. 296—28.)



1. A sectional metallic vehicle body including on each side an integral cast metallic door-framing section which comprises a front and rear panel and a connecting portion joining their bottoms and having an inwardly extending flange around the door opening formed by the two panels and the connecting portion and means on the rear edge of the rear panel for attachment to an adjacent section.

1,574,875. MANUFACTURE OF SODIUM FORMATE FROM CARBON MONOXIDE. MAX ENDELL, Oestrich, Germany, assignor to Firm of Rudolph Koepp & Co., Chemische Fabrik, Oestrich, Germany. Original application filed Feb. 24, 1921, Serial No. 447,623, Patent No. 1,555,796, dated Sept. 29, 1925. Divided and this application filed Feb. 28, 1923. Serial No. 621,923. 7 Claims. (Cl. 260—114.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

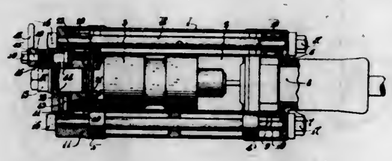


1. A process for the manufacturing of sodium formate consisting in causing carbon monoxide to act upon strongly diluted sodium sulfate solutions in the presence of alkali earth metal hydroxide, and replacing the converted sodium sulfate by addition of fresh sodium sulfate in such quantities that a constant low sodium sulfate concentration is maintained which is below the saturation concentration of the basic sodium calcium sulfate for the corresponding temperature.

1,574,876. BLANK-HEATING FURNACE. ALEXANDER D. FERGUSON, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 5, 1922. Serial No. 549,928. 27 Claims. (Cl. 263—8.)

5. In a blank heating furnace, a combustion chamber comprising parallel side walls, an inclined bottom, and a top supported upon one of said side walls and terminating short of the other, and means including a conveyor running along the other of said side walls for supporting a series of bits over the vent formed between said last mentioned side wall and said top.

1,574,877. MACHINE FOR SPINNING OR DOUBLING YARNS AND THREADS. FRED FERRAND, Southport, England. Filed Dec. 9, 1922. Serial No. 605,814. 4 Claims. (Cl. 118—55.)



1. In machines for spinning or doubling yarns and threads, a spindle, a member carried by and rotating with

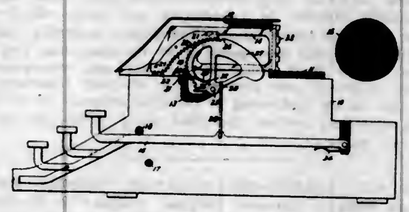
the spindle and having radial guides, balls running in said guides in a radial direction under centrifugal force, and a relatively stationary element surrounding the member and with which the balls engage to frictionally retard the rotation of the spindle.

1,574,878. METAL-CHIP BRIQUETTE. GEORGE E. GAIL, Jr., Pontiac, Mich., assignor of one-sixth to Harry A. Sibley and one-sixth to George A. Brown, both of Pontiac, Mich. Filed Feb. 2, 1925. Serial No. 6,459. 8 Claims. (Cl. 75—73.)

1. A briquette adapted for use in cupolas comprising a dried compacted block of metallic chips and a binder incorporated therein consisting solely of diluted liquid water glass, said briquette being capable of withstanding high temperatures without premature disintegration.

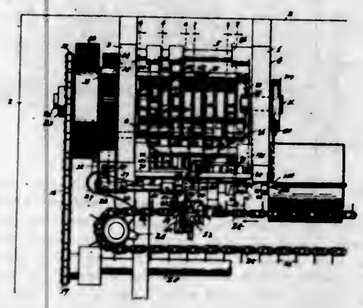
1,574,879. ROTATING MECHANISM FOR ROCK DRILLS. ELMER G. GARTIN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Jan. 2, 1920. Serial No. 349,018. 16 Claims. (Cl. 121—7.)

1. In a motor, a cylinder, a hollow percussive piston therein, cooperating means carried by said cylinder and extending into said piston for causing rotation of the latter, a chuck, and chuck rotating means including an element extending into the interior of said piston and having a straight tongue and groove connection therewith.



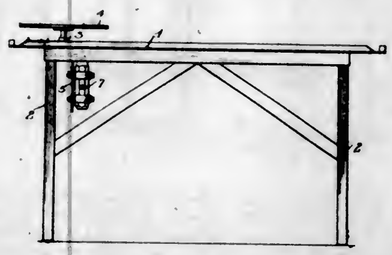
1,574,880. VENTILATOR FOR BUSSES AND OTHER VEHICLES. MAMIE M. GARLAND, Chicago, Ill., assignor to Garland Ventilator Company, Chicago, Ill., a Corporation of Illinois. Filed May 12, 1925. Serial No. 29,687. 14 Claims. (Cl. 98—22.)

10. A ventilator comprising, a bottom plate having a hole therein adapted to register with a hole in the top of the vehicle to which the ventilator is applied, a top plate having a series of openings therein, walls extending from the bottom plate up to the top plate to form a hollow box-like structure, an eductor flue located over the hole in the bottom plate, and a baffle plate to direct a current of air over the openings in the top plate to create a vacuum space therenbove to draw air from the interior of the vehicle.



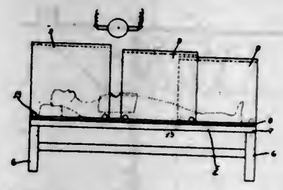
1,574,881. TYPEWRITING MACHINE. GEORGE GOULD GOING, Middletown, Conn., assignor, by mesne assignments, to Remington-Noiseless Typewriter Corporation, a Corporation of New York. Filed Jan. 10, 1924. Serial No. 685,348. 20 Claims. (Cl. 197—25.)

1. In a typewriting machine, in combination, a platen, a type bar adapted to approach the platen rectilinearly, actuating means therefor, including a key lever and a pivoted member arranged to make substantially rolling contact with said type bar and impart motion thereto



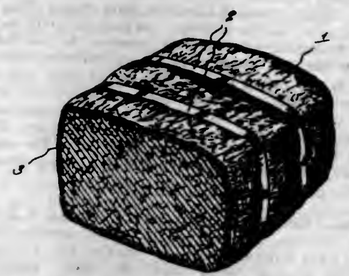
which has a negative acceleration during the final stage, and an inertia device for imparting a pressure printing impulse to said type bar at the end of said final stage.

1,574,882. MACHINE FOR ARRANGING, COUNTING, AND GROUPING HAIRPINS OR LIKE ARTICLES. SOLOMON H. GOLDBERG, Chicago, Ill. Filed Feb. 13, 1919. Serial No. 276,709. 8 Claims. (Cl. 163—8.)



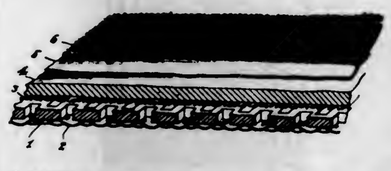
1. In a machine for handling hairpins, or similar articles, the combination with a continuously advancing conveyor for said articles, of automatically operated gripping jaws for removing the articles from the conveyor, forcing means to which the articles are advanced for applying said articles to suitable holding means.

1,574,883. METHOD AND APPARATUS FOR CEMENTING INSULATORS. WILLIAM F. HARVEY, Lima, N. Y. Filed June 26, 1925. Serial No. 39,849. 9 Claims. (Cl. 18—59.)



1. The method of cementing together the parts of an insulator, consisting in subjecting the insulator to rapid vibration while the cement is poured therein.

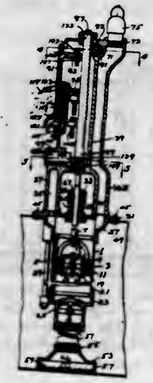
1,574,884. COMBINED X-RAY PROTECTIVE CANOPY AND TABLE. ELLIOTT M. HENDRICKS, Columbus, Ohio. Filed Oct. 24, 1923. Serial No. 670,405. 9 Claims. (Cl. 250—34.)



1. In an X-ray treatment table and protective device, the combination of a table and a plurality of canopies impervious to Röntgen rays adjustably mounted above the table.

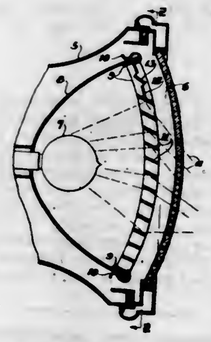
1,574,885. METHOD OF PROTECTING COTTON BALES. HERBERT G. HENNE, New Braunfels, Tex. Filed July 31, 1924. Serial No. 729,427. 7 Claims. (Cl. 91—68.)

6. A method of treating cotton bales consisting in applying a composition to the surface of the bale to form therewith a protective covering over the contents of the bale.



1,574,886. WATERPROOF COVERING. OTTO A. HEPPES, Chicago, Ill., and WALTER H. CADY, Boston, Mass., assignors to The Flintkote Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 12, 1922, Serial No. 528,880. Renewed July 27, 1925. 5 Claims. (Cl. 154—51.)

1. A waterproof covering, comprising a relatively heavy fibrous board, having air circulating ducts shaped therein, a plurality of overlaying plies of fibrous material and waterproofing substances imposed upon the base to form a unitary structure.

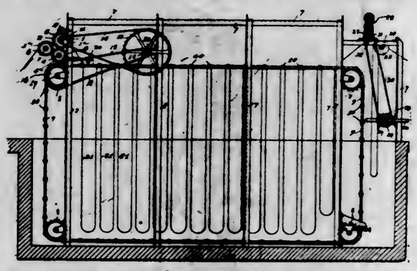


1,574,887. PUMP. SHERWOOD HINDS, Chicago, Ill., assignor to St. Louis Pump & Equipment Company, St. Louis, Mo., a Corporation of Missouri. Filed Jan. 28, 1921. Serial No. 440,796. 6 Claims. (Cl. 103—198.)

1. In apparatus of the class described, in combination, a cylinder having a piston adapted to reciprocate therein, a housing mounted on said cylinder comprising relatively front and rear hollow legs and a transverse arm connecting said legs, with front leg thereof forming an expansion chamber, and the rear leg extending above said expansion leg to form a discharge chamber, the connecting arm extending transversely at approximately the upper extremity

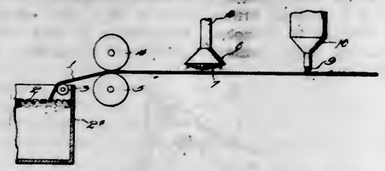
of the front leg the rear leg having an extension on the upper portion thereof, and a rack journaled in said extension adapted to reciprocate with said piston.

1,574,888. ATTACHMENT FOR HEADLIGHTS. CHARLES T. HIXSON, Aztec, N. Mex., assignor of one-third to William Utton, Aztec, N. Mex., and one-third to Williard W. Campbell, Albuquerque, N. Mex. Filed June 30, 1924. Serial No. 723,307. 2 Claims. (Cl. 240—48.4.)



1. An attachment for headlights comprising a metallic rim fitting closely within the rim of the headlight reflector and having a series of similarly disposed arcuate blades extending from side to side thereof and secured thereto, clips connected with said metallic rim and engageable over the edge of the reflector rim in front of the light to removably secure the attachment in such a position that the convex faces of the blades are disposed downwardly and slope upwardly and rearwardly, so that the rays of light will be reflected downwardly and dispersed laterally.

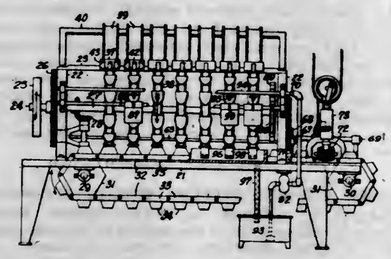
1,574,889. LOOPING SYSTEM. WILLIAM T. HOFMANN, Chicago, Ill., assignor to Beckman-Dawson Roofing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 2, 1921. Serial No. 441,940. 4 Claims. (Cl. 34—12.)



3. In a looping apparatus, the combination with an endless means for supporting a plurality of loops of flexible materials, of feed in rolls adjacent the inlet end of the endless means through which the flexible material is threaded and drawn into the looping apparatus, the ar-

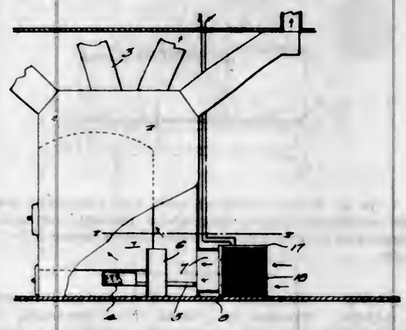
rangement of these rolls being such that the material is drawn into the looping apparatus without being subjected to the squeesing effect of pressure rolls, gripping drawoff rolls adapted to withdraw the flexible material from the

last loop on the endless means, said gripping drawoff rolls forming an additional loop beyond the endless means, and a flanged guide roll for positively directing the subsequent course of the flexible sheet in its travel to the next succeeding step of operation.



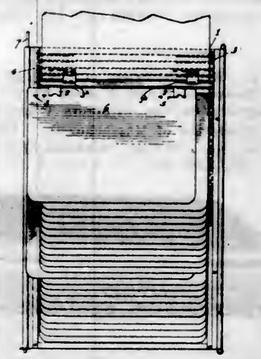
1,574,890. PROCESS FOR PRODUCING A WATERPROOF SHEETED SUBSTANCE AND PRODUCT PRODUCED THEREBY. WILLIAM T. HOFMANN, Chicago, Ill., assignor to Beckman-Dawson Roofing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 17, 1922. Serial No. 544,594. 5 Claims. (Cl. 91—68.)

1. A process for producing a waterproof sheeted material, consisting in passing the sheet through a waterproof saturant and subjecting the applied coating to the roughening effect of a finely divided air blast to set the coating and produce a denticulated surface, applying coarse surfacing material to the roughened coating and imposing a cementitious covering thereon.



2. A waterproof sheet, consisting of a felted fibrous base saturated and coated with a waterproofing substance, one surface of the sheet having irregular furrows and raised portions and having a coarse granular surfacing applied thereto.

1,574,891. HEEL-BUILDING MACHINE. LESLIE A. HOLMAN, Waltham, Mass. Filed Aug. 29, 1921. Serial No. 496,201. 82 Claims. (Cl. 12—50.)

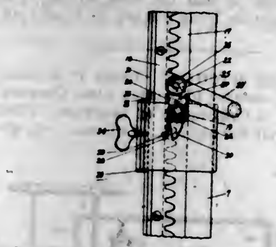


1. In a heel building machine, the combination with lift supplying means and a continuously moving conveyor of continuously moving unidirectional means provided with lift gripping means for transferring lifts from said supply means to said conveyer to build up heels thereon.

1,574,892. INDUCTION HEATING AND VENTILATING SYSTEM. DAVID HUNTER, New Orleans, La. Filed Aug. 29, 1924. Serial No. 734,909. 1 Claim. (Cl. 126—113.)

A heating and ventilating system including a heating device, a casing disposed thereover, said casing being provided with an air passageway, an angular plate located within the casing and disposed between the heating device and the air passageway, air moistening elements located in the casing each a distance at each side from the angular plate and each disposed at each side of the heating device, and a fan located at the intake end of the passageway and adapted to direct a blast of air through the passageway for engagement with the angular plate and deflection toward the air moistening elements.

1,574,893. VISIBLE CARD SYSTEM. LEROY E. HUTCHINGS, Chicago, Ill., assignor, by mesne assignments, to Acme Card System Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 26, 1921. Serial No. 503,349. 4 Claims. (Cl. 129—16.)



1. In a visible card system, the combination with a frame, of flexible wire hangers detachably mounted in said frame having return-bent portions, individual cards hung by metallic clips from the return-bent portions of said hangers, said cards being movable laterally to an offset position from the normal position of the cards without disengagement from the return-bent portions.

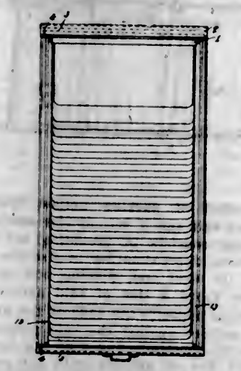
1,574,894. ADJUSTABLE TRIPOD OR OTHER SUPPORT. THEODORE A. JANSSON, Johnson City, N. Y., assignor to Ansco Photoproducts, Inc., Binghamton, N. Y. Filed Feb. 24, 1925. Serial No. 11,216. 7 Claims. (Cl. 248—43.)

1. Shifting mechanism comprising a support and including an adjustable member provided with teeth, means

for adjusting the position of said member comprising a pivoted element rockable toward and away from said

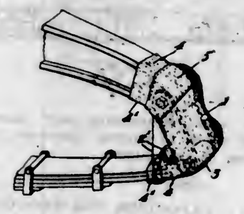
teeth, and a rotatable element carried by said pivoted element and having means for engaging said teeth.

1,574,895. LUMBER-STACKING DEVICE. JOSEPH H. JOHNSON, Los Angeles, Calif. Filed June 22, 1925. Serial No. 38,878. 7 Claims. (Cl. 214—6.)



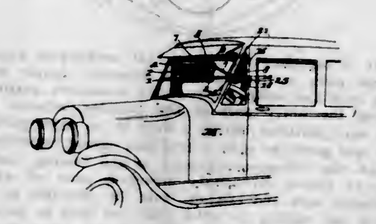
1. A lumber stacking device comprising an elongated body, and spacing strips receiving members at intervals along the length and at opposite sides of the body.

1,574,896. FELT FABRIC. REGINALD H. JOHNSON, Newark, N. J. Filed July 3, 1924. Serial No. 724,050. 4 Claims. (Cl. 91—68.)



2. An improved fabric comprising a sheet formed of felted cattle hairs and a binder containing an adhesive and latex.

1,574,897. REVERSIBLE CARD-INDEX HOLDER. FRANK H. JOHNSTON, Chicago, Ill., assignor, by mesne assignments, to Acme Card System Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 19, 1919, Serial No. 339,251. Renewed July 23, 1925. 3 Claims. (Cl. 45—7.)

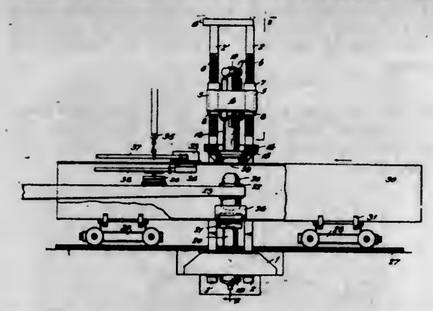


1. In a reversible card index holder, the combination with a slidable drawer having elongated slots in opposite end portions thereof, of a reversible card index holder adapted to be carried by said drawer and movable therewith, studs projecting from said holder and entering said slots in the ends of the drawer, said holder being shiftable bodily relative to said drawer by a movement of the studs in said slots to permit the holder to be reversed.

1,574,898. SHACKLE COVER. JASON A. H. JOHNSTON, Framingham, Mass. Filed Nov. 9, 1923, Serial No. 673,846. Renewed Aug. 17, 1925. 5 Claims. (Cl. 267—37.)

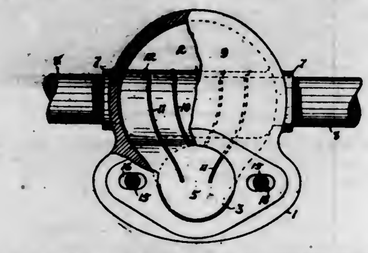
2. A shackle cover comprising a flapped body portion of subsantially the length of the shackle and a flapped end portion connected thereto by a short web of less width and having lateral notches and a flapped cape portion overlying said connecting web and adapted to cover the intervening lateral notches.

1,574,899. GLARESHIELD. ALBERT T. KELLOGG, Houston, Tex. Filed June 7, 1924. Serial No. 718,595. 4 Claims. (Cl. 296—97.)



4. A glare shield comprising a supporting rod extending outward from the frame portion of a motor vehicle, a combined universal joint and clamp by which one end of the rod is slidably secured to said frame portion permitting adjustment in various longitudinal and radial positions, a screen carrying a rod in longitudinal spaced relationship thereto at one edge, and clamp means connecting the supporting and screen rods in which the supporting rod is slidable to produce longitudinal and lateral adjustments of the screen and in which the screen rod is revoluble to produce radial adjustments of the screen in reference to the supporting rod.

1,574,900. APPARATUS AND METHOD FOR MAKING OPENINGS IN PIPES, CYLINDRICAL TANKS, ETC. MORRIS W. KELLOGG, Brookville, N. Y., assignor to The M. W. Kellogg Company, a Corporation of Delaware. Filed July 16, 1923. Serial No. 651,957. 15 Claims. (Cl. 153—21.)

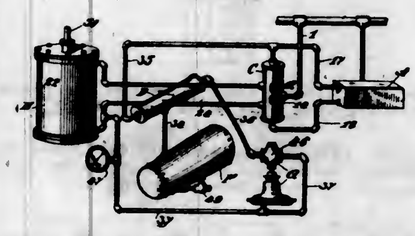


1. Apparatus for making flanged openings in the side of an elongated hollow body, comprising in combination,

a die, a fluid operated forming punch adapted to be inserted within said body and to be expanded within

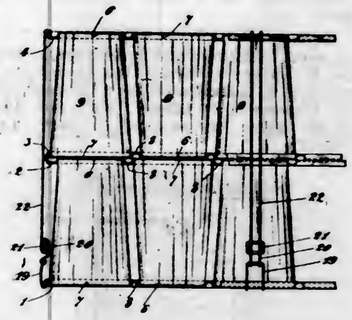
said body to cause the forming part thereof to enter said die, and means to prevent distortion of said body by the reaction of said punch.

1,574,901. VAPORIZER FOR HYDROCARBON ENGINES. MARTIN C. KORTE and LOUIS N. WICKERT, Fort Wayne, Ind. Filed Feb. 20, 1922. Serial No. 537,973. 2 Claims. (Cl. 257—241.)



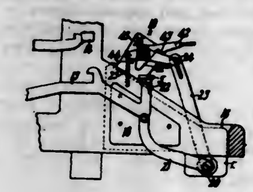
1. In a vaporizer for an internal combustion engine, a single piece casting having a chamber therein with alined inlet and outlet ports and a transverse partition dividing the lower part of the chamber between the ports, said partition having a duct in its upper portion above said ports the ends of said duct extend respectively through the corresponding sides of the casting, and a group of blades divergently arranged, each of which is integral with and extends from the partition to the wall of the casting in which the inlet port is located, the upper ends of the respective blades being curved away from the center line of the casting.

1,574,902. METHOD FOR THE MANUFACTURING OF WHEELS. GREGOR KOWARSKI, Berlin, Germany. Filed Feb. 29, 1924. Serial No. 696,080. 2 Claims. (Cl. 301—64.)



2. As an article of manufacture, a one piece vehicle wheel formed from a profiled section having a web and a flange, including in combination, a circular rim formed by bending said flange, spokes extending radially inward from said rim formed from said web and each having an enlarged perforated end, said spokes being offset inwardly of said rim so that the ends overlap to form a hub, said perforations being aligned to receive an axle.

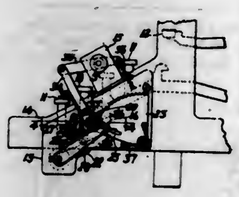
1,574,903. GLASS MACHINE. PETER P. KUCERA, Connellsville, Pa., assignor to Capstan Glass Company, Connellsville, Pa., a Corporation of Delaware. Filed Mar. 24, 1920. Serial No. 368,238. 6 Claims. (Cl. 49—38.)



1. In an automatic glass machine, the combination of pressing devices, a plurality of interacting controllers for controlling the operation of said pressing devices, a timer for operating said controllers, an automatic relief device operative on one of said controllers for relieving the pressure on said devices when the pressure has reached a predetermined limit, a tank of predetermined capacity to receive the relieved pressure and to regulate the final pressure, and a regulating outlet valve on the tank.

1,574,904. COLLAPSIBLE CRATE. PETER KUCERA, Connellsville, Pa., assignor to Capstan Glass Company, Connellsville, Pa., a Corporation of Delaware. Filed Dec. 19, 1921. Serial No. 528,343. 12 Claims. (Cl. 220—7.)

12. The method of packing hollow fragile articles having an open end and a second end smaller than the open end which consists in providing flat sheets with embossed portions approximating in size the diameter of an article at its open end, placing one of said sheets below and one above a tier of said articles with said embossed portions opposite the ends of the articles, pressing the said articles against the said portions so as to engage the same, superimposing a second tier of articles upon said first tier of articles with the small ends of the articles of one tier within the prolongation of the open ends of the articles of the other tier, and causing portions of said flat sheet to act as elastic cushioning zones between the articles in the adjacent tiers.

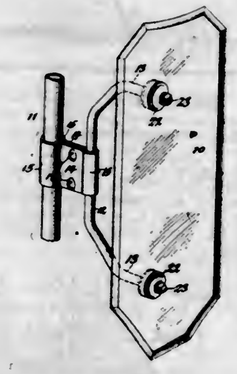


1,574,905. TYPEWRITING MACHINE. ADOLPH G. KUPETZ, New Rochelle, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 28, 1922. Serial No. 597,437. 19 Claims. (Cl. 235—102.)

1. In a typewriting machine, a number-key, a register for counting the operations of the number-key, means normally maintaining the register in locked condition to prevent clearing thereof, the register comprising register-clearing mechanism, means for unlocking the register to permit operation of the register-clearing mechanism, and supplemental means for insuring that no counting operation of the register will ensue as a result of the operation of the unlocking means.

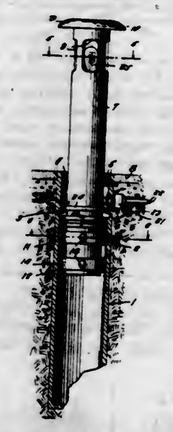
15. In a machine of the class described, a register comprising a series of number-wheels and a clearing mechanism, an arm for operating the register to count, and a lever supplemental to the arm to condition the register without counting, for clearing purposes.

1,574,906. TYPEWRITING MACHINE. ALFRED G. F. KUROWSKI, Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Nov. 6, 1922. Serial No. 599,221. 31 Claims. (Cl. 235—102.)



1. In a typewriting machine, the combination of a pair of typing keys, a register for registering typed values, and means actuable by one of the keys to register only once a certain amount and actuable by the other key to register repeatedly the same amount.

30. In a typewriting machine, a pair of keys, and means actuable by an operation of one of the keys to oscillate an arm once and actuable by the other of the keys to oscillate the arm twice.



1,574,907. WINDSHIELD-WING MOUNTING. WILLIAM LA HODNY, Buffalo, N. Y., assignor to Standard Mirror Company, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 25, 1925. Serial No. 25,800. 4 Claims. (Cl. 296—84.)

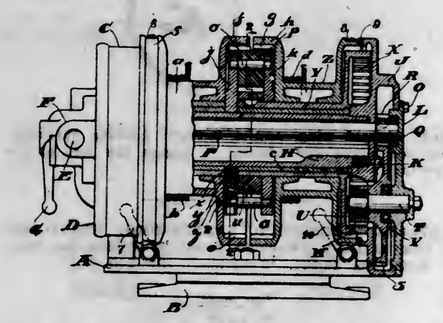
4. A mounting for windshield wings, comprising an arm adapted to pass through an opening in said wing, a sleeve mounted on said arm and adapted to extend through said opening and provided at opposite ends with disks which are adapted to engage with opposite

sides of said wing, and a resilient bushing surrounding said sleeve and adapted to engage the bore of the opening in the wing.

1,574,908. TELESCOPIC SAFETY-ZONE STANDARD. FRED C. LAMP, Cleveland, Ohio. Filed Mar. 25, 1925. Serial No. 18,191. 5 Claims. (Cl. 240—1.)

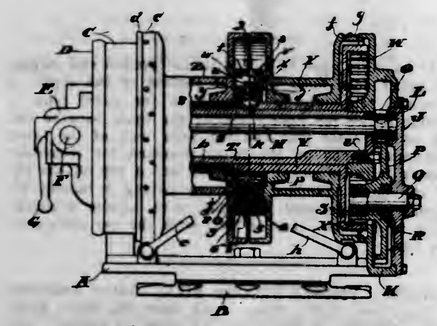
1. An outer pipe embedded in the ground and having its upper edge flush with the surface of the street, a standard telescopically mounted in the outer pipe, a sealing device for tightly sealing the space between the top of the outer pipe and the outer wall of the inner standard, means on the inner standard for releasably locking it in its elevated position, and a cap on the top of the outer standard, said cap having a handle for raising the standard manually, said handle normally lying in a plane below or level with the top surface of the cap.

1,574,909. VISIBLE-RECORD FILE. ARVIN THEODORE LANGJAHR, Colby, Wis. Filed June 26, 1922, Serial No. 570,968. Renewed Jan. 11, 1926. 3 Claims. (Cl. 129—16.)



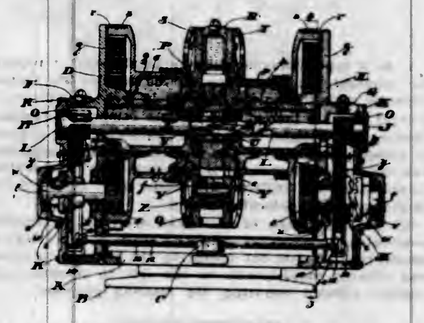
2. A record-supporting member for filing systems comprising a body portion provided with trunnions for

pivotally engaging a filing casing, cams for limiting its movement in said casing, and means comprising integral



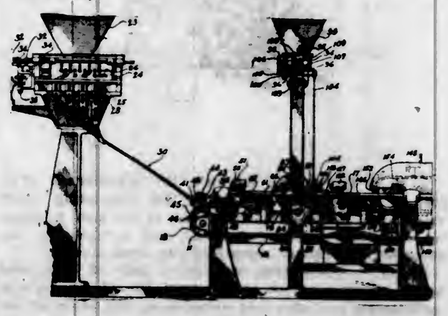
laterally and upwardly bent tongues having enlarged heads and reduced connecting portions for readily detachably holding a record-bearing member.

1,574,910. DOUBLE-DRUM HOIST. EARL B. LEAR, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 15, 1925. Serial No. 43,687. 3 Claims. (Cl. 254—185.)



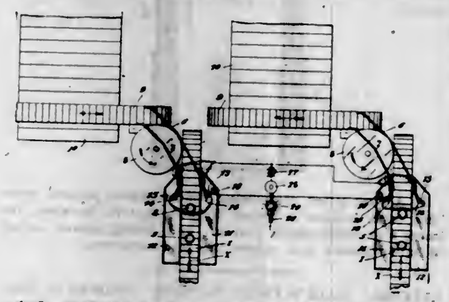
1. In a hoist, the combination of a frame, a driving shaft, drums rotatable about said driving shaft, a motor connected for rotating said driving shaft, drivers on said drums, a main driver connected to be rotated by the driving shaft, an oscillating pawl associated with the main driver for automatically connecting said main driver with one or the other of said drums in accordance with the direction of rotation of the driving shaft, and positive means including longitudinal gear teeth independent of the opposed drivers for rocking said pawl through a plane transverse to the longitudinal axis of the hoist to engage one or the other of said drivers.

1,574,911. DOUBLE-DRUM HOIST. EARL B. LEAR, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 15, 1925. Serial No. 43,688. 3 Claims. (Cl. 254—185.)



1. In a hoist, the combination of a frame, a driving shaft, a pair of drums rotatable about said driving shaft, opposed drivers carried by said drums, a motor for rotating the driving shaft, a main driver, a pawl carrier on said main driver and connected to be rotated by the driving shaft, a pawl carried by the pawl carrier reciprocable in a plane extending through the longitudinal axis of the hoist, and means including a ring and a pin connected to the main driver rotating through a plane transverse to the longitudinal axis of the hoist to automatically actuate the pawl into engagement with one or the other of said opposed drivers in accordance with the direction of rotation of the driving shaft and to hold said pawl in engagement with either of the opposed drivers.

1,574,912. DOUBLE-DRUM HOIST. EARL B. LEAR, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Oct. 5, 1925. Serial No. 60,378. 10 Claims. (Cl. 254—185.)

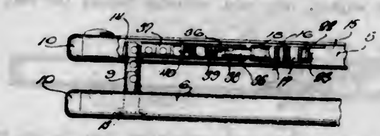


1. In a hoist, the combination of a frame, a driving shaft supported by the frame, a pair of drums rotatable about said driving shaft, a fluid actuated motor between the drums, intermediate gears for connecting the drums to be rotated by the driving shaft, and means for automatically shifting said gears to connect one or the other of said drums with the driving shaft in accordance with the direction of rotation of said motor.

1,574,913. BOTTLE-CAP-ASSEMBLING MACHINE. CHARLES E. MCMANUS, New York, N. Y. Filed Mar. 17, 1924. Serial No. 699,771. 33 Claims. (Cl. 113—80.)

1. A bottle cap assembling machine embodying therein a sequence of adjacent, similar carrier members each adapted to receive and convey a group of metal shells, a shell feeding mechanism adapted to simultaneously deliver a group of shells to each of said carrier members, a mechanism adapted to thereafter apply adhesive to each shell upon each carrier member, a mechanism adapted to deposit a disk upon the adhesive within each shell, means adapted to force said disks within the respective shells, means subjecting the shells and the adhesive therein to an elevated temperature, a pressure mechanism operative upon the disks and the shells upon the several carrier members while the adhesive therein is heated, and an actuating mechanism whereby said carrier members are successively, and progressively, brought into the operative relation to said other mechanisms, and said mechanisms are actuated in synchronism with the movement of said members.

1,574,914. AUTOMATIC CONVEYER SIGNAL. WILLIAM L. MCNAMARA, Connellsville, Pa., assignor to Capstan Glass Company, Connellsville, Pa., a Corporation of Delaware. Filed Oct. 6, 1923. Serial No. 666,894. 6 Claims. (Cl. 198—40.)



4. In a device for conveying hot glass ware; a conveyer; a rotary transfer device for transferring ware from said conveyer; guide rails cooperating with said rotary tansfer device, shelves adjacent the front end of said rails to support ware pushed from the conveyer; electrical contacts attached to the front ends of said guide rails, said contacts being normally open and being adapted to be closed by ware pushed from the conveyer; and signalling means connected to be set in operation by the closing of the contacts.

1,574,915. GOLF CLUB. MAXWELL R. MARSTON, Philadelphia, Pa. Filed Mar. 24, 1923. Serial No. 627,261. 2 Claims. (Cl. 273—77.)

1. A golf putter comprising a shaft and a head secured thereto, said head comprising a flat sole of substantial width, a flat top of substantial width but of less width and of greater length than the sole and parallel therewith, two plane faces extending from opposite sides of the sole to the top, the width of said top being greater than the diameter of the shaft where it connects with the head and a curvilinearly formed toe extending from said top to said sole.

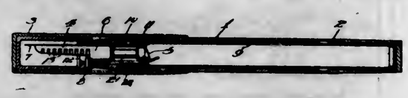
1,574,916. LOOSE-LEAF BINDER. HENRY C. MILLER, Milwaukee, Wis. Filed July 17, 1925. Serial No. 44,273. 8 Claims. (Cl. 129—41.)

1. In a loose-leaf binder, an upper binder head member, a binder post member adapted to be adjustably connected with the head member and having one end portion normally free and extensible in said head member, cooperating means between the post member and head member to adjustably and releasably connect the post member with the head member, said means including a stud carried by one member and engageable with a part carried by the other member, and means independent of said stud and part to accommodate relatively small adjustments between the members.

1,574,917. GRAIN-DRILL TOOTH. JOHN ABERCROMBIE MITCHELL, Lawson, Saskatchewan, Canada. Filed Apr. 18, 1923. Serial No. 632,949. 2 Claims. (Cl. 111—86.)

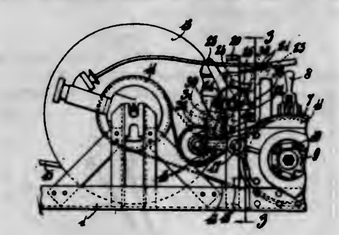
2. A grain drill tooth comprising a spout having its delivery end bent at an angle to the horizontal, a three-edged plate attached to said spout at the delivery end and having one edge extending transversely of the spout, said plate being bent medially from said edge to the opposite vertex, the remaining edges of the plate being sharpened, and a solid block secured in the bend of the plate, and spaced from the delivery end of the spout, said block presenting to said delivery end a vertical deflecting surface intersected by the prolonged longitudinal axis of said end.

1,574,918. BOBSLED. MORTEN MORTENSON, South Range, Wis. Filed Oct. 12, 1925. Serial No. 61,984. 4 Claims. (Cl. 280—15.)



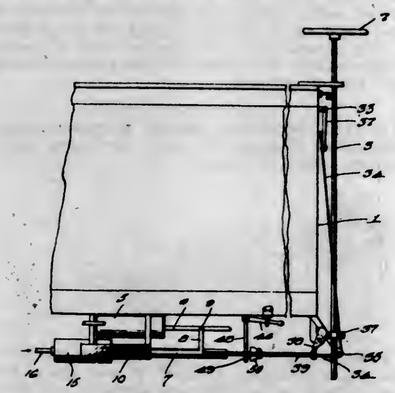
1. A sled having seats in the bodies of its runners, a crosstie beam removably mounted in said seats, said runner and beam having coincident half-seats, and dowel pins mounted in said half-seats.

1,574,919. FOUNTAIN PEN. JULIAN H. MURDOCK, Boston, Mass., assignor to Pollock Pen Company, South Boston, Mass., a Corporation of Delaware. Filed Apr. 26, 1924. Serial No. 709,081. 5 Claims. (Cl. 120—42.)



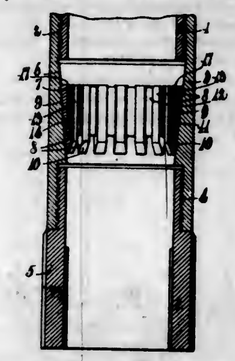
1. In a fountain pen, the combination with a barrel, of an ink feed inserted in one end of said barrel, a cartridge, having a puncturable seal screw threaded immedi-

ately adjacent said seal and insertable in the barrel, said ink feed being provided on its inner end with a puncturing point adapted to puncture the cartridge seal and project slightly into said cartridge beyond the seal, a



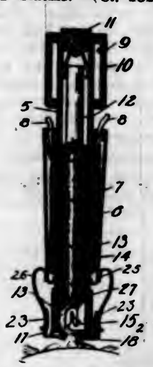
sleeve seal insertable into said barrel from the ink feed end thereof and surrounding the inner end of said ink feed, said sleeve seal having a screw threaded inner end adapted to engage the screw threaded portion of the cartridge.

1,574,920. MINING APPARATUS. RICHARD E. MURPHY, California, Pa., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed May 11, 1922. Serial No. 560,122. 6 Claims. (Cl. 242—91.)



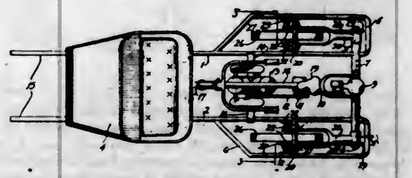
1. In combination, a mining apparatus having an electric cable reel, driving means for said reel including a flexible connection, a cable support adjacent said reel, and tensioning means for said connection carried by said support.

1,574,921. BRAKE LOCK FOR RAILWAY CARS. HERBERT W. NELSON, Buhl, Minn. Filed Mar. 14, 1925. Serial No. 15,538. 3 Claims. (Cl. 303—89.)



1. A device of the class described comprising a rack bar connected with the brake mechanism of the car, means cooperating with said bar normally adapted upon the movement of the brake mechanism toward set position to hold said bar and brake mechanism to prevent release of the brakes, pressure operated means adapted to control the rack bar locking means under predetermined conditions, and manually operated means for controlling said rack bar locking means independently of said pressure operated means.

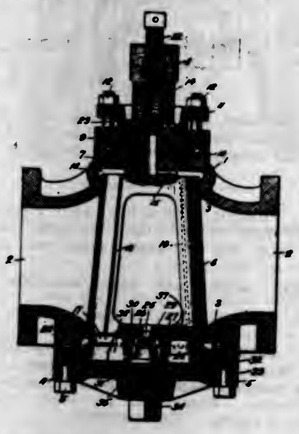
1,574,922. CORE DRILL. SVEN T. NELSON, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed May 5, 1924. Serial No. 710,966. 14 Claims. (Cl. 255—72.)



1. A core lifter comprising spaced wedge shaped members each having a recess formed therein between the inner and outer walls thereof, and spring means seated in said recesses and connecting said members.

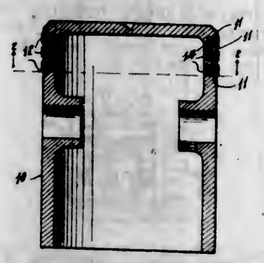
1,574,923. HAIR-WAVING DEVICE. CHARLES G. NESSLER, New York, N. Y. Filed Sept. 22, 1922. Serial No. 589,745. 12 Claims. (Cl. 132—36.)

1. In hair waving apparatus including a tubular strand-heating device, a gate member adapted to occupy a position in partial closing relation to the end of the tube when in operative position, and spring means carried by the heating device and arranged to engage and hold the gate member in tube closing position.



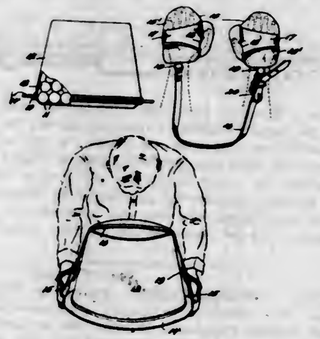
1,574,924. MOTOR SLED. KARL JOHAN ENGELBERT NILSON, Detroit, Mich. Filed Feb. 9, 1923. Serial No. 618,017. 9 Claims. (Cl. 180—6.)

1. A self-propelled sled comprising in combination with the runners thereof, a frame supported by the runners of the sled, said frame including fixed main and auxiliary



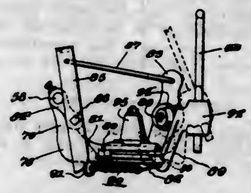
side members spaced to form respectively central and lateral looped portions constituting closed gaps, traction wheels carried by the frame and disposed in said lateral looped portions, a motor sustained by and located intermediate of the main members and above the plane of said central loop portion, a power transmitting medium mounted on the frame and arranged in rear of said motor and wheels, and means having driving connection with the motor, the power transmitting medium and said wheels for conveying motion to the latter.

1,574,925. VALVE. SVEN JOHAN NORDSTROM, Saratoga, Calif., assignor to Merco Nordstrom Valve Company, San Francisco, Calif., a Corporation of Delaware. Filed Aug. 12, 1925. Serial No. 49,697. 6 Claims. (Cl. 251—93.)



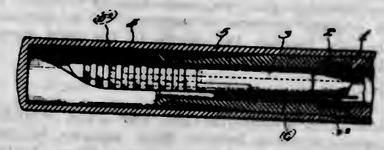
2. A valve comprising, a casing having a passageway therethrough and a tapered valve seat formed transversely of the passageway, a cover secured to the casing for closing the larger end of the valve seat, a tapered plug seated in the valve seat and having a hole adapted to register with the passageway, a metallic disk interposed between the cover and the casing, an anti-friction bearing between the larger end of the plug and the metallic disk, and means for resiliently forcing the metallic disk against the anti-friction bearing and the latter against the plug.

1,574,926. PISTON RING. ERNEST C. NORTON, Moline, Ill. Filed Dec. 11, 1924. Serial No. 755,227. 1 Claim. (Cl. 74—109.)



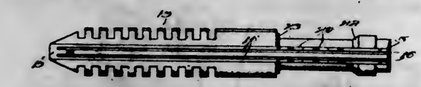
In combination with a piston having a peripheral groove for a ring, a ring disposed in said groove comprising a plurality of sections having their meeting ends lapped and their inner walls straight and unobstructed from top to bottom, and a spring wire coiled upon itself a plurality of times to provide an expansive body disposed between said wall and the inner wall of the groove and directly engaging the top and bottom walls of the groove.

1,574,927. PACKER'S MITT. JULIUS H. OTTO, Macon, Ga. Filed July 14, 1925. Serial No. 43,651. 4 Claims. (Cl. 226—17.)



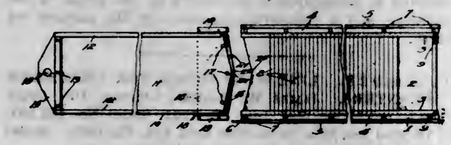
1. A packer's implement comprising two members adapted to be secured to or carried by the hands of the operator, and a connecting element, for the purpose set forth.

1,574,928. LINE-WIRE GUIDE FOR CHECKROW PLANTERS. JAMES W. PARKER, Chicago, Ill. Original application filed June 29, 1921, Serial No. 481,391. Divided and this application filed Jan. 23, 1922. Serial No. 531,256. 1 Claim. (Cl. 111—48.)



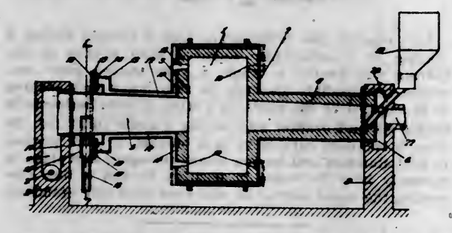
In a planter, the combination with a bracket having a bearing, of a periodically operated shaft carried by the bearing and having a crank, a yoke shaped lever connected intermediate its ends to said crank and adapted to be engaged by the knots on a wire, a plate horizontally hinged to said bracket and having a guide roller for the wire, a standard carried by said bracket, a latch pivoted to said standard and having means to engage said plate, to normally hold the same in position to and a link connecting the upper portion of said lever with said standard.

1,574,929. FOUNTAIN PEN. ROBERT T. POLLOCK, Boston, Mass. Filed Apr. 1, 1922, Serial No. 548,687. Renewed May 4, 1925. 3 Claims. (Cl. 120—50.)



1. In a fountain pen, the combination with a pen barrel containing the ink supply, of a pen mounted therein, an ink feed communicating between the ink supply and the pen point, said ink feed comprising a member having a closed rifled duct extending longitudinally its length and adapted to deliver the ink from the ink supply substantially at the writing point of the pen.

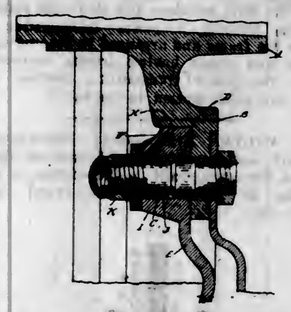
1,574,930. FOUNTAIN PEN. ROBERT T. POLLOCK, Boston, Mass. Filed Apr. 18, 1924. Serial No. 707,444. 5 Claims. (Cl. 120—50.)



1. In a fountain pen, the combination with a barrel, of an ink supply therein, a feed bar having its inner end communicating with the ink supply, a nib mounted on the feed bar, said feed bar being longitudinally channeled throughout its entire length on the surface immediately below the nib, a channeled auxiliary feed element mounted in said longitudinal channel and insertable or removable therefrom without removing the feed bar from the barrel.

1,574,931. VISIBLE INDEX. FRANK D. POWELL, Chicago, Ill., assignor, by mesne assignments, to Acme Card System Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 22, 1923. Serial No. 669,941. 5 Claims. (Cl. 40—64.)

1. In a visible index, the combination with a holder having a plurality of movable index members, of an auxiliary holder adapted to be connected to the first-mentioned holder, and means for simultaneously transferring a plurality of the index members from one holder to the other.



1,574,932. ROTARY FURNACE. ADAM HELMER PEHRSON, Stockholm, Sweden. Filed Aug. 8, 1922. Serial No. 580,476. 5 Claims. (Cl. 266—10.)

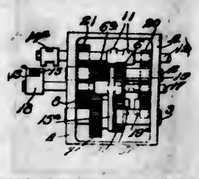
1. A rotary or oscillatory furnace consisting in the combination of three chambers one of which constitutes the main furnace chamber and the other two constitute integral coaxial tubular extensions therefrom having a smaller diameter than the main furnace chamber, and means whereby aeriform or gaseous fluid is introduced continuously through the charge in the main furnace chamber during its rotation or oscillation.

1,574,933. SECURING DEVICE FOR DISK WHEELS. ALDEN L. PUTNAM, Detroit, Mich., assignor, by mesne assignments, of one-half to Motor Wheel Corporation, Lansing, Mich., a Corporation of Michigan, and one-half to The Midland Steel Products Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 27, 1919. Serial No. 333,860. 4 Claims. (Cl. 301—9.)

1. In a wheel, the combination with a member having a stud projecting therefrom having a reduced outer portion, of a member mounted on said first-mentioned member having an apertured portion for engaging said stud provided with a bearing engaged by the inner portion of the stud and having a clearance from the reduced outer

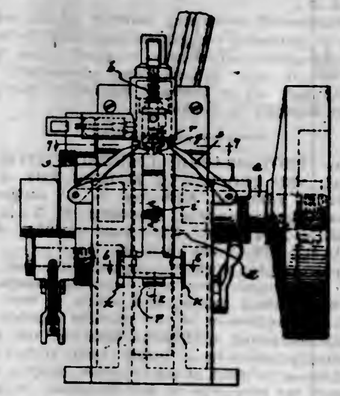
portion of the same, and a bushing for filling the clearance between said stud and apertured member detachably engaging said member to extend the length of bearing.

1,574,934. PHENOLPHTHALEIN AND PROCESS OF MAKING THE SAME. EARL B. PUTT, New York, N. Y. Filed July 10, 1925. Serial No. 42,832. 5 Claims. (Cl. 260—65.)



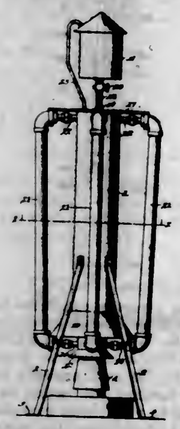
1. A bulky, substantially white, amorphous phenolphthalein.

1,574,935. PRESSURE STILL FOR OIL REFINING. DANIEL PYZEL, Piedmont, Calif., assignor to Simplex Refining Company, San Francisco, Calif., a Corporation of California. Filed Mar. 13, 1922. Serial No. 543,508. 6 Claims. (Cl. 196—137.)



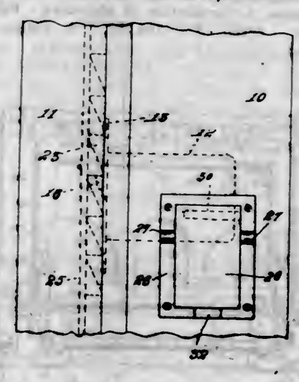
2. In a still, the combination of: a furnace; a container in said furnace; and an indicating thermometer embedded in but projecting through only one surface of the wall of said container.

1,574,936. CHANGE-SPEED GEARING FOR MOTOR ROAD VEHICLES. JAMES RHODES, Bradford, England. Filed Aug. 19, 1922. Serial No. 583,016. 2 Claims. (Cl. 74—39.)



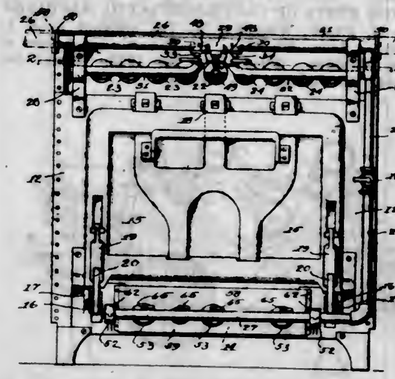
1. Change speed gearing, comprising splined shafts, wheels mounted to slide thereon and to transmit motion thereto, operating forks engaging with said wheels, a hand lever, two sliding bars carrying said operating forks, grooved blocks fixed upon said bars, the groove in one block being formed to receive and be always in engagement with the hand lever while the groove in the other block is arranged so that the operating lever may be disengaged therefrom, for the purpose described.

1,574,937. BUTTON-ATTACHING MACHINE. FREDERICK N. ROSS, Detroit, Mich., assignor to The Button Attaching Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Feb. 14, 1925. Serial No. 9,068. 5 Claims. (Cl. 218—4.)



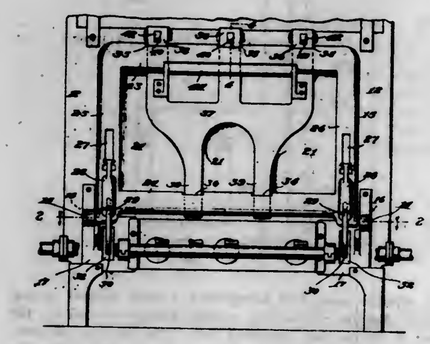
5. In a button attaching machine, the combination of a support, attaching mechanism, button supporting means including a button plunger provided with a button seat movable with respect to the support, button feeding mechanism, means for moving the button plunger to position a button in cooperative relation with the attaching mechanism, and a single finger hinged to said support and provided with means for guiding the button from the feeding mechanism to the button seat, but retractable upon the moving of the button plunger.

1,574,938. PORTABLE STEAM HEATER. JOHN W. RUDDER, Montgomery, Ala. Filed July 20, 1925. Serial No. 44,829. 7 Claims. (Cl. 237—17.)



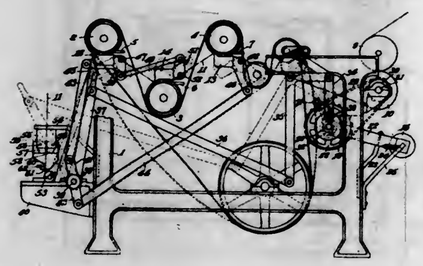
1. A portable heater of the character described, comprising a vertically elongated body interiorly divided into a lower steam-generating chamber and an upper steam-receiving chamber, means for supporting said body above a source of heat, a reservoir positioned at the upper end of the body, a water supply pipe connecting the reservoir with the steam generating chamber, a radiator pipe outside the body connecting the steam-generating and receiving chambers of the body, and a conduit connecting the steam-receiving chamber with the reservoir.

1,574,939. WINDOW-SASH LOCK. ARTHUR E. SCHAMP, Milwaukee, Wis. Filed June 5, 1925. Serial No. 35,132. 1 Claim. (Cl. 292—178.)



A window sash lock comprising a sash carried casing, a bolt slidable within the casing, means carried by the window frame for engaging with the bolt, a substantially rectangular plate secured to the bolt within the casing and engaging the latter to prevent rotary movement of the bolt and plate, means to yieldingly force the bolt to engage the frame carried means, a pivotally mounted actuating member carried by the sash, a finger carried by the actuating member and extending into the casing and an extension provided upon the bolt carried plate, said extension being located in the path of the finger when the actuating plate is moved pivotally to retract the bolt.

1,574,940. GAS RANGE. WILLIAM ELBERT SEXTON, Baltimore, Md., assignor, by mesne assignments, to The Baltimore Trust Company, trustee, a Corporation of Maryland. Filed Apr. 11, 1924. Serial No. 705,766. 9 Claims. (Cl. 126—39.)



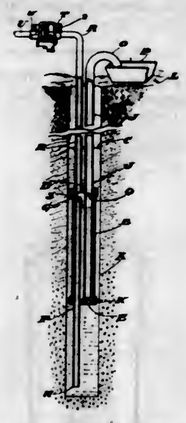
1. In a gas range the combination with a plurality of top burners arranged in groups, of a plurality of bottom burners, a lower main for supplying gas to the lower burners, an upper main, a pipe connecting said lower and upper mains and maintaining communication between the two, a branch from the upper main to one group of top burners a separate branch from the upper main to another group of top burners, said branches being independent of the pipe that connects the lower and upper mains, and separate valves between the upper main and said branches for controlling the flow of gas from said upper main to said branches.

1,574,941. DOOR MECHANISM FOR RANGES. WILLIAM ELBERT SEXTON, Baltimore, Md., assignor, by mesne assignments, to The Baltimore Trust Company, trustee, a Corporation of Maryland. Filed Apr. 11, 1924. Serial No. 705,767. 2 Claims. (Cl. 126—191.)

1. The combination with a range-front having a door-opening and also having vertical slots below the opposite lower corners of said door-opening, a door for said opening, means at the lower part of the door for pivotally sustaining the latter, a lever extending through each of said slots and having a weighted inner end and an up-turned outer end which up-turned outer end extends over the door pivot and seats against the outer side of the said door and a link having one end pivotally attached to the said up-turned outer end of the lever and the other end of the link having a sliding connection with the door.

1,574,942. RETRACTING MECHANISM FOR THE CLOTH RESTS OF CLOTH-SURFACING MACHINES. ROY M. SHARP, Wheeling, W. Va., assignor to J. L. Stifel & Sons, Wheeling, W. Va., a Corporation of West Virginia. Filed July 23, 1925. Serial No. 45,644. 10 Claims. (Cl. 26—17.)

1. In a cloth surfacing machine, the combination with shearing elements, and rests normally disposed in cloth-presenting relation to said elements, of a constantly rotated member, a normally idle rotatable member, connections between said rotatable member and said cloth rests whereby rotation of the former actuates movement of the latter from cloth presenting position, and means controlled by abnormal thicknesses of the advancing cloth whereby said rotatable member is automatically shifted into driven relation to said rotated member.



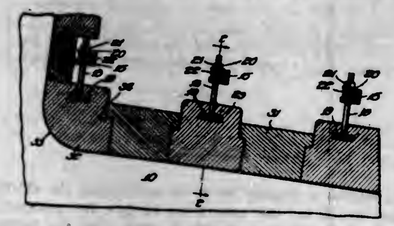
1,574,943. ART OF LIGHT-SENSITIVE PHOTOGRAPHIC MATERIALS. SAMUEL E. SHEPPARD, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed June 6, 1924. Serial No. 718,410. 75 Claims. (Cl. 95—7.)

1. A biochemical sensitizing material which has the property of increasing the general light-sensitiveness of photographic gelatino-silver-halid emulsions when incorporated therein, said material being substantially free from that part of its normally associated substances which are insoluble in alcohol.

1,574,944. PHOTOGRAPHIC LIGHT-SENSITIVE MATERIAL AND PROCESS OF MAKING THE SAME. SAMUEL E. SHEPPARD, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed June 6, 1924. Serial No. 718,411. 75 Claims. (Cl. 95—7.)

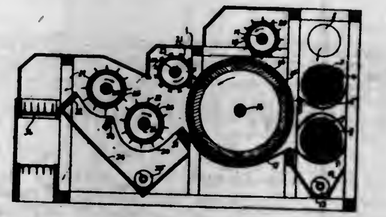
1. A photographic emulsion comprising a colloid, particles of photographic silver salt suspended therein, and an added compound therein upon which at least part of the light-sensitiveness of the emulsion depends, said compound containing a divalent atom of the sulfur group directly joined by a double bond to a single metalloid atom, to which at least another group of atoms is attached, the proportion of said compound being substantially independent of the proportion of said colloid.

1,574,945. FLUID-PRESSURE PUMPING APPARATUS. FRED M. SLATER, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Aug. 20, 1925. Serial No. 51,362. 2 Claims. (Cl. 103—232.)



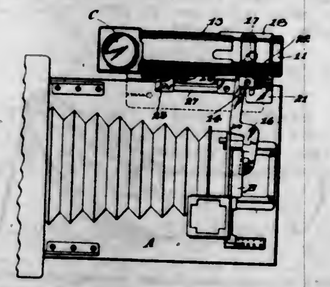
1. Fluid pressure pumping apparatus for automatically discharging liquid from a well in accordance with the rise of liquid in the well, comprising a casing located in the well into which the liquid is permitted to enter, means controlled by the back pressure in the casing for automatically discharging the casing by main pressure fluid, said discharging mechanism including a main valve, an auxiliary valve controlling the main valve, and a back pressure valve controlling the auxiliary valve.

1,574,946. HANGING-ARCH CONSTRUCTION. ENOCH P. STEVENS, Chicago, Ill.; Mary Ann Stevens executrix of said Enoch P. Stevens, deceased. Filed Dec. 19, 1919, Serial No. 346,155. Renewed July 6, 1923. 13 Claims. (Cl. 110—95.)



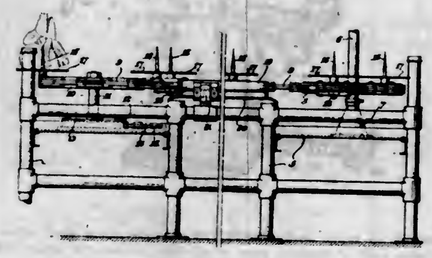
1. In an arch construction, a series of hangers, a row of bricks extending in the direction of the series of

hangers and in substantially balanced suspension beneath the same, said bricks having recesses and said hangers having engaging heads and the head of each hanger in engagement with a group of the bricks in the



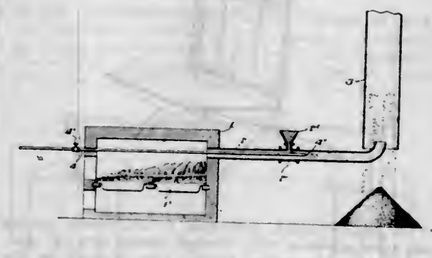
row, and an adjacent row of bricks supported on said hanger-supported bricks; a brick in a group supported by a hanger being removable in a direction transverse to its row, into a space left by removal of a brick in said adjacent row.

1,574,947. COMBINED HULLER AND CLEANER FOR COTTON GINS. JOHN ARNOLD STREUN, Sherman, Tex. Filed Mar. 16, 1925. Serial No. 15,790. 6 Claims. (Cl. 19—67.)



6. In a device of the character described, a housing having a cotton receiving opening at one side thereof, a saw cylinder rotatable therein, means to receive cotton at one end of said cylinder and move it longitudinally of said cylinder and back again, means to prevent the hulls from passing said cylinder with said cotton, a brush roll, and a plurality of picker cylinders arranged to receive cotton from said brush roll and to eliminate the dirt from the cotton and discharge said cotton from said housing.

1,574,948. MEANS FOR CLAMPING FOCUSING DEVICES TO CAMERAS. FRANK TORKA, Port Townsend, Wash. Filed May 12, 1923. Serial No. 638,553. 4 Claims. (Cl. 95—44.)

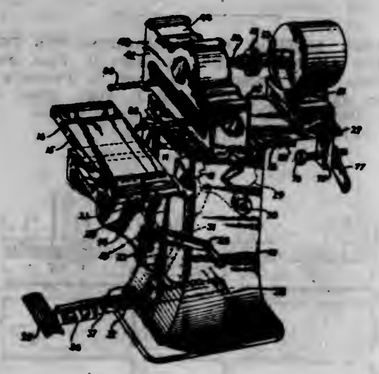


1. In combination, a guide member, a clamping jaw slidable in said member, a laterally projecting shelf toward which said jaw is movable to clamp the flat object thereagainst, a cam lever mounted on the jaw and laterally extending abutment on said guide against which the cam reacts to move the jaw toward the shelf.

1,574,949. METHOD OF AND MACHINE FOR TRIMMING ANIMAL HEADS. CHARLES H. VOGT, Philadelphia, Pa., assignor of one-third to Frederick A. Vogt and one-third to Gustav L. Vogt. Filed Aug. 28, 1920. Serial No. 406,649. 18 Claims. (Cl. 17—1.)

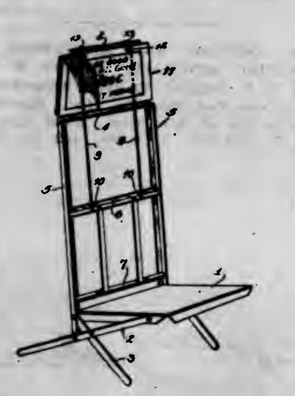
1. A machine for trimming animal heads comprising a link chain arranged to be moved slowly and continuously in a horizontal plane, means for driving said chain, and a series of impaling spikes individually secured at spaced intervals to links of said chain, said spikes extending vertically upward from said chain and adapted to have animal heads rotatably impaled thereon.

1,574,950. METHOD AND MECHANISM FOR DEHYDRATING MINERALS. WILLIAM R. WADE, Edwards, N. Y., assignor, by mesne assignments, of one-half to New York Zinc Co., Inc., Edwards, N. Y. a Corporation of New York. Filed Mar. 28, 1923. Serial No. 628,185. 7 Claims. (Cl. 34—7.)



1. The method of dehydrating mineral substances which comprises feeding them into a furnace flue communicating with a combustion chamber and containing hot gases of combustion and delivering a blast of air into said flue.

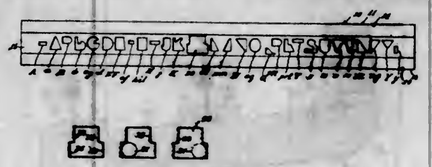
1,574,951. WOOD-BORING MACHINE. STEFAN WAGNER, Los Angeles, Calif. Filed June 22, 1925. Serial No. 38,652. 5 Claims. (Cl. 144—69.)



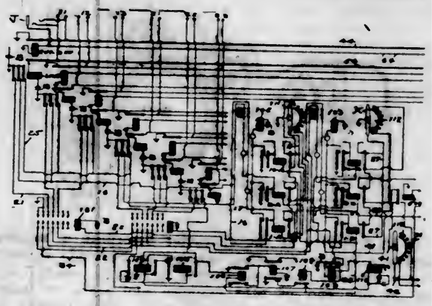
1. In a boring machine, a base having a slide movable thereon, a pair of chucks supported on said slide, a shaft for each chuck, a gear on each of said shafts,

an elongated gear engaging both of said first mentioned gears for simultaneously driving both of said chucks,

means to move said chucks toward and from each other along said elongated gear while said elongated gear and said chuck gears remain in engagement.



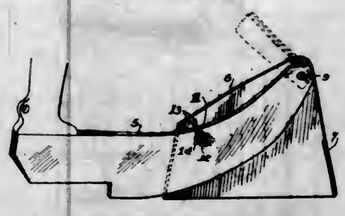
1,574,952. DISPLAY STAND. EDWARD B. WESTON, Dayton, Ohio, assignor to Weston Paper and Mfg. Co., Dayton, Ohio, a Corporation of Ohio. Original application filed Nov. 4, 1924, Serial No. 747,748. Divided and this application filed July 30, 1925. Serial No. 46,963. 2 Claims. (Cl. 40—102.)



1. A display stand, including a back frame having cross bars provided with vertical alined sets of openings, and an extension having rods slidable in the openings, one of the bars having sockets adjacent the openings for engagement by the ends of the rods when free from the openings to support the extension, in extended position.

1,574,953. LETTERING-GUIDE STENCIL. EDWIN C. WOOD, Boise, Idaho, assignor of one-fourth to William Vallentine Regan, Boise, Idaho. Filed Aug. 30, 1922. Serial No. 585,261. 4 Claims. (Cl. 33—174).

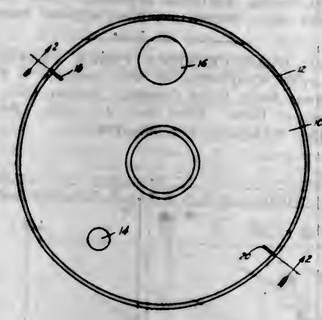
1. A stencil having cuts therethrough for forming letters or characters upon an underlying surface by marking means cooperating with the cuts, some of the cuts being designed for forming complete letters or characters and others of the cuts being designed as complemental parts for forming complete letters or characters, the stencil being provided with a spacing opening adapted to receive a spacing block for controlling the shifting of the stencil on the underlying surface for positioning the complemental cuts relative to each other for forming complete letters or characters.



1,574,954. TELEPHONE-EXCHANGE SYSTEM. JOSEPH L. WRIGHT, Cleveland, Ohio, assignor of one-half to Puget Sound Telephone Company, Everett, Wash., and one-half to Western Electric Company, Incorporated, New York, N. Y., a Corporation. Filed June 6, 1921. Serial No. 475,224. 6 Claims. (Cl. 179—27.)

2. In a telephone exchange system, the combination of two exchanges, operators' cord circuits at each exchange, trunk lines extending between said exchanges, primary and secondary relay switching means for extending calls to an operator's cord circuit at each exchange, primary and secondary means used at one exchange and secondary means alone at another exchange when calls are extended over said trunk lines.

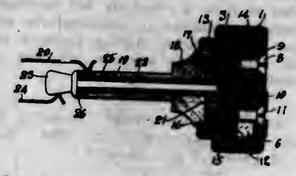
1,574,955. CORN PLANTER. GEORGE M. YACKLEY, Avoca, Minn. Filed June 15, 1925. Serial No. 37,248. 2 Claims. (Cl. 97—225.)



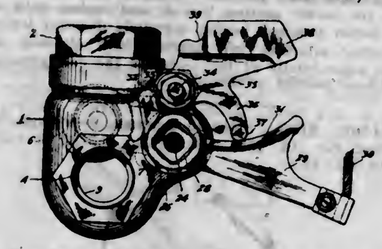
1. In a corn planter, a shoe having an aperture near its front end, a pivot therein, a deflector extending downwardly in the path of travel of the shoe and comprising a plate having apertures to receive the pivot, whereby the deflector is oscillatably connected to the shoe, the said deflector having a plurality of apertures near its rear end, said shoe having an open slot in its upper edge forming a seat with relation to which the apertures of the deflector may be adjusted, a friction disk bearing against the side of the shoe at the seat, and means carried by the deflector and lying in the seat of the shoe for engaging the disk and holding it in frictional engagement with the said shoe.

1,574,956. SLIP OR EXPANSION JOINT FOR CONCRETE PIPE. THOMAS DE LA MARE, Tooele, Utah. Filed Mar. 4, 1922. Serial No. 541,059. 14 Claims. (Cl. 72—58.)

1. A concrete pipe comprising a slip joint having sections embedded in the inner face of the concrete with portions extending radially to the outer face of the concrete, and other portions having parallel coacting surfaces permitting appreciable movement longitudinally.



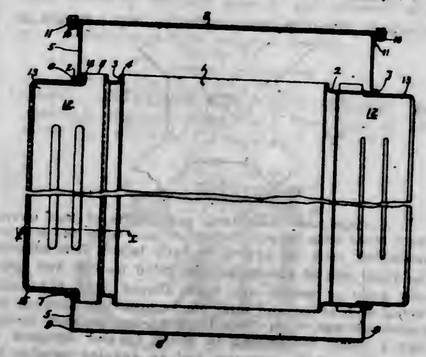
1,574,957. BRAKE. ADIEL Y. DODGE, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 17, 1925. Serial No. 50,658. 2 Claims. (Cl. 188—2.)



1. A backing plate for a brake constructed to be clamped by an anchor and by brake-applying means and radially slotted between the positions of the anchor and said means to prevent vibrations causing drumming.

1,574,958. RADIO APPARATUS. CHARLES W. DENNY, WILLIAM E. MCLAUGHLIN, and GEORGE HELWIG, Middletown, Ohio, assignors to The Barkelew Electric Manufacturing Company, Middletown, Ohio, a Corporation of Ohio. Filed Aug. 12, 1923. Serial No. 657,174. 4 Claims. (Cl. 173—324).

1. In a radio attachment for phone tips, a cup-shaped member for receiving phone tips, means in said cup-shaped member for retaining said tips in position, a second cup-shaped member mounted in the first, and means engaging both of said cup-shaped members for retaining them in engagement with one another, and means connecting said retaining means with said phone tips in circuit.



1,574,959. VALVE-MECHANISM CONTROL. JOSEPH W. DEARING, Cleveland, Ohio, assignor, by mesne assignments, to Springfield Lumber Company, Springfield, Ill., a Corporation of Illinois. Filed June 21, 1922. Serial No. 569,822. 6 Claims. (Cl. 251—18.)

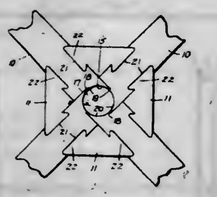
1. A valve mechanism control comprising the combination of a valve casing, a valve operating element adapted to turn therein, a double-armed member operatively connected with said element, and a weight movably connected with said casing, said weight adapted during movements of the parts from open to closed position to engage one arm of said member and thereby yieldingly hold the valve open until carried upwardly to its dead center position and thereafter adapted to fall upon the other arm of said member and thereby lock the valve against opening movement.

1,574,960. TRANSFORMER TANK. WALTER M. DANN and ALBERT T. CHADWICK, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 30, 1920. Serial No. 434,019. 7 Claims. (Cl. 257—191.)

5. A cooling system comprising a receptacle having enlargements at each of the ends thereof, a plurality of cooling elements disposed between said enlargements and

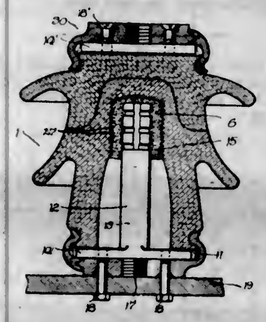
communicating therewith, said elements comprising a plurality of complementary members of dish-shape having extensions at each end thereof and adapted to be secured together to form a relatively flat envelope having tubular extensions adapted to communicate with said enlargements, said elements having portions extending beyond said enlargements whereby air may circulate freely therebetween.

1,574,961. CHAIN CONNECTER. SIGMUND FISCHER, Providence, R. I. Filed Feb. 12, 1924. Serial No. 692,246. 4 Claims. (Cl. 24—218.)



1. A chain connecter comprising a socket member having a stud gripping spring mounted therein, a stud member superimposed upon the socket member and having an enlarged head portion to snap through said spring into the socket portion beyond said spring, said stud and socket members having oppositely disposed laterally extending attaching eye members both disposed in a plane substantially at the center of the enlargement of said head portion of the stud.

1,574,962. RING. SIGMUND FISCHER, Providence, R. I. Filed Feb. 16, 1925. Serial No. 9,518. 2 Claims. (Cl. 63—16.)

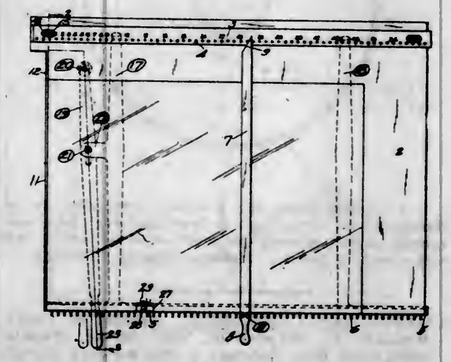


1. A separable ring comprising a band for encircling the finger, the end portions of the band being provided with cooperating snap fastenings for separably connecting them together, and a pocket formed in one of the fastening members for the reception of perfumed material.

1,574,963. CHAIR BASE. THOMAS W. FOOTE, Cleveland, Ohio. Filed July 6, 1925. Serial No. 41,579. 3 Claims. (Cl. 155—138.)

1. A chair base comprising a plurality of legs having their inner ends shaped to form a bore when the legs are assembled, each leg having on each lateral face adjacent the inner end of the leg an elongated mortise two opposite walls of which are hook shaped with the hooks facing each other, and filler blocks insertible between the assembled legs, each filler block having on each lateral face a tenon conforming in shape to and designed to engage one of the mortises and an angular member intermediate the tenons designed to project into the angular space between the inner ends of the side walls of the legs.

1,574,964. INSULATION EQUIPMENT. FRANK E. GETTS, deceased, late of Chicago, Ill., by Eva J. Getts, administratrix, Chicago, Ill., assignor to Electrical Engineers Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 21, 1918. Serial No. 255,184. 31 Claims. (Cl. 173—321.)



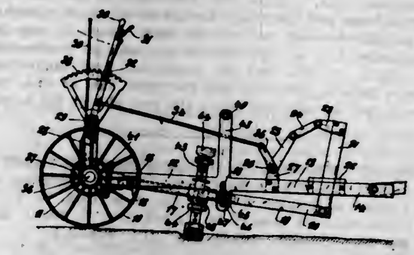
6. In combination, an insulator, a clamp engaging with said insulator, and a pin carried by said clamp engaging in a socket in said insulator.

15. In an insulator clamp for clamping over a bead on the end of an insulator, a first circumferential member lying above the bead, a second circumferential member lying below the bead, both members engaging said bead, said members being divided into two co-extensive segments having integral lugs for bolting the segments together, a bolt for each member in each lug, and operating means carried by the first member for providing a supporting surface.

17. In combination, an insulator, a supporting pin for said insulator, and a laterally extending arm on said pin adapted to engage in a cooperating depression in said insulator to reinforce the insulator.

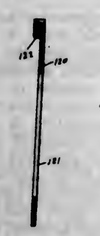
30. A petticoat insulator having under cut skirt portions and having duplicate grooves at both ends for engagement with interchangeable clamping means.

1,574,965. GLASS-CUTTER'S TABLE. LAWRENCE A. GROLEMUND, Charleston, W. Va., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Nov. 12, 1923. Serial No. 674,142. 6 Claims. (Cl. 33—180.)



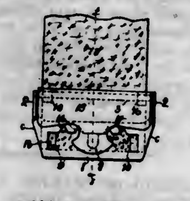
1. A glass cutter's table, comprising a plane sheet supporting member, a pair of parallel measuring bars movably mounted in the member adjacent opposite edges thereof, and means for simultaneously adjusting the bars.

1,574,966. OSMIUM ALLOY. ERNST HAAGN, Hanau-on-the-Main, Germany, assignor to the Firm W. C. Heraeus G. m. b. H., Hanau-on-the-Main, Germany, a Society of Germany. Filed Mar. 29, 1921. Serial No. 456,757. 8 Claims. (Cl. 75—1.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



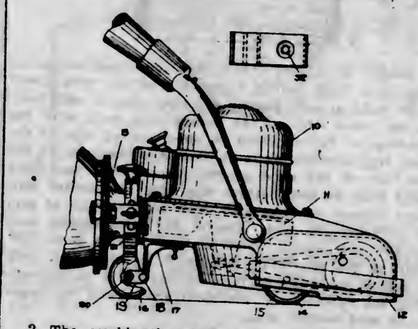
1. An alloy non-fibrous and of greater hardness than the natural osmium iridium alloy occurring in platinum ore, said alloy being composed of osmium and of two other metals of the platinum group, with the osmium present in a much greater proportion than in the aforesaid natural osmium iridium alloy and the remainder consisting of the two other metals of the platinum group in substantial amounts but one of said other platinum metals in a predominating quantity.

1,574,967. PLANT-TOPPING MACHINE. FRANK HAJOSI, Victoria, Tex. Filed June 3, 1925. Serial No. 34,688. 2 Claims. (Cl. 97—15.)



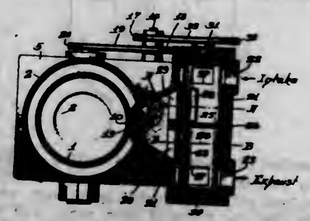
1. A plant topping implement comprising a frame having an axle and a pair of wheels at the rear, an inner frame pivoted within the first frame at a point in advance of the axle, means for adjusting the relative height of said frames, said means retaining their adjustments, means for guiding and limiting the movement of said inner frame; a shaft journalled lengthwise in the inner frame, a bevel gear fixed on said shaft, a mating gear keyed to slide on said axle, means to engage and disengage said gears, and a cutter head on said shaft having angularly disposed peripheral blades.

1,574,968. REENFORCED-FIBER DUST GUARD FOR AXLE BEARINGS. WILLIAM D. HAMERSTADT, Indianapolis, Ind. Filed Mar. 2, 1925. Serial No. 12,695. 1 Claim. (Cl. 286—6.)



A dust guard for truck axle journals, comprising a single ply of relatively rigid homogeneous fibrous sheet body centrally apertured for axle reception and having a top edge and sides, and a sealing strip integral therewith extending substantially across the sheet top from one side to the other thereof, and comprising a laterally projecting portion, a lateral extension thereof in spaced relation to the body, and another extension thereof lying parallel to the body and the lateral extension therebetween.

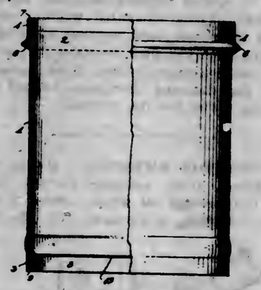
1,574,969. BUCKLE. WILLIAM E. HATHEWAY, Bridgeport, Conn. Filed Aug. 21, 1924. Serial No. 733,278. 2 Claims. (Cl. 24—191.)



1. An integral webbing holding sheet metal buckle frame comprising a floor, upturned ear and a lever supporting bar in spaced relation with the floor to form a slot, said floor having elongated webbing clamping sections pierced therefrom, said sections adapted to be temporarily offset from the floor to form a stop for the end of webbing, said sections having teeth formed on their inner edges and disposed therefrom toward the floor to form retaining claws for the webbing.

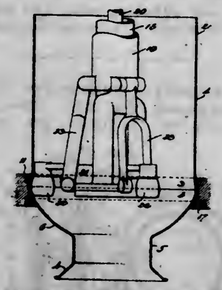
1,574,970. SUCTION SWEEPER. HENRY C. HETTELSATER, Canton, Ohio, assignor to The Hoover Company, a Corporation of Ohio. Filed Feb. 3, 1923. Serial No. 616,658. 4 Claims. (Cl. 15—16.)

2. The combination with a suction cleaner, having a nozzle of means for adjusting the nozzle height comprising a pivoted support member, an adjusting strap secured thereto, a second pivotally mounted member, adjusting means connecting said adjusting strap and said second pivotally mounted member and separate means for securing said adjusting strap and said second pivotally mounted means in adjusted position.



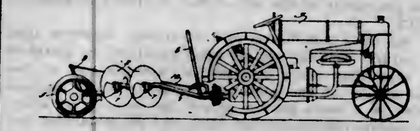
1,574,971. INTERNAL-COMBUSTION ENGINE. GEZA HORVATH, Highland Park, Mich. Filed May 31, 1921. Serial No. 473,795. 1 Claim. (Cl. 123—79.)

In an internal combustion engine, a cylinder having a combustion chamber, an auxiliary chamber in a plane below the combustion chamber of said cylinder and having



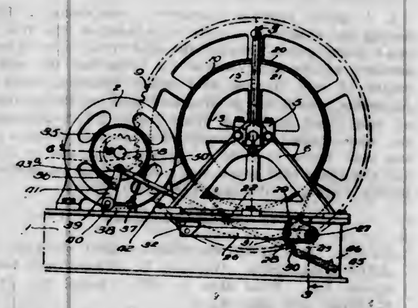
a passage to said combustion chamber, a tubular valve body of substantial length having intake and exhaust ports adjacent its ends and the ports from said auxiliary chamber intermediate its ends, all of said ports being in the same horizontal plane as said auxiliary chamber, and said auxiliary chamber having walls diverging from said passage towards said valve body so that the intermediate ports may both open into said chamber, and a pair of axially and integrally alined rotary valves in said valve body controlling the passage of fuel and burned gases to and from said auxiliary chamber through the ports of said valve body.

1,574,972. METHOD OF MAKING ICE-CREAM CONTAINERS. GEZA HORVATH, Detroit, Mich. Filed Nov. 23, 1922. Serial No. 602,713. 1 Claim. (Cl. 113—116.)



A method of making a container consisting in placing a body in a mold having a groove with the body covering the mold groove, placing a bottom ring in said body with the lower edge of the bottom ring flush with the lower edge of the body and an upper curved edge of the bottom ring terminating in substantially the plane of the lower edge of the mold groove, placing a bottom piece in said body on said bottom ring with an annular wall of said bottom piece parallel with that portion of said body covering the mold groove, and then forcing said body and the annular wall of said bottom piece outwardly at the groove of said mold to cause said body and bottom piece to conform in curvature to approximately the curvature of the mold groove and the upper edge of said bottom ring.

1,574,973. METHOD OF MAKING CONTAINERS. GEZA HORVATH, Detroit, Mich. Filed Nov. 23, 1922. Serial No. 602,714. 7 Claims. (Cl. 113—116.)

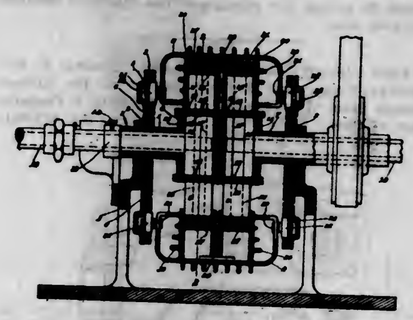


1. A method of assembling and uniting can parts, consisting in placing said parts in superposed abutting relation to form an uninterrupted inner wall, with a ring about the abutting edges of such parts, and then subjecting such parts to an internal pressure to anchor said parts in said ring and form an uninterrupted smooth interior can wall.

1,574,974. DISK PLOW. OTIS W. HOWARD, Moline, Ill., assignor, by mesne assignments, to Moline Implement Company, a Corporation of Illinois. Filed Sept. 16, 1922. Serial No. 588,702. 2 Claims. (Cl. 97—47.)

2. A frameless disk plow having a single beam carrying plowing disks, said beam being bent at an angle and having the disks on one of the arms of the angle, connecting means for connecting the front end of the beam to the draw bar of a tractor so that the beam may be supported directly by the tractor, said means including pivotal connections which permit the beam to move relative to the tractor about both a vertical and a horizontal axis, a crank axle journalled to the rear end of the beam and carrying a ground wheel, a lever mounted at the forward end of the beam where it may be manipulated by an operator on the seat of the tractor to which a plow may be connected, and connecting means between the lever and the crank axle to rock the crank axle to raise and lower the rear end of the beam.

1,574,975. BRAKE FOR MOTOR-OPERATED HOISTS. SIDNEY M. HUNN, Woodhaven, N. Y., assignor to Thomas & Buckley Hoisting Co., New York, N. Y., a Corporation of New York. Filed Aug. 5, 1924. Serial No. 730,230. 10 Claims. (Cl. 188—1.)



1. In a hoisting apparatus, a motor having a drive shaft, a hoisting cable drum, a driving connection between said drive shaft and the drum, a service brake adapted to be operated to prevent rotation of the drum, an emergency brake adapted to be operated to prevent rotation of the motor drive shaft, and brake operating means adapted to be shifted in one direction to apply the service brake the extent of said shift being limited by the service brake and said operating means being adapted upon a failure of said brake to be shifted further in the same direction and apply the emergency brake and hold the drive shaft against rotation, the said driving connection between the drive shaft and the drum being adapted to hold the drum against rotation when said shaft is held.

1,574,976. ROTARY ENGINE. WALTER M. INGRAM, Baltimore, Md. Filed Sept. 29, 1920. Serial No. 413,659. 6 Claims. (Cl. 103—161.)

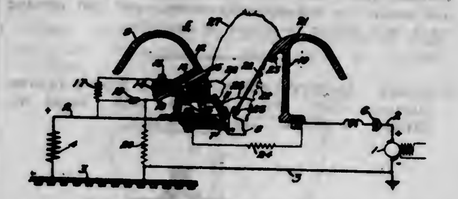
1. A rotary engine or pump including a rotating rigid piston member having a plurality of pistons rigidly connected to each other radiating from the axis of rotation

and a suitable bearing therefor, a cylinder co-operating with each piston to reciprocate relatively thereto and a cylinder carrier and pivotal means supporting each said

cylinder on said carrier, and a rotary bearing for said carrier, the carrier rotating about an axis eccentric as to the axis of the piston member.

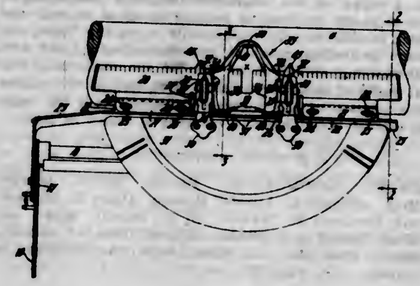
1,574,977. OUTBOARD-MOTOR MOUNTING. LOUIS J. JOHNSON, Mishawaka, and HARRY L. JOHNSON, Indianapolis, Ind., assignors to Johnson Bros. Engineering Corporation, South Bend, Ind. Filed June 16, 1924. Serial No. 720,817. 20 Claims. (Cl. 115—17.)

1. The combination with the stern of a boat having a recess therein extending entirely through the stern of the boat, of a drive motor mounted in said recess and maintained in relative relation to the boat upon variation of the draft of the boat.



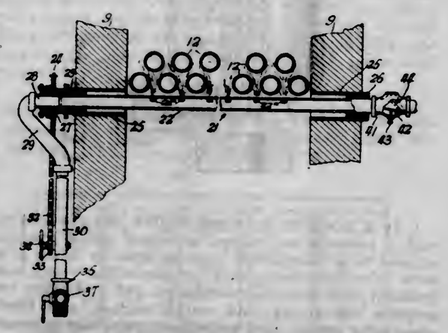
1,574,978. BARREL CLEAT. HENRY KIELBERG, Martins Ferry, Ohio, assignor to Wheeling Steel Corporation, Wheeling, W. Va., a Corporation of Delaware. Filed June 16, 1924. Serial No. 720,249. 3 Claims. (Cl. 217—89.)

2. In a sheet metal barrel cleat, a body of approximately angle-iron form designed for mounting with the edges of its side portions resting upon a barrel head, said side portions being oppositely inclined with respect to the barrel head and provided with nail holes adapted for the guidance of attaching nails into the barrel head in crossing relation.



1,574,979. CIRCUIT INTERRUPTER. JOSEPH W. LEGG, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 13, 1920. Serial No. 430,156. 12 Claims. (Cl. 175—294.)

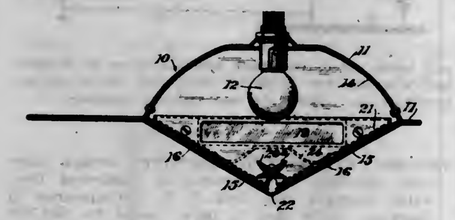
1. The combination with arc-forming terminal members, one of which is formed in two separate spaced parts that have insulation interposed therebetween, of a resistor disposed between the said parts of one terminal



and connected to the other terminal so as to be automatically inserted in circuit with the arc as the arc terminals move along the said terminal members.

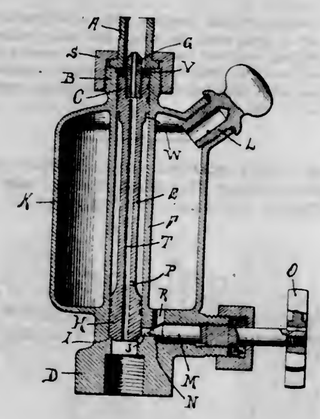
1,574,980. TYPEWRITING MACHINE. JOSEPH LINDBURG, Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 7, 1924. Serial No. 697,477. 23 Claims. (Cl. 197—135.)

1. In a typewriting machine, the combination with a platen, of a wing-scale adjacent the front thereof, said scale carrying resilient ears arranged to overlie the scale in spaced relation thereto, and pressure means engaging against said resilient ears and yieldingly pressing the scale toward the platen.



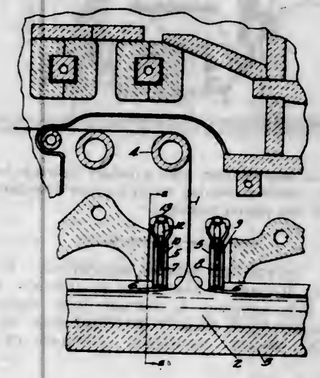
1,574,981. SOOT BLOWER. PAUL LIPPERT and JOHN S. DEAN, Chicago, Ill. Filed June 1, 1925. Serial No. 33,911. 14 Claims. (Cl. 122—392.)

1. A soot blower embodying therein, a blower element having a plurality of discharge orifices therein, and a discharge opening at one end, means for supplying a cooling medium to said element, said orifices and open-



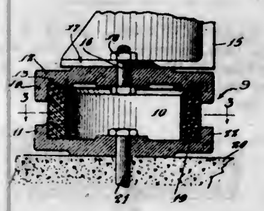
ing being so arranged that a portion of said cooling medium may discharge through said orifices and another portion thereof may discharge through said end opening, and means for automatically closing said end opening when said blower is placed in operation.

1,574,982. SAFETY LIGHT. WALKER BLAINE LISHER, Martinez, Calif. Filed June 11, 1923. Serial No. 644,546. 8 Claims. (Cl. 240—8.26.)



6. A light of the character described comprising a vertical shield or plate, a housing mounted thereon and having a substantially horizontally extending triangular portion projecting from one side thereof and fitted with light-emitting apertures in each of the converging vertical walls of said triangular portion and in the bottom and a portion of the housing projecting from the opposite side of the shield and carrying a source of light.

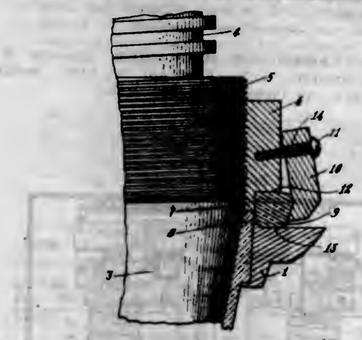
1,574,983. LUBRICATOR. ELIJAH MCCOY, Detroit, Mich., assignor to Armster Havard, Albert L. Stricker, and Margaret E. Warren, all of Detroit, Mich., and Alma Zienert and William Zienert, both of Jackson, Mich. Filed Mar. 12, 1924. Serial No. 698,607. 4 Claims. (Cl. 184—76.)



1. In a lubricator for steam engines, the combination with a lubricant cup having a central tubular portion adapted to be connected to a steam boiler by means of a main lubricator and a pipe for conducting steam and lubricant from said main lubricator, and a chamber for graphite surrounding said central portion, said lubricator being formed with an internal valve seat adjacent the lower end of the central tubular portion and with a passage connecting said chamber and the interior of the tubular portion just above the valve seat, a manually adjustable valve to control the effective area of said passage, and a dumb-bell piston valve mounted within said tubular portion and adapted to engage said valve seat, said valve being subject to said boiler pressure at its upper end, said valve having a central longitudinal passage to permit the passage of the lubricant received from said pipe.

1,574,984. DRAWING SHEET GLASS. THOMAS C. MCKINLEY, Charleston, W. Va., assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Nov. 5, 1923. Serial No. 672,801. 6 Claims. (Cl. 49—17.)

1. A cooler for use in sheet glass drawing apparatus comprising a hollow casing having a plurality of compartments, means for passing air through the compartment closest to the sheet being drawn, and means for passing a cooling fluid through the remaining compartments.



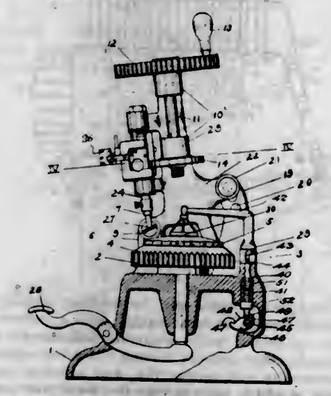
1,574,985. MOUNTING FOR VIBRATING MACHINES. EUGENE E. MCWAIN, Glendale, Calif. Filed July 2, 1924. Serial No. 723,704. 5 Claims. (Cl. 25—41.)

1. In a mounting for supporting a vibrating machine, the combination of a foundation, a block consisting of a hollow body having a substantially vertical peripheral wall composed of a resilient material, and a cap unconnected with the foundation seating on said body and having means for securing the same to the frame of the supported machine.

1,574,986. MOLDING MACHINE. CLIFFORD E. MANSIR, Cambridge, Mass., assignor to A. H. Hews & Co., Incorporated, Cambridge, Mass., a Corporation of Massachusetts. Filed Aug. 21, 1925. Serial No. 51,714. 9 Claims. (Cl. 25—26.)

1. A device of the class described, comprising a hollow mold member, a plunger member, one of said members being movable relatively to the other, a top-forming member movable with said plunger, and a wiper element actuable to remove the material extruded between the

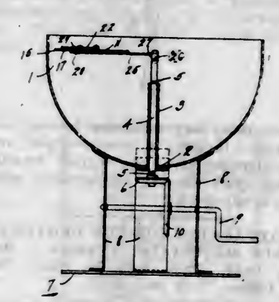
top-forming member and the mold, said wiper element comprising a block of soft material, and means for clamping said block against the top-forming member.



1,574,987. METHOD OF PRODUCING PURIFIED SULPHUR. CARL MARX, Wyoming, Milburn Township, Essex County, N. J., assignor to Union Sulphur Company, a Corporation of New Jersey. Filed Dec. 19, 1922. Serial No. 607,897. 3 Claims. (Cl. 23—227.)

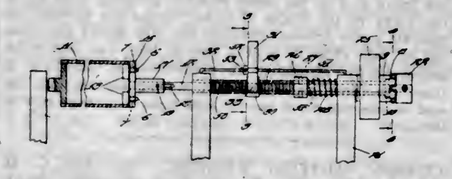
3. A process for the recovery of sulphur from sulphide ores comprising distilling the sulphide ores under a high vacuum to liberate sulphur vapors and condensing such vapors.

1,574,988. METHOD OF PRODUCING PURIFIED SULPHUR FROM IMPURE SULPHUR OR ORES CONTAINING THE SAME IN ELEMENTAL FORM. CARL MARX, Wyoming, Milburn Township, Essex County, N. J., assignor to Union Sulphur Company, a Corporation of New Jersey. Filed Dec. 19, 1922. Serial No. 607,898. 4 Claims. (Cl. 23—227.)



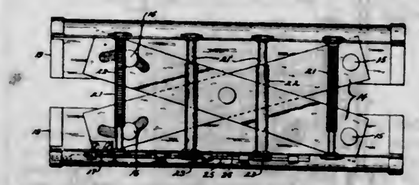
4. A process for the recovery of sulphur from ores containing the same in elemental form comprising distilling the sulphur from the ore under a high vacuum, passing the vapors into a connected vacuum receiver and condensing said vapors.

1,574,989. LENS CUTTER. ALBERT E. MAYNARD, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Oct. 28, 1919. Serial No. 333,990. 11 Claims. (Cl. 33—28.)



1. In a lens cutter, the combination with a base bearing a lens support, of a slide carried by the base, a cutter head carried by the slide a former and a cutter on the cutter head, having its position controlled by the former, and means for synchronously rotating the former and lens support.

1,574,990. RIDING TOY. HASKELL K. MEACHAM, Lone Oak, Tex. Filed Sept. 8, 1925. Serial No. 54,899. 3 Claims. (Cl. 272—31.)

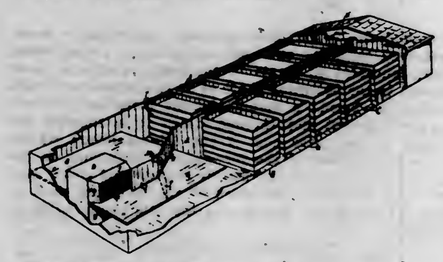


1. A device of the kind described, comprising a basin supported with its open side uppermost; an operating shaft journaled to rotate in the basin; a driving lever pivoted to the operating shaft so as to oscillate vertically within the basin; a riding element including a frame having a medial slot through which it is slidingly attached to the outer end of the driving lever; wheels pivotally attached at the forward and rear ends of the frame and adapted to operatively impinge and travel over the inner surface of the basin as the operating shaft is rotated; and means for causing the said operating shaft to rotate.

1,574,991. MACHINE FOR MAKING FIBER TUBES. CASPER MEHLUM, Waltham, Mass. Filed July 29, 1925. Serial No. 46,920. 8 Claims. (Cl. 93—81.)

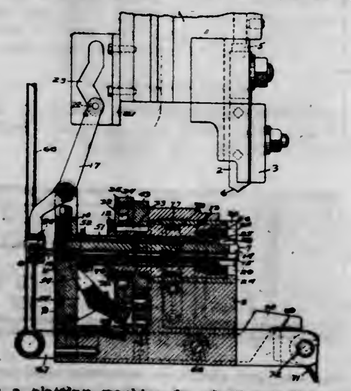
6. In a machine for making fiber tubes, a mandrel, a rotary shaft, a disk mounted on one end thereof and rotating therewith, a bearing which supports one end of said mandrel, said mandrel carrying at its other end pins which are adapted to engage with holes in said disk whereby the rotation of said shaft will rotate said mandrel.

1,574,992. LOOSE-LEAF BINDER. HENRY C. MILLER, Milwaukee, Wis. Filed Jan. 18, 1924. Serial No. 687,068. 11 Claims. (Cl. 129—13.)



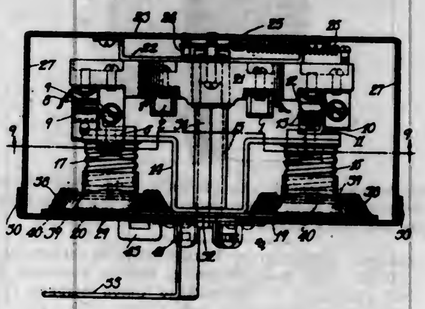
1. In a loose leaf binder, an extensible back, revolvable binding posts and means for simultaneously adjusting said back and revolving said binding posts.

1,574,993. BUS BAR. DOUGLAS F. MINER, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 24, 1920. Serial No. 412,529. 6 Claims. (Cl. 173—13.)



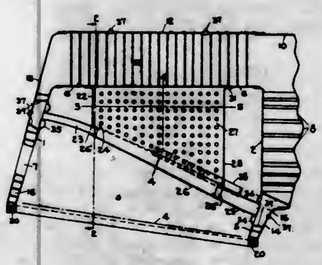
2. A substantially flat conductor having its opposed surfaces concave to form a cross-sectional area corresponding in distribution to the current densities determined by skin effect whereby substantially uniform current density is effected.

1,574,994. APPARATUS FOR THE DEHYDRATION OF VEGETABLE MATERIALS. CHARLES C. MOORE, San Francisco, Calif. Filed Feb. 14, 1925. Serial No. 9,261. 6 Claims. (Cl. 34—39.)



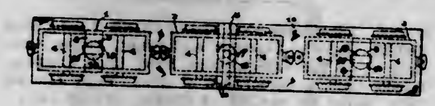
1. In a dehydration apparatus, the combination of a series of ricks of trays containing material to be dried by air that moves continuously through the spaces between the trays and in the same relative direction over all of the trays in the series of ricks, means for moving the said air under pressure through the said spaces and from one of said ricks to a next rick in line, and means for automatically reversing, at predetermined intervals of time, the direction of the said moving air through the said spaces and from one of said ricks to a next rick in line.

1,574,995. SLOTTING MACHINE. FERDINAND C. H. MÜLLER, Sandusky, Ohio, assignor, by mesne assignments, to Myer Prussian, Detroit, Mich. Filed Nov. 25, 1921. Serial No. 517,480. 7 Claims. (Cl. 10—72.)



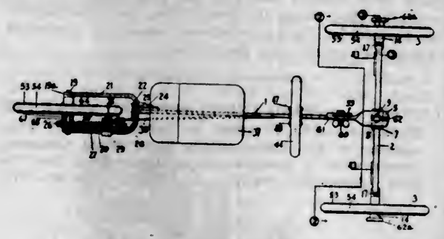
1. In a slotting machine for slotting hollow objects, a punch, a floating die coacting with the punch and located within the object, and means located within the die for ejecting the parts sheared from the object from within the die.

1,574,996. FUSE-SWITCH MECHANISM. THOMAS E. MURRAY, Brooklyn, N. Y. Filed Apr. 26, 1922. Serial No. 556,818. 12 Claims. (Cl. 200—114.)



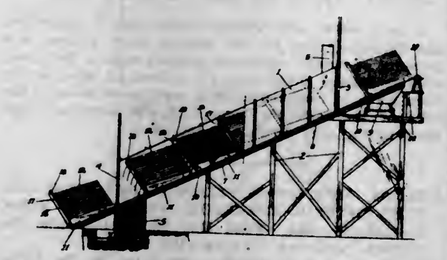
1. A fuse switch mechanism including in combination a pair of switch terminals, a movable bridge for connecting said switch terminals and adapted to be disconnected from both of them, fuse terminals, a casing for said mechanism having a cover with an opening and a plate overlying said switch terminals and movable with said bridge and adapted to close the opening in the cover when the switch terminals are connected and to open it and permit replacement of a fuse when the switch terminals are disconnected.

1,574,997. LOCOMOTIVE BOILER. JOHN L. NICHOLSON, Chicago, Ill., assignor to Locomotive Firebox Company, Chicago, Ill., a Corporation of Delaware. Filed Feb. 21, 1922. Serial No. 538,409. 4 Claims. (Cl. 122—68.)



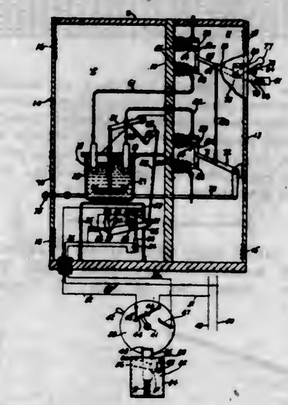
1. A locomotive boiler and its internal firebox having a fuel door therein in combination with a vertical longitudinally extending water steaming and circulating element therein, said element having a bottom which is inclined upwardly and rearwardly, and terminal neck portions, one of which extends into the front water space of the boiler and the other into the back water space above the fuel door, and said element at its top opening through the crown sheet of the firebox.

1,574,998. ARTICULATED ELECTRIC-LOCOMOTIVE-TRUCK STRUCTURE. ALBERT H. PENDLETON, Wilkinsburg, and CHARLES JABLOW, East Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 27, 1922. Serial No. 590,782. 5 Claims. (Cl. 105—175.)



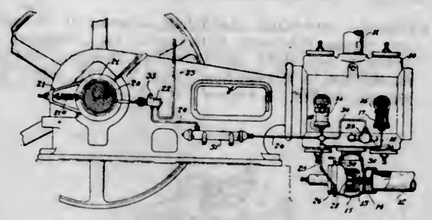
1. The combination with a plurality of articulated trucks, of a vehicle body supported thereon, a connection between the body and one of the trucks to permit relative lateral movement, and a connection between the body and other trucks to permit relative longitudinal movement.

1,574,999. WHEELED TOY. FERDINAND A. PFEIFER, Springfield, Ohio, assignor, by mesne assignments, to The Samson Manufacturing Company, Springfield, Ohio, a Corporation of Ohio. Filed Nov. 8, 1924. Serial No. 748,568. 21 Claims. (Cl. 208—34.)



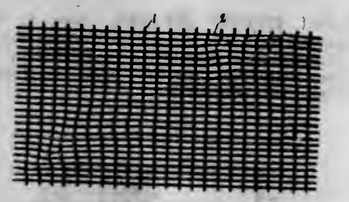
1. In a device of the character described, a longitudinal frame, a seat carried by said frame, a driving wheel supporting one end of said frame, means for actuating said driving wheel, an axle pivotally connected between its ends with the other end of said frame, and wheels carried by the respective ends of said axle, said axle and said frame having cooperating parts controlled by the weight on said frame to resist the movement of said axle about its pivotal connection.

1,575,000. DEHYDRATOR. BEN R. RAGAIN, Colusa, Calif. Filed Nov. 8, 1924. Serial No. 748,557. 8 Claims. (Cl. 34—47.)



1. A dehydrator comprising an inclined tunnel, elements for supporting individual and separated stacks of fruit trays disposed lengthwise in the tunnel, and means whereby air passing longitudinally between the trays of one stack will be caught by and caused to pass between the corresponding trays of the adjacent stack above.

1,575,001. CIRCUIT BREAKER. KARL C. RANDALL, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 20, 1921. Serial No. 481,546. 10 Claims. (Cl. 175—375.)

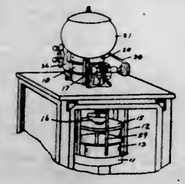


1. Switch mechanism comprising a circuit breaker, a disconnecting switch, a controller for the circuit breaker, means for locking the disconnecting switch in closed position, a locking means for the controller and means for actuating both of said locking means so interlocked with the controller that the actuating means is rendered inoperative to actuate the disconnecting-switch locking means while the controller is in a predetermined position.

1,575,002. COMPRESSOR REGULATOR. WARD RAYMOND, Easton, Pa., assignor to Pennsylvania Pump & Compressor Company, Easton, Pa., a Corporation of Pennsylvania. Filed Jan. 29, 1925. Serial No. 5,544. 4 Claims. (Cl. 137—142.)

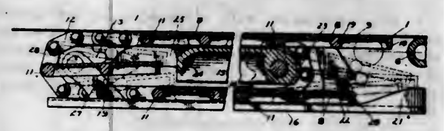
1. An unloader valve for a compressor comprising in combination, a body member, a valve therein movement of which controls the loading and unloading of the compressor, and two independent fluid inlet means to close said unloader valve, one of said means being operated by the speed of said compressor and the other controlled by the pressure of the compressed fluid.

1,575,003. NECKTIE-INTERLINING FABRIC. MAX RECHER, Browns Mills, N. J., assignor to Recher Bros. Ltd., New York, N. Y., a Corporation of New Jersey. Filed Sept. 12, 1925. Serial No. 56,087. 1 Claim. (Cl. 28—1.)



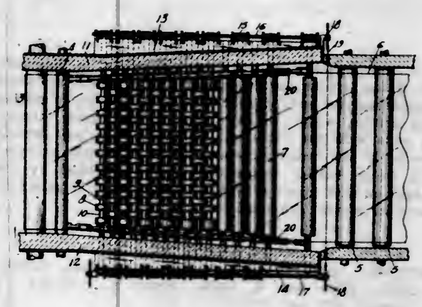
A necktie lining fabric composed of loosely woven normally twisted threads running in one direction and relatively closer woven normally twisted threads in the other direction whereby the fabric can stretch in one direction only, the surface of the fabric being processed to prevent the edges thereof from unravelling when said fabric is cut into strips.

1,575,004. SHOE AND METHOD OF MAKING SAME. GLENN W. ROBERTSON, Minneapolis, Minn. Filed Apr. 29, 1922. Serial No. 557,363. 7 Claims. (Cl. 12—142.)



1. The method of making a shoe which consists in first providing an integral blank adapted to form the sole and upper of a shoe, slitting the blank by two spaced slits forwardly extending from the rear edge of the blank to approximately the hollow of the shoe and thus providing the rear portion of the blank with two side parts and a sole, then turning the two side parts inside out and stitching their rear edges together, then inserting and stitching the edges of an elongated welt member to the blank edges formed by the slits while the parts are turned inside out, then turning the stitched welted blank inside in and inserting a heel element in the turned shoe substantially within the space afforded by the welt member, and finally lasting the shoe to form.

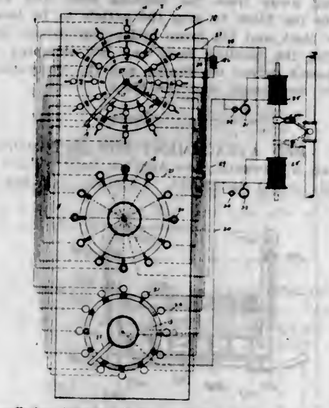
1,575,005. POP-CORN MACHINE. GEORGE H. ROSSEBO and HOMER WALTMAN, Indianapolis, Ind., assignors to Holcomb and Hoke Manufacturing Company, Indianapolis, Ind., a Corporation. Filed Feb. 21, 1925. Serial No. 10,888. 5 Claims. (Cl. 53—4.)



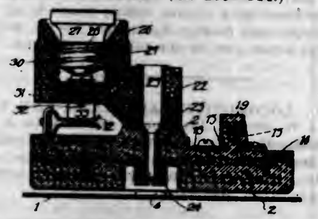
1. In a popcorn machine having a casing and a corn hopper supported thereon, a rotatable dispensing member associated with said hopper, ratchet teeth positioned about the periphery of said member, a pawl positioned to engage said ratchet teeth for causing the rotation of said member, a star wheel operably connected with said pawl, a gear having pins thereon for engaging the said star wheel and causing the rotation thereof, and means for driving said gear, whereby said member will receive a timed and relatively slow rotary movement through said star wheel.

1,575,006. DRAWING AND FLATTENING TABLE FOR SHEET GLASS. CLIFFORD A. ROWLEY, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Jan. 25, 1924. Serial No. 688,357. 5 Claims. (Cl. 49—17.)

1. A drawing and flattening table for sheet glass, comprising an upper stationary table and a lower stationary table, the tables each having upper flat horizontal supporting surfaces, a series of flat sheet-supporting plates, and means for moving the plates successively along the upper table beneath and with the glass sheet, and then returning them along the lower table, the sheet-supporting surfaces of the plates always remaining uppermost, and out of contact with the tables.



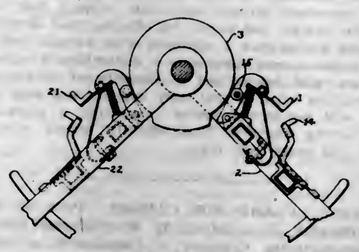
1,575,007. DRAWING AND FLATTENING TABLE FOR SHEET GLASS. CLIFFORD A. ROWLEY, Toledo, Ohio, assignor to The Libbey-Owens Sheet Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Jan. 30, 1924. Serial No. 689,398. 10 Claims. (Cl. 49—17.)



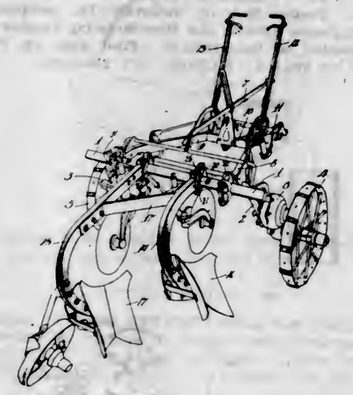
1. In a sheet glass drawing apparatus, a supporting and flattening table for the moving sheet, formed of a plurality of closely positioned parallel rollers, the upper sheet-supporting surfaces of the rollers all lying in the same plane, in combination with continuous means at the sides of the table for supporting and drawing longitudinally the edge portions of the sheet.

1,575,008. PROCESS OF STEAMING DRY KILNS AND TIME CONTROL THEREFOR. FREDERICK W. RUBIN, Indianapolis, Ind. Filed May 15, 1924. Serial No. 713,601. 4 Claims. (Cl. 34—19.)

3. The process of steaming dry kilns in the drying treatment of lumber from a source of steam supply consisting of electrically controlling the discharge of steam from said supply by turning it on or shutting it off, providing a remotely positioned electric time controlled switch and manually setting said switch so as to actuate the discharge of steam from said source of supply for turning the same on for given periods of time and turning it off for intermediate periods of time determined by the manual positioning of the switch irrespective of the relative humidity of the kiln.

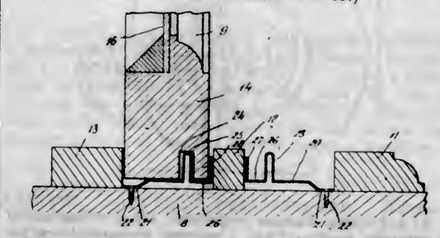


1,575,009. FUSE AND CUT-OUT MECHANISM. ALBERT B. RYPINSKI, Laurelton, N. Y., assignor to Thomas E. Murray, Brooklyn, N. Y. Filed May 16, 1924. Serial No. 713,663. 5 Claims. (Cl. 200—114.)



1. A cut-out mechanism including in combination a base block and a rocking arm mounted on said block and comprising in an integral structure of insulating material a pivoted hub and a fuse socket said hub being pivoted about an axis transverse to the face of the base block.

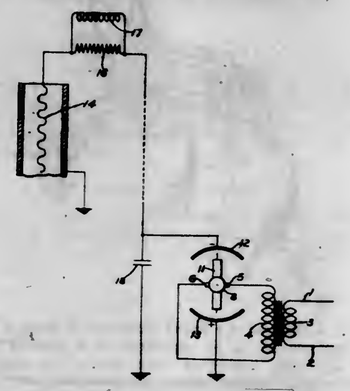
1,575,010. LIMIT SWITCH. GEORGE B. SCHEER, Berkeley, Calif., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 29, 1922. Serial No. 557,484. 5 Claims. (Cl. 200—87.)



1. A reversing limit switch comprising a plurality of movable members, an operating cam therefor, electromagnetic means for rendering said cam effective to actuate said members, means for advancing the operation of said movable members, and means for restoring said members to their original positions independently of said operating cam, when said electromagnetic means is inoperative.

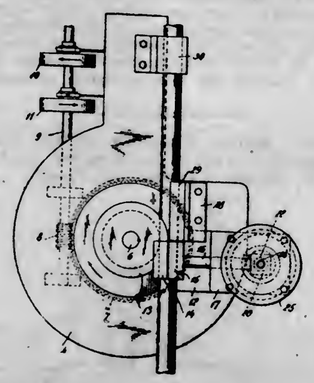
1,575,011. AGRICULTURAL TOOL. JOHN P. SEAHOLM, Moline, Ill., assignor, by mesne assignments, to Moline Implement Company, a Corporation of Illinois. Filed Feb. 24, 1923. Serial No. 621,068. 1 Claim. (Cl. 97—197.)

In a connection for heavy agricultural tools, a square tool bar adapted to be supported by a wheeled carrier, said bar being positioned with two of its edges in a substantially vertical plane, a relatively narrow rectangular plow beam for carrying a plow body, said beam being positioned with its greatest width in a vertical plane and having one end forged to provide a bearing of greater width than the beam, said bearing having a horizontally extending, V-shaped notch in its face so that the bearing will fit onto two sides of the tool bar, ears formed on the bearing, one projecting upwardly and the other downwardly, a complementary clamping member having a V-shaped notch for fitting on the sides of the bar opposite to the bearing, said clamping member having one ear projecting upwardly and another projecting downwardly, the V-shaped notches in the bearing and the clamping member being of such depth that the bearing and clamping member are separated a substantial distance from one another, a bolt for connecting the ears of the bearing and of the clamping member above the tool bar, and a second bolt for connecting the ears of the bearing and the clamping member below the tool bar, whereby the beam is tightly clamped against the bar.



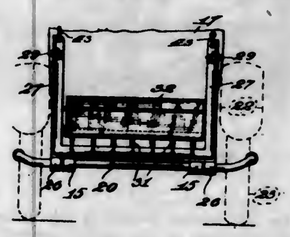
1,575,012. METAL WEATHER STRIP. GEORGE R. SIEFKEN, New York, N. Y. Filed Feb. 11, 1924. Serial No. 691,949. 6 Claims. (Cl. 20—69.)

1. The combination of a window frame provided with a channel, a sash having a side member entering the channel, this side member having a groove formed length-



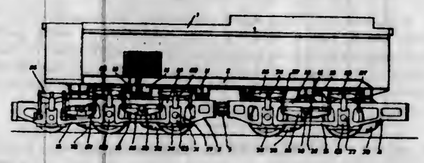
wise in its outer face, and a strip lying in the channel and secured along one edge to the bottom of the channel, this strip having a lengthwise fold forming a tongue entering the groove in the side member and terminating beyond the tongue in a flat flange extending at an angle to the main body of the strip and lying between the side of the channel and the side of the side member of the sash.

1,575,013. WIRELESS-INTERFERENCE PREVENTION. JOSEPH SLEPIAN, Swissvale, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 18, 1921. Serial No. 493,357. 5 Claims. (Cl. 250—16.)



1. A treater circuit comprising a treater, a source of high-potential alternating current, a rectifier in circuit between the source of high-potential alternating current and the treater, and a condenser connecting the circuit to ground adjacent the rectifier and between the treater and the rectifier.

1,575,014. BENDING MACHINE. SAMUEL ARCHIBALD SNELL, Detroit, Mich., assignor to American Metal Products Co., Detroit, Mich., a Corporation of Michigan. Filed May 20, 1925. Serial No. 31,641. 7 Claims. (Cl. 153—40.)



1. A bending machine comprising the combination of a rotatable bending form, a movable clamping block for clamping a member to be bent to the bending form, and holding it at one point against movement relative to the form, a fluid pressure mechanism movable with the bending form and lying out of the plane of the latter, a connection between this mechanism and the clamping block through which the mechanism moves the block toward and away from the bending form and applies pressure to the block to grip the article to be bent between the block and the form, and power driven devices for rotating the bending form and the clamping block and the power driven mechanism and the connection between this mechanism and the block.

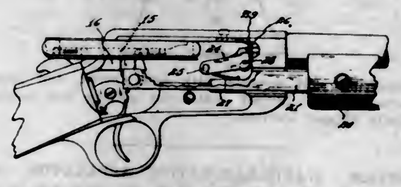
1,575,015. BED ATTACHMENT FOR AUTOMOBILES. EMANUEL A. SPENGLE, Los Angeles, Calif. Filed June 23, 1925. Serial No. 39,020. 4 Claims. (Cl. 293—55.)

1. The combination with an automobile and its rear axle, of a U-shaped frame secured to said axle and extending rearwardly thereof, a bumper secured to the rear portion of said frame and disposed transversely to the rear of the automobile body, a rectangular bed frame formed in two parts and hinged to each other so that one part may be folded flat against the other part, one end of the inner part of said folding frame being hinged to the bumper and folding legs hinged to the outer portion of the other part of the folding bed frame.

1,575,016. LOCOMOTIVE CAB FRAME AND TRUCK. NORMAN W. STOUMS, Pittsburgh, and HAROLD A. HOUSTON, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 19, 1922. Serial No. 589,086. 5 Claims. (Cl. 105—175.)

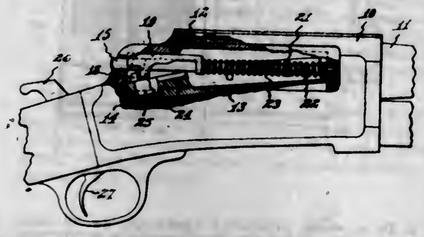
1. The combination with a vehicle-body support, of a plurality of wheeled trucks, means for effecting relative lateral movement between said trucks and relative pivotal movement between said body support and the respective trucks, and means for effecting load distribution on said trucks over a relatively wide surface area, said first-named means comprising a mallet-hinged connection between said trucks and a plurality of center-bearing connections between said body support and said trucks, and said last-named means comprising a plurality of side-bearing supports longitudinally spaced along the body and truck side frame.

1,575,017. CLAMP FOR CABLES. PAUL G. SWARS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 29, 1924. Serial No. 702,709. 8 Claims. (Cl. 24—126.)



2. In a cable clamp, the combination with clamping jaws for clamping a cable, of a tubular member in which

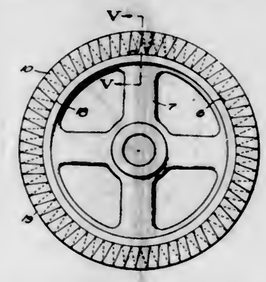
the inner wall of one section forms a tapered socket for the clamping jaws and a portion of the inner wall



of the remaining section is offset to form a supporting surface for the cable in line with one side of the inner surface of the clamping jaws.

1,575,018. FIREARM. CARL G. SWEBILIUS, New Haven, Conn., assignor to The Marlin Firearms Corporation, New Haven, Conn., a Corporation of Delaware. Filed Dec. 3, 1921, Serial No. 519,643. Renewed Nov. 17, 1925. 15 Claims. (Cl. 42—16.)

1. In a gun, a receiver having a slot, a reciprocable breech bolt therein, movable means to support a cartridge inserted through said slot in position to be chambered by said breech bolt, and a spring in said receiver adapted to be engaged by a cartridge on said supporting means.



1,575,019. FIREARM. CARL GUSTAF SWEBILIUS, New Haven, Conn., assignor to The Marlin Firearms Corporation, New Haven, Conn., a Corporation of Delaware. Filed Apr. 4, 1922, Serial No. 549,412. Renewed Nov. 17, 1925. 15 Claims. (Cl. 42—16.)

15. In a firearm, a breech bolt, a locking bolt pivoted thereto, and reciprocable inertia means for momentarily preventing the rotation of said locking bolt after the firing of said firearm.

1,575,020. COMPOSITE GEAR. GEORGE S. TURNER, Edgewood Park, and BENJAMIN J. GUDOR, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 23, 1921. Serial No. 454,732. 4 Claims. (Cl. 74—28.)

1. A method of forming composite articles which comprises providing a strip of fibrous material impregnated with a binder, said strip having wide and narrow portions, folding said strip on its wide and narrow portions to form a flat helix of contiguous sections with corresponding folds on one side, disposing said helix around the outer periphery of a metallic member with

the narrow folds adjacent to its outer periphery and applying heat and pressure thereto to form a unitary mass.

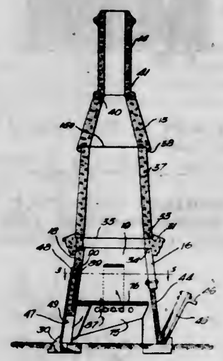
1,575,021. FILING DEVICE. PETER VAN VLISSINGEN, Chicago, Ill., assignor to Syco Systems Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 10, 1923. Serial No. 667,783. 10 Claims. (Cl. 129—16.)

1. A spacing device for filing cases or the like consisting of a soft rubber.

1,575,022. RESILIENT SHOE LACE. FRANK M. WAKIMOTO, Highland Park, Mich. Filed Feb. 5, 1925. Serial No. 6,962. 1 Claim. (Cl. 24—143.)

A fastener for shoes equipped with eyelets comprising a resilient lace adapted to be threaded through the eyelets and carrying at each extremity a tip having a cylindrical portion adapted to be clamped upon the end of the lace and a loop portion in substantial alignment with the cylindrical portion but projecting beyond the clamped portion of the lace for the purposes described.

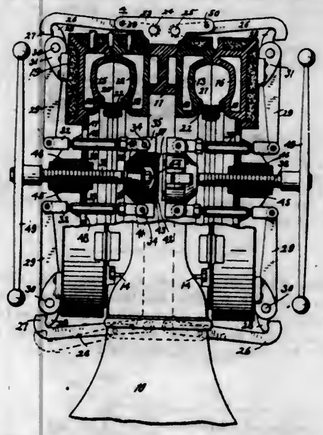
1,575,023. GOLF-CLUB STRAIGHTENER. JACKSON WALTON, Toronto, Ontario, Canada. Filed Feb. 27, 1923. Serial No. 621,662. 1 Claim. (Cl. 273—77.)



A golf club straightener comprising a cylinder having a plurality of longitudinal grooves formed in its surface, each groove being angularly shaped and adapted to

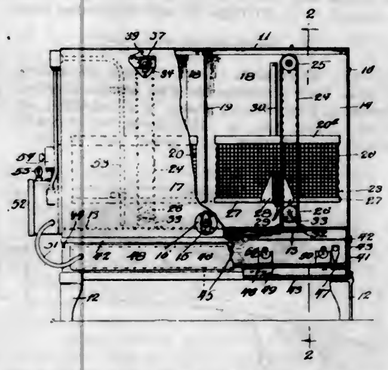
receive the shaft of a golf club so that the shaft projects beyond the perimeter of the cylinder and adapted to engage the shaft along two lines longitudinally of

the groove, and a plurality of flexible elastic binders for applying pressure, at several places to the shafts in the grooves.



1,575,024. INCINERATOR. FREDERICK J. WEBER, Los Angeles, Calif. Filed Oct. 29, 1923. Serial No. 671,347. 7 Claims. (Cl. 110—18.)

1. In an incinerator, a combination of: side walls defining a fire chamber; a grate disposed across said chamber at an intermediate level; and a member U-shaped in horizontal outline and provided with perforations in its upper part, said member forming V-shaped air passages between a draft opening in the lower portion of said chamber and a central space beneath said grate, whereby air for sustaining combustion is conveyed, by way of said V-shaped passage and by way of said perforations, into contact with the material on said grate.

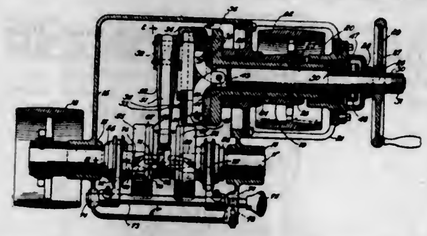


1,575,025. TIRE MOLD. THOMAS H. WILLIAMS, Akron, Ohio, assignor to The Akron Rubber Mold & Machine Company, Akron, Ohio, a Corporation of Ohio. Filed Oct. 12, 1925. Serial No. 61,906. 4 Claims. (Cl. 18—38.)

1. In apparatus of the class described, the combination of a stationary mold section, a mold section hinged thereto, a plurality of links carried by said stationary section around the periphery thereof, levers fulcrumed on said hinged section and adapted to engage said links, a floating member arranged within said sections, links

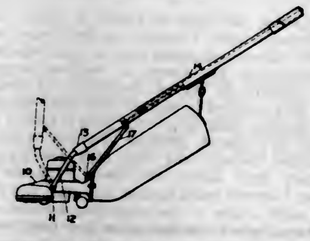
connecting said member with said levers, and means carried by said hinged section for moving said member axially of said sections.

1,575,026. WASTE-SATURATING APPARATUS. ANDREW D. WYCKOFF, Oak Park, Ill., assignor to Oil Products Appliance Co., Maywood, Ill., a Corporation of Illinois. Filed May 17, 1922. Serial No. 561,698. 2 Claims. (Cl. 91—46.)



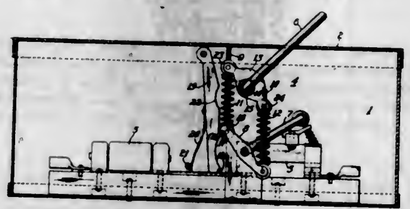
2. In a waste saturating apparatus, an oil tank, a partition therein and extending part way to the bottom of the tank from its top dividing it into two communicating compartments, a cover for said tank, a waste receiving elevator in each compartment, elevator operating mechanism for each elevator, a heating chamber below the compartments and heating elements contained in said heating chamber.

1,575,027. VARIABLE-SPEED-TRANSMISSION MECHANISM. JOHN S. BARNES, Rockford, Ill., assignor to W. F. & John Barnes Company, Rockford, Ill., a Corporation of Illinois. Filed July 31, 1922. Serial No. 578,629. 8 Claims. (Cl. 74—53.)



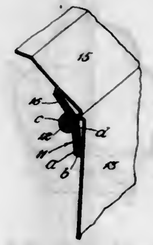
1. In a variable speed transmission mechanism, the combination with a driving element of a bearing block adjustable toward and away from the rotational axis

of said element, a counterweight slidably mounted on said element in diametrically opposed relation to said block, a toggle mechanism including a pair of links re-



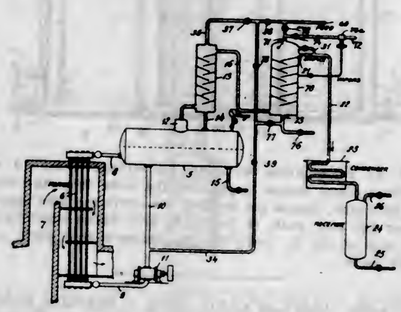
spectively connected to said block and counterweight, and means for actuating said toggle mechanism to effect concurrent movement of said block and counterweight toward and away from each other.

1,575,028. HANDLE. ALBERT H. BATES, Elgin, Ill., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio, a Corporation of Ohio. Filed June 6, 1921. Serial No. 475,233. 4 Claims. (Cl. 306—18.)



1. A controlling handle for hand-propelled devices comprising a ball pivotally attached to the device and having a socket portion formed therein, a hollow handle member secured to the ball, a member slidably mounted in the interior of the handle, a link pivotally secured to the device and to the slidable member, means mounted on the handle acting normally to lock the slidable member for all positions of the handle, and means adapted to hold said locking means in a non-locking position.

1,575,029. SWITCH MECHANISM. HAROLD G. BAXTER, Baldwin, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 17, 1920. Serial No. 381,914. 4 Claims. (Cl. 200—70.)

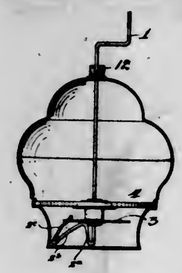


1. A quick-acting switch mechanism for a switch comprising an operating handle, a plurality of separate resilient members alternately energized thereby, a cam member for actuating the switch, and a latching member for precluding the actuation of the switch until the resilient members have been energized to a predetermined degree.

1,575,030. METHOD OF MAKING HOOD HINGES FOR AUTOMOBILES. GUIDO G. BEHN, Detroit, Mich. Original application filed July 3, 1920, Serial No. 393,797. Divided and this application filed Oct. 8, 1923. Serial No. 667,147. 2 Claims. (Cl. 29—11.)

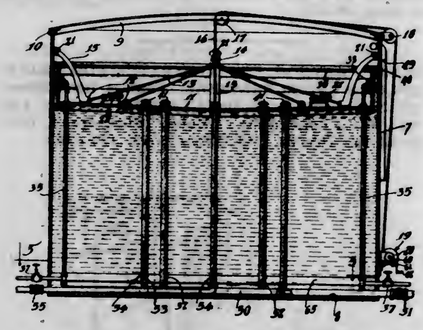
1. The method of hinging automobile hood members and the like which consists in providing a hinge member having a tubular pintle receiving portion and a leaf portion, securing an edge portion of a hood member to the outer side of the leaf portion of said hinge member, and then folding said hood member upon itself along a line parallel with and adjacent to the tubular portion of said hinge member.

1,575,031. METHOD AND APPARATUS FOR CRACKING OILS UNDER PRESSURE. JOHN E. BELL, Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill., a Corporation of Maine. Filed Apr. 1, 1924. Serial No. 703,339. 19 Claims. (Cl. 196—49.)



1. The process of cracking heavier hydrocarbons under pressure, which comprises subjecting the hydrocarbons to a cracking temperature under pressure, subjecting the resulting vapors to a regulated condensation while under pressure, permitting uncondensed vapors to escape through a fixed orifice, and increasing and decreasing the condensation in the said regulated condensation with increase and decrease, respectively, of the pressure.

1,575,032. MUSICAL TOY. ELMER A. BENDIXON, Chicago, Ill. Filed Aug. 9, 1924. Serial No. 731,007. 8 Claims. (Cl. 84—92.)

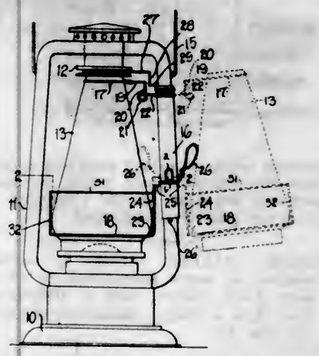


4. A musical toy comprising a metal housing having a flat bottom, a sheet parallel to said bottom and secured to said housing, a shoulder, a plate having a circular ridge and a plurality of reeds integral therewith, a washer and means for clamping said sheet, shoulder, plate and washer together, said means comprising a bushing, a

stem extending through said bushing and top of said housing, a handle on one end of said stem outside of said housing and a pick on the other end of said stem,

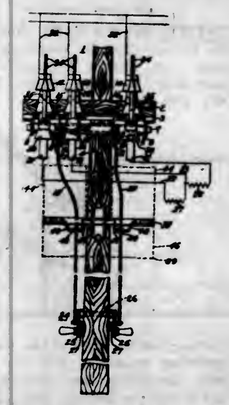
said pick being adapted to pick said reeds upon being revolved in either direction, said handle and said pick being integral with said stem.

1,575,033. STORAGE TANK. JAMES BOWN, Death Valley, Calif. Filed Dec. 11, 1923. Serial No. 679,958. 9 Claims. (Cl. 220—26.)



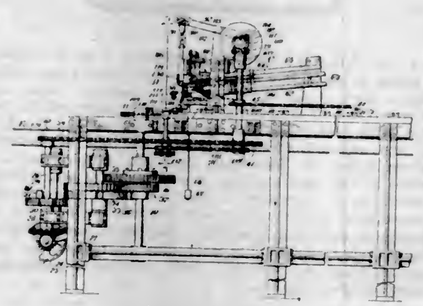
1. In combination with an oil storage tank, an oil surface plate, means to position the plate from the sides of said tank, means for holding the surface plates spaced from the side walls of the tank, and means controllable in case of fire to close the gap between said plate and said walls.

1,575,034. DISPLAY CARD. PAUL A. BRATTAIN, Seattle, Wash., assignor of one-half to Pliny T. Birchard, Seattle, Wash. Filed Sept. 30, 1925. Serial No. 59,446. 3 Claims. (Cl. 211—34.)



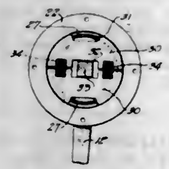
2. A display card for packages having a base section adapted to fold back and a hole cut in the main body of a shape to fit the package upon the outline formed by a diagonally intersecting plane which cuts across the top and bottom ends of the package inward from and adjacent to respectively the back and the front sides of the package, said hole having an extension which cuts into the base to thereby facilitate placing of the package in the hole.

1,575,035. LANTERN. CHARLES ARTHUR BREEN, Moose Lake, Minn. Filed Apr. 2, 1925. Serial No. 20,302. 1 Claim. (Cl. 240—31.)



A lantern including a frame, a sleeve mounted to slide thereon upon a portion of the frame, a vertically movable chimney engaging cap, an arm engaging the cap and embracing the sleeve, a member carried by the sleeve adapted to engage the base of a lamp chimney, and a loop adapted to embrace the upper terminal of the lamp chimney, said loop comprising a strand of material having its terminal portions extended laterally a predetermined distance and then bent downwardly at substantially right angles, the lower terminals of the depending portions being formed into coils and then extended at right angles to the depending portions and formed into loops, said loops embracing and freely engaging the sleeve.

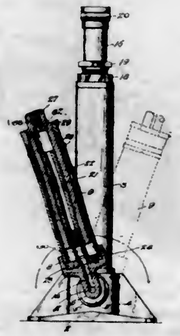
1,575,036. SWITCH MECHANISM. JAMES M. BROWN, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Original application filed June 9, 1920, Serial No. 387,626. Divided and this application filed Dec. 17, 1921. Serial No. 523,067. 2 Claims. (Cl. 200—50.)



1. The combination with a pair of independently operable switch members having axially aligned interlocked pivot members and manually operable to open and closed positions, of a switch member yieldingly retained in open position and movable to closed position by either of the first said switch members.

1,575,037. BAIL-PLACING MACHINE. GEORGE W. CHALMERS, Summit, and FRANK E. WILSON, Argo, Ill., assignors to International Patents Development Company, Wilmington, Del., a Corporation of Delaware. Filed Feb. 5, 1925. Serial No. 7,058. 55 Claims. (Cl. 140—93.)

1. A machine for placing bails on cans provided with bail-receiving ears, comprising a holder for a supply of bails, a conveyor for supporting the cans and moving them successively into position adjacent the bail holder, and means for moving and guiding a bail from the holder into engagement with the ears of a can.



1,575,038. WINDOW REGULATOR. ANGELO ROBERT CLAS, Toledo, Ohio. Filed Nov. 7, 1924. Serial No. 748,403. 9 Claims. (Cl. 192—8.)

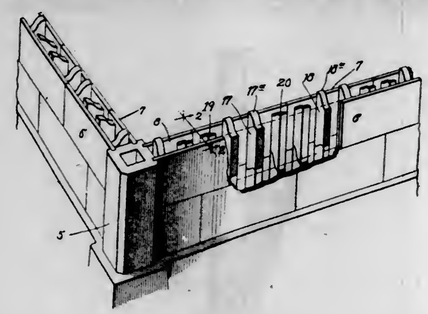
1. A brake comprising a bearing member having a cylindrical wall, a sectional disk normally bearing against said wall, a driving member having engagement with the disk sections near their peripheries, and a driven member having a cam fitting between the disk sections.

1,575,039. HYDRAULIC LIFTING JACK. WALTER J. COOPER, Cleveland, Ohio, assignor to Edward Umbstaetter, Cleveland, Ohio. Filed Mar. 14, 1924. Serial No. 699,176. 2 Claims. (Cl. 138—9.)

1. A hydraulic lift jack, comprising a pair of cylinders having a swiveled coupling provided with a passage for the transfer of a fluid from one cylinder to the other, operating and lift plungers in said cylinders, the operating plunger being a rotatable hollow screwthreaded member, a stationary hollow screw member extending into said operating plunger having a disk-shaped base and formed with an opening near said base and the cylinder

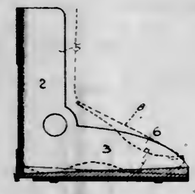
for the operating plunger being screwed in clamping engagement with said base to hold said screw member in a stationary and removable position upon said coupling.

1,575,040. FLAGPOLE. RUFUS M. CRUM, Wichita, Kans. Filed Sept. 3, 1925. Serial No. 54,330. 2 Claims. (Cl. 116—173.)



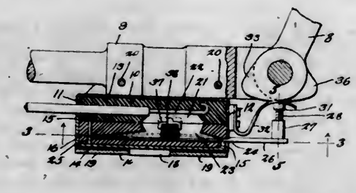
2. In a flag pole, a tubular base supporting member, said member having an opening in the side thereof, a notch in the top end of said member, the said notch functioning as a support, a flag pole positioned in the opening of said base support, the said pole being pivotally connected to the top end of said support and adapted to swing laterally, resting in said notch, an annular collar on the lower end of said pole, said collar functioning as a counter-balance and spacing means for the axial alignment of said pole to said base, an anchor bolt radially passing through said collar and said pole, an aperture through the wall of said base, the said bolt engaging through said aperture as anchoring means for said pole.

1,575,041. BUILDING CONSTRUCTION. FRANCISCO T. DA SILVA TELLES, Santos, Brazil. Filed July 18, 1922. Serial No. 575,904. 1 Claim. (Cl. 72—1.)



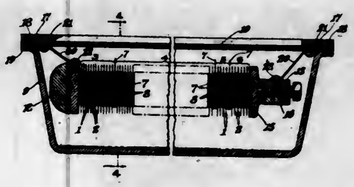
As a new article of manufacture, a building slab comprising a flat body substantially rectangular in configuration, similarly formed ribs extending inwardly from the

inner face of the body adjacent the end edges thereof, said ribs extending above and below the top and bot-



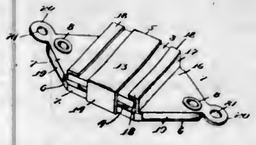
tom edges of the body, the extreme upper and lower ends of the ribs being partially cut away to provide reversely formed projections.

1,575,042. ANKLE BRACE. EDGAR M. DENNISTON, Burlington, Iowa. Filed Jan. 14, 1925. Serial No. 2,322. 3 Claims. (Cl. 128—80.)



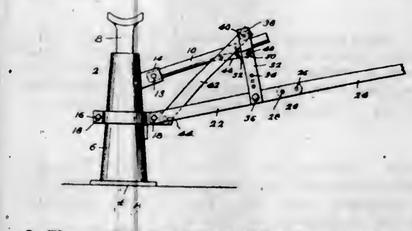
1. An ankle brace, including a body composed of an upright open-front portion having a rounded back and parallel sides and a horizontal open-top portion having parallel sides, and a removable floor strip fitting within and extending the full length of said body and having parallel sides and rounded ends and being reversible end for end.

1,575,043. SWITCH. PATRICK JOSEPH DEVER, Freeland, Pa. Filed July 3, 1924. Serial No. 724,063. 2 Claims. (Cl. 200—59.)



1. In combination with a spindle arm having oppositely disposed cams, pairs of wires providing lighting circuits, arms carrying contact members adapted to bridge the wires of the respective pairs of wires to complete circuits therethrough, said arms having tubular members adjacent to their outer ends, threaded members movable through the tubular members, spring arms contacting with the cams and engaged by the threaded members to adjust the arms with respect to the cams, and said cams adapted to operate to move the arms to move the contact members to their active positions.

1,575,044. ELECTRICAL CONDENSER. WILLIAM DUBILIER, New York, N. Y., assignor to Dubilier Condenser & Radio Corporation, a Corporation of Delaware. Filed May 24, 1921. Serial No. 472,105. 16 Claims. (Cl. 250—41.)



1. An electrical condenser comprising a stack having a series of conducting sheets alternating with larger thin and unitary dielectric sheets, the respective series of sheets above mentioned being disposed substantially in line, with each conducting sheet overlapped on all sides by the adjacent dielectric sheets, and the conducting sheets being all electrically isolated, and conducting plates at the opposite ends of said series of alternating sheets, which last-named conducting plates have circuit connections leading respectively thereto, to make up a condenser unit, and a sufficient number of said isolated sheets being employed in said unit to reduce the potential strain per dielectric sheet to a value below the brush discharge point.

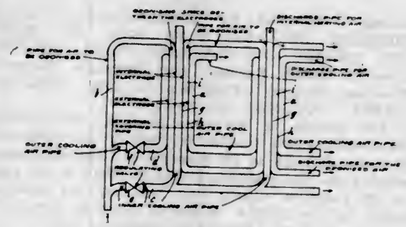
1,575,045. ELECTRICAL CONDENSER. WILLIAM DUBILIER, New York, N. Y., assignor to Dubilier Condenser and Radio Corporation, a Corporation of Delaware. Filed Feb. 14, 1924. Serial No. 692,869. 22 Claims. (Cl. 250—41.)

1. A condenser comprising a substantially rigid insulating plate having extensions, a body of dielectric and conductive elements, and fastening means affixed to said extensions and having portions overlapping the adjacent ends of the body and set to exert pressure upon said elements to enable said elements to be held tightly against said plate.

1,575,046. AUXILIARY LEVER ATTACHMENT FOR JACKS. GEORGE E. DYER, Kansas City, Mo. Filed June 12, 1925. Serial No. 36,700. 2 Claims. (Cl. 254—120.)

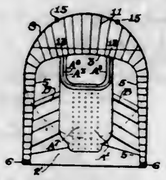
2. The combination with a lifting jack having actuating means including a main lever, of a bracket secured to the standard of said lifting jack, an auxiliary lever pivotally conected to said bracket, connecting bars extending upwardly from said auxiliary lever and operably connected to the main lever, links pivotally connected to the upper portions of said connecting bars and the bracket, a roller engaging the upper surface of the main lever and mounted on the pivot connecting the links and the connecting bar, a roller engaging the underside of the main lever, a spindle on which said roller is journaled, a pair of arms carrying said spindle at one end and pivotally connected at their opposite end to the links, and spring means connecting said arms and the links to yieldably hold the last mentioned roller in engagement with the main lever.

1,575,047. SHANK STIFFENER. GEORGE H. GILLIS, Brookfield, Mass. Filed Jan. 25, 1924. Serial No. 688,412. 3 Claims. (Cl. 36—76.)



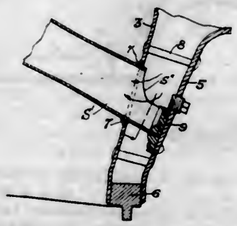
2. A metal shank stiffener for shoes, comprising a pair of supporting members, each of said supporting members being provided with a single integral fastening device at an end thereof, said shank support being interposed between the inner sole and outer sole of a shoe, and one of said fastening devices being driven into said outer sole and the other of said fastening devices being driven into said inner sole to hold said shank support in place.

1,575,048. ROTARY PUMP. OSCAR C. GOERIZ, Oakland, Calif. Filed Oct. 18, 1922. Serial No. 595,434. 8 Claims. (Cl. 103—90.)



1. In a turbine pump, a series of diffuser blades, a runner adjacent the same, said runner having a frusto conical hub and blades connected therewith, which blades have their surfaces adjacent the line of contact with said hub and their surfaces at their peripheries developed along different spirals, the blades having their intermediate surfaces merged from one curve into the other with gradual changes of direction, and a casing within which said runner rotates.

1,575,049. METHOD OF COOLING THE ELECTRODES IN OZONIZERS. REINHOLD GRAEF, Berlin, Germany, assignor to Aktiengesellschaft für Ozon Industrie, Berlin, Germany. Filed Feb. 10, 1925. Serial No. 8,309. 2 Claims. (Cl. 204—32.)

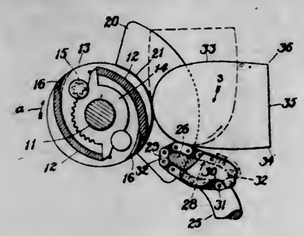


1. A method of cooling the internal and external electrodes in ozone generators, consisting in passing cooling air in two independently regulable streams along the internal and external electrodes, as set forth.

1,575,050. LOCOMOTIVE BOILER. CHARLES GILBERT HAWLEY, Chicago, Ill., assignor to Locomotive Firebox Company, Chicago, Ill., a Corporation of Delaware. Filed May 13, 1922. Serial No. 560,664. 3 Claims. (Cl. 122—71.)

1. In combination with a locomotive boiler and the firebox thereof, a water steaming and circulating element embodying, a tubular inclined bottom portion connected at one end to the flue sheet of the firebox and flat tubular side portions connected at one end to said inclined bottom portion and opening at their top ends through the crown sheet of the firebox.

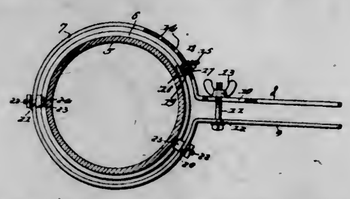
1,575,051. LOCOMOTIVE BOILER. CHARLES GILBERT HAWLEY, Chicago, Ill., assignor to Locomotive Firebox Company, Chicago, Ill., a Corporation of Delaware. Filed May 13, 1922. Serial No. 560,659. 4 Claims. (Cl. 122—68.)



1. A locomotive boiler firebox in combination with a substantially triangular thermic siphon or water-steaming wall forming a water passage between the throat of the firebox and the space above the crown sheet thereof, said siphon being structurally dependent from said crown sheet, and having a lower intake neck por-

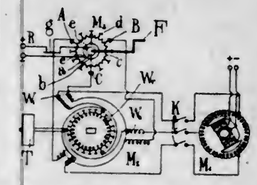
tion extending through the inner throat sheet, and a member on the inner surface of the outer throat sheet against which said neck portion has an end thrust bearing engagement as and for the purpose specified.

1,575,052. PROCESS OF MANUFACTURING THIN THREADS OF ARTIFICIAL SILK OF HIGHEST DEGREE OF FINENESS FROM VISCOSE. LEOPOLD HESSE, Barmen, and HERMANN RATHERT, Elberfeld, Germany. Filed Feb. 13, 1922. Serial No. 536,365. 10 Claims. (Cl. 18—54.)



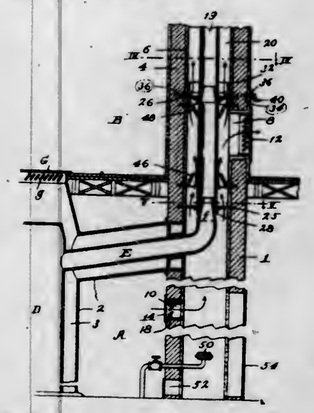
1. The process of producing artificial silk threads from viscose, which consists in treating alkali-cellulose with carbon-bisulfide in the presence of a reducing agent, dissolving the xanthogenate formed in alkali in the presence of reducing agents, and injecting the solution obtained into a solution of sodium sulphate containing comparatively large amounts of sulphuric acid.

1,575,053. MACHINE FOR OPERATING ON SHOES. JAMES R. HOOKE, Holbrook, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 6, 1921. Serial No. 475,288. 16 Claims. (Cl. 12—88.)



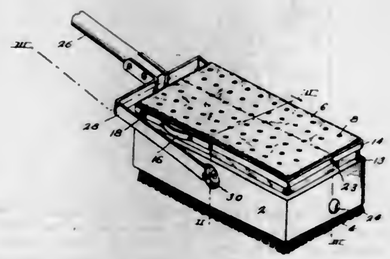
1. In a machine having a tool for operating on an article of work undergoing manipulation, a work-rest comprising a support having a traction surface, and a chain of which some of the links are arranged to slide on said surface and engage the work to support or brace the latter in cooperative relation to said tool, said chain being movable by the work as manipulation thereof requires.

1,575,054. CARBON REMOVER. THOMAS F. IBBETSON and THOMAS F. MORRISON, Chanute, Kans. Filed Mar. 30, 1922. Serial No. 548,095. 1 Claim. (Cl. 15—104.01.)



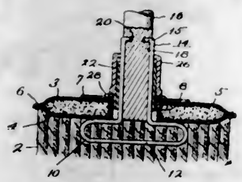
In a carbon remover, a substantially circular body of pliable material of greater diameter than a piston with relation to which it is to be manipulated, the said circular body having arms adapted to extend outwardly approximately parallel to each other to form a handle, the said body having apertures a plurality of which are in proximity to one of the arms, guiding members having shanks extending through certain of the apertures, and a carbon removing element comprising a head with one of its edges adapted to bear against the inner wall of a piston ring groove, a shank for carrying the head, the said shank being secured in one of the plurality of apertures near one of the handles and operative to tilt with the yielding of the pliable material constituting the circular body when pressure is applied to the handle in manipulating the remover.

1,575,055. DEVICE FOR THE DISTANT CONTROL OF A MOVABLE MEMBER. NICOLAS JAPOLSKY and MACHAEL KOSTENKO, London, England, and BORIS WORONOFF and CONSTANTIN SABANEEW, Petrograd, Russia. Filed June 9, 1924. Serial No. 718,901. 8 Claims. (Cl. 172—239.)



1. An installation for the distant control of a movable body, comprising a polyphase synchronous motor, driving means between said motor and the movable body, an alternating current commutator generator adapted to supply the full driving current to said motor, means for driving said generator at constant speed, a polyphase excitation winding on said generator, compensating means on the stator of said commutator generator connected with the rotor windings for compensating the effect of the rotor power current, an electric transmitter adapted to supply the currents to said polyphase excitation winding, a movable element forming part of said electric transmitter and adapted to be displaced by hand, and means within the electric transmitter whereby the position of the movable element of the transmitter controls the phase relations of the currents supplied to the excitation winding of the generator.

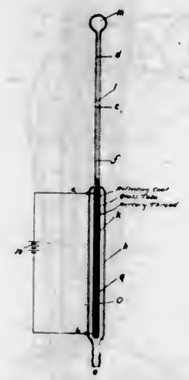
1,575,056. CHIMNEY. THEODORE G. JOHNSON, Kansas City, Mo. Filed Jan. 7, 1924. Serial No. 684,783. 1 Claim. (Cl. 98—30.)



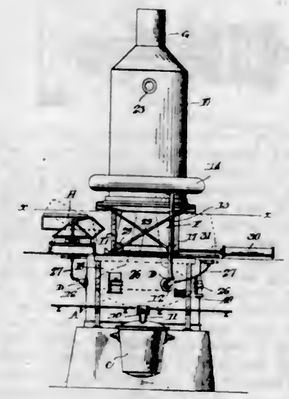
In combination a chimney having openings in its side for the passage of air, a smoke stack arranged within said chimney and spaced from the inner surface thereof to leave an intervening air shaft which communicates with said openings in the sides of the chimney and reversely disposed conical baffles extending around the smoke stack in the air shaft for directing the air therein toward and away from the smoke stack.

1,575,057. FLOOR DRESSING AND POLISHING DEVICE. THEODORE G. JOHNSON, Kansas City, Mo. Filed Apr. 18, 1924. Serial No. 707,425. 4 Claims. (Cl. 91—43.)

1. A device of the character described consisting of an open-bottom container, a handle to said container, a rubbing cloth stretched across said open-bottom and folded against the sides and ends of said container, a band fitting around said container to hold the folded portions of said cloth, and a retaining device mounted at each side of said band and having a terminal to enter a recess in the container and hold said band in position on said container.



1,575,058. MOP. THEODORE G. JOHNSON, Kansas City, Mo. Filed July 17, 1924. Serial No. 726,510. 1 Claim. (Cl. 15—153.)

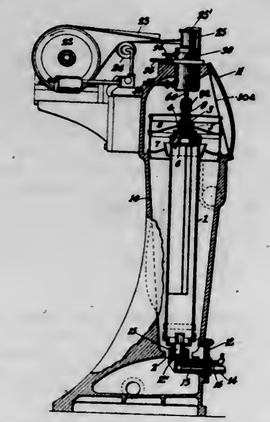


A mop consisting of folded mopping means, a handle, a supporting element having a loop arranged beneath the folded portion of said mopping means and arms extending upwardly through said folded portion and engaging said handle, a sleeve for securing said arms to the handle, a plate resting upon the folded portion of said mopping means, and clamp means threaded on said sleeve to draw said plate and said loop firmly into engagement with the folded portion of the mopping means.

1,575,059. DIRECT-INDICATING HIGH-VACUUM METER. JULIUS JONAS, Meierhof, and OSKAR SEITZ, Oberer Kappelerhof, Baden, Switzerland, assignors to Aktiengesellschaft Brown, Boveri and Cie., Baden, Switzerland. Filed Feb. 5, 1923. Serial No. 617,117. 7 Claims. (Cl. 73—31.)

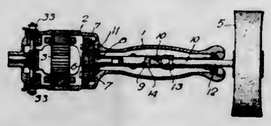
1. In an apparatus for measuring high vacua by direct indication, the combination with a mercury thermometer having a tubular mercury bulb, of a cylindrical enclosing tube fitted gas-tight upon, and surrounding said tubular bulb so as to leave an annular space between said enclosing tube and said tubular bulb, a tube connecting said annular space to the vacuum which is to be measured, and means for providing an approximately constant supply of energy for heating the mercury in said tubular bulb.

1,575,060. OPEN-HEARTH FURNACE. JAMES DYER JONES, Sault Ste. Marie, Ontario, Canada, and EARL EWING LITZ, Sault Ste. Marie, Mich. Filed Apr. 23, 1921. Serial No. 463,856. 3 Claims. (Cl. 263—15.)



1. In an apparatus of the character described, the combination with a furnace, of a regenerative stove and a removable throat of frusto-conical formation adapted to form a connection between the furnace and the regenerative stove, and designed exclusively for waste gases.

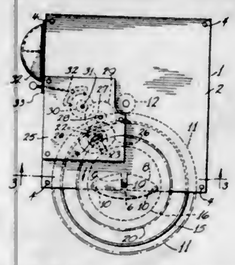
1,575,061. CENTRIFUGAL MACHINE AND PROCESS INVOLVING THE USE OF THE SAME. LEO D. JONES and ARTHUR U. AYRES, Philadelphia, Pa. Original application filed May 1, 1924, Serial No. 710,388. Divided and this application filed May 29, 1925. Serial No. 33,729. 45 Claims. (Cl. 233—13.)



1. In the centrifugal treatment of a substance the process which comprises subjecting the substance to the action of centrifugal force to effect a desired change in

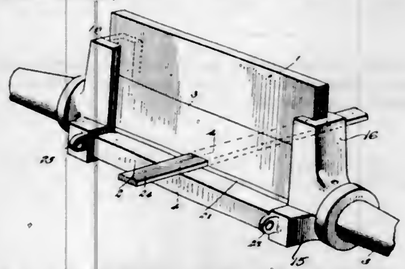
the substance and to discharge the substance in dispersed form from the influence of the centrifugal force, and suitably regulating the pressure of the atmosphere within

which the substance is so discharged to prevent undesirable alteration of the substance while it exists in the dispersed state in which it is discharged.



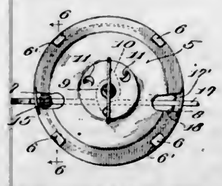
1,575,062. ELECTRICAL HAND POLISHING MACHINE. ERNEST F. KAISER, New York, N. Y. Filed Mar. 17, 1921. Serial No. 452,993. 2 Claims. (Cl. 15—23.)

1. A device as herein characterized and comprising a handle shaped tubular casing, an extension housing at one end of said casing, an electric motor housed within said housing, a driving shaft within said handle driven by said motor and supported within said handle at its front and rear ends, the front portion of said driving shaft being tubular and having a counter-bored square socket at its inner end, plate springs secured at one end to said driving shaft, balls mounted in the walls of the tubular front portion of the driving shaft and movable to project within the hollow thereof, said springs overlying and pressing upon said balls, a driven shaft carrying at its outer end a brush and mounted within the tubular front end of the driving shaft, the inner end of the driven shaft reduced and squared and fitted in the square socket within the driving shaft, a circumferential semi-circular groove being provided adjacent the inner end of the driven shaft receiving the said spring pressed balls whereby to form a detachable connection between said driving and driven shafts.



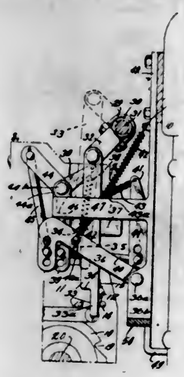
1,575,063. ALARM-CLOCK MECHANISM. ALBERT F. KENDLE, Syracuse, Nebr. Filed Mar. 27, 1925. Serial No. 18,831. 4 Claims. (Cl. 58—16.)

1. In a device of the type described a drive shaft, a gear loosely mounted on said drive shaft, a spring housing mounted upon said drive shaft and having a threaded connection with said gear whereby said housing will rotate said gear when said housing is rotated in one direction which will be released from said gear when rotated in the reverse direction, and a coil spring mounted within said housing and being adapted to rotate said housing so as to rotate said gear, said spring when breaking causing said housing to rotate in a direction to free the housing from the gear.



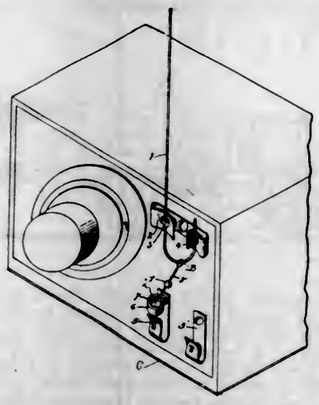
2. A device of the type described comprising a clock spring, a clock train operatively connected to one end of said spring, an alarm train, said alarm train having a stop member for preventing the normal operation of said train of alarm gears, means operatively connecting said alarm train with the other end of said spring, whereby said alarm train takes the place of the usual pawl and ratchet for preventing the unwinding of the spring, and means for permitting said alarm train connecting means to become disconnected from said spring when said spring is wound.

1,575,064. AXLE. FRANK MARION KENNEDY, Clarendon, Ark. Filed Sept. 1, 1925. Serial No. 53,933. 4 Claims. (Cl. 301—124.)



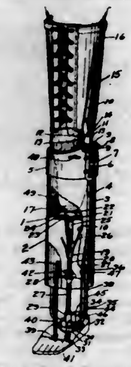
2. In a vehicle axle, a plurality of beams, of rectangular cross section arranged with their longer cross sectional dimensions in perpendicular relation, bearing members having sockets shaped to fit the ends of said beams, receiving the same, and a tie rod having a flat intermediate portion lying between said beams, and alined with the axes of said bearings, said tie rod being tensioned against said bearing members for securing them to said beams.

1,575,065. SPRING MOTOR. HARRY T. KINGSBURY, Keene, N. H. Filed Aug. 30, 1922. Serial No. 585,288. 7 Claims. (Cl. 185—45.)



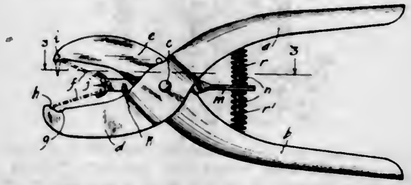
1. A spring motor, comprising a casing having a spring receiving chamber, a lateral rim carried by the chamber, a crown gear attached to the spring and resting on the rim, and a pinion gear carried by the casing and engaging the crown gear.

1,575,066. STARTER-PAWL TRIPPER FOR MAGNETOS. WILLIE E. LACEY, Royal, Iowa. Filed May 8, 1925. Serial No. 28,815. 8 Claims. (Cl. 123—149.)



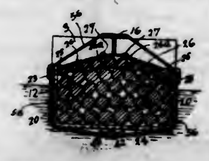
1. In combination with an engine, equipped with an impulse starter magneto, means for tripping the starting pawl of said magneto, said means comprising a frame supported on said engine, an arm clamped to the spark control mechanism of said engine, a bar pivoted to said arm, a shoulder on said bar for engaging a lever pivoted to said frame whereby movement of said spark control mechanism will move said lever for engaging said starter pawl.

1,575,067. FUNCTIONING PARTS OF MINERAL-TYPE DETECTORS. LEON B. LAMBERT, Wichita, Kans. Filed Feb. 17, 1925. Serial No. 9,792. 2 Claims. (Cl. 250—14.)



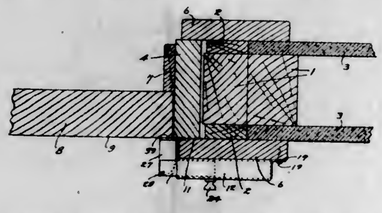
1. In the functioning parts of a mineral type detector radio set, the terminating end of the secondary coil having a return bend and firmly connected to the panel of the mineral set, said bend functioning as supporting means for the upper end of the contacting member, a contacting member having a loop on one end thereof, said loop adapted to engage on the bend of said terminating end of the said secondary coil, the oposite end being pointed and adapted to engage on a mineral detector, a weight intermediately positioned between said loop and point of said contacting member in combinatin with a rubber sponge cushion as support for said set as damping means.

1,575,068. ARTIFICIAL LIMB. THEODORE M. LAWRENCE, Seattle, Wash. Filed Aug. 20, 1924. Serial No. 733,042. 3 Claims. (Cl. 3—4.)



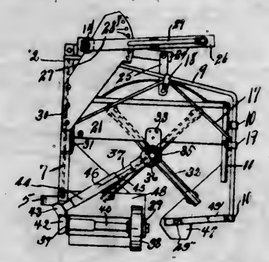
1. In an artificial limb a foot having adjustable features, a casing that may be placed around the limb, and a means for adjustably holding the casing to the foot; said casing having an adjusting disc with an adjustable center therein.

1,575,069. EAR-TAG TONGS. FRANK X. LENK, Portland, Oreg., assignor to Irwin-Hodson Company, Portland, Oreg. Filed Sept. 5, 1922. Serial No. 586,211. 7 Claims. (Cl. 128—331.)



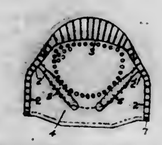
1. In ear-tag tongs of the character described, comprising pivotally connected levers having cooperating jaws each provided with a pocket for engaging the extremities of the arms of an ear-tag, thus to hold the latter against moving lengthwise in the jaws, and a centering arm extending between said jaws and provided at the extremity of such extension with a socket for receiving the heel of the ear tag.

1,575,070. LOG CARRIER. ALLAN WALTER LEWIS, Vancouver, British Columbia, Canada. Filed Dec. 3, 1924. Serial No. 753,698. 7 Claims. (Cl. 114—73.)



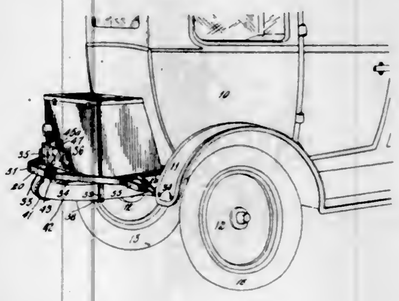
1. A log carrier comprising, a hull having an open hold extending throughout the major part of its length and water-tight compartments at its ends, adapted under water admission thereinto to sink to varying depths including total submergence of the hold while remaining buoyant, said hold having spaced channels extending transversely across but clear of the bottom of the hold and continued up the sides and over its opposite edges.

1,575,071. DOOR BOLT. AVIE JOHN LUMAN, Berkeley, Calif. Filed Feb. 24, 1925. Serial No. 11,253. 6 Claims. (Cl. 292—192.)



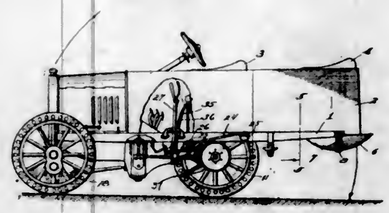
1. Locking means for a door having a casing framing the same and projecting beyond the plane of the closed door, comprising a guideway fixed to the casing adjacent the free end of the door and a bolt retractible therein having means associated therewith for turning the same around the edge of the casing into abutting relation with the face of the door when the bolt is projected.

1,575,072. INSECT-DESTROYING MACHINE. SAMUEL H. MANLY, Granbury, Tex. Filed Sept. 15, 1923. Serial No. 662,800. 4 Claims. (Cl. 43—142.)



1. An insect destroying machine comprising a hanger frame provided with screen side members forming a longitudinal channel, a rod journaled in one side of said frame and provided with arms rigid therewith and projecting approximately horizontally therefrom, a screen hood suspended from said arms, a lever rigid with said rod for raising and lowering said hood, a rack for holding said lever at different adjustments, vertical guides for said hood, a reel journaled in said hood, means for driving said reel, and trap pans below said reel for catching insects.

1,575,073. LOCOMOTIVE BOILER. JOHN LUTHER NICHOLSON, Chicago, Ill., assignor to Locomotive Firebox Company, Chicago, Ill., a Corporation of Delaware. Filed May 15, 1922. Serial No. 560,904. 6 Claims. (Cl. 122—68.)



1. A locomotive boiler firebox of the anthracite burning type, in combination with a pair of substantially triangular thermic siphons therein, each of said siphons being disposed in planes inclined from the vertical and drawing water from a water leg of the firebox and delivering the same into the upper part of a side water leg of the firebox, substantially as and for the purposes specified.

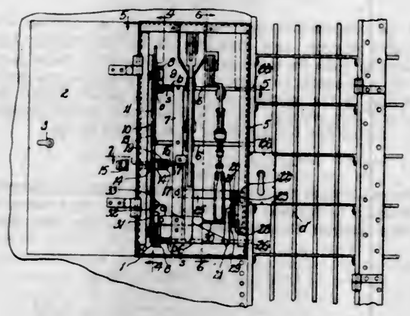
1,575,074. COMBINATION FENDER BRACE, BUMPER, AND TRUNK SUPPORT. ALGOT W. NORDOREN, St. Paul, Minn., assignor to Marquette Manufacturing Company, St. Paul, Minn. Filed Nov. 17, 1924. Serial No. 750,292. 5 Claims. (Cl. 293—55.)

1. The combination with an automobile body having a pair of fenders supporting members fixed to the automobile body and extending rearwardly therefrom a bumper secured to the free ends of said members and having its ends projected beyond said members and in the rear of said fenders, said bumper member being bowed outwardly midway between its ends, brace elements connected to the fenders of the automobile, a tire support secured to said supporting members and coming within the outline of the bowed portion of the bumper and a trunk supported by said supporting members.

1,575,075. AMUSEMENT DEVICE. GEORGE T. O'MALEY, Kansas City, Mo. Filed Dec. 1, 1924. Serial No. 753,184. 1 Claim. (Cl. 180—1.)

An amusement device adapted to perform antics such as rearing, bucking and pivoting rapidly in either direction with the manipulation of the control mechanism, consisting of a motor driven vehicle having its rear wheels moved forward to the position of a fulcrum to substantially balance the body when loaded, eccentrically mounted front wheels, separate brakes and brake controls for the respective wheels, and drag means at the rear of the body upon which the body rests and slides when in a reared up position.

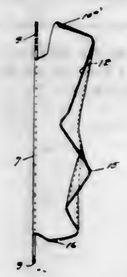
1,575,076. ELECTRIC SWITCH. ALFRED PAGE, London, England. Filed May 26, 1925. Serial No. 32,869. 7 Claims. (Cl. 200—161.)



1. An electric switch comprising in combination fixed contacts, a contacting member, an actuating member, an intermediate member separate from said contacting member and said actuating member, said intermediate member being operated upon by said actuating member and

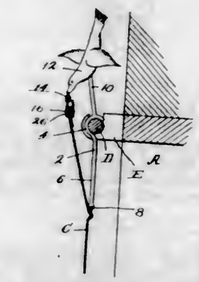
adapted to move said contacting member over the first part of its movements required for both engagement with and disengagement from said contacts and automatic

means whereby said contacting member is moved independently of said actuating member over the position at which electrical connection between said contacts and said contacting member is actually made or broken.



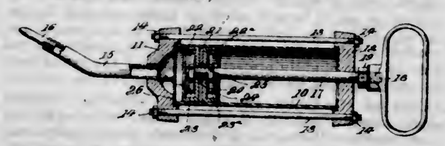
1,575,077. JAIL-DOOR-LOCKING MECHANISM. PETER J. PAULY, St. Louis, Mo. Filed Oct. 5, 1925. Serial No. 60,518. 4 Claims. (Cl. 189—7.)

1. In combination with a door, a locking mechanism therefor comprising a plurality of locking bolt adapted to enter suitable openings in the margin of said door, said locking bolts being provided with notches in aligning relation, a lock bar transversely disposed with relation to the locking bolts and provided with a plurality of openings adapted to be traversed by said bolts, said lock bar being longitudinally movable to permit engagement of the margins of the openings with the notches in the locking bolts to hold the same against movement, an operating handle for the locking bolts, suitable connections between said handle and the bolts, and suitable connections between said handle and the aforesaid locking bar, said handle being movable in a given direction to release the locking bar from the bolts and movable in an opposite direction to effect a release of the bolts from the door.



1,576,078. OIL COLLECTOR AND DISTRIBUTOR. JOHN H. PIPER, Palo Alto, Calif. Filed June 25, 1923. Serial No. 647,584. 2 Claims. (Cl. 184—11.)

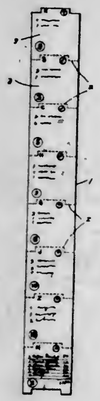
2. An oil collector having an oblong upright intermediate member, the opposite end portions of which are disposed in angular relation to the intervening portion and one of these being curved and flared, said collector also having a securing flange connected to the upright member between said end portions thereof and an oblong pan portion having three of its lateral edges connected to the entire lower edge of the upright intermediate member and formed with a series of transverse ducts opening through the free side of the pan member and disposed in different parallel planes and sloping inwardly with respect to the free edge of the pan portion, said



securing flange and pan portion being arranged in substantially parallel planes and extending in opposite directions from the intermediate member.

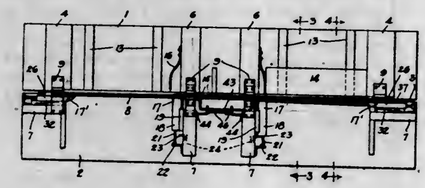
1,575,079. CURTAIN FIXTURE. LOUIS H. REINHARDT, Independence, Mo., assignor of one-half to Edward F. Reinhardt, Gore, Mo. Filed May 9, 1924. Serial No. 712,151. 1 Claim. (Cl. 156—21.)

A curtain fixture consisting of a rod over which the upper end of a curtain may be secured, a hook adapted to be suspended from a curtain pole, a shank depending from said hook, a fastener carried by said shank and adapted to engage and support the major portion of a curtain, a stem projecting upwardly from said hook, and a fastener associated with said stem and provided with spring-actuated jaws for engaging over the rod and adapted to engage and support the lower margin of the curtain.



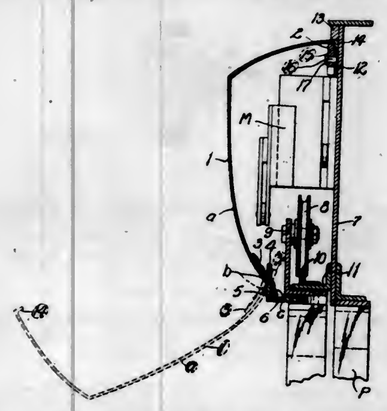
1,575,080. GREASE GUN. FREDERICK T. RUNDELL, Morgantown, W. Va., assignor to Monongahela Supply Company, Morgantown, W. Va., a Corporation of West Virginia. Filed May 23, 1921. Serial No. 471,719. 2 Claims. (Cl. 74—109.)

1. In a grease gun a piston cup of flexible material adapted to be movably mounted in a grease gun cylinder, a metal reenforcing cup located within the piston cup and provided with parallel slits forming spring tongues



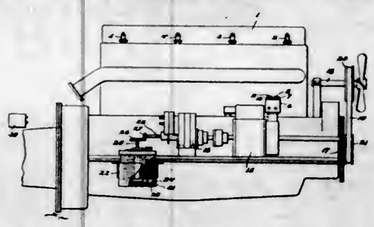
the ends of said tongues being curved outwardly at approximately right angles to maintain a substantially continuous outwardly acting backing for said piston cup, and a piston rod engaging said cups.

1,575,081. RECORDING STRIP. ANTON SUK, Santa Cruz, Calif. Filed Oct. 15, 1921. Serial No. 507,944. 1 Claim. (Cl. 283—62.)



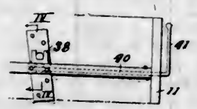
A record strip comprising a single oblong length of flexible fibrous material having equally spaced portions thereof scored transversely to provide a series of detachable sections, the scoring between adjacent sections extending along an irregular shaped line so that each section upon detachment will have at one end a projecting tongue.

1,575,082. MACHINE FOR SPLITTING SHAKES. JAMES N. THOMAS, Garberville, Calif. Filed Mar. 4, 1924. Serial No. 696,816. 6 Claims. (Cl. 144—162.)



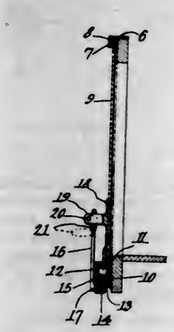
1. In a bolt splitting machine of the character described, two elongated tables placed alongside of one another so as to form a crack, a blade mounted for reciprocal motion in and over said crack and means for securing a bolt on the tables in operative relation to the blade so as to slightly project from one of the tables over the crack comprising transverse guide means for the bolt on one of the tables and stopping elements engaging opposite ends of the bolt mounted on the other table, one of the elements including a retractible sliding block and adjustable means for effecting a positive stop of the block and the other element including a pivtoted block, yielding means opposing pivotal motion and adjustable means for positively stopping pivotal motion at a predetermined point.

1,575,083. COVERING BOX. MICHAEL J. TRACY, St. Louis, Mo., assignor to Pauly Jail Building Company, St. Louis, Mo., a Corporation of Missouri. Filed Oct. 5, 1925. Serial No. 60,515. 7 Claims. (Cl. 189—5.)



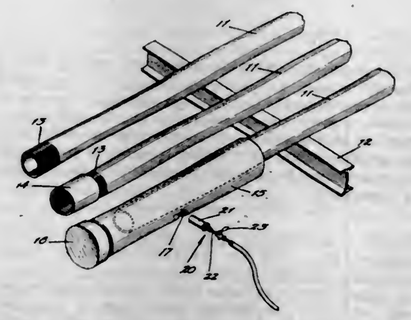
1. In combination with a wall plate, a covering box mounted thereon, said covering box having suitable lugs projecting from its lower edge and adapted to enter slots in the wall plate, an inwardly turned flange on the opposite edge of the covering plate, locking means within the covering box effective on said flange, and means outside the covering box for actuating said locking means.

1,575,084. ELECTRICAL AUXILIARY ARRANGEMENT. ROBERT L. WALSH, Washington, D. C. Filed Sept. 9, 1920. Serial No. 409,236. 1 Claim. (Cl. 290—31.)



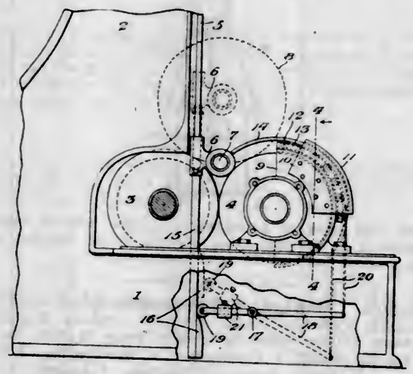
In combination with an electric starter motor generator means for an engine, a storage battery for said motor generator means, means to effect a depolarization of said storage battery, an engine coupled to said starter motor generator means, and further means whereby said depolarization means and said motor generator are simultaneously actuated at starting by the battery.

1,575,085. TEXTILE-TREATING MACHINE. OLIVER S. WRIGHT, Philadelphia, Pa. Filed Aug. 4, 1922. Serial No. 579,552. 11 Claims. (Cl. 68—21.)



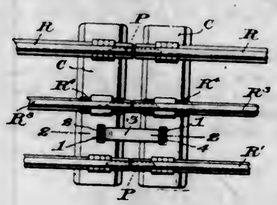
2. In a textile treating machine, an enclosure, an oscilatable container having trunnions mounted therein, a motor rigidly supported exteriorly of the enclosure, means directly driven by said motor for co-action with one of said trunnions to oscillate the container, means whereby the container may be laterally shifted for removal and replacement, and means serving to lock the container in operative connection with the driving means subsequent to replacement.

1,575,086. CRANK LOCK FOR BOX CARS. ADOLPH E. ASHLEMAN and THOMAS E. HANEY, Waco, Tex. Filed July 25, 1925. Serial No. 46,057. 1 Claim. (Cl. 268—6.)



A sliding door for cars including a body portion, a plate secured to the lower end of the door and having a downwardly extended portion, the main portion of the plate being disposed in spaced relation with the lower end of the body portion, rollers positioned between the door and plate, a track secured to the car and having a depending flange formed along one edge thereof, a rack bar secured on the inner surface of the track, a bracket member secured to the door and overlying the plate, said bracket member having an inwardly and upwardly extended portion, a pinion supported by the bracket member and adapted to mesh with the rack bar to operate the door, a shaft on which the pinion is mounted, an operating handle secured to the shaft for rotating the pinion, and means for lockng the operatng handle aganst movement.

1,575,087. APPARATUS FOR ANNEALING PIPE. CHARLES W. BARDEEN, Long Beach, Calf., assignor to B and B Pipe Shops, Inc., Long Beach, Calif., a Corporation of California. Filed Jan. 15, 1925. Serial No. 2,467. 5 Claims. (Cl. 266—4.)

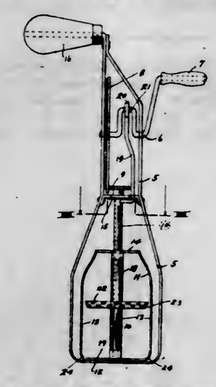


2. An apparatus for annealing the ends of pipe comprising: a muffle having a closed outer end and an open inner end and adapted to be placed over a projecting end of the pipe, said muffle resting upon and being entirely supported by said pipe; and means for projecting hot gases into the space between the pipe and the muffle in a manner to permit said gases to escape from said open inner end of said muffle.

1,575,088. GUARD FOR PAPER-WINDING MACHINES. ALFRED E. BARTLETT, Ogdensburg, N. Y., assignor of one-third to Richard Spry and one-third to Alderic M. Cormier, both of Ogdensburg, N. Y. Filed Mar. 18, 1925. Serial No. 16,378. 19 Claims. (Cl. 74—105.)

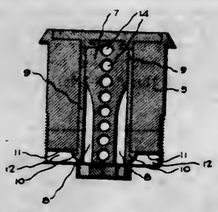
1. Guarding mechanism including a stationary guard, guide plates secured thereto and having inwardly extending flanges spaced apart from said stationary guard, anti-friction rollers securely carried by said stationary guard, and a movable guard interposed between said inwardly extending flanges and the anti-friction rollers, and movable relative thereto.

1,575,089. CLIP FOR TOY TRACKS. HARRY S. BECKER, River Forest, Ill., assignor to American Flyer Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 27, 1925. Serial No. 65,180. 7 Claims. (Cl. 238—10.)



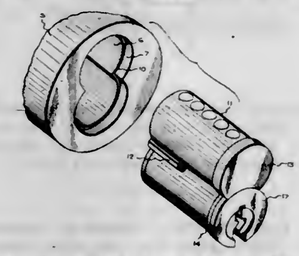
1. A track clip for toy railway track sections, comprising in combination with the ties of adjacent sections having slots, of resilient means for engaging in said slots to hold said track sections together.

1,575,090. EGG BEATER. FREDERICK BENSON, San Francisco, Calif. Filed May 26, 1924. Serial No. 715,992. 4 Claims. (Cl. 259—126.)



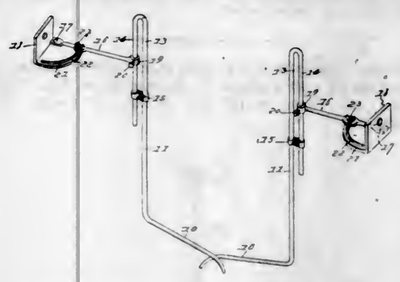
1. A beater comprising an open frame allowing the material to be beaten to readily flow therethrough transversely thereof, a rotary agitator, means for throwing matter to be agitated into the presence of the agitating

surfaces of the agitator, and mechanism for operating said means and the agitator simultaneously, said means operating inwardly of the path of rotation of said agi-



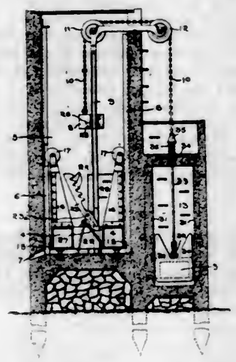
tator and being of perforated cup form adapted when moved to an extreme lower position to be disposed at the extreme base of the rotary agitator.

1,575,091. MANUALLY-RELEASABLE SNAP-LATCH-LOCK CORE-HOLDING DEVICE. FRANK ELLISON BEST, Seattle, Wash., assignor to Frank E. Best, Inc., Seattle, Wash., a Corporation of Washington. Filed Aug. 21, 1923. Serial No. 658,569. 5 Claims. (Cl. 70—46.)



2. In a lock, a core case, a core removable from said core case and snap means for locking said core in said core case said snap means being releasable manually without the use of a key from the exterior of said core case.

1,575,092. LOCK FACE. FRANK ELLISON BEST, Seattle, Wash., assignor to Frank E. Best, Inc., Seattle, Wash., a Corporation of Washington. Filed Oct. 9, 1924. Serial No. 742,599. 5 Claims. (Cl. 70—46.)

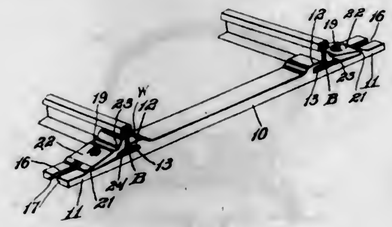


1. In a cylinder lock, a lock face of figure 8 shape having a thicker solid portion at one end and a thinner ring portion at the other end, a key plug arranged to extend through said ring and a head on said key plug arranged to overlap said ring.

1,575,093. WEEDER FOR CULTIVATORS. CLARENCE BISHOP, New Florence, Mo. Filed Jan. 6, 1923. Serial No. 611,067. 4 Claims. (Cl. 37—193.)

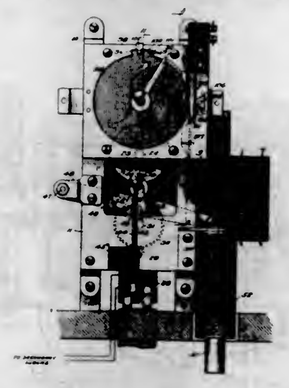
1. A weeding device for corn cultivating machines having weed folding arms laterally directed toward a row of corn stalks for bending the weeds in the direction of the progress of the cultivators in advance of the hilling shovels, said folding arms being provided with upright torsional stems and means for supporting the same from the cultivator frame.

1,575,094. AUTOMATIC OUTFALL FOR THE TIDAL DISCHARGE OF SEWAGE. HAROLD EDWARD BRIGHT, Hamilton, New Zealand. Filed Oct. 10, 1924. Serial No. 742,937. 4 Claims. (Cl. 61—16.)



1. In apparatus wherein a sewage control gate is operated to open an outlet by means of a descending float, a ratchet-toothed catch lever pivotally mounted on the float, a catch block connected with the gate and arranged to be engaged by the ratchet-toothed catch lever whereby the control gate begins to open as soon as the float commences to descend, substantially as described and illustrated.

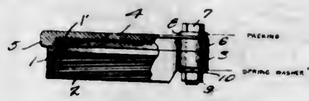
1,575,095. RAILROAD TIE. ERNEST C. BUCHANAN, Sullivan, Ky. Filed Nov. 24, 1925. Serial No. 71,140. 1 Claim. (Cl. 238—284.)



A metallic tie comprising a body portion having reduced extensions at opposite ends thereof, said body portion at each end thereof being provided with a longitudinally projecting flange overlying the upper surface of the inner end of the corresponding extension, said flange being adapted to overlie the inner flange of the base of a rail, the outer ends of the extensions having

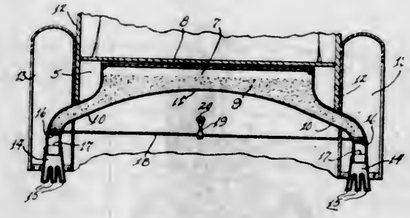
longitudinally extending slots opening through said outer ends adapted to receive the stems of securing elements, the lower edges of the slots being cut away for the reception of the head of the securing elements, said slots

at the inner ends thereof being deepened to provide a socket for the reception of the head of the securing element and a rail retaining plate engaged with the securing element and engaging the outer flange of the rail.



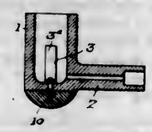
1,575,096. MECHANISM FOR SYNCHRONIZING CLOCKS. THADDEUS STEPHENS CASNER, Plainfield, N. J., assignor, by mesne assignments, to Radio Electric Clock Corporation, New York, N. Y., a Corporation of Delaware. Filed Mar. 24, 1921, Serial No. 455,262. Renewed Feb. 5, 1925. 42 Claims. (Cl. 58—35.)

7. In the automatic correction of a clock by recurrent electrical impulses separated by time intervals of different lengths through the medium of electrically actuated mechanism, the method of selecting an impulse following a relatively long interval between impulses which comprises arranging said mechanism so as to tend to change its condition during the time that impulses are being received, but to actually change to a certain condition only in the absence of recurrent electrical impulses during a predetermined period, and employing one of said impulses to actuate said mechanism when said change has occurred.



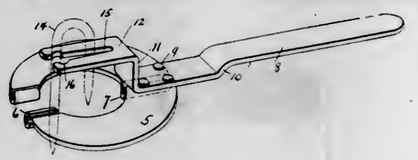
1,575,097. GASOLINE-TANK CAP. HENRY H. CONNER, Jr., Ithaca, N. Y. Filed July 11, 1923. Serial No. 650,940. 1 Claim. (Cl. 220—33.)

A closure cap comprising an internally threaded collar, an ear formed thereon and extending laterally from the upper face thereof, an inwardly directed annular flange formed upon the upper edge of the collar, a closure plate normally resting upon the flange and an ear formed therewith and registering with the first mentioned ear, a bolt passing through the ear, resilient means associated with the bolt for holding the pivot plate against accidental displacement, the closure plate being slightly



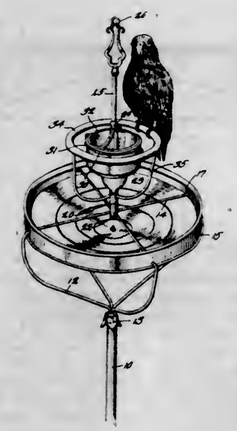
larger in diameter than the collar whereby it can be engaged by an object and moved to one side of the collar, the flange serving to limit the turning of the collar on a radiator cap and also serving as a bearing surface over which the cover plate is adapted to move.

1,575,098. SANDING DEVICE. RENE HENRY CONTY, Chicago, Ill. Filed Mar. 14, 1925. Serial No. 15,670. 2 Claims. (Cl. 291—28.)



1. The combination with a motor vehicle, of a sanding device comprising a hopper carried by the vehicle, a delivery duct communicating with said hopper at one end and having its opposite end in registration with one of the wheels of said vehicle, a distributer member disposed at the lower end of the duct, said duct having a portion of its wall cut away, a valve member hingedly mounted upon said duct adjacent to said cutaway portion of the duct, and manually actuated means for moving the valve on its hinged support so as to lie transversely across the duct thereby closing the duct and whereby the valve may be moved into registration with the cutaway portion of the duct so as to entirely close that portion and lie contiguous therewith.

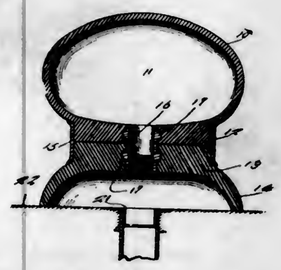
1,575,099. PIPE. BOLTON L. COBSON, Plymouth Meeting, Pa. Filed Feb. 9, 1921. Serial No. 443,579. 1 Claim. (Cl. 131—12.)



A pipe comprising a bowl, a stem extending from the bowl, a cleaning element movably mounted in the bowl, a shaft secured to said element and extending through an aperture in the bottom of the bowl, and an operating element for the cleaner secured to said shaft on the under side of the bowl and shaped to appear as a continuation of the latter.

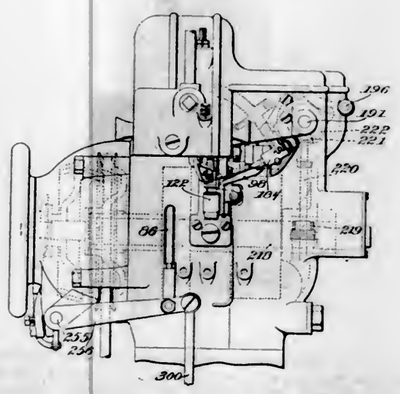
1,575,100. WIRE STRETCHER. CHARLES W. COSSMAN, Newark, N. J. Filed May 13, 1925. Serial No. 30,130. 6 Claims. (Cl. 140—123.5.)

1. An implement of the class described comprising a stabilizing plate, a handle secured to said plate, said handle having a staple gripping member whereby a wire may be twisted with a staple when the handle is manipulated.



1,575,101. BIRD STAND. JOSEPH S. EDWARDS, Long Beach, Calif. Filed Apr. 10, 1925. Serial No. 22,224. 8 Claims. (Cl. 119—26.)

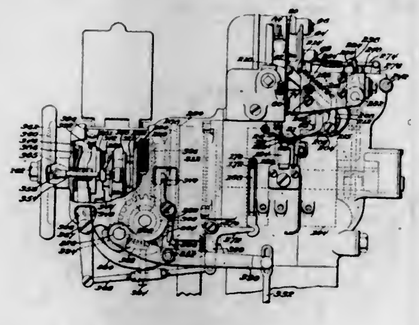
8. A bird stand comprising a supporting standard, a frame including an annular horizontally disposed band, rods extending upwardly and radially from the standard and supporting the band, said rods terminating in horizontally disposed inwardly extending portions with their free ends located centrally of the band, a tray detachably engaging the rods, a receptacle, means extending from the bottom of the receptacle and engaging the free ends of the rods to connect said rods and support the receptacle centrally above the tray, feed and water containers within the receptacle, a perch extending around the receptacle and means to support the perch from the receptacle supporting means.



1,575,102. PLUNGER. LOUIS A. FISET, Amsterdam, N. Y., assignor of one-half to William J. Collins, Amsterdam, N. Y. Filed Feb. 25, 1925. Serial No. 11,576. 3 Claims. (Cl. 4—255.)

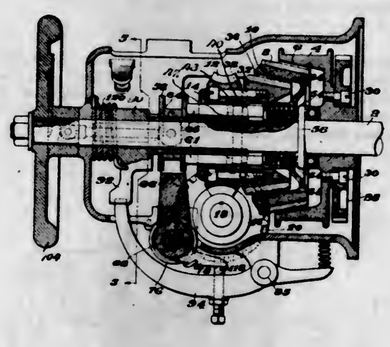
3. A plunger composed of upper and lower sections respectively, the upper section being hollow and bulb-like, the lower section having an outwardly converging annular flange portion extending from the lower portion thereof, a band member extending around the inner portion of the section and associating the same, and an interiorly threaded pipe member having flange members

extending from the outer surfaces thereof, and embedded within the inner portions of the sections and establishing communication within the upper bulb-like sections.



1,575,103. INSEAM-SHOE-SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Sept. 14, 1918. Serial No. 254,104. 61 Claims. (Cl. 112—35.)

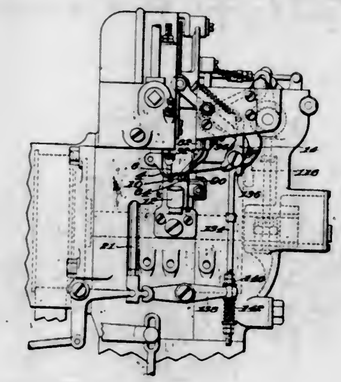
1. A shoe sewing machine, having, in combination, a curved hook needle, a needle guide for said needle, needle actuating means for advancing and retracting the needle and a cam operated by said needle actuating means for advancing and retracting said needle guide.



1,575,104. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed May 21, 1919, Serial No. 298,589. Renewed July 30, 1925. 12 Claims. (Cl. 112—50.)

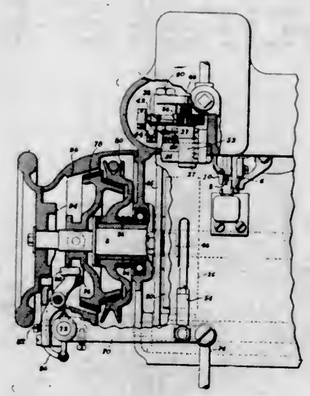
1. An inseam shoe sewing machine having, in combination, stitch forming devices including a curved hook needle, a channel guide, means comprising a two-part lever for moving said channel guide transversely of the direction of feed about a fixed axis, and means permitting an adjustment of the parts of said lever with relation

to each other to adjust the channel guide in its path of movement transversely of the direction of feed about said axis.



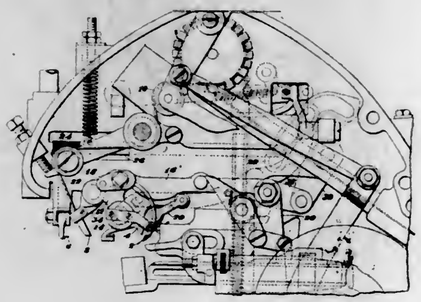
1,575,105. STOP MECHANISM. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Oct. 25, 1919. Serial No. 333,275. 20 Claims. (Cl. 192—144.)

1. A stop mechanism having, in combination, a driven member, a high speed driving mechanism therefor, a low speed driving mechanism therefor comprising a friction clutch and a positive clutch, the friction clutch acting first to reduce the speed of the driven member to that of the low speed mechanism and the positive clutch then acting to drive the driven member, and means for shifting from the high to the low speed driving mechanisms.



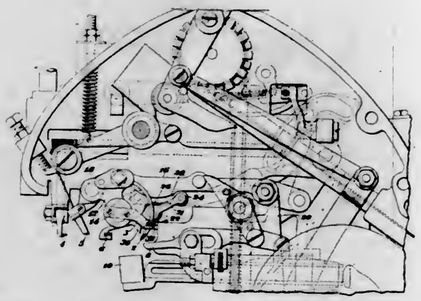
1,575,106. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Dec. 29, 1919, Serial No. 348,065. Renewed July 30, 1925. 19 Claims. (Cl. 112—47.)

1. An inseam shoe sewing machine having, in combination, stitch forming devices, a feed point arranged to engage the shoe at the top of the between substance of the sole, and means to force the feed point into the



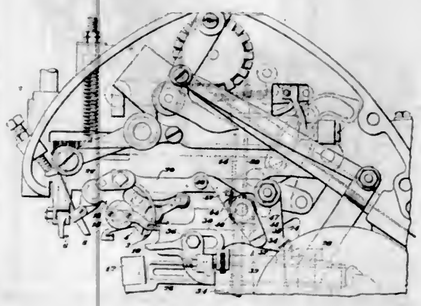
work, to relieve the pressure of the feed point on the work, and to actuate the feed point to feed the work while the pressure thereof is relieved.

1,575,107. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 14, 1920, Serial No. 351,432. Renewed July 30, 1925. 14 Claims. (Cl. 112—55.)



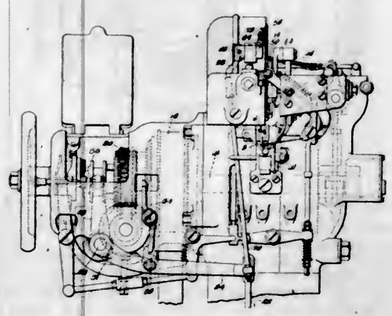
1. A sewing machine having, in combination, stitch forming device including a hook needle and a looper, and mechanism for shifting the position of the looper relatively to the needle without altering the shape of the path described by the looper as the machine is stopped to prevent the laying of the thread in the barb of the needle during the final cycle of operations of the machine and for returning the looper to its initial position relatively to the needle upon starting the machine into operation.

1,575,108. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed May 21, 1919, Serial No. 298,589. Divided and this application filed Sept. 25, 1920, Serial No. 412,651. Renewed Aug. 27, 1925. 6 Claims. (Cl. 112—35.)



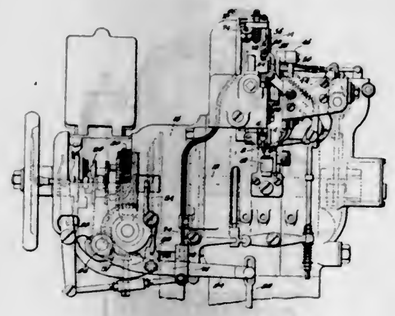
1. A chain stitch inseam shoe sewing machine having in combination, a curved hook needle, a looper movable to lay the thread in the hook of the needle, a take-up, and a thread finger engaging the thread between the looper and the work mounted to have a loop drawing movement in the direction of feed outside of the seam.

1,575,109. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed May 21, 1919, Serial No. 298,589. Divided and this application filed Sept. 25, 1920. Serial No. 412,652. 6 Claims. (Cl. 112—35.)



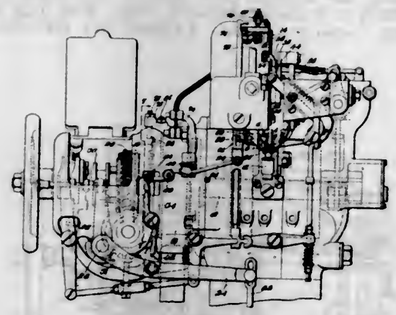
1. A shoe sewing machine having, in combination, stitch forming devices including a curved hook needle arranged to pass through the channel of a shoe sole beneath the channel flap, a channel flap closing device movable into and out of engagement with the work, and means for yieldingly pressing the channel flap closing device against the work while the needle is in the work.

1,575,110. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed May 21, 1919, Serial No. 298,589. Divided and this application filed Sept. 25, 1920, Serial No. 412,653. Renewed Aug. 27, 1925. 3 Claims. (Cl. 112—39.)



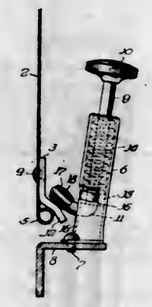
1. An inseam shoe sewing machine having, in combination, stitch forming devices including a curved hook needle, a back gage movable toward and from the work, means for locking the back gage against the work and for unlocking the back gage, a spring acting on said gage, means for increasing the tension of the spring to press the back gage against the work and for decreasing the tension of the spring after the gage is locked in position, and means for retracting the back gage.

1,575,111. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Oct. 21, 1920, Serial No. 418,450. Renewed Mar. 26, 1924. 19 Claims. (Cl. 112—57.)



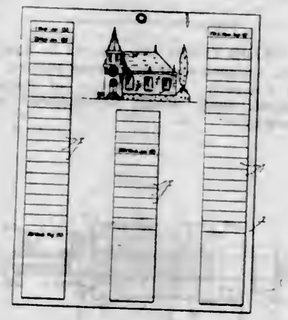
1. A shoe sewing machine having, in combination, stitch forming devices including a hook needle, a needle carrier, a main take-up, an auxiliary take-up, and means operated by the needle carrier for raising the auxiliary take-up against the strain of the thread during the taking-up stroke of said main take-up and for holding said auxiliary take-up raised during the remainder of the taking-up stroke.

1,575,112. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Oct. 21, 1920, Serial No. 418,451. Renewed Mar. 5, 1925. 18 Claims. (Cl. 112—57.)



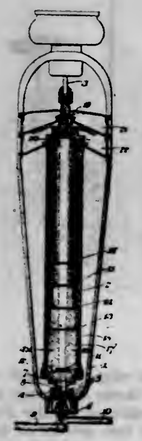
1. A sewing machine having, in combination, stitch forming devices, mechanism for exerting a strain on the thread, and treadle controlled means for adjusting said mechanism to vary the duration of said strain.

1,575,113. SEWING MACHINE. ALFRED B. FOWLER, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Filed Oct. 21, 1920, Serial No. 418,452. Renewed Apr. 1, 1925. 17 Claims. (Cl. 112—35.)



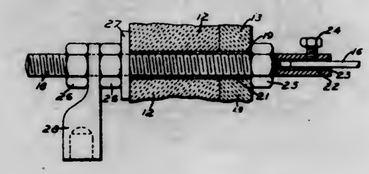
1. A sewing machine having, in combination, stitch forming devices including a needle, mechanism for exerting a strain on the thread during the retracting movement of the needle, and means rendered active upon a reduction in the speed of the machine to adjust said mechanism at a predetermined point in the retracting movement of the needle to increase the effectiveness of the strain during the continued retracting movement of the needle.

1,575,114. HOOD LATCH FOR AUTOMOBILES AND THE LIKE. CHARLES B. GILMORE, Chicago, Ill., assignor to Chicago Forging & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 14, 1924. Serial No. 749,982. 15 Claims. (Cl. 292—60.)



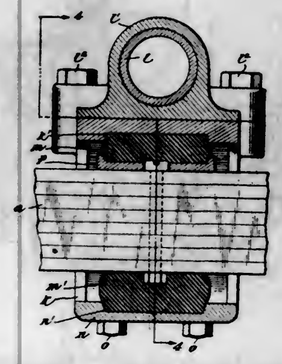
1. In combination with a closure member having a boss, a latch guide fixedly supported adjacent said member, a latch bolt supported by and slidable with respect to said guide, and a cam surface on said bolt adapted to engage said boss.

1,575,115. COMBINED CALENDAR AND CONTRIBUTION ENVELOPE. ADOLF T. HANSER, Buffalo, N. Y. Filed May 12, 1923. Serial No. 638,642. 1 Claim. (Cl. 40—122.)



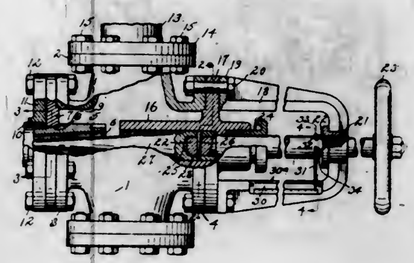
A calendar comprising a carrier and a plurality of contribution envelopes having their base portions detachably secured to said carrier and extending obliquely therefrom, said envelopes being sequentially arranged on the carrier, whereby portions of certain of the envelopes, bearing designations indicating period subdivisions of time, are exposed beyond the marginal edges of adjacent envelopes in a series, said envelopes being selectively removable as a whole from said carrier.

1,575,116. PROCESS AND APPARATUS FOR SECURING TEMPORARY INTIMATE CONTACT BETWEEN IMMISCIBLE LIQUIDS. LEO D. JONES, Philadelphia, Pa., assignor to The Sharples Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Filed Sept. 3, 1921. Serial No. 498,368. 12 Claims. (Cl. 233—14.)



1. The process of treating one liquid substance with another immiscible liquid substance of different density, which consists in centrifugally stratifying said substances in concentric layers and flowing one of said substances in a thin layer or layers in contact with the other of said substances without emulsification.

1,575,117. OXIDE TERMINAL. ALVIN D. KEENE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 15, 1923. Serial No. 668,500. 7 Claims. (Cl. 201—63.)

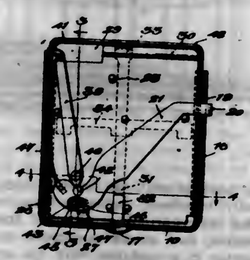


1. A terminal structure for a resistor member, comprising a terminal member, of larger cross-sectional area than said resistor member operatively engaging the same, and means in said terminal member that is operative at a high temperature to swell and tightly grip the resistor member.

1,575,118. CUSHIONED CONNECTION BETWEEN THE SPRING AND AXLE OF MOTOR VEHICLES. FRED L. LARCOT, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed Nov. 13, 1923. Serial No. 674,462. 2 Claims. (Cl. 267—54.)

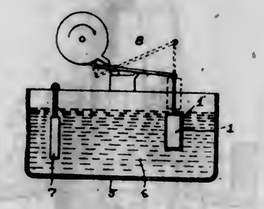
1. In a motor vehicle, the combination with the axle and vehicle leaf spring, of opposed seats carried with the axle and between which the spring extends, a seat carried with the spring to co-operate with the seats on the axle, separate blocks of yielding non-metallic material disposed between the seats on the axle and the spring respectively, and means to maintain said blocks under compression.

1,575,119. THROTTLING DEVICE. DAVID G. LORRAINE, Los Angeles, Calif., assignor of one-half to Willard L. Burrough, Fullerton, Calif. Filed June 1, 1922. Serial No. 565,147. 2 Claims. (Cl. 251—156.)



2. In a device of the character described, a casing having an outlet, a memoer having a bore provided with attaching means, an annulus received against said member and fixed to said casing for positioning said member against said casing and over said outlet, and a bushing in said casing detachably engaged by said attaching means.

1,575,120. WELL TOOL. GEORGE B. LOUDENBACK, Compton, Calif. Filed May 12, 1924. Serial No. 712,785. 6 Claims. (Cl. 255—76.)



1. A drilling bit comprising: a pair of pivoted cutters; a feed screw adapted for variably spacing said cutters; a torsion spring adapted for actuating said feed screw; and a plunger adapted by reciprocation to cause said spring to act.

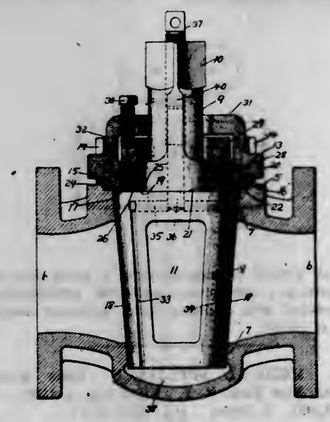
1,575,121. CIGARETTE CASE. GEORGE W. LYONS, New Haven, Conn., assignor to The Lyons Manufacturing Company, New Haven, Conn., a Corporation of Connecticut. Filed Dec. 29, 1923. Serial No. 683,448. 15 Claims. (Cl. 206—41.)

1. In a cigarette case; a body; a cover movably connected therewith; an inner plate connected with said body; and ejector mechanism comprising companion levers movably mounted upon said inner plate and spaced from the body so as to move freely relatively thereto irrespective of the shape or smoothness of the adjacent face of the body.

1,575,122. MOLD, DIE, AND THE LIKE AND METHOD OF MAKING THE SAME. CHARLES P. MADSEN, New York, N. Y., assignor to Madsenell Corporation, New York, N. Y., a Corporation of New York. Filed June 25, 1919, Serial No. 306,597. Renewed May 7, 1925. 10 Claims. (Cl. 22—136.)

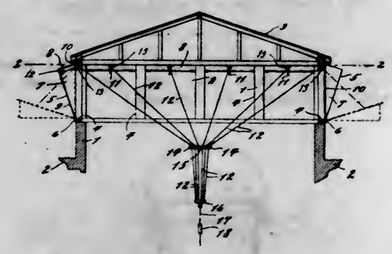
1. As an article of manufacture, a mold, die or the like comprising a non-porous, malleable, nickel-containing metal provided with a dense, hard, adherent coating of an oxide of nickel.

1,575,123. MEDICAL APPLIANCE. LEON MARTOCCI-PISCULLI, New York, N. Y. Filed Aug. 1, 1922. Serial No. 578,860. 1 Claim. (Cl. 128—270.)



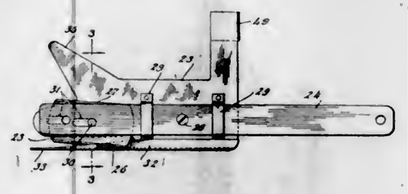
A medical appliance, including a substantially rigid soluble casing having a perforated end-portion, a tampon within said casing, and a medicinal agent disposed within said casing adjacent the perforated end thereof.

1,575,124. PAPER RECEPTACLE. ARLINGTON MOORE, Boston, Mass. Filed Mar. 23, 1921. Serial No. 454,765. 4 Claims. (Cl. 229—5.7.)



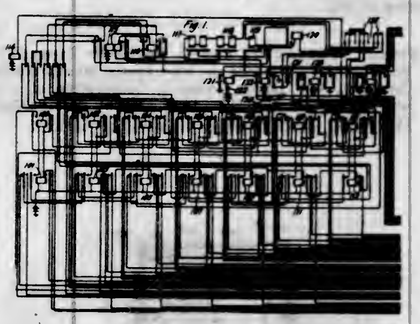
1. In combination with a paper receptacle having a reenforced rim, providing an external shoulder at its under side, a flexible closure therefor adapted to be bent down over said rim beneath said shoulder, a resilient wire ring adapted to be distended to pass over said rim and to press the closure against said shoulder and the adjacent portion of the side wall, and means adapted to be attached to said ring, to support the receptacle.

1,575,125. VALVE. SVEN JOHAN NORDSTROM, San Francisco, Calif., assignor, by direct and mesne assignments, to Merco Nordstrom Valve Company, San Francisco, Calif., a Corporation of Delaware. Filed Mar. 19, 1923. Serial No. 626,001. 4 Claims. (Cl. 251—108.)



1. A valve comprising a casing having a passageway therethrough and a tapered valve seat therein, a plug seated in the valve seat and having a hole adapted to register with the passageway, the casing being provided with an annular recess surrounding the upper end of the tapered valve seat, a metal washer seated in the recess and extending to the valve stem, a resilient washer superposed upon the metallic washer, a valve cover for fixedly holding the outer edges or rims of the washers against the casing and means for adjustably holding the inner portions of the washers against the top of the tapered portion of the plug.

1,575,126. BUILDING STRUCTURE. JOSEPH A. PETERMAN, Brooklyn, N. Y. Filed Nov. 11, 1925. Serial No. 68,280. 3 Claims. (Cl. 108—31.)

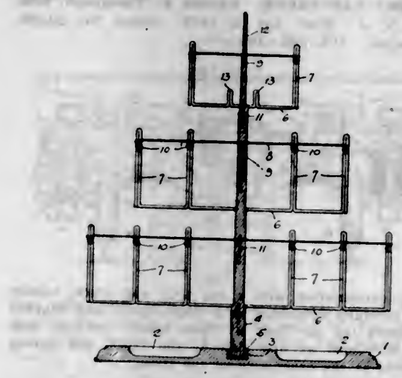


1. A superstructure for buildings comprising a frame projecting upwardly from and above the roof of said building and having, in a lateral wall, an opening with a substantially vertical jamb, a closure for said opening having triangular end walls with the long side of the triangle abutting the jamb, the two other and shorter sides of the triangle being connected by sheet walls, said closure being disposed across said opening with the free edge of the sheet wall connecting the triangular end pieces hinged along its lower edge to said frame along the lower edge of said opening, whereby said closure will swing outwardly and downwardly when opening and have its center of gravity to one side of the vertical plane of its hinged edge, to provide therefor a normal bias toward open position.

1,575,127. CUTTING MECHANISM FOR PILE FABRICS. ZDENKO PODHRADSKY, Astoria, N. Y., assignor to H. R. Mallinson & Co. Inc., New York, N. Y., a Corporation of Delaware. Filed Aug. 30, 1922. Serial No. 585,191. 12 Claims. (Cl. 26—8.)

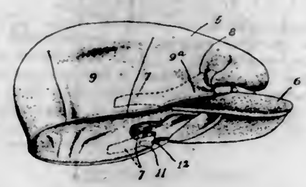
5. In a pile cutting mechanism a carrier, a blade holding member supported thereby, a channel pile guide disposed below said blade holding member, a blade having a straight edge carried by said blade holding member in fixed and non-movable relation thereto, said blade having a cutting edge positioned in a gradually diverging direction from the pile guiding edges of said channel.

1,575,128. TESTING SYSTEM FOR TESTING SENDERS OF AUTOMATIC EXCHANGES. FRANK N. REEVES, Woodensburg, Md., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 6, 1923. Serial No. 678,944. 12 Claims. (Cl. 179—175.)



1. A testing arrangement for testing register senders of an automatic telephone exchange comprising means for transmitting interruptions at different speeds for setting said registers, and means responsive to the operation of the sender in accordance with the setting of its registers for testing the accuracy with which said registers have functioned in response to said interruptions.

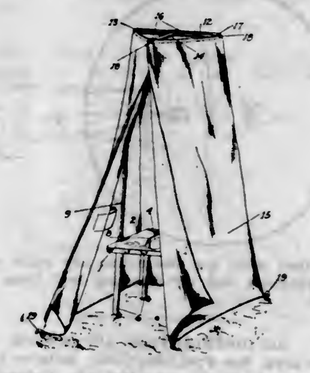
1,575,129. SPOOL HOLDER. LULU E. SCHENCK, Los Angeles, Calif. Filed May 14, 1924. Serial No. 713,352. 7 Claims. (Cl. 223—57.)



1. A device of the character described comprising a supporting upright, wires fixed to one side of the upright at vertically spaced points and branching laterally therefrom and bent to form spindles, and other wires

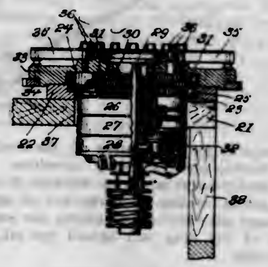
fixed to the opposite side of the upright in horisontal alinement with the upper portions of the spindles formed by the respective first wires, said other wires

extending laterally from the upright in spaced relation in front of the spindles and bent to form guide loops in front of the upper ends of the respective spindles.



1,575,130. ADJUSTABLE-SIZE CAP. MORRIS SCHIFF, Bronx, N. Y., assignor of one-half to Philip A. Fischer, New York, N. Y. Filed Nov. 11, 1924. Serial No. 749,308. 2 Claims. (Cl. 2—197.)

1. An adjustable size cap of the class described composed of a facing and lining, said lining being continuous circumferentially at the head band portion of the cap and the facing being severed at the opposite sides of the front portion of and over the peak of the cap forming side flaps directed backwardly to form tongues which are positioned between the facing and lining, strap members secured to the free portions of the facing above the peak and which overlap the flap portions of said facing and said strap members and tongues forming the adjustable means for said cap and being concealed by that portion of the crown of the cap which rests upon the peak when the cap is in use.

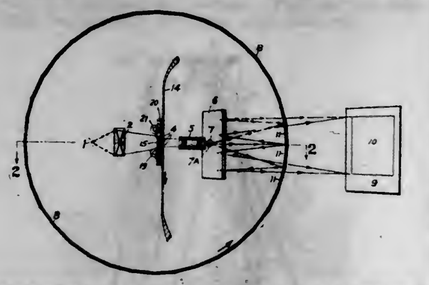


1,575,131. PORTABLE TOILET. ETTA MAY SCHUMACHER, Stockton, Calif. Filed Apr. 8, 1925. Serial No. 21,499. 5 Claims. (Cl. 4—116.)

1. A portable toilet comprising a seat adapted to be supported from the ground, a standard projecting upwardly from the seat and demountably supported therefrom, a bar mounted on top of the standard and adapted to extend horisontally across the plane of the seat or to be folded to lie alongside the standard, an arm pivoted onto said bar and adapted to extend horisontally at

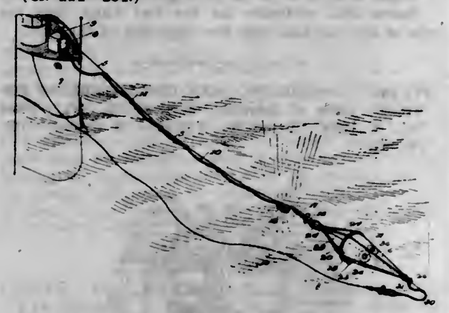
an angle thereto or to lie in alignment therewith, and a flexible side enclosure for the seat hung from the ends of the bar and from the outer end of the arm.

1,575,132. ASSEMBLING AND DISASSEMBLING DEVICE. ARCH C. SHIRLEY, Fort Smith, Ark. Filed Dec. 1, 1924. Serial No. 753,259. 5 Claims. (Cl. 29—89.)



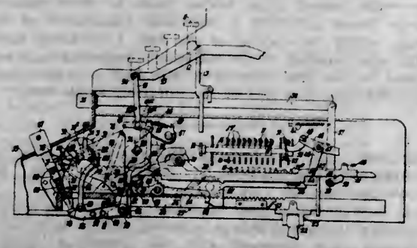
1. Means of the character described comprising a base plate having an opening therein, a disk fitting within and engaging the walls of the opening and supported by the base plate, said disk having a central opening and spaced sockets in one face thereof around the opening, reversible nested rings having seats in their opposite faces, means providing a removable engagement of the rings within the opening of the disk, a relatively small disk also adapted to be removably supported and engaged by the first mentioned disk and a central boss provided upon one face of the relatively small disk.

1,575,133. MOTION-PICTURE MACHINE. ISRAEL N. STEIGMAN, New York, N. Y. Filed May 3, 1923. Serial No. 636,309. 18 Claims. (Cl. 88—16.8.)



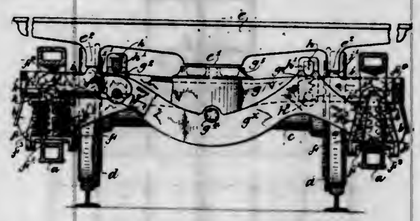
1. In a motion picture machine, a revoluble internally reflecting ring comprising a series of substantially plane reflectors each arranged with the reflecting surface thereof parallel to the axis of revolution of said ring, a film movably arranged inside of said ring, means for passing light through said film, means for focusing the

resulting beam of light at a predetermined point between said film and said reflectors and for directing said beam toward said reflectors, and means at said



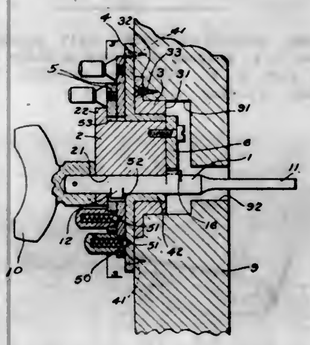
predetermined point for obstructing the beam reflected by said reflectors and for diverting said beam out of said ring.

1,575,134. OIL-DISTRIBUTING APPARATUS. HARRY W. STOCKING, San Francisco, Calif., assignor of forty-nine one-hundredths to John McKenna, Hoboken, N. J. Filed Mar. 4, 1924. Serial No. 696,763. 12 Claims. (Cl. 114—234.)



1. In apparatus for distributing oil, the combination of a tank, a flexible pipe extending therefrom, a sea-drag supporting said pipe at a remote distance from the vessel, and a nozzle at the discharge end of said pipe in axial alinement with said drag whereby the water thrown to the side of the drag will spread the oil discharged from the nozzle.

1,575,135. COMBINED TYPEWRITING AND COMPUTING MACHINE. ELISHA E. STRONG, Paris, France, assignor to Underwood Computing Machine Company, New York, N. Y., a Corporation of New York. Filed Feb. 21, 1924. Serial No. 694,211. 25 Claims. (Cl. 235—60.)

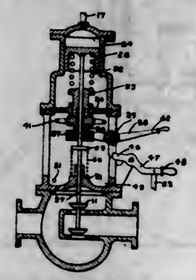


1. In a computing machine, the combination with a register having denominational dials, of numeral-keys, means operated by the actuation of said keys to perform a correct computation between two numbers, and means including a special key to make the result spurious to vary from the correct result by a definite amount.

1,575,136. CAR TRUCK. GEORGE K. THOMPSON, Summit, N. J. Filed Apr. 2, 1925. Serial No. 20,022. 6 Claims. (Cl. 105—190.)

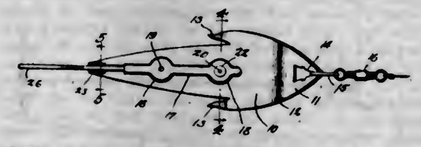
1. In combination with a car body and truck, bolster levers pivotally connected at a middle point and adapted to support the car body at their middle portion, each lever fulcrumed at one side of the truck and spring supported at the other side of the truck.

1,575,137. COMBINATION LOCK. FRANK TORKA and WILHELM V. E. TORKA, Seattle, Wash. Filed Jan. 29, 1924. Serial No. 689,246. 6 Claims. (Cl. 70—53.)



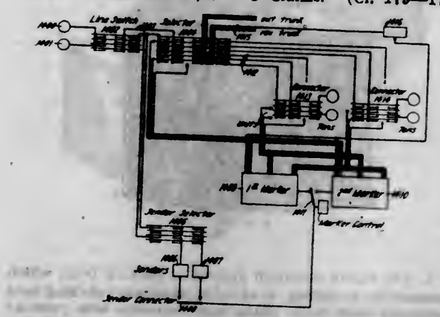
1. In a combination lock, the combination with a support and a lock unit removably secured therein, and including a rotatable lock shaft and combination means cooperable with said shaft to permit rotation thereof when the shaft and combination means assume a predetermined relative position, of a member directly secured to said support and hidden by said lock unit, and means removable from the support with said lock unit, and normally engaging said member to prevent removal of the lock unit while the shaft is in normal locking position, said means being operable by rotation of the shaft to disengage it from the said member when the shaft is turned from locking position.

1,575,138. GOVERNING APPARATUS. HENRY R. TROTTER, Morton, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 18, 1924. Serial No. 726,883. 8 Claims. (Cl. 264—14.)



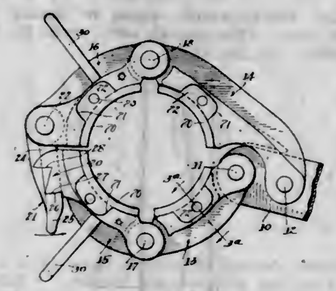
1. In a variable fluid pressure governing apparatus for a prime mover, the combination of a piston subjected on one side to the variable fluid pressure, an admission valve, a valve rod for actuating the admission

valve, said valve rod having a collar provided thereon near its inner end and being in abutting relation to the piston at its outer end, a relatively heavy spring bearing at one end against the piston and opposing the variable fluid pressure, an abutment for the opposite end of the spring, said abutment surrounding the valve rod



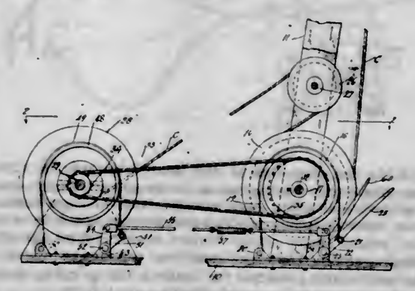
and being slidable with respect thereto, means for supporting the abutment, releasable means for retaining the supporting means in a fixed position, and means for releasing the releasable means, whereby the relatively heavy spring forces the abutment and supporting means against the collar on the valve rod forcing the valve to a closed position.

1,575,139. FISH BAIT OR LURE. ROBERT S. WIESENFELD, Baltimore, Md. Filed Sept. 10, 1925. Serial No. 55,461. 4 Claims. (Cl. 43—45.)



4. In a spoon hook, a spoon body provided with spaced openings for the selective reception of hook attaching means, and hook attaching means secured in a selected opening, and a hook connected to said attaching means, said body also having grooves alined with said openings whereby to receive the shank of the hook, one of said grooves have spaced enlargements at each opening to receive a hook eye.

1,575,140. TELEPHONE-EXCHANGE SYSTEM. SAMUEL B. WILLIAMS, Brooklyn, N. Y., assignor, by mesne assignments, to Western Electric Company, Incorporated, a Corporation of New York. Filed Mar. 31, 1925. Serial No. 19,577. 8 Claims. (Cl. 179—17.)

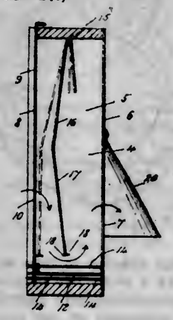


1. In a telephone system, a party line, a trunk circuit, a selective switch for extending said trunk to said line, a switch controlling marker for operating said switch, a source of ringing current in the trunk circuit, means in the marker operated by said switch in making connection with said line, and means thereupon controlled by the marker for applying said ringing current to the line in a characteristic manner.

1,575,141. PIPE TONGS. ELIHU C. WILSON, Los Angeles, Calif. Filed Oct. 4, 1922. Serial No. 592,439. 8 Claims. (Cl. 81—66.)

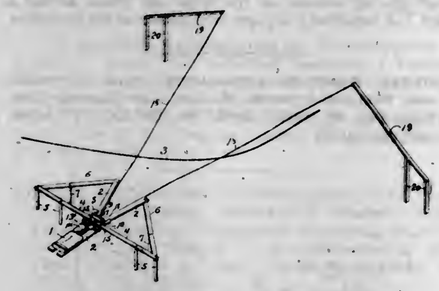
1. A pipe tongs adapted to take work of different diameters, including a lever, two oppositely disposed series of pivotally interconnected pipe encircling segments, each series pivotally connected at one end to the lever and the two series being substantially alike, and lying in substantially symmetrical relation with reference to the longitudinal axis of the lever, and a resiliently actuated latch mechanism to latch the two series together selectively in position to encircle pipe or the like of different diameters, said latch mechanism including a latch member on one segment and a lug member on the other, one of said members having a plurality of latch engaging shoulders spaced apart in a direction circumferential of the pipe, spring means urging the latch and lug members into latching engagement, and the lug and latch members being shaped so that the latch member rides up over the lug member as the tongs are closed around a pipe and selectively engages with either of its shoulders.

1,575,142. HOISTING APPARATUS. ELIHU C. WILSON and WILLIAM WEBSTER WILSON, Los Angeles, Calif. Filed Dec. 28, 1923. Serial No. 683,190. 9 Claims. (Cl. 254—176.)



1. In a device of the character described, a driven sheave, a reel for storing cable fed thereto by rotation of the sheave in one direction and adapted to pay out said cable as the sheave rotates in the opposite direction, the reel being rotated by the withdrawal of cable therefrom, means for checking rotation of the sheave, and means for checking rotation of the reel, one of said checking means being adapted to be put into operation by virtue of the putting of the other into operation.

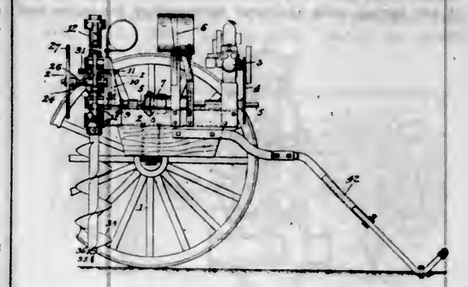
1,575,143. PHOTOGRAPHIC SENSITIZER. MURRAY C. BEEBE and ALEXANDER MURRAY, Cincinnati, Ohio, assignors to The Wadsworth Watch Case Company, Dayton, Ky., a Corporation. Filed Nov. 18, 1922. Serial No. 601,885. 5 Claims. (Cl. 95—7.)



1. A photographic sensitizer adapted for sensitizing a photographic medium, said sensitizer comprising a hydrophobic protective colloid, and a halogen-liberating compound dispersed therein.

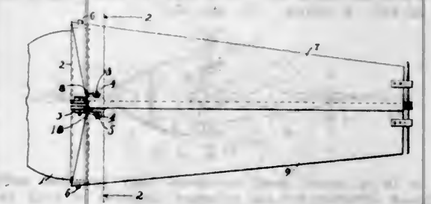
1,575,144. VENTILATOR. JACOB W. BISHOP, Washington, Iowa. Filed June 25, 1925. Serial No. 39,521. 2 Claims. (Cl. 98—27.)

1. In a ventilator; a frame having inner and outer sides provided with air openings and having also a vertically adjustable plate at its bottom, and a damper plate pivoted in the frame above the bottom plate and between the air openings and operated by the currents passing through the frame.



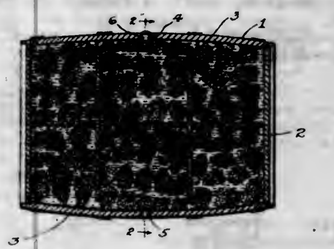
1,575,145. APPARATUS FOR DELIVERING ARTICLES TO AIRCRAFT. FRANK F. BRADSHAW, Yazoo City, Miss. Filed Dec. 27, 1920. Serial No. 433,463. 6 Claims. (Cl. 258—1.)

1. In an apparatus of the kind described, an article carrying device having means for gripping a flexible trailing device or cable, and movable from an open position to a closed gripping position and having means by which the weight of the article carried tends to force the gripping means to the closed position, and means releasable by said trailing device for holding the gripping means in the open position, substantially as set forth.



1,575,146. PORTABLE BORING MACHINE. HUGH S. BROWN, Roselle Park, N. J., assignor to The Hubron Company, Inc., a Corporation of New Jersey. Filed Oct. 8, 1919. Serial No. 328,251. Renewed Aug. 6, 1925. 3 Claims. (Cl. 255—22.)

1. In an earth boring machine the combination, with the main frame, of a vertically arranged bearing block having its lower end fastened to said main frame and having vertically arranged journal bearings in its upper and lower ends, an upright, tool holding, cylindrical member adapted to rotate in said bearings, a pinion

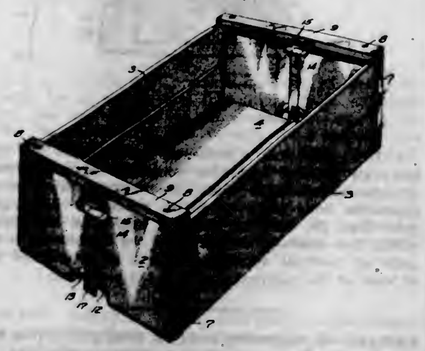


mounted on a horizontal shaft, which shaft is journaled in said bearing block between the said vertically arranged journal bearings, a vertically arranged rack bar meshing with said pinion and connected to said tool carrying member, and means for rotating said pinion.

1,575,147. LIGHT-CONTROLLING DEVICE. THOMAS BULL, near Santa Clara, Calif. Filed Nov. 17, 1924. Serial No. 750,382. 3 Claims. (Cl. 240—48.4.)

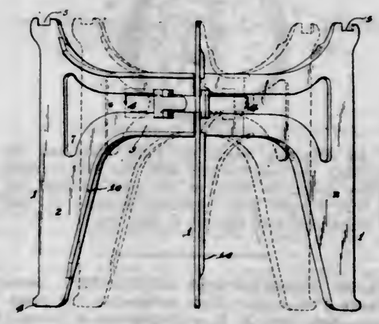
1. The combination with a source of light and a case therefor, of a light controlling device comprising a hollow truncated cone divided longitudinally into two parts having light reflecting interior surfaces, and means for pivotally mounting each part for vertical adjustment on said case.

1,575,148. PROCESS OF PACKING AND PRESERVING FRUIT. MARIO CARBONE, New York, N. Y. Filed Feb. 14, 1924. Serial No. 692,746. 8 Claims. (Cl. 99—1.)



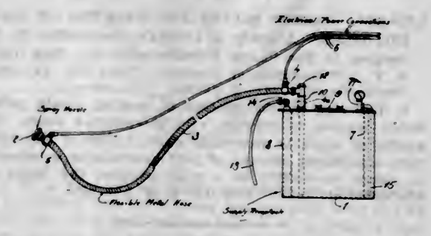
1. The herein described process of packing fruit, which consists in providing a suitable container, packing said container with fruit, filling said container with juice of fruit of the same type or kind as the fruit under treatment, said juice being impregnated with a sterilizing agent, and then sealing said container.

1,575,149. SCREW HOLDER AND DRIVER. JAMES L. CRAIG and ALEXANDER BLYTH CRAIG, San Francisco, Calif. Filed Feb. 11, 1925. Serial No. 8,880. 6 Claims. (Cl. 145—62.)



6. A screw holding device adapted to cooperate with a screw driver having a shank with a driving bit on one end thereof, a sleeve adapted to be secured on the shank near the bit end thereof, a second sleeve slidable axially to two positions on the first sleeve, a pair of jaws pivotally carried by the second sleeve and having means on the bit ends thereof for engaging a screw to be driven by the bit, the second sleeve in one axial position holding the screw-engaging portions of the jaws below the bit and in the other position holding the same above the bit, and means slidable axially on the second sleeve and cooperating with the jaws, movement thereof toward the bit being adapted to close the jaws and movement thereof in the opposite direction being adapted to open the jaws.

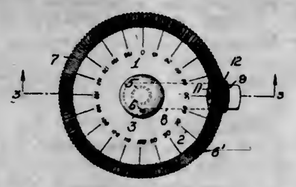
1,575,150. BOX. HUGH DE HAVEN, San Francisco, Calif. Filed Aug. 22, 1923. Serial No. 658,768. 11 Claims. (Cl. 217—66.)



11. A box comprising a head having beveled edges, bottom and side pieces having complementary shaped surfaces to engage said edges, a strap holding the bottom and side pieces to the head and resilient means for holding said strap in tension.

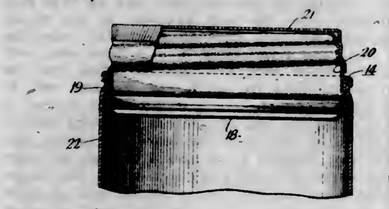
1,575,151. ADJUSTABLE NO-BOLT AND NO-RING TRIPOD BOILER STAND. HENRY E. DERRYSHIRE, Philadelphia, Pa., assignor to Sanitary Company of America, Philadelphia, Pa., a Corporation of Delaware. Filed Sept. 4, 1924. Serial No. 735,830. 3 Claims. (Cl. 248—41.)

2. A boiler stand comprising separable sections each including a vertically disposed body and an arm portion extending from the body inwardly of the stand, said arm provided with a longitudinal slot extending into the body and terminating in a widened end, said arm being provided with a tongue extending from its free end intermediate its width and the free end of the arm being beveled above and below the tongue, a cross head at the free end of said tongue having beveled faces at its inner end above and below the tongue, and said head being adapted to be passed through the wide end of the slot of a co-operating section and the tongue slid longitudinally in the slot to an adjusted position with the beveled ends of the arm and head engaging opposed faces of the arm of said cooperating section above and below the slot thereof.



1,575,152. SPRAY APPLICATION OF COATING COMPOSITION. CHARLES DI BATTISTA, Berwick, Pa. Filed May 22, 1925. Serial No. 32,035. 5 Claims. (Cl. 91—45.)

2. In spraying apparatus, a spray nozzle and a flexible hose connected thereto for supplying the nozzle, said hose being of metal and forming a resistance element in an electrical circuit for heating material flowing therethrough to the nozzle.



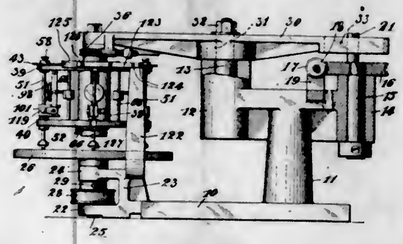
5. An apparatus for increasing and retaining fluidity of material and for spraying the same, which includes a container for the material, means for heating the material while in the container, a flexible conduit, having a discharge outlet, through which the material is adapted to flow, means for generating heat and for supplying the heat to the material in the conduit substantially throughout its length in order to maintain the material in a fluid condition while flowing therethrough, and means for causing the heated material to pass out of the discharge outlet so that it may be sprayed upon a surface.

1,575,153. VERNIER DIAL. JAMES F. DOBBINS, Brooklyn, N. Y. Filed Oct. 20, 1925. Serial No. 63,584. 6 Claims. (Cl. 74—7.)

1. An adjusting means for radio dials and the like comprising the combination with the dial mounted for rotation about an axis, of an arm swiveled on said axis, and a bevel gear rotatably mounted on said arm and contacting with the top of said dial.

1,575,154. CLOSURE FOR CONTAINERS. ROLLIN L. DRAKE, Port Arthur, Tex., assignor to The Texas Company, New York, N. Y., a Corporation of Texas. Filed Sept. 23, 1922. Serial No. 589,973. 5 Claims. (Cl. 220—39.)

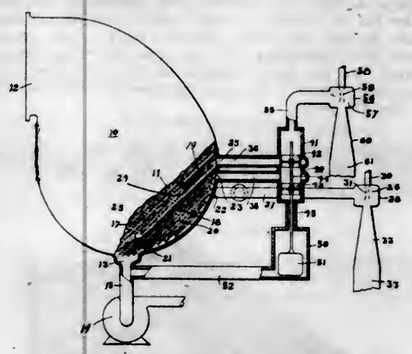
1. A container having adjacent an end thereof a curved portion, a closure for said container comprising a substantially concave member the edge of which is spun over said end and a portion of which is rolled against said curved portion so as to make a curved joint therewith, a threaded thimble rolled into said concave member and a cap therefor.



1,575,155. CASEIN SOLIDS AND PROCESS OF MAKING THEM. ANDREW A. DUNHAM, Bainbridge, N. Y., assignor to The Casein Manufacturing Co., New York, N. Y., a Corporation of Vermont. Filed Feb. 14, 1923. Serial No. 619,024. 2 Claims. (Cl. 99—11.)

1. The step in the process of making casein solids which consists in treating acid precipitated casein, the acidity of which is materially above 0.75% of free acid, with a sufficient amount of acid neutralizing substances to reduce its acidity to a point between the limits of approximately 0.75% and 0.25% of free acid.

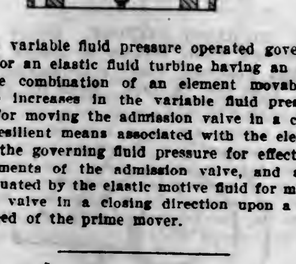
1,575,156. GRINDING AND POLISHING MACHINE. FREDERIC ECAUBERT, New York, N. Y. Filed July 18, 1923. Serial No. 652,254. 26 Claims. (Cl. 51—134.)



1. In a grinding and polishing machine, a lap member, a rovoluble work carrier having plates connected thereto, a spindle, a work holder connected to the spindle, and means associated with the spindle for engaging portions of the said plates to connect and disconnect the said spindle to and from the said plates.

18. In a grinding and polishing machine, a lap member, a work carrier comprising a revoluble hub and spaced plates connected thereto, a spindle, a work holder connected to the spindle, sets of links pivotally connected at corresponding ends in the said work carrier, a block for spacing and pivotally connecting the adjacent ends of the said links, an adjusting screw passing through the said block, means for pivotally connecting the opposite corresponding ends of the said links to the said spindle, a cam shaft journaled in the said plates, a cam carried by the said cam shaft, a spring coacting with the said adjusting screw for normally maintaining the links in an operative position, the end of the said adjusting screw being maintained in contact with the face of the cam by the said spring, a disk mounted exteriorly of one of said plates, a ratchet secured to

the outer end of the cam shaft, a pawl carried by the disk and adapted to engage the teeth of the ratchet, a brake for periodically engaging the disk to retard the movement of the same relatively to the said plate and then releasing the same, and a spring for then returning the disk to its normal position relatively to the plate to thereby impart a partial revolution to the cam shaft and cam through the said ratchet and pawl.



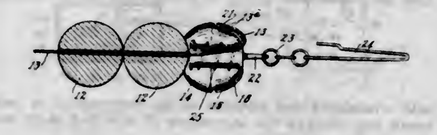
1,575,157. CONDENSER INSTALLATION. WARREN B. FLANDERS, Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 29, 1921. Serial No. 456,679. 12 Claims. (Cl. 257—24.)

1. In combination, a condenser having main and auxiliary air removal apparatus connected to the condenser at different operative levels, the auxiliary air removal apparatus being connected to the condenser at a higher level than the main air removal apparatus and means within the condenser for directing the condensate to the main air removal apparatus upon a predetermined rise of level of the condensate within the condenser.

1,575,158. GOVERNING SYSTEM FOR ROTATING MACHINES. WARREN B. FLANDERS, Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed July 12, 1921. Serial No. 484,100. 6 Claims. (Cl. 264—14.)

1. In combination, with a prime mover oil relay valve operating mechanism having a pilot valve and an operating cylinder with its piston member, connected to a motive-fluid admission valve, a device responsive to fluid pressure connected to the pilot valve for actuating the

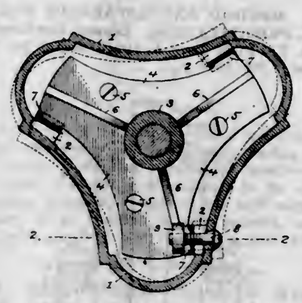
latter, and an auto-stop mechanism connected to the piston member for actuating the latter to close the admission valve upon overspeeding of the prime mover.



1,575,159. GOVERNOR. WARREN B. FLANDERS, Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 3, 1924. Serial No. 753,596. 5 Claims. (Cl. 264—14.)

1. In a variable fluid pressure operated governing apparatus for an elastic fluid turbine having an admission valve, the combination of an element movable in response to increases in the variable fluid pressure and effective for moving the admission valve in a closing direction, resilient means associated with the element and opposing the governing fluid pressure for effecting opening movements of the admission valve, and additional means actuated by the elastic motive fluid for moving the admission valve in a closing direction upon a predetermined speed of the prime mover.

1,575,160. SEPARATION OF METALS. SIGURD GIERTSEN, Kristiansands, Norway, assignor to Kristiansands Nikkelraffineringsverk, Kristiansands, S. Norway, a Corporation of Norway. Filed Sept. 26, 1921. Serial No. 503,358. 1 Claim. (Cl. 75—18.)

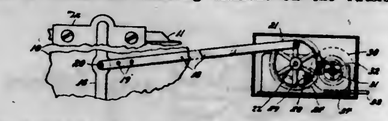


The method of separating copper from copper-nickel solutions, which comprises treating the same with Bessemerized copper-nickel matte containing less than about ten per cent of sulfur.

1,575,161. BEAD-NECKLACE TIP. RUDOLPH G. GRODE, Norwood, R. I. Filed June 20, 1925. Serial No. 38,444. 2 Claims. (Cl. 24—123.)

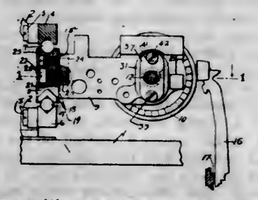
1. A bead necklace tip comprising a hollow body member having an external clamping face and coaxial outer and inner orifices, the margin of the inner orifice constituting a bead seat; a head member having an internal clamping face conforming to the external clamping face, a tubular shank inserted in the outer orifice of the body member, a slot opening on the outer margin of the head, and an outwardly projecting coupling eye; and an expansion spring seated on the internal surface of the body member and on an abutment on the tubular shank, and normally pressing the head member toward the clamping face of the body member, the arrangement being such that a terminal portion of a necklace cord extending through a string of beads, may be passed through the tubular shank, across a portion of the outer surface of the head member and into the slot, and disposed in convolutions between the clamping faces of the head and body members, said convolutions being confined by the clamping faces.

1,575,162. FLOOR FASTENING FOR STOOLS AND THE LIKE. SHERMAN A. HATHORNE, Waukegan, Ill., assignor to Chicago Hardware Foundry Company, North Chicago, Ill., a Corporation of Illinois. Filed June 8, 1925. Serial No. 35,579. 4 Claims. (Cl. 45—137.)



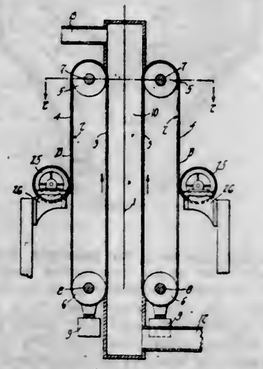
1. In a floor fastening for pedestals, the combination of a pedestal base of an open bottom shell form having a plurality of lateral inclined lugs in its interior, a floor plate formed for fixed attachment to a floor and for enclosure by the base, said floor plate having a plurality of inclined planes complementary to the inclined lugs aforesaid for interlocking engagement therewith in a turning movement of said base, and means for holding the parts in the described interlocked condition.

1,575,163. POWER-ACTUATED WINDSHIELD WIPER. ALVA K. HINCHMAN, Philadelphia, Pa. Filed May 7, 1920, Serial No. 379,590. Renewed Aug. 1, 1925. 2 Claims. (Cl. 15—253.)



1. In a windshield cleaning device for vehicles, an attaching bracket adapted to be attached to a windshield and provided with a driving shaft and gearing, a rock shaft on said windshield spaced from said bracket and provided with a crank arm on the inner side thereof,

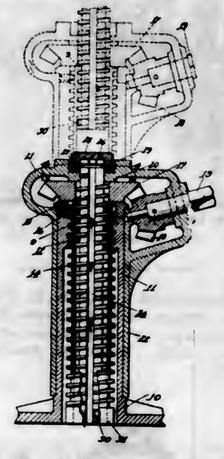
a connecting link between said crank arm and gearing, and an arm mounted on said rock shaft and provided with a windshield cleaning element on the outside of



said windshield and adapted to be reciprocated by said crank arm through the movements of said rock shaft and actuating gearing.

1,575,164. TYPEWRITING MACHINE. JOSEPH B. HOLDEN, Syracuse, N. Y., assignor to Remington Typewriter Company, Ilion, N. Y., a Corporation of New York. Filed Sept. 8, 1923. Serial No. 661,619. 13 Claims. (Cl. 197—149.)

1. In a typewriting machine, the combination of a platen, a platen carriage comprising a rear bar and a pair of end bars having a set normal relationship, and means for affording a swinging movement of said end bars relative to said rear bar to vary their normal relationship and alter the normal position of the platen in a vertical direction.

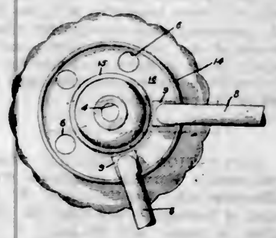


1,575,165. METHOD AND APPARATUS FOR ELECTRICAL PRECIPITATION. ERNEST HOPKINSON, New York, N. Y. Filed June 4, 1924. Serial No. 717,688. 9 Claims. (Cl. 183—7.)

1. An apparatus for collecting particles of matter from gaseous suspensions thereof, which comprises a relatively extended passageway for the gaseous suspension, an active electrode extending through said passageway, and a collecting electrode movable longitudinally of the passageway.

1,575,166. DOUBLE-SCREW JACK. ALVIN L. JOHNSON, Springfield, and WATERMAN GOULDING WARREN, Holden, Mass. Filed Apr. 8, 1925. Serial No. 21,655. 4 Claims. (Cl. 254—102.)

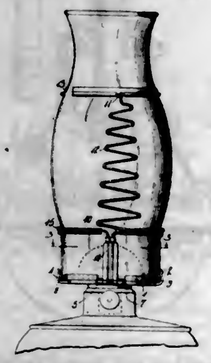
8. In a jack, the combination of a standard having a vertical passage therethrough with an internal thread extending for a distance therealong, a hollow screw mounted in said thread and having an internal thread extending for a shorter distance therealong, an inner screw mounted in the second internal thread and having a work rest freely rotatable on the top thereof, a gear resting on the top of the standard and having a passage therethrough for the smaller screw, said gear and smaller screw being splined together so as to permit



longitudinal motion of the screw and prevent relative rotation of the screw and gear, whereby when the gear is turned the hollow screw will act as a stationary nut to cause the inner screw to rise as it turns, said inner screw having means at the bottom thereof for preventing its screwing out of its nut, whereby when said means comes into action the two screws will turn together with gear and the outer screw will move upwardly, taking the frame with it.

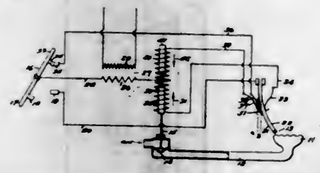
1,575,167. PROCESS FOR MANUFACTURING A LEAD ACCUMULATOR. KANEICHI KAWAKAMI, Hongo-Ku, Tokyo, Japan. Filed Oct. 3, 1921. Serial No. 505,177. 2 Claims. (Cl. 136—75.)

1. A battery element comprising a solid solution of a small percentage of mercury in a large percentage of lead alloyed with a small percentage of antimony, in the form of a porous plate.



1,575,168. LIGHTING FIXTURE. PHILIP KESTELL, San Francisco, Calif., assignor to Thomas Day Company, San Francisco, Calif., a Corporation of California. Filed Oct. 14, 1924. Serial No. 743,535. 2 Claims. (Cl. 240—78.)

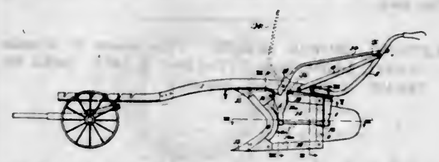
1. The combination with a lighting fixture, of a plurality of fixture arms having squared portions, a supporting plate for said fixture arms, two concentric beads on one side of said plate and enclosing a plurality



of apertures in said plate whereby said fixture arms may extend thru said apertures and at substantially right angles to the plane of the plate with the squared portions lying between the two beads, and fastening means on the other side of said plate engaging said fixture arms.

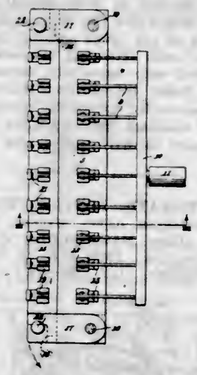
1,575,169. CHIMNEY HOLDER. SAMUEL J. KILLINGSWORTH, Brewton, Ala. Filed Sept. 17, 1924. Serial No. 738,210. 2 Claims. (Cl. 240—97.)

1. The combination with a burner having a support, and a chimney holder hingedly secured to said support for permitting a swinging movement of said chimney holder and chimney to expose the burner, upper and lower rings for engaging said chimney, and yieldable means connecting said rings to urge the upper ring and chimney downwardly into tight engagement with the chimney holder, and means for securing said chimney holder to said burner support when the chimney holder is in its operative upright position.



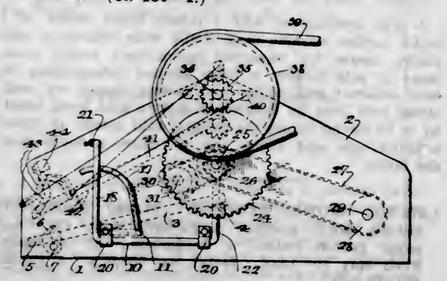
1,575,170. IGNITION SYSTEM. OTTO A. KNOPF, Oakland, Calif. Filed Dec. 11, 1923. Serial No. 679,960. 1 Claim. (Cl. 158—28.)

In combination, a burner, a pair of circuits arranged to be selectively energized and respectively to permit the flow of fuel to the burner, and to prevent said flow, an electrically energized means for igniting the fuel at the burner tip, a support for said igniting means, movable to carry said means out of the hot region near the burner in response to an increase in temperature, and circuit controlling devices operated by the movement of said support to control the said pair of circuits, whereby after completion of their function they become inactive.



1,575,171. PLOW. GEORGE S. KOHUT, Kool, Wyo. Filed Jan. 31, 1923. Serial No. 616,151. 1 Claim. (Cl. 97—26.)

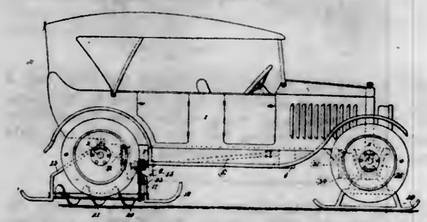
In a reversible plow, a mold board support comprising a forward arch bar having its forward edge sharpened to provide a cutting edge, a rear cross bar, side rails each connected forwardly to one end of the arch bar and rearwardly to one end of the cross bar, a double mold board having its forward edge connected to an arched bearing bar which is secured to the arch bar of the mold board support, brackets extending from the ends of the rear cross bar and connected to the rear portion of the mold board, a shaft extending from said



arched bearing bar rearwardly through the cross bar, a beam, and a pair of depending arms secured to the under side of the beam and lying respectively immediately behind the arched bearing bar and the cross bar, said arms having journal ends supporting said shaft.

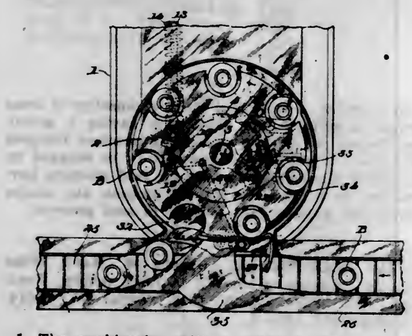
1,575,172. SWITCH. JOHN LUKASZEWSKI, Chicago, Ill. Filed Apr. 30, 1925. Serial No. 27,005. 4 Claims. (Cl. 200—15.)

3. In a switch, a mounting block, a plurality of arms projecting therefrom, said arms each having a groove formed therein, a plurality of movable members fastened to said block, a plurality of contacts to be engaged by said movable members, a support for said contacts having tongues to be received in said grooves, and means for removably holding said tongues in said grooves.



1,575,173. SELF-FEEDER. GEORGE W. MANN, Webb City, Mo., assignor of one-half to Jacob Gripka, Wentworth, Mo. Filed July 9, 1925. Serial No. 42,514. 3 Claims. (Cl. 130—1.)

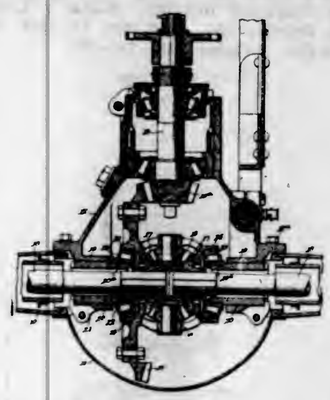
1. In a device of the class described, a deck mounted for swinging movement, a feeding means operating above the deck, a conveyor discharging upon the deck, mech-



anism for operating the conveyor, a clutch interposed in said mechanism, and means for throwing out the clutch, the last-specified means being operated by the deck as the deck swings downwardly responsive to an undue accumulation of material between the feeding means and the deck.

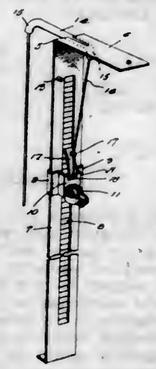
1,575,174. MOTOR SLEIGH. FRANCISZEK B. MIERZEJEWSKI, Adams, Mass. Filed Nov. 6, 1924. Serial No. 748,133. 1 Claim. (Cl. 180—3.)

In a motor sleigh, an axle; a frame consisting of a pair of arches pivoted at their central portions to the sleigh adjacent and above the axle, a pair of transverse members carried by the lower ends of the arch members and having their ends extending downwardly in parallelism and provided with oppositely disposed runner portions at their lower extremities; shafts journaled between the downwardly extending parallel portions of the transverse members and provided with propeller screws, and means to drive said shafts simultaneously.



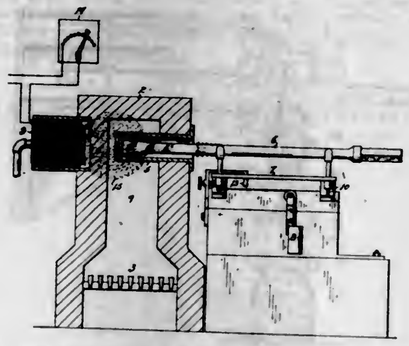
1,575,175. AUTOMATIC BOTTLE FEEDER AND UNLOADER. CHARLES ALVIN MILLER, Bainbridge, Ga., assignor to Miller Manufacturing Company, a Corporation of Georgia. Filed Feb. 23, 1924. Serial No. 694,600. 2 Claims. (Cl. 198—22.)

1. The combination with a rotary bottle holder, of a bottle carrier movable tangentially with respect to said holder, means for imparting intermittent rotary movement to said holder, a lever pivoted intermediate its ends adjacent said holder and carrier, means for oscillating said lever by first-named means, said lever adapted to be swung across the path of said carrier to direct a bottle onto said holder and to remove a bottle from the latter.



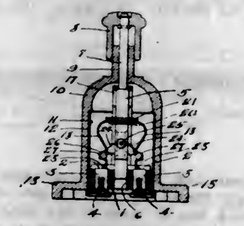
1,575,176. MOTOR VEHICLE. ALFRED MOORHOUSE, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed May 10, 1923. Serial No. 638,063. 1 Claim. (Cl. 74—99.)

In a rear axle structure for motor vehicles, in combination, a tubular axle casing having a central front opening, a cover frame secured to said casing over said opening, a pair of lugs integral with said frame and coaxial with said casing, sleeves screwed in said lugs and having adjusting notches at their outer ends, dogs mounted on said lugs adapted to engage said notches to hold said sleeves in adjusted positions, a differential cage between the inner ends of said sleeves, said cage having an annular flange on each side thereof coaxial



with said sleeves and said sleeves having reduced inner ends projecting into said flanges, an outer race ring seated in each of said flanges, an inner race ring seated on the reduced end of each sleeve and abutting the annular shoulder formed by said reduced end, the bearing faces of said race rings being conical and said inner race rings having marginal shoulders, and tapered rollers between said inner and outer rings.

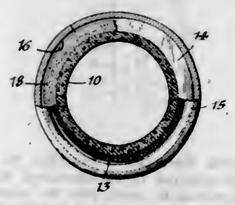
1,575,177. DROP-CORD HOLDER. LAWRENCE MORAN, Chicago, Ill. Filed Oct. 5, 1925. Serial No. 60,529. 2 Claims. (Cl. 248—2.)



1. A device of the class described including a bracket having a series of teeth formed thereon, a carriage slidably mounted on the bracket, a spring pawl on the carriage engageable with said teeth, a clamp on said carriage for engaging a drop cord, an eye on the intermediate portion of the pawl, a cord fixed to the carriage and threaded through the eye, and guide means on the bracket for the cord so that when said cord is pulled to raise the carriage it will pull the pawl out of engagement with the teeth.

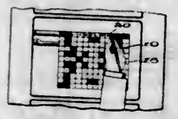
1,575,178. MAGNETICALLY-CONTROLLED HEAT TREATMENT OF MATERIALS. DAVID STANISLAUS O'DONOVAN, Vogelfontein, Transvaal, South Africa, assignor to O'Donovan Furnaces Limited, Johannesburg, South Africa. Filed Feb. 29, 1924. Serial No. 696,046. 7 Claims. (Cl. 263—6.)

1. The method of heating a magnetic body, which consists in mounting the body for movement to position it in a heating zone or withdraw it therefrom and so that the weight of the body has no material effect on its movement, subjecting it whilst in the heating zone to magnetic attraction tending to retain it in said zone, simultaneously applying to the body a retractive force, and relatively adjusting the retractive force and the magnetic force to cause the body to be retracted at a desired temperature.



1,575,179. ELECTRIC SWITCH. RAYMOND H. OLLEY, Syracuse, N. Y., assignor to Crouse-Hinds Company, Syracuse, N. Y., a Corporation of New York. Filed Dec. 4, 1923. Serial No. 678,549. 11 Claims. (Cl. 200—76.)

1. In a switch, the combination of a base having a contact thereon, a switch arm mounted to shift toward and from the base into and out of engagement with the contact, the switch arm having a portion extending parallel to the direction of the shifting movement and movable laterally relatively to the shifting movement thereof, whereby the switch arm has a wiping engagement with the contact, and an operating member movable in a direction substantially parallel to the former movement of the switch arm, and connections between the operating member and the switch arm to effect the shifting and lateral movements thereof.

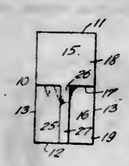


1,575,180. PIPE JOINT. ALBERT G. PERKINS, Buffalo, N. Y. Filed Aug. 13, 1924. Serial No. 731,757. 3 Claims. (Cl. 72—58.)

1. In a flexible joint for concrete pipes, the combination of a pair of concrete pipe-sections, each provided at its ends with coupling rings of flexible metal, each ring comprising a base portion embedded in the concrete pipe-section and a flange projecting therefrom, and clamping means connecting the opposing flanges of the pipe-sections, said clamping means and the portion of

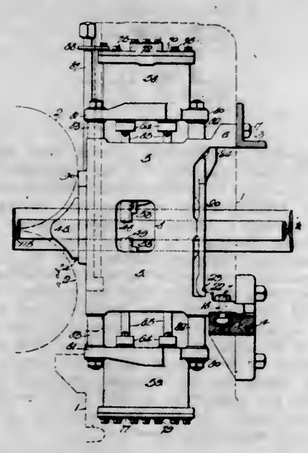
said ring-flanges engaged thereby being clear of and unimbedded in the pipe-structure, permitting the flanges to flex freely to compensate for misalinement of the sections.

1,575,181. METHOD OF PRODUCING, PHOTOGRAPHING, AND PRESENTING A CROSS-WORD PUZZLE. ISADOR SCHWARTZ, New York, N. Y. Filed Dec. 8, 1924. Serial No. 754,656. 5 Claims. (Cl. 88—16.)



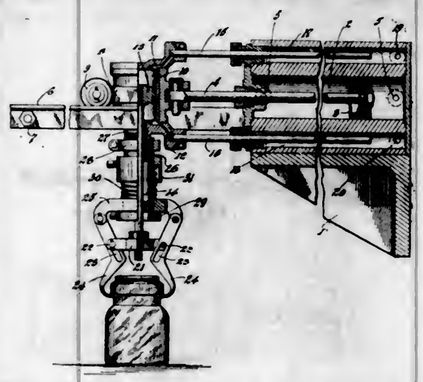
1. The method of presenting a cross word puzzle by animated pictures consisting of the progressive steps of exhibiting a chart of predetermined configuration ruled in rows of predetermined configurations having index numerals, causing a legend to appear outside of the chart directing attention to one of the rows, causing a puzzle writing to appear together with an exponent numeral relating to a row having a corresponding index numeral, picturing an index finger as pointing out first the exponent numeral, then the index numeral and the succeeding squares in said row suggesting the number of letters of the answer, picturing a hand with a marking implement in the act of filling the letters of an enigmatical word in the squares previously pointed out, causing the dissolving of said word, causing the gradual and finally the full appearance of an explanation of said enigmatical word.

1,575,182. WATCH-CHAIN FASTENER. YAICHIRO SHIBA, San Jose, Calif. Filed July 25, 1925. Serial No. 45,961. 2 Claims. (Cl. 24—3.)



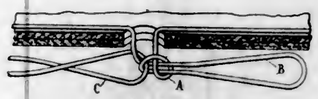
1. A lock for watch chains comprising a circular body member adapted to be extended over the front of a vest button, which member is provided with eyes on opposite sides so that it may be incorporated with a watch chain between the ends of the latter, a flange extending rearwardly from the outer edge of the body, being curved in cross section so as to extend behind the button and means on the back of the body for clasping the body to a button.

1,575,183. ROOFING ELEMENT. PETER E. SINNETT, Buffalo, N. Y. Filed Oct. 12, 1925. Serial No. 61,953. 6 Claims. (Cl. 108—10.)



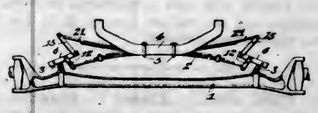
1. Roofing which comprises a plurality of roofing elements which are adapted to be assembled in rows with the separate elements in each row in spaced relation, and with the elements in alternate rows disposed in staggered arrangement and engaging the elements of adjacent rows, and said elements having portions of their lower faces which together form a substantially continuous surface which is adapted to contact throughout its entire area with a roof.

1,575,184. APPARATUS FOR REMOVING FLAWS AND SLIVERS FROM WORN RAILS. JOHN L. SMITH, Hamilton, Ontario, Canada, assignor to Sheridan A. Smith, Hamilton, Ontario, Canada. Filed Oct. 16, 1924. Serial No. 744,057. 13 Claims. (Cl. 80—3.)



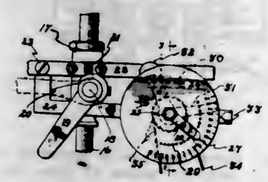
6. In apparatus of the class described, the combination with a rolling mill having rest bars; a rail head scraping apparatus associated with said mill whereby the mill rolls draw the rail through said apparatus, said apparatus comprising a housing, means to secure said housing to the rest bars of the mill, said housing having a rail pass, a guide held in said pass and having a portion projected out of the rear of said housing and a portion projecting to adjacent the front thereof, two sets of upper and lower knife holders projected into the guide, a bell mouth held on said housing at the front thereof and having a pass and spaced upper and lower pairs of spacer wings abutting said knife holders, sets of upper and lower spacers also abutting said knife holders above and below said guide, said spacers and said bell mouth being associated with said housing to constitute knife holder slideways, an upper and a lower cylinder mounted on the housing and each having a pair of piston chambers, pistons in said chambers, rods on said pistons projecting out of the cylinders and carrying said knife holders to effect the operation of the same.

1,575,185. AUTOMATIC TRANSFER DEVICE. THOMAS STENHOUSE, Washington, Pa., assignor to Hazel-Atlas Glass Company, Wheeling, W. Va., a Corporation of West Virginia. Filed Sept. 17, 1923. Serial No. 663,222. 12 Claims. (Cl. 214—1.)



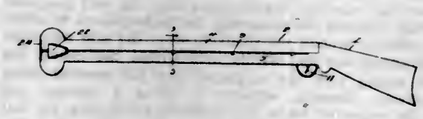
1. A transfer device for glass ware including a fluid pressure cylinder, a vertically reciprocable piston rod operated thereby, a cross-bar carried by the piston rod, a pair of pivotally mounted grippers operatively connected with the crossbar and having downwardly and inwardly inclined slots therein, means carried by the crossbar engaging said slots to open and close the grippers and to lift them bodily, and means for reciprocating the cylinder and piston bodily in a substantially horizontal plane.

1,575,186. SEWING. FREDERICK BAKER, London, England, assignor to Single Thread Lock-Stitch Machines Limited, London, England, a Company of Great Britain. Original application filed Jan. 17, 1923. Serial No. 613,223. Divided and this application filed Jan. 25, 1924. Serial No. 688,570. 11 Claims. (Cl. 112—262.)



1. Single thread lock stitching comprising a line of lengths of single thread on the top side of the material sewn and a line of loops of the same thread on the underside, each loop being locked at its root by its own upwardly passing strand leading to the top length of single thread lying above said locked loop.

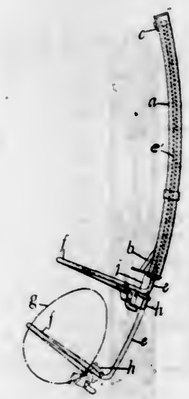
1,575,187. SHOCK ABSORBER. LOUIS BOYD, Shepherdsville, Ky., assignor to Boyd Shock Absorber Company, Shepherdsville, Ky. Filed Oct. 2, 1924. Serial No. 741,239. 1 Claim. (Cl. 267—19.)



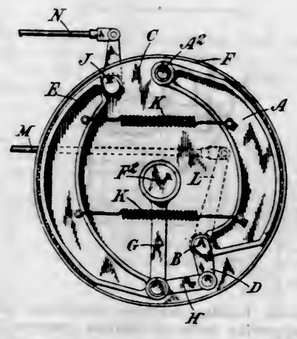
In a device of the character set forth associated with a vehicle axle and spring, a relatively long yoke member adapted to be pivotally connected to be a spring perch, depending links supporting one end of said spring from said yoke intermediate the ends thereof, a pair of upwardly extending arms pivotally connected to the other end of said spaced arms, and an auxiliary spring supported by and extending from said first mentioned spring and pivotally connected to the upper ends of said upwardly extending arms, said links and upwardly extending arms having that portion which is connected to the said yoke bearing against the outside thereof, and formed to position the other portion in alignment with the sides of the yoke.

1,575,188. TEMPERATURE-CONTROL DEVICE FOR LAUNDRY WASHING MACHINES. WILLIAM M. CHACE, Detroit, Mich. Filed Feb. 4, 1924. Serial No. 690,525. 6 Claims. (Cl. 126—372.)

1. A device of the character described, comprising the combination with a container for fluid, means for heating the fluid and a control device, of a means for preventing the temperature of the fluid increasing beyond a predetermined degree comprising a calibrated member indicating temperatures, a movable member for indicating the predetermined highest degree of temperature desired, an actuator member positioned relative to the control device by the positioning of the movable member, and a bi-metallic element in contact with the fluid of the container adapted through increase in degree of temperature to turn the indicator and actuator and actuate the control device to stop injection of heat when the desired temperature is attained.



1,575,189. TOY GUN. ALBERT JOSEPH CHABERT, Woonsocket, R. I. Filed Nov. 2, 1925. Serial No. 66,260. 4 Claims. (Cl. 124—7.)

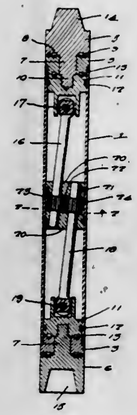


1. A gun of the class described comprising a stock, a barrel connected thereto, said barrel being composed of spaced sections, a flexible bow at the outer end of said sections, a string carried by said bow and extending between said sections, one of said sections being formed with shoulders with which said string may be selectively engaged to flex said bow, and means associated with said barrel and shoulders for disengaging the string from the latter.

1,575,190. EGG-MARKING APPLIANCE. WILLIAM COACKLEY, Goostrey, and WILLIAM HENRY GALLIMORE, Holmes Chapel, England. Filed Feb. 6, 1925. Serial No. 7,418. 3 Claims. (Cl. 119—22.)

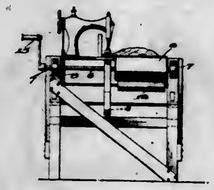
1. In egg marking appliances, the combination comprising a frame, means for attaching said frame to a hen, a holder for the egg on its delivery by the hen the said holder being in sliding connection with said frame, and a marking stamp in pivotal connection with said holder the said stamp being engaged and tilted by the egg during said delivery.

1,575,191. BRAKE FOR VEHICLES. LOUIS COATALEN, Wolverhampton, England, assignor to Sunbeam Motor Car Company, Limited, Wolverhampton, England, a British Company. Filed Dec. 13, 1923. Serial No. 680,404. 5 Claims. (Cl. 188—78.)



1. In a brake for a vehicle, the combination of a drum, a main segmental shoe inside said drum, a servo segmental shoe also inside said drum and on the opposite side of the axis of said drum, a fixed pivot for one end of said main shoe, an operative connection between the other end of said main shoe and the adjacent end of said servo shoe, including a lever and a cam operated thereby, said cam engaging said main shoe.

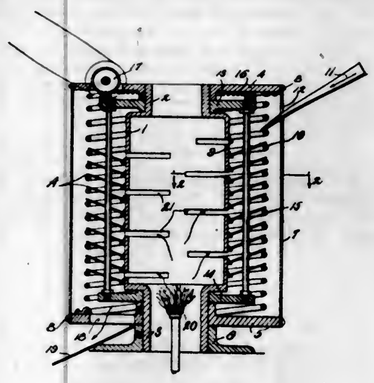
1,575,192. TOOL. JOHN E. COLBERT, Tupman, Calif., assignor of one-half to Frank R. Giddens, Tupman, Calif. Filed May 11, 1925. Serial No. 29,482. 2 Claims. (Cl. 145—66.)



1. In a tool of the class described, an elongated casing, tool engaging members rotatably mounted in the

ends of the casing, a pair of spaced bearing blocks mounted in the central portion of the casing in spaced

relation to each other, shafts extending longitudinally of the casing and journaled through said blocks, gears on the shafts between the blocks and meshing with each other.



1,575,193. TOBACCO-HOUSING MACHINE. GEORGE L. DAVIS, Danville, Va. Filed Oct. 3, 1925. Serial No. 60,310. 2 Claims. (Cl. 131—21.)

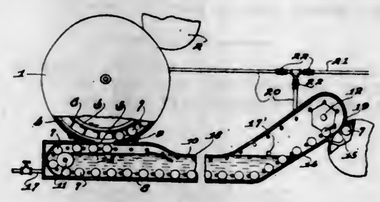
1. A tobacco housing machine comprising in combination a supporting table, an endless conveyor belt and a sewing machine operatively mounted thereon, a tape adapted to pass beneath the needle of the sewing machine and adjacent to one side of the conveyor belt; means for actuating the said sewing machine and conveyor belt and a butting board adjustably arranged upon the supporting table in parallel relation to the conveyor belt, said board being adapted to regulate the position of the tobacco leaves as they are placed upon the conveyor belt.

1,575,194. DRIER. BRADLEY DEWEY, Cambridge, Mass., assignor to Dewey and Almy Chemical Company, Cambridge, Mass., a Corporation of Massachusetts. Filed Feb. 17, 1925. Serial No. 9,824. 8 Claims. (Cl. 34—42.)

1. A drier comprising a vertically disposed drying chamber having means to admit can ends thereto, spiral means for supporting can ends at an angle in such a manner that the inner edges thereof are guided and the

outer portions thereof are loosely supported, and means independent of said last means to cause the can ends to travel through said chamber.

1,575,195. PENCIL HOLDER. AMBROSE FLEMING, Washington, D. C. Filed Mar. 16, 1923. Serial No. 625,558. 1 Claim. (Cl. 120—21.)

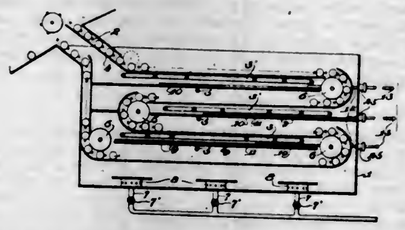


A pencil holder comprising a casing having a lead passage in its forward end, a pencil lead receiver axially insertable within the casing and having clutch portions at the forward end for cooperating with the delivery end of the casing, whereby to grip the leads projected from the receiver through the casing end, and a magazine into which the leads are endwise insertable, the said magazine having elements for sustaining the leads therein in annular relation around the receiver, when the said magazine is inserted into and fixedly held within the casing, the said casing with the magazine and the receiver being relatively rotatable, whereby to bring a selected one of the magazine leads into position for falling, its full length, into the receiver and means adapted, under relative rotation of the casing and the receiver for clamping the selected pencil lead in the front end of the casing, the said magazine consisting of a resilient metal plate bent to tubular shape with one of its meeting edges bent, its full length, radially inward to constitute a stop against which the leads held in annular relation within the casing can be successively fed, the said tubular magazine being insertable into one end of the casing and held, under frictional contact, in rigid connection therewith.

1,575,196. APPARATUS FOR HEAT-TREATING SUBSTANCES PACKED IN SEALED RECEPTACLES. NELSON H. FOOKS, Preston, Md. Filed Feb. 12, 1925. Serial No. 8,841. 3 Claims. (Cl. 126—272.)

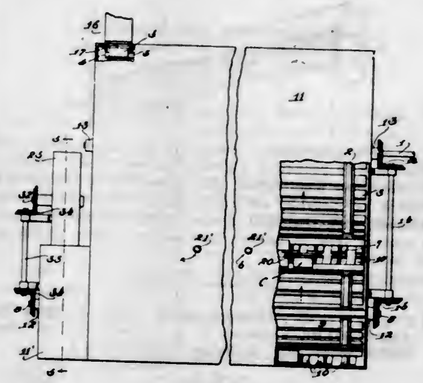
1. A combined cooker and cooler comprising a cooking retort and a cooling retort, the latter positioned beneath

the former and communicating therewith by an open passage, the cooling retort having its discharge end remote from said passage and elevated above the main body



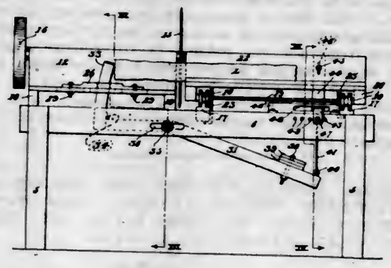
of said cooling retort and means for supplying equal fluid pressure to the cooking retort and said elevated end of the cooling retort.

1,575,197. COMBINED COOKER AND COOLER. NELSON H. FOOKS, Preston, Md. Filed Feb. 28, 1925. Serial No. 12,432. 4 Claims. (Cl. 126—277.)



2. In combination, a tank, a helical can path supported in fixed position therein, said can path having a point of discharge for the cans, an endless conveyer arranged below said helical can path within the tank parallel with the axis thereof, and a can chute leading from the discharge end of said can path directly to the upper run of said endless conveyer, said conveyer adapted to convey the cans away from the discharge end of the chute through a cooling medium within the tank.

1,575,198. APPARATUS FOR COOKING AND COOLING IN SEALED RECEPTACLES. NELSON H. FOOKS, Preston, Md. Filed Mar. 11, 1925. Serial No. 14,805. 2 Claims. (Cl. 126—272.)

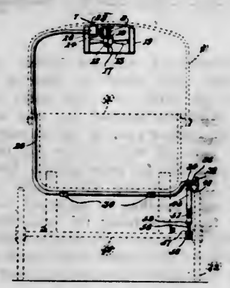


1. In a cooker and cooler comprising a liquid container, means for supplying heat to the container intermediate the top and bottom, means for supplying liquid to the container adjacent the bottom and means for restricting currents in the entering liquid to a substantially horizontal plane.

1,575,199. COMBINED COOKER AND COOLER. NELSON H. FOOKS, Preston, Md. Filed Apr. 4, 1925. Serial No. 20,788. 2 Claims. (Cl. 126—272.)

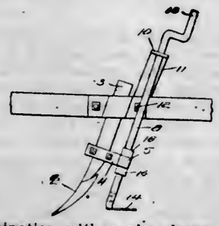
1. In combination, a pair of helical can tracks of different lengths, the track of shorter length being superposed on the other one, the extra length of the longer track extending beyond one end of the shorter track, means for feeding cans to the shorter track, rotary means within both of said tracks for progressing the cans therealong, means for passing cans from the shorter to the longer track at any given point between them comprising alined openings in adjacent sections of the tracks, means for discharging the cans from the longer track comprising a rotary valve tangentially arranged on the extra length of the longer track, said valve adapted to receive the cans from the discharge end of the longer track.

1,575,200. AUTOMATIC MEASURE FOR WOOD SAW TABLES. CHARLES H. FREDENBURG, Afton, N. Y. Filed June 13, 1925. Serial No. 36,779. 1 Claim. (Cl. 143—168.)



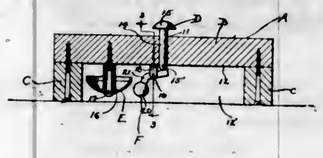
In a device of the type described, a support, a power saw carried thereby, a carriage movable on the support for properly feeding a log against the saw to cause a section to be severed from the log, an apertured guide plate carried by the support longitudinally of the carriage and adjustable in respect to the latter, a lever pivoted on a fulcrum pin carried by the support and adjustable longitudinally of the carriage, a stop hinged to one end of the lever and projecting into the aperture of the guide plate, a weight on the lever for normally holding the stop projected above the top plane of the support, and a connection between the remaining end of the lever and the carriage for causing the lever to pivot to move the stop below the top plane of the support when the carriage is moved to make the cut.

1,575,201. COMB. ALBERT H. GOSHIA, Toledo, Ohio. Filed Nov. 24, 1924. Serial No. 752,001. 1 Claim. (Cl. 132—11.)



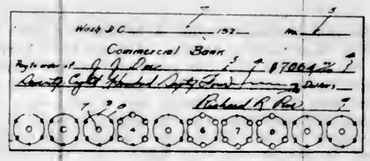
A comb comprising a relatively flat longitudinal body fashioned to provide a plurality of comb teeth, the body at the upper longitudinal edge thereof being transversely curved to provide an overhanging inverted U-shaped member, such U-shaped member being adapted to receive a curling iron to protect the operator while in the act of curling one's hair.

1,575,202. FAN ATTACHMENT FOR CARRIAGES. STEVE HALMI, Yonkers, N. Y. Filed Apr. 18, 1925. Serial No. 24,101. 3 Claims. (Cl. 230—7.)



1. In a device of the type described, the combination with a wheeled carriage, of a fan mounted thereon including a series of blades carried by a hub, and a gear formed integrally with the hub; a flexible shaft, a gear connected to one end of the flexible shaft and meshing with the gear part of the fan hub, a friction wheel connected to the other end of the flexible shaft, a support for the friction wheel including a tubular member vertically supported on an axle of the carriage, a downwardly tensioned rod slidable in the tubular member and supporting the friction wheel at its upper end, and means for selectively moving the tread of the traction wheel into and out of engagement with the tread of one of the ground-engaging wheels of the carriage.

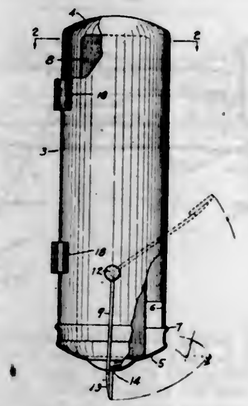
1,575,203. COTTON CHOPPER AND WEEDER ATTACHMENT FOR CULTIVATORS. JOHN WARREN HIGGINS, Merkel, Tex. Filed July 9, 1925. Serial No. 42,517. 3 Claims. (Cl. 97—12.)



1. In combination with a plow beam, a plow and the usual foot therefor, of a weeder comprising a vertical rod, a bracket extending rearwardly from the plow foot for supporting the vertical rod, an additional support for said rod extending upwardly from the plow beam, a handle formed on the upper end of the rod, and a cutter blade extending laterally from the lower end of the rod, said rod being adapted for rotatable movement in said bracket when the handle is operated.

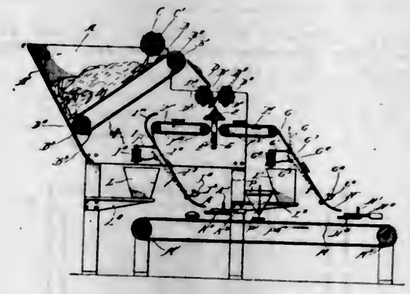
1,575,204. AMUSEMENT DEVICE. MICHAEL RAY HILTY, Comanche, Tex. Filed Nov. 10, 1923. Serial No. 674,019. 2 Claims. (Cl. 273—102.)

1. In an amusement device a platform, spacing strips secured to the under side of said platform and providing a recess below said platform, a bell mounted on the under face of said platform in said recess, a movable target extending vertically through the platform and adapted for reciprocatory motion, and a tapper pivotally secured intermediate its ends to the under face of the platform for striking the bell when said movable target is caused to move downwardly when struck with a missile.



1,575,205. BANK CHECK. FRANK R. HINTON, Johnson City, Tex. Filed July 24, 1925. Serial No. 45,863. 3 Claims. (Cl. 283—9.)

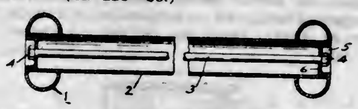
1. A bank check having customary appropriately designated spaces on its face for reception of the usual entries, a horizontal row of circles formed across the bottom of the face of the check, a consecutive arrangement of digits in the centers of the circles, and a zero in the center of the remaining circle, circumferentially spaced indicating numbers formed around each circle, said numbers being arranged in numerical order and adapted to be utilized in indicating the order in which the coacting central digit is read in verifying the amount written on the check.



1,575,206. FIRST-AID-KIT CONTAINER. LOUIS P. HOWE, San Francisco, Calif., assignor to Standard Oil Company, a Corporation of California. Filed May 29, 1923. Serial No. 642,199. 1 Claim. (Cl. 206—1.)

A first aid kit container, comprising an elongated cylindrical metallic container having a top integral with the side wall of said container to present a sealed upper end and an open bottom end, a bottom closure having an elongated cylindrical wall and a circumferential bead, said bottom closure frictionally fitting snugly into the lower end of the container, said cylindrical bead of the bottom closure limiting the extent to which the bottom closure fits within the cylindrical wall, and forming a substantially dust-proof joint with the bottom end of the container, means for holding the closure tightly into place but permitting its ready removal, brackets secured

to the container and adapted to receive means to hold the container in its vertical position to a support, said bottom closure being concaved and adapted to support the articles within the container.



1,575,207. BISCUIT-HANDLING MACHINE. WARREN H. HUNGERFORD, Chicago, Ill. Filed Dec. 3, 1923. Serial No. 678,091. 15 Claims. (Cl. 107—1.)

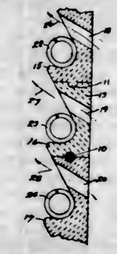
1. In a biscuit handling device, a biscuit feeding means, a biscuit facing means adapted to deliver a series of biscuits each with the same side facing up, means for dividing the biscuits delivered by said facing means into a plurality of series, means for conveying said series along separate paths, means for reversing the facing of all of the biscuits of one of said series only.

15. In a biscuit handling device, a biscuit feeding means, a biscuit facing means adapted to deliver a series of biscuits each with the same side facing up, a plurality of conveyors, each conveyor adapted to receive and separately convey a portion of the biscuits delivered by said facing means and means for limiting the delivery of biscuits conveyed by each of said conveyors, comprising a cut-off element and means for actuating it comprising a movable section in said conveyor, a solenoid and an electric contact therefor adapted to be contacted by said movable section in response to a pre-determined load of biscuits thereupon, and means for normally maintaining said movable section out of contact with said contact comprising a lever and a weight adjustable therealong.

1,575,208. METAL LADDER. FREDRICK L. JACOBS, Detroit, Mich. Filed May 8, 1922. Serial No. 559,256. 1 Claim. (Cl. 228—55.)

In a ladder, a tubular side rail having flattened opposite wall portions with an opening in one of said portions, and a boss in the other extending toward said opening and forming an indentation exteriorly of the rail, a tubular rung passing through said opening and embracing said boss, and a tie member extending within the rung and having an enlargement within said indentation.

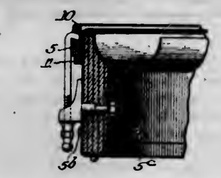
1,575,209. DRAWING INSTRUMENT. AKSEL THEODOR JESPERSEN, Omaha, Nebr. Filed June 4, 1924. Serial No. 717,778. 10 Claims. (Cl. 120—43.)



1. A drawing instrument comprising a handle, marking means which is continuously revoluble upon movement of the instrument while in contact with a surface, an inking roller in contact with said means to ink the same for the making of marks, and a holder terminating in a curved portion constituting a cup to contain a supply of ink into which said inking roller dips.

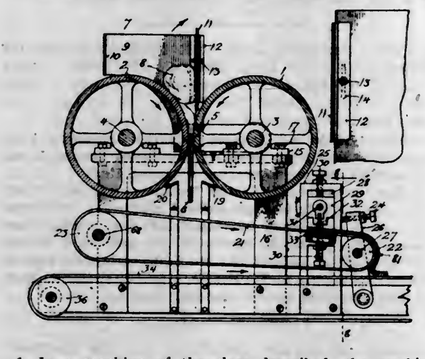
1,575,210. PROCESS FOR THE MANUFACTURE OF FIBERS, TAPE, ETC., FROM VISCOSE. ADOLF KÄMPF, Premnitz, Westhavelland, Germany. Filed May 7, 1923. Serial No. 637,374. 3 Claims. (Cl. 18—54.)

1. The method of making cellulose products from viscose that comprises spinning unripened viscose in an acid bath having a temperature of about 4° C.



3. The method of making cellulose products from viscose that comprises producing completely unripened viscose from completely unripened alkaline cellulose, and spinning the unripened viscose in an acid bath having a temperature of about 4° C., the bath containing organic bodies or salts only to the extent in which they find their way into the bath by the spinning process.

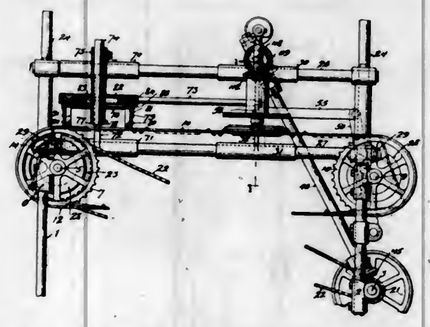
1,575,211. ELECTRIC HEATER. ARTHUR KEMPSTON and GEORGE J. HENRY, San Francisco, Calif., assignors to Majestic Electric Appliance Co., San Francisco, Calif., a Corporation of California. Filed Apr. 2, 1925. Serial No. 20,036. 4 Claims. (Cl. 219—34.)



1. In an electric heater, a refractory member adapted to carry an electric resistance and comprising a plurality of receiving shelves substantially parallel and spaced apart, a plurality of air ducts in said member adjacent said resistance whereby air passing through said ducts is highly heated.

1,575,212. STRINGED MUSICAL INSTRUMENT. WALTER I. KIRK and LOUIS E. PETERSEN, Chicago, Ill., assignors, by mesne assignments, to Marquette Music Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 29, 1922. Serial No. 557,271. 3 Claims. (Cl. 84—269.)

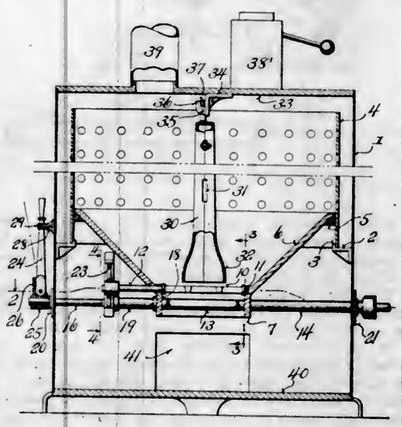
1. A stringed musical instrument having a rim with an annular shoulder, a diaphragm extending across the rim, means for holding the diaphragm under tension and an annular member arranged beneath the diaphragm and extending around within said rim, and at the upper edge of the same, said annular member being concave with both its outer and inner edges near the diaphragm so as to form a resonating chamber beneath the diaphragm, the inner edge of said member being free from contact with the diaphragm.



1,575,213. MACHINE FOR ROLLING PIE-CRUST DOUGH. JOHN F. KOHLER, White Plains, N. Y., assignor to New York Pie Baking Company, New York, N. Y., a Corporation of New York. Filed May 10, 1921, Serial No. 468,237. Renewed July 22, 1925. 4 Claims. (Cl. 107—12.)

1. In a machine of the class described, the combination of a pair of cooperating rollers spaced apart and adapted to roll a body of dough between them into sheet or strip form, and a hopper for holding a supply of dough to be taken by said rollers, said hopper being so disposed in relation to said rollers that the dough contained therein will have a relatively large area of contact with one of said rollers, and a wall in said hopper adjustable relatively to one of said rollers and arranged adjacent to the bight of said rollers and adapted to limit the contact of said body of dough with the other of said rollers to a relatively smaller uniform area than the area of contact with said first roller.

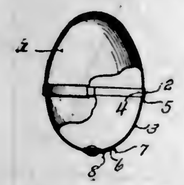
4. In a machine of the class described, the combination of means for rolling a body of dough into strip form of substantially uniform thickness, a conveyor for receiving the strip of dough therefrom, means for operating to sever said strip into individual sheets while moving with said conveyor, said severing means operating at a different speed to said conveyor to separate the severed edges of the dough, a second conveyor moving faster than said first conveyor and receiving the dough therefrom, and a roller for re-rolling said dough into a thinner body of substantially uniform thickness and operating on the dough while it is moving with said second conveyor.



1,575,214. PIE-MAKING MACHINE. JOHN F. KOHLER, Larchmont Manor, N. Y. Filed Aug. 22, 1923. Serial No. 658,705. 25 Claims. (Cl. 107—1.)

1. In a pie making machine the combination of means for holding a pie plate having a sheet of dough thereon; means for cutting the sheet of dough to a circumference larger than the finished product; means for turning in the projecting edge of the dough and means for forming the turned-in dough into a rim.

10. In a pie making machine the combination of a support adapted to hold a pie plate with the flange of the plate resting on the support; a die co-operating with the said plate to press a sheet of dough; a cutting member co-operating with said support to cut a disk of dough of larger circumference than the finished product; means for pressing the cutting means into contact with said support; a blade for turning the projecting edge of dough inwardly between the plate and die, and means for pressing said blade into contact with said support.

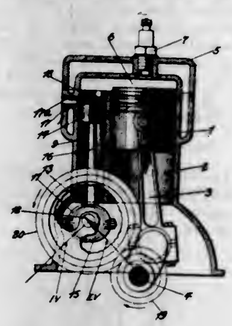


1,575,215. GARBAGE INCINERATOR. MATHIAS ANTON KOHN, Milwaukee, Wis. Filed Jan. 13, 1925. Serial No. 2,165. 2 Claims. (Cl. 110—18.)

1. A garbage incinerator comprising an outer shell having a transverse top, a perforated colander positioned therein and spaced therefrom, and having a downwardly extending open hopper, a grate carried in the lower portion of said hopper, a burner positioned below said grate and operatively connected to said grate, means for simultaneously rocking said grate and burner, a hollow vertical flame distributor positioned above said grate and having an open bottom and outwardly opening

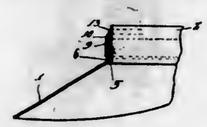
apertures, and means carried by said transverse top and cooperating with the upper portion of said flame distributor to hold said flame distributor against rocking motion.

1,575,216. FISHING BOBBER. KURT KUEHN and OTTO RIBBECK, Manitowoc, Wis. Filed July 23, 1925. Serial No. 45,613. 2 Claims. (Cl. 43—49.)



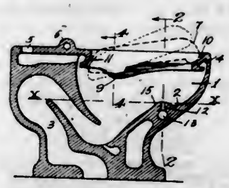
1. A bobber comprising a hollow metallic member of oval, shape, said bobber having a spring clip secured to its lower end and adapted to receive a line between such clip and the body of said bobber and having an outwardly turned outer end and having a recess intermediate its ends.

1,575,217. SEPARATION AND RECOVERY OF ARSENIC AND/OR ANTIMONY AND TIN. JOHN AUGUSTUS LAHEY, Sewaren, N. J., assignor to Vulcan Detinning Company, Sewaren, N. J., a Corporation of New Jersey. Filed May 6, 1925. Serial No. 28,523. 17 Claims. (Cl. 204—57.)



1. The improvement in separating arsenic and tin which comprises evaporating a solution containing the arsenic and tin in the form of oxysalts, cooling the solution and crystallizing out therefrom the oxysalts of arsenic while retaining the tin in solution, and recovering the tin from the remaining solution.

1,575,218. INTERNAL-COMBUSTION ENGINE. CHARLES LATTA, St. Louis, Mo., assignor of one-half to Allen Thurman Latta, St. Louis, Mo. Filed Feb. 11, 1922. Serial No. 535,669. 3 Claims. (Cl. 123—84.)

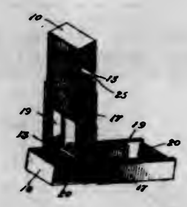


1. In an engine, a piston cylinder, a compression and combustion chamber at one end of the cylinder, separate inlet and exhaust valve cylinders having their upper ends in the same plane with and communicating with said chamber in the same plane, an inlet port to the inlet valve cylinder, a sliding piston valve in said inlet valve cylinder, an exhaust port from said exhaust valve cylinder in the same plane with said inlet port, a sliding piston valve in said exhaust valve cylinder, a sealing device on each of said valves, said valves being duplicates, a cam shaft, cams of equal size on said shaft having their long radii at an angle of 90° relative to each other, and connections of equal length from said cams for operating said valves in strokes of equal length and in a relationship in which the sealing device on the inlet valve is beginning to open the inlet port when the sealing device on the exhaust valve has closed the exhaust port, and vice versa.

1,575,219. SUNSHADE. MARGARET E. MCCLAY and CHARLES E. MCCLAY, Los Angeles, Calif. Filed July 7, 1924. Serial No. 724,571. 1 Claim. (Cl. 2—12.)

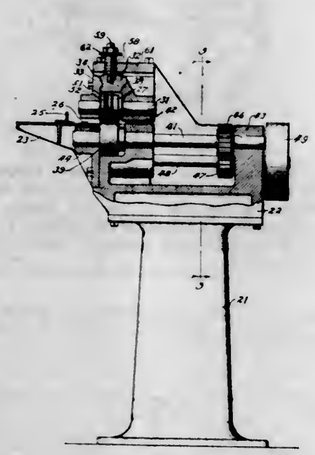
A sunshade formed of pyralin comprising a visor having an upper engaging edge, a sweatband having a longitudinally extending air duct formed therein, the said sweatband being cemented to the visor at the upper engaging edge and head straps secured to the said sweatband.

1,575,220. SANITARY FIXTURE. FRANCIS T. MEYER, Montclair, N. J., assignor to Meyer-Sniffen Co., New York, N. Y., a Corporation of New York. Filed Sept. 26, 1924. Serial No. 739,994. 6 Claims. (Cl. 4—7.)



1. The combination of a water closet hopper or the like and means for flushing it, a bed pan supporting flange below the top edge of the rim closely adjacent thereto and above the bottom of the hopper, a jet opening below the support, and means for supplying a flushing fluid to the jet.

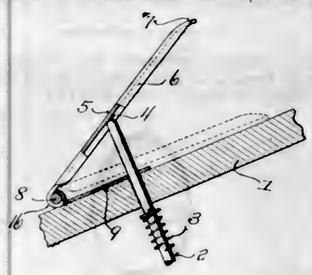
1,575,221. FOLDING COT. FRANK H. MORSE, Detroit, Mich. Filed Jan. 25, 1922. Serial No. 531,567. 4 Claims. (Cl. 5—118.)



2. In a cot frame, a cross piece consisting of two parts pivoted together at their inner ends, means for limiting the relative pivotal motion of said parts to a position at which they are substantially in line, a pivot rod joining said parts and being turned upward, a supporting surface, the upturned end of said pivot rod engaging in a cavity in said frame at said supporting surface.

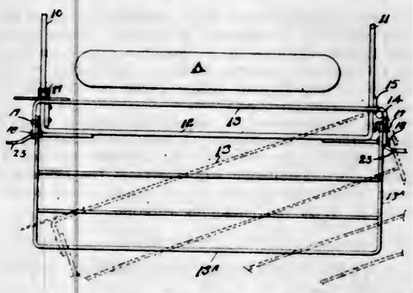
1,575,222. BRACELET. NELS T. NELSON, Attleboro, Mass., assignor to J. F. Sturdy's Sons Co., Attleboro Falls, Mass., a Corporation of Massachusetts. Filed July 15, 1925. Serial No. 43,776. 11 Claims. (Cl. 59—79.)

1. An extendible bracelet structure comprising a series of box-shaped link units, each having two cooperating relatively slidable sheet metal band links, one forming broad top and bottom walls and the other comparatively narrow side closing walls, the bottom wall of said band link having a lateral slot at substantially the middle of its length to permit the passage of a side band link therethrough for ready detachment of the units one from the other.



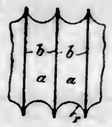
1,575,223. SCORING MACHINE. RONALD E. J. NORDQUIST, Maplewood, N. J., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 12, 1923. Serial No. 674,370. 9 Claims. (Cl. 113—15.)

1. A machine for scoring blanks for tearing strip containers, comprising a feeding table, a feeding roller for directing the blanks across said table, and a free scoring roller disposed above said feeding roller and adapted to be rotated by the motion of the blank to perform a scoring operation upon the latter.



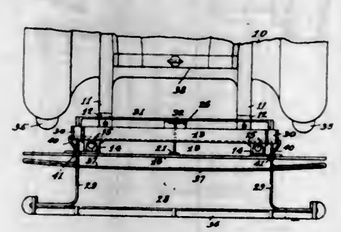
1,575,224. FOOT PEDAL. ELWIN D. OSBORNE, Racine, Wis. Filed Nov. 6, 1925. Serial No. 67,275. 2 Claims. (Cl. 74—81.)

1. An accelerator pedal for automobiles having a floor board and an accelerator rod, said accelerator comprising a sheet metal base member adapted to be secured to the floor board, a movable sheet metal member, a pintle pin pivotally joining said movable member and said base



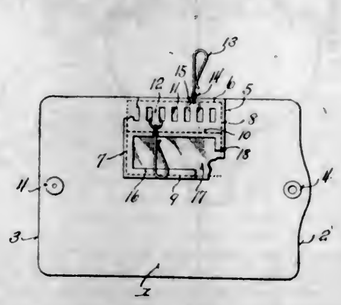
member, said movable member and said base member having projecting lugs and recesses cooperating to limit the upward motion of the movable member.

1,575,225. BAGGAGE CARRIER FOR AUTOMOBILES. ARTHUR PAINTER, Berkeley, Calif. Filed May 29, 1924. Serial No. 716,683. 5 Claims. (Cl. 224—29.)



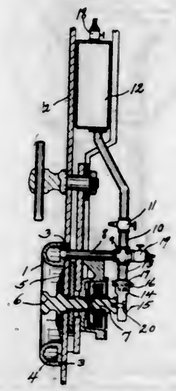
1. A baggage carrier for automobiles comprising carrier arms attached to said automobile and a rack pivotally mounted on a vertical axis upon one of said carrier arms so that said rack can be swung outwardly, said rack comprising a horizontally pivoted part adapted to swing downwardly into baggage holding position and to tilt upwardly to stand adjacent to the rear end of the automobile when not in use and means for securing said part of rack when in baggage holding postion.

1,575,226. WALL FOR VESSELS SUBJECTED TO EXTERIOR OVERPRESSURE. FRIEDRICH PICHLER, Ingolstadt, Germany. Filed Jan. 25, 1924. Serial No. 688,628. 2 Claims. (Cl. 220—72.)



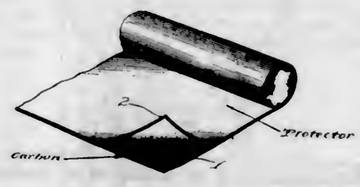
1. As a new article of manufacture, a thin wall for vessels subject to heavy external pressures, said wall consisting of a series of juxtaposed curved units, the outer surface of each unit presenting an uninterrupted concave curvature only and the total area of the juxtaposed parts of the units being so minute as compared with the area of the curved portions that the major portions of the wall constituted by the part of concave curvature are subjected only to tensile stresses and the relatively minute portions of the wall at which the units are juxtaposed are subjected to compressive strains within the material of the wall upon the occurrence of a substantial exterior pressure.

1,575,227. SAFETY FENDER FOR AUTOMOBILES. MATTHEW POLJANIC, West New York, N. J. Filed June 2, 1925. Serial No. 34,277. 7 Claims. (Cl. 293—37.)



2. In a safety fender construction for automobiles, a support bar extending transversely across the forward extremity of the vehicle, a vertically movable safety gate structure, vertically disposed guide rods carried by the gate structure, bracket members mounted on the support bar in which the guide rods are supported for vertical movement, a latch member extending through the support bar for normally engaging and holding the safety gate in an elevated position, a pivoted tripping arm connected with the latch member at the rear of the support bar, a tripping bumper arranged to move rearwardly upon contact with an object, and means for applying the rearward movement of the tripping bumper to an actuation of the tripping arm whereby to withdraw the latch from engagement with the gate and permit the gate to drop to protective position.

1,575,228. KEY CASE. ROBERT H. ROLFS and HARRY J. ROLFS, West Bend, Wis., assignors to Amity Leather Products Co., West Bend, Wis. Filed May 8, 1925. Serial No. 28,842. 2 Claims. (Cl. 150—40.)

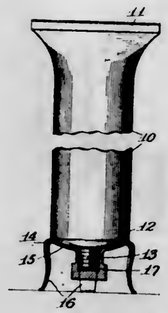


1. A key case comprising a body portion having foldable end flaps, a sheet of flexible material stitched to said body portion along its marginal edges and having a portion thereof free from said body portion, a relatively large cutout formed adjacent the unattached portion, a transparent member positioned rearwardly of said cutout and providing an identification card pocket, said sheet of material having a plurality of regularly spaced cutouts of smaller size than said first mentioned cutout, and defining tongues therebetween, and key hooks provided with rings, said rings being looped around said tongues.

1,575,229. SAFE PROTECTOR. DOMENICK RUFF, Youngstown, Ohio. Filed July 18, 1924. Serial No. 726,848. 2 Claims. (Cl. 109—6.)

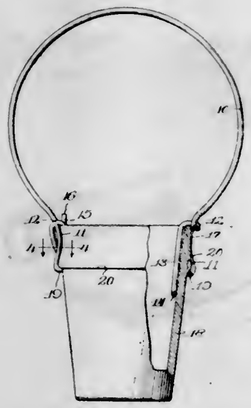
1. In a device of the class described, the combination of a circular chamber positioned around a central knob carrying a dial, means for securing said circular chamber to the outer surface of a safe door, an upper gas chamber, and a frail tube communicating with said circular chamber and also communicating with said upper gas chamber, substantially as described for the purpose set forth.

1,575,230. FLEXIBLE PROTECTOR FOR CARBON PAPER. CHARLES P. SCHMITT, Jr., Chicago, Ill. Filed Dec. 3, 1924. Serial No. 753,588. 4 Claims. (Cl. 282—28.)



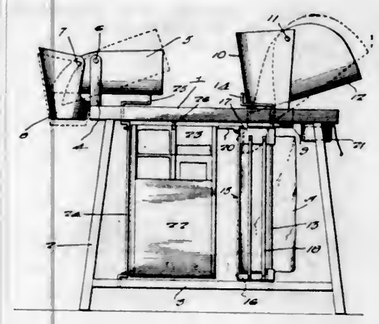
1. In combination, a carbon sheet, and a protector therefor, comprising a thin flexible sheet of material superimposed on said carbon sheet and adapted to absorb the shock of type indirectly striking thereagainst.

1,575,231. DEVICE FOR SUPPORTING FLEXIBLE TUBES. WALTER A. SELTMANN, Passaic, N. J. Filed June 5, 1923. Serial No. 643,486. 3 Claims. (Cl. 221—60.)



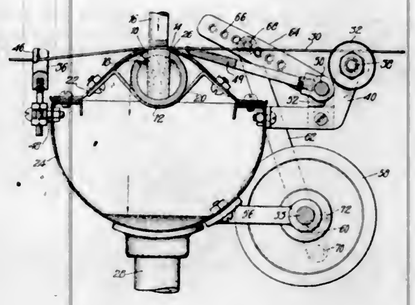
1. A device for supporting a flexible tube in an upright position, said tube comprising a body portion provided at one end with a discharge spout, and said device comprising a body portion fashioned to receive said spout and

provided at the periphery thereof with means depending in a direction away from said tube and projecting beyond the discharge end of the spout and of substantially the



same transverse dimensions as the corresponding dimensions of said tube and adapted to be placed on a suitable support for supporting said tube in an upright position.

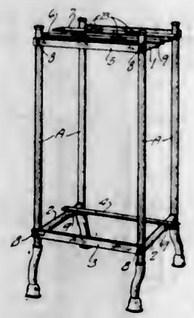
1,575,232. HANDLE OR HANGER FOR FLOWERPOTS AND THE LIKE. GROVER P. SHEARER, Chicago, Ill., assignor to A. L. Randall Company, Chicago, Ill., a Corporation of Illinois. Filed May 28, 1925. Serial No. 33,344. 4 Claims. (Cl. 215—100.)



1. A handle of the character described embodying a body, a portion of the body being bent to form a loop at a point remote from the end of the body, then in a direction transverse to and across the loop, and then in a direction adjacent and substantially parallel with the loop and spaced therefrom to form laterally spaced members adapted to receive the edge of a receptacle therebetween, one of said members being shaped to form a laterally projecting shoulder extending in a direction across the space between the members and adapted to engage under a shoulder on the said edge of the receptacle.

1,575,233. BAG HOLDER AND FILLING DEVICE. RAYMOND H. STILLMAN, Eatontown, N. J., assignor of one-half to Frederick Baden, Monmouth County, N. J. Filed Oct. 23, 1924. Serial No. 745,469. 2 Claims. (Cl. 226—58.)

1. In combination, a table, a bracket on the table, a scoop pivotally mounted intermediate its ends on the bracket, and a hopper having a side opening in the upper portion only thereof into which said scoop extends, and a fixed pivot between the hopper and the scoop.



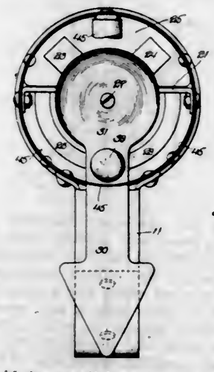
1,575,234. YARN-DYEING DEVICE. GEORGE T. THOMAYER, Albany, N. Y., assignor, by mesne assignments, to Economy Dyeing Machine Corporation, Albany, N. Y., a Corporation of New York. Original application filed Feb. 2, 1925, Serial No. 6,253. Divided and this application filed June 6, 1925. Serial No. 35,289. 8 Claims. (Cl. 8—19.)

3. Apparatus of the type described which comprises a dye containing tank, a wick in said tank, means for passing yarn over and in contact with the upper surface of said wick, a rock shaft, a finger mounted on said rock shaft, a crank arm on said shaft, a reciprocating link and means for connecting said link to said crank arm at a variable distance from the axis of said rock shaft.

1,575,235. STAND. HIERO G. TIFFANY, St. Louis, Mo. Filed Apr. 5, 1924. Serial No. 704,446. 6 Claims. (Cl. 45—31.)

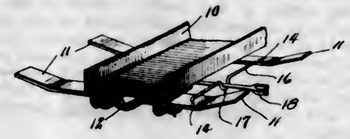
1. A stand for supporting computing machines and the like, comprising two side frames, each constructed in the form of a single unit, tie members detachably fastened to said side frames for connecting them together, two transversely-disposed supporting members at the upper end of the stand detachably and adjustably connected to said side frames and adapted to be moved towards and

away from each other, and adjustable machine supports on said supporting members that are adapted to be adjusted longitudinally of same.



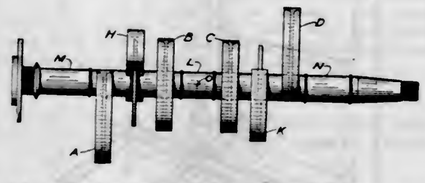
1,575,236. ATTACHMENT FOR FLUSH TANKS. BERT O. TILDEN, Trenton, N. J., assignor to B. O. T. Mfg. Co., Trenton, N. J., a Corporation of New Jersey. Filed Mar. 30, 1925. Serial No. 19,485. 2 Claims. (Cl. 4—67.)

2. A head piece for the handles of flush valve operating mechanisms having stems for actuating the valve, including an integral globular vitrified body having a cylindrical neck projecting outwardly from a side of the body, said neck having a stem-receiving socket extending from its outer end into the body, the body being formed with a recess in its periphery arranged in substantially the plane of the adjacent side of the neck and disposed at right angles to the socket and being further formed with an opening extending from the recess into the socket, and an escutcheon for the head-piece including a circular body having a central axial opening and having a concentric socket at one end to receive the neck of the head piece, the bottom wall of the socket being concave, the opposite end of the body being formed with a circular cavity surrounded by an annular face which latter is concaved to conformably seat against the convex outer face of a flush tank.



1,575,237. VEHICLE SIGNAL. FREDERICK W. VODOZ, Chicago, Ill. Filed Jan. 27, 1922. Serial No. 532,127. 3 Claims. (Cl. 177—327.)

3. In a signal, a pair of solenoids, means for selectively energizing either solenoid, a semi-circular core movable in either direction according to the selective energization of one of the solenoids, a signal arm and lamp carried by the core and actuated in opposite directions according to the solenoid selected, and means adapted to connect the

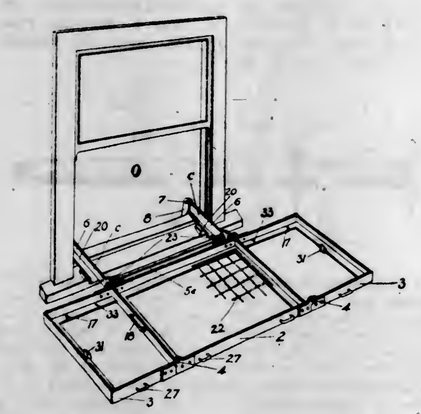


inactive solenoid in parallel with the selected solenoid after a predetermined initial movement of the core to cause a further movement of said core.

1,575,238. SAFETY DEVICE FOR BRAKE RODS. CHARLES I. WALKER, Los Angeles, Calif., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 2, 1923. Serial No. 666,192. 7 Claims. (Cl. 188—205.)

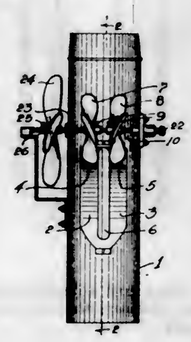
1. In a car truck construction, the combination with a brake beam support, of means secured to said support and adapted to catch and support a brake rod when the latter is disconnected at either one of its ends.

1,575,239. METHOD OF COUNTERBALANCING ENGINE MAIN SHAFTS. CLINTON L. WALKER, Piedmont, Calif. Filed Feb. 4, 1924. Serial No. 690,682. 5 Claims. (Cl. 74—38.)



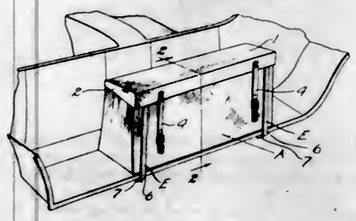
1. A method of counterbalancing an engine main shaft having four throws, with the throws set as follows: Throws 1 and 4 set at 180° apart; throws 2 and 3 set at 180° to each other but at 90° to throws 1 and 4; which consists in treating each half of the shaft as a cantilever supported at the central transverse plane of the shaft, determining the bending moment of the cantilever at the point of support produced by the centrifugal force of each throw multiplied by the distance from the central transverse plane of the shaft, and counteracting this bending moment by weights of such mass and radius of mass center and distance from the central transverse plane of the shaft that their bending moment will be equal and opposite to that of the throws to be balanced.

1,575,240. CIGARETTE-DISPENSING DEVICE. LOUIS WEIDLICH, Stratford, Conn. Filed Oct. 23, 1923. Serial No. 670,272. 1 Claim. (Cl. 211—8.)



A device of the character described, comprising a casing having a front wall provided near its lower edge with a horizontal grooved cigarette receiving portion, said front wall being provided with a horizontal slot having its edges in a vertical plane and having its lower edge coincident with the inner edge of said grooved portion, a cigarette containing hopper in said casing provided in its base with a horizontal opening having its edges in a horizontal plane above the upper edge of said slot of the front wall, the walls of said hopper being inclined inwardly toward said opening, a rotatable cylindrical cigarette selecting and delivering member mounted in the casing beneath said opening of the hopper and at the side of said slot of the front wall, the cylindrical surface of said member adapted to move through said opening and said slot to close them, said member being provided with a longitudinal pocket adapted to be moved upon rotation of said member between registering relation with said opening and registering relation with said slot, the surface of said pocket adapted in the latter position to be aligned with the surface of said grooved portion of the front wall whereby the cigarette delivered by said pocket rolls directly therefrom into said grooved portion, means for manually rotating said member, and limiting means adapted to limit the rotation thereof between said opening and slot registering positions of said pocket.

1,575,241. WINDOW BED. CLINTON W. WILLIAMS, now by judicial change of name Joseph Clinton Williams, Los Angeles, Calif. Filed Dec. 22, 1922. Serial No. 608,489. 7 Claims. (Cl. 5—10.)

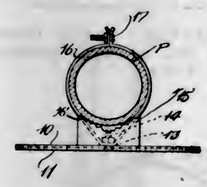


1. A wall-window bed having a main section of less length than a given window so as to pass fully therethrough in or out, means extensible to form a full length bed outside the wall, and a foldable supporting means attachable to the inner face of the wall and attached to the main section of the bed to hold the bed suspended outside the window and permitting the sash to be substantially closed while the bed is hung outside.

1,575,242. DRAFT FAN. JAMES E. WILLOUGHBY, Kellogg, Idaho. Filed Mar. 16, 1925. Serial No. 15,878. 3 Claims. (Cl. 253—37.)

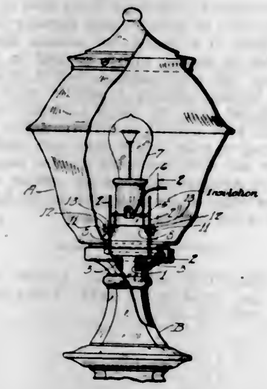
1. The combination with a smoke flue having a slotted shield therein forming a pair of deflector plates for updraft through the flue, of a spindle supported transversely of the smoke flue and having an exterior impeller fan thereon, and a pair of fans within the flue alined with the deflector plates for operating the impeller fan.

1,575,243. AUTOMOBILE RUNNING-BOARD TRUNK. DESFORD WITBECK, St. Louis, Mo. Filed Mar. 2, 1925. Serial No. 12,685. 5 Claims. (Cl. 190—19.)



1. A collapsible running board trunk, comprising a casing constructed of fabric or other suitable material, rigid front and rear wall members arranged inside of the casing and connected at their upper ends to the front and rear wall portions of the casing, and a rigid bottom member interposed between said front and rear wall members and adapted to be disengaged from same and arranged in superimposed relation with said members when it is desired to collapse the trunk.

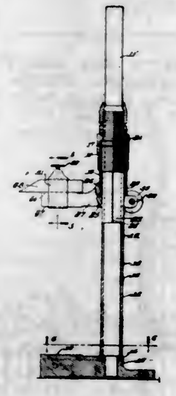
1,575,244. NAME PLATE. WILLIAM H. WIX, Baltimore, Md. Filed Dec. 17, 1924. Serial No. 756,437. 1 Claim. (Cl. 40—21.)



The combination with a name plate; of lugs projecting rearwardly from said name plate, each formed integrally therewith and positioned to hold said name plate in vertical alinement with the pipe to which the

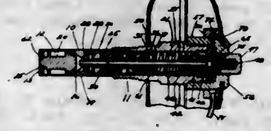
plate is to be attached and a flexible securing band pivotally attached to said plate between said lugs on the rear side thereof, each of said lugs having its rear-

ward edge notched to engage the pipe, the edge of the notched portions of said lugs being serrated, and means to adjustably connect the ends of said securing band.



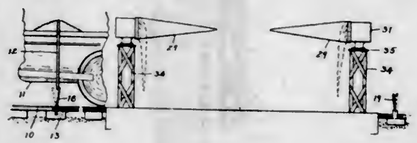
1,575,245. LAMP-BULB SUPPORT. WILLIAM WURDACK, jr., St. Louis, Mo., assignor to Wm. Wurdack Electric Mfg. Co., St. Louis, Mo., a Corporation of Missouri. Filed Apr. 28, 1924. Serial No. 709,415. 1 Claim. (Cl. 240—25.)

In combination with a lighting standard and a globe mounted upon the standard, the standard having a ledge below the plane of the globe, a spaced pair of longitudinally slotted parallel rails fixed at an end upon the standard ledge and upstanding in the globe, a bulb-socket disposed for adjustable movement intermediate the rails and relatively to the globe, angle brackets fixed at one leg to the socket, means comprising screw-members carried by the other legs of the brackets and projecting through the rail-slots for fastening the socket to the rails in adjusted positions lengthwise of the rails, and blocks having engagement with the brackets and fitting for sliding movement in the slots of the rails for retaining the socket against tilting movement relatively to the rails.



1,575,246. MICROMETER HEIGHT GAUGE. DANIEL ANDERSON, Rockford, Ill. Filed Mar. 11, 1922. Serial No. 542,855. 12 Claims. (Cl. 33—165.)

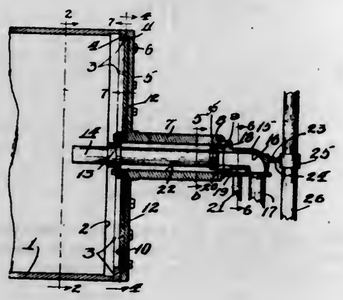
1. A micrometer height gauge comprising a surface-working base carrying an upright rod, one or more gauge sleeves adapted to be positioned on the rod, a micrometer screw adapted to be moved lengthwise and rotatable on the rod and to bear against the uppermost gauge sleeve for determining measurements, a graduated thimble on the micrometer screw for rotating it, a nut on the mi-



crometer screw having graduations in co-operation with those on the thimble, and a contact member fixed to the nut and adapted to cooperate with said base.

1,575,247. VENT VALVE. GIDEON ANDERSON, New York, N. Y. Filed July 8, 1922. Serial No. 573,574. 7 Claims. (Cl. 236—61.)

1. An automatic air vent for heating systems employing a moist heating medium, said vent comprising a member having a continuous passage therethrough leading to the outside thereof, a valve in said member for opening and closing said passage, a seat for said valve, means for holding the valve off its seat while the air escapes, means controlled by the moisture of the heating medium for permitting said valve to move said first-named means to ineffective position and allow seating of the valve and closing of said passage, and means operable to unseat the valve, when said first-named means is in ineffective position, to permit the heating medium to pass between the valve and its seat.

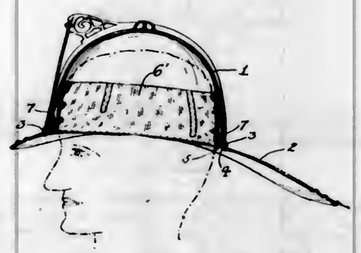


1,575,248. CROSSING GATE. JEREMIAH ANDY, Newington, Conn. Filed June 12, 1924. Serial No. 719,681. 1 Claim. (Cl. 39—1.)

In combination with a railroad crossing, a pedestal located at one side of the roadway, a housing supported by said pedestal, a gate supported from one side of said housing for being alternatively projected over the ad-

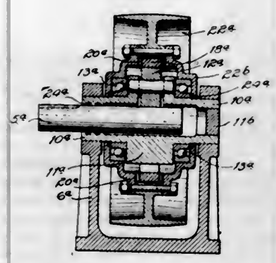
jacent portion of said highway and supported in pendent position, said gate being in the form of a hollow structure and having a side wall of fabric-like material, and means for providing air under pressure for effecting such projection of the gate.

1,575,249. APPARATUS FOR REMOVING CONDENSATE FROM REVOLVING DRIERS. EARL ELWIN BERRY and HAMILTON N. ROSS, Beloit, Wis., assignors to Beloit Iron Works, Beloit, Wis. Filed Dec. 15, 1923. Serial No. 680,821. 12 Claims. (Cl. 34—4.)



1. A paper machine drier comprising a cylinder having a plurality of outlet passages at the end thereof, and an end closure plate secured to the cylinder and cut away to project therein, said closure plate having a plurality of radial outlet passages therein and a ring groove which registers with the cylinder outlet passages and with the closure plate radial outlet passages.

1,575,250. OIL-WELL PUMP. THOMAS W. BRITTAIN, Long Beach, Calif. Filed June 21, 1924. Serial No. 721,418. 4 Claims. (Cl. 103—184.)

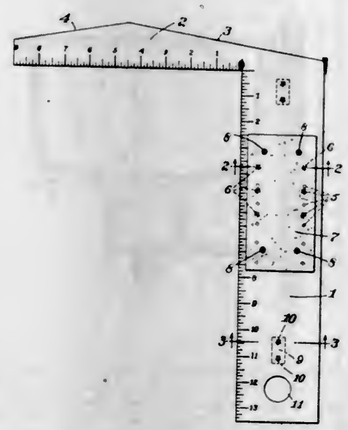


1. A pump of the class described, comprising a working barrel, a plunger in the working barrel, a standing valve below the plunger, an inlet line to the plunger, a working barrel within said inlet line and discharging into the first mentioned working barrel, a second and annular inlet line to said first mentioned working barrel, an annular standing valve for said annular inlet line, and a plunger in said second mentioned working barrel.

1,575,251. HEADGEAR. EDWARD CAIRNS, Montclair, N. J. Filed Feb. 26, 1925. Serial No. 11,736. 3 Claims. (Cl. 2—5.)

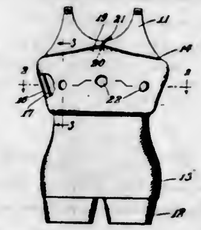
1. The combination comprising a hat body of relatively inelastic material, an insert lining therefor adapted to engage the skull of a wearer, an annular elastic cushioning member of sponge rubber secured to the insert lining adjacent the lower margin thereof, said cushioning member having normally a smaller outer periphery when unstretched than the inner periphery of the hat body to which it is secured so that the lower margin of said cushioning member is stretched with respect to its upper margin and said cushioning member being so positioned that it normally assumes an oblique angle with respect to the sides of the hat prior to its being placed on the head of the wearer.

1,575,252. FRICTION GEARING. LIONEL A. CARTER, St. Louis, Mo. Filed May 1, 1922. Serial No. 557,555. 4 Claims. (Cl. 74—26.)



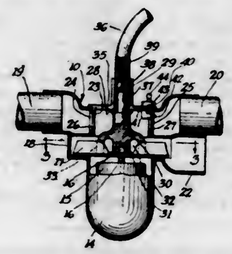
1. Friction gearing comprising a shaft, a ring surrounding said shaft, wheels located between said shaft and said ring and in contact therewith, a member having a portion opposite one end of said ring, and tongue and groove connections between opposing end faces of said ring and said member, said connections being adapted to permit relative rndial movement of said ring and said member.

1,575,253. SHELL DRILL. JOHN CHESNEY, Paulsboro, N. J., assignor to E. I. du Pont de Nemours and Company, Wilmington, Del., a Corporation of Delaware. Filed June 12, 1916. Serial No. 103,134. 9 Claims. (Cl. 77—4.)



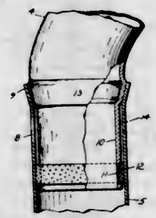
1. A drilling apparatus for shells having a drill, and means to feed a shell downwardly in an inverted position to the drill, a reciprocable carrier for the shell and means for imposing fluid pressure upon said carrier to elevate the same.

1,575,254. TOOL. ERNEST S. COEY, Birmingham, Ala. Filed May 2, 1925. Serial No. 27,538. 2 Claims. (Cl. 33—194.)



1. A tool comprising a main leg and a supplemental leg, the inner straight edge on one leg joining an inner straight edge on the other at right angles, points secured to one leg and projecting from the surface thereof, and a strike pad secured to one of the legs overlying the heads of the projecting points.

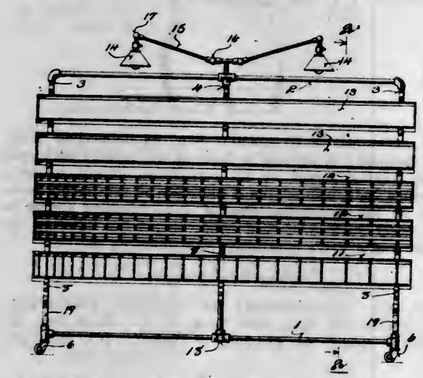
1,575,255. SWIMMING GARMENT. JULIAN CZYZYKOWSKI, Harrison, N. J. Filed June 16, 1924. Serial No. 720,165. 1 Claim. (Cl. 9—20.)



A substantially rectangular band of impervious material doubled and seamed to form an air holding sack, said band having means at its corners to engage about a person's body, and having a plurality of ventilating openings on the center line thereof, a re-enforcing casing on the outer surface of said band, means for inflating the band, and a valve controlling said inflating means.

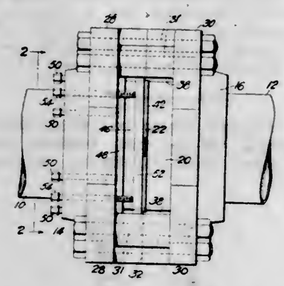
1,575,256. ATTACHMENT TO SUCTION SWEEPERS. JOAQUIN DEL RIO, New York, N. Y. Filed Dec. 31, 1923. Serial No. 683,796. 2 Claims. (Cl. 15—246.)

1. The combination with a suction sweeper having a motor, a fan driven directly thereby and a casing enveloping said motor and fan, said casing having a cylindrical chamber over the fan, of a cover for said casing, said cover having a depending circular flange fitting the chamber and an elongated hub, a rotatable catch removably securing said cover to said casing, a drive head journalled in said hub and intersecting the vanes of said fan, and a flexible shaft actuated by said drive head.



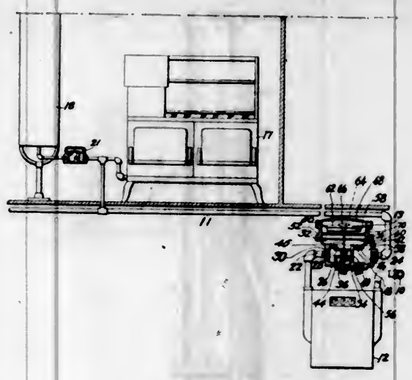
1,575,257. SOCKET JOINT FOR WIND MUSICAL INSTRUMENTS. MORRIS EARL, Oakland, Calif. Filed July 5, 1924. Serial No. 724,183. 4 Claims. (Cl. 84—385.)

1. A socket joint for wind musical instruments, comprising a body member provided with a socket having a flaring end of shallow depth and a mouthpipe having a



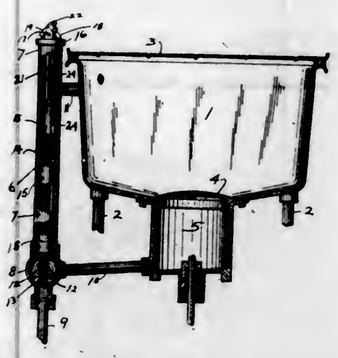
spigot end of formation adapted to enter said socket and contactingly seat on said flaring end, and said spigot end having near its extremity a narrow ring of resilient material to effect an air-seal thereat.

1,575,258. PORTABLE SLUG, RULE, AND BORDER STANDARD. EDMUND PAUL EHRLINGER, Janesville, Wis. Filed Mar. 23, 1923. Serial No. 627,115. 1 Claim. (Cl. 276—44.)



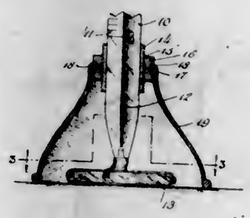
A portable support for compositors' material comprising a vertical frame work having end bars and an intermediate bar extending vertically upwardly and joined adjacent their upper and lower ends, a bracket secured on opposite sides of each of said bars, said brackets furnishing a plurality of downwardly slanting faces arranged one under the other with the upper end of one face spaced below the lower end of the next face, outwardly extending lugs carried by said brackets adjacent the lower ends of each of said faces, and a plurality of elongated trays supported by said faces and said brackets.

1,575,259. COMBINED PIPE CONNECTION AND ORIFICE-DISK HOUSING. JAMES P. FISHER, Bartlesville, Okla., assignor to Doherty Research Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 8, 1921. Serial No. 450,648. 6 Claims. (Cl. 73—167.)



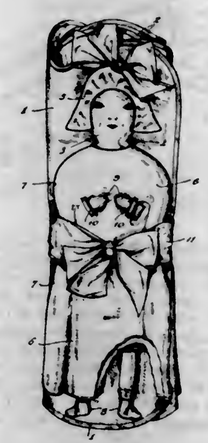
4. In a device of the class described, an orifice plate, a housing for the plate, constructed to connect two adjacent pipe sections, the said housing comprising a pair of flanges spaced apart by a distance such as to permit the orifice plate to be inserted between them, and means for forming fluid-tight joints between the plate and the housing comprising a packing ring mounted on one of the flanges, a retaining ring surrounding the packing ring, and means for moving the retaining ring into close engagement with the orifice plate to provide support for the packing ring adjacent to the plate.

1,575,260. PROCESS AND APPARATUS FOR DISTRIBUTING GAS TO CONSUMERS. JAMES P. FISHER, Bartlesville, Okla., assignor to Doherty Research Company, New York, N. Y., a Corporation of Delaware. Filed May 4, 1921. Serial No. 466,761. 14 Claims. (Cl. 48—190.)



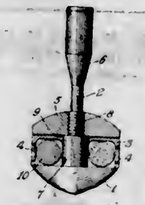
8. An apparatus for distributing gas to consumers comprising a supply main, means for limiting the demand of a consumer on the supply main, and means for automatically restricting the flow of gas to certain of the appliances of the consumer when necessary to assure an adequate supply of gas to other of the consumer's appliances.

1,575,261. DRAINAGE DEVICE. CHARLES B. FOSTER, Indianapolis, Ind. Original application filed Dec. 8, 1917, Serial No. 206,291. Divided and this application filed July 17, 1923. Serial No. 652,056. 3 Claims. (Cl. 4—202.)



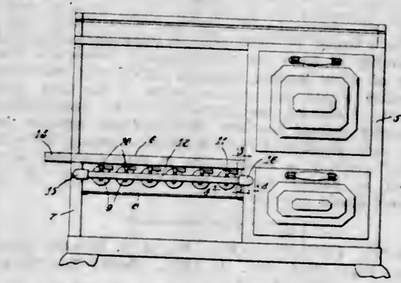
1. A draining device connected with a receptacle comprising a valve body, a casing in open connection with said body, a pipe connecting said receptacle with said body for draining said receptacle, a valve seat on said body forming a draining exit, a valve for said seat, a tube passing through said valve and fixed thereto, said tube extending part way up into said casing, a second tube, longer than the first mentioned tube, between said casing and said first mentioned tube, spaced from the latter and from said casing, said second tube being adapted to seat upon said valve, to close its lower end, means for positioning said tubes with respect to one another and with respect to said valve and its seat.

1,575,262. SKIN THERMOMETER. LEOPOLD E. GREINER, Jr., Bronx, N. Y. Filed May 22, 1923. Serial No. 640,668. 1 Claim. (Cl. 73—52.)



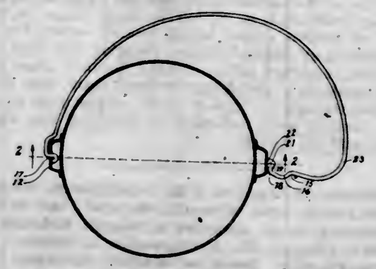
A clinical skin thermometer including a bulb capable of being engaged with the skin, a graduated stem projecting from said bulb, an externally screw threaded sleeve secured to said stem adjacent said bulb, an internally screw threaded collar for receiving said sleeve and with respect to which the latter is longitudinally movable when said stem is rotated relative to the collar, and a flexible shield carried by said collar and capable of contact with the skin to form a chamber for said bulb from which air may be expelled by a depression of said shield when the bulb is retracted within the shield to a point adjacent said collar by rotation of said stem in one direction, the stem and sleeve being thereafter rotatable in an opposite direction to engage said bulb with the skin.

1,575,263. COMBINED COVERLET AND DOLL. WINIFRED GUGLIELMI (Mrs. Rudolph Valentino), professionally known as Natacha Rambova, New York, N. Y., assignor to Cosmic Arts, Inc., New York, N. Y., a Corporation of Delaware. Filed Mar. 6, 1924. Serial No. 697,224. 3 Claims. (Cl. 46—40.)



1. A convertible robe and doll comprising a fabric body of greater length than width, and a doll formed on said body and extending transversely thereof having a face and a hood raised from said fabric and stitched thereto at its margins, and hands and feet flexibly connected with said fabric body.

1,575,264. INDICATOR TOP. BEULAH L. HENRY, New York, N. Y. Filed Jan. 23, 1924. Serial No. 687,895. 8 Claims. (Cl. 273—147.)



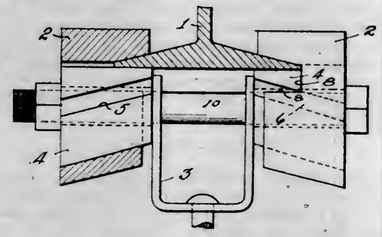
8. A top of the character described including a hollow, independently rotatable, portion having openings therein, and balls located in said hollow portion and adapted to register with the openings therein.

1,575,265. MANIFOLD SUPPORT. PETER I. HOLLMAN, Rockford, Ill., assignor to Geo. D. Roper Corporation, Rockford, Ill., a Corporation of Illinois. Filed Oct. 22, 1925. Serial No. 64,200. 3 Claims. (Cl. 126—39.)

1. In a gas stove, the combination with a burner top section of a front manifold pipe, a plurality of burner cocks for supplying gas from said manifold pipe to burners in said top section, and means for supporting said manifold pipe consisting solely of a gas supply pipe connected to and communicating with one end of said manifold pipe, and a bracket connected to and closing the opposite end thereof.

1,575,266. BAIL. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 9, 1920, Serial No. 402,333. Renewed July 20, 1925. 2 Claims. (Cl. 220—95.)

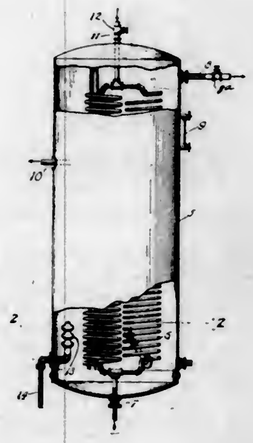
2. A bail for pails, buckets and the like, having at each end a pivot portion adapted to extend inward through the opening of a bail ear, and having thereboyond a downwardly and outwardly extending return



part 22, to allow the extreme end of the bail to be first inserted through the ear and then to abut against the inner side of the bail ear which embraces said pivot portion.

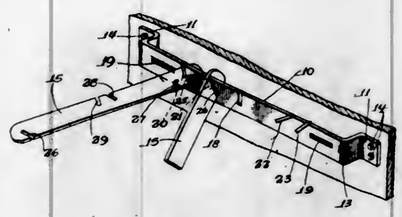
1,575,267. LAPPER. WALLACE M. HOULDSWORTH, Royal Oak, Mich. Filed Apr. 5, 1923. Serial No. 629,971. 6 Claims. (Cl. 51—206.)

1. In a lapper, in combination, a rotatable body having a plurality of seats for spiral lapping elements, a plurality of spiral lapping elements individually removably receivable within the provided seats of the body, said elements extending lengthwise the body and circumferentially thereof but less than half way around the body, and releasable retaining means engaging the ends of said elements to secure them in their provided seats adaped to permit limited movement radially of the elements during operation.



1,575,268. I-BEAM CLAMP. FRANK H. HOWARD, Reading, Pa. Filed Nov. 4, 1925. Serial No. 66,742. 2 Claims. Cl. 248—32.)

1. In an I-beam clamp, a pair of clamping members having inclined lugs formed on their inner walls, a pair of tapered sliding blocks located within the said members and having grooves engaging the lugs, said clamping members having recesses in their inner faces to accommodate the flange of the I-beam, and a bolt passing through the tapered blocks and adapted to draw the clamping parts towards each other and into engagement with the I-beam.

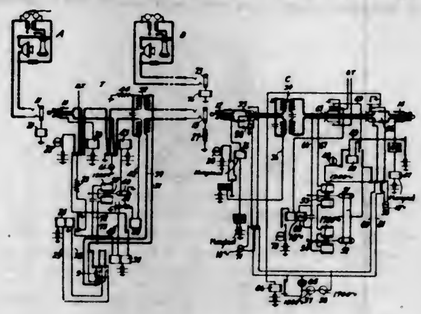


1,575,269. APPARATUS FOR CONDENSING VAPORS. EDWARD W. ISOM, Winnetka, Ill., and JOHN E. BELL, Brooklyn, N. Y., assignors to Sinclair Refining Company, Chicago, Ill., a Corporation of Maine. Filed May 27, 1921. Serial No. 472,999. 13 Claims. (Cl. 261—77.)

1. In an apparatus for cooling and condensing mixtures of hydrocarbon vapors and gases, a tank, cooling coils arranged therein, means for maintaining a substantially constant liquid level in the tank, nozzles arranged to discharge into the lower part of the tank below the normal liquid level and thoroughly to agitate liquid

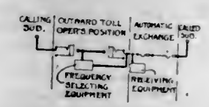
in the tank and connections for introducing the mixture of hydrocarbon vapors and gases to be cooled and condensed to said nozzles.

1,575,270. INTERCHANGEABLE SUPPORTING STRUCTURE. SIMON JANKOWSKY, Tulsa, Okla. Filed Apr. 6, 1925. Serial No. 21,059. 4 Claims. (Cl. 211—14.)



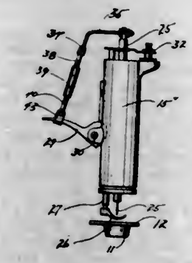
1. In an interchangeable structure system, a plurality of separate supporting pieces comprising a master piece and one or more associated pieces, all being of substantially uniform cross-sectional area and provided with a plurality of uniform slots arranged at varying angles to afford mutually interchangeable double slotted connection of the pieces at varying angles with respect to each other, and clamping means for securing other structural parts to said pieces comprising spring clamping members having one end adapted to fit in said slots and extend into tensional engagement with said structural parts.

1,575,271. TELEPHONE SYSTEM. HENRY W. O'NEILL, Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 1, 1922. Serial No. 604,196. 13 Claims. (Cl. 179—50.)



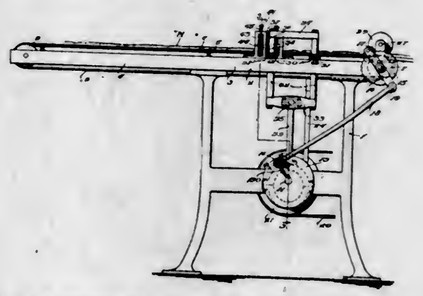
1. In a telephone system, a link circuit adapted to interconnect lines of different characteristics, a bridge

associated with said link circuit comprising a plurality of selectively responsive devices, a plurality of signals



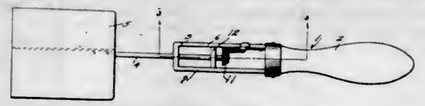
controlled thereby, and means dependent upon the characteristics of the line with which said link circuit is associated for selectively controlling said signals.

1,575,272. TELEPHONE SYSTEM. HENRY W. O'NEILL, Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 31, 1923. Serial No. 671,871. 16 Claims. (Cl. 179—27.)



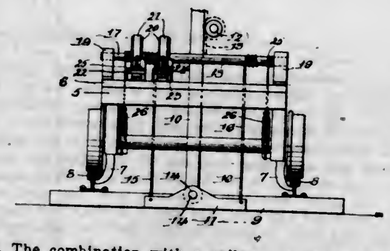
1. In a telephone exchange system, a toll line, automatic switching means associated with the incoming end thereof, a called subscriber's line terminating in said switching means, sources of alternating current, sending means for transmitting pulses over siad toll line to set said switching means to connect said subscriber's line with said toll line, each of said pulses comprising currents from various combinations of said sources and means responsive to the first of said pulses to condition said switching means for receiving said pulses.

1,575,273. CROSS-STITCH ATTACHMENTS FOR PATCH MACHINES. JOHN OPACITY, Newark, N. J. Filed Sept. 29, 1924. Serial No. 740,422. 1 Claim. (Cl. 112—239.)



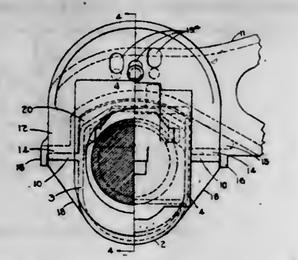
In a sewing machine having a reciprocating needle-bar and a presser-foot bar, said presser-foot bar being provided with a manually operating raising lever, a loop engageable with said lever, a rod actuated by the needle-bar, and right and left hand screw-threaded connections between said loop and rod.

1,575,274. MARSHMALLOW-CUTTING MACHINE. PASQUALE PASSARELLI, Brooklyn, N. Y. Filed Mar. 27, 1925. Serial No. 18,862. 3 Claims. (Cl. 107—21.)



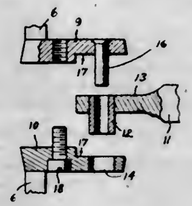
1. In a machine for cutting a sheet of confection paste into pieces of uniform size, a conveyer belt for supporting and advancing the sheet, a cutter including a blade movable vertically into and out of cooperative relation to the belt to cut the sheet transversely of its line of travel, means for reciprocating the cutter, compressing rollers extending across the sheet in advance of and to the rear of said blade, and means for imparting intermittent movement to the belt in consonance with the operation of the cutter.

1,575,275. CAKE TURNER. BENJAMIN F. PEARSON, Asheville School, N. C. Filed July 10, 1924. Serial No. 725,210. 5 Claims. (Cl. 294—8.)



1. In a cake turner, the combination of a shank carrying a cake receiving plate, a handle provided with a U-shaped end, the shank penetrating the base of the U-shaped end and supported in the U-shaped end, and means carried by the U-shaped end for rotating the shank.

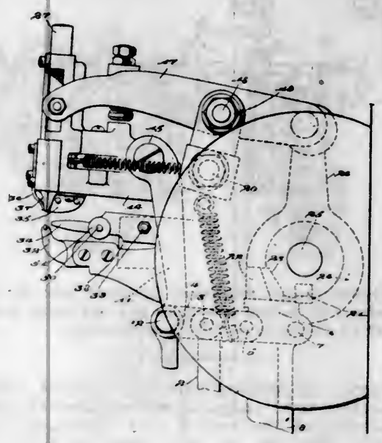
1,575,276. ATTACHMENT FOR TRACK-LIFTING MACHINES. ERNEST E. PETERSON, Carson Lake, Minn. Filed Sept. 8, 1924, Serial No. 736,533. Renewed Jan. 14, 1926. 6 Claims. (Cl. 104—7.)



2. The combination with a railway car adapted to be clamped on the supporting rails and provided with a pedestal and a boom adapted to be engaged to raise the car and rails, of means severally connecting the sides of said pedestal with the sides of said car and means for severally retarding or stopping the movement of said connecting means relative to said car during the upward movement of said car on said boom whereby lateral tilting of the car may be limited or prevented.

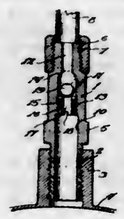
1,575,277. RAILWAY-CAR TRUCK. JOHN A. PILCHER, Roanoke, Va. Filed Aug. 13, 1921. Serial No. 491,989. 3 Claims. (Cl. 105—220.)

1. In combination with a truck journal box, a side frame resting on arc-shaped seats disposed at the sides of the said journal box below the top thereof, liners interposed between said side frame and said arc-shaped seats on journal box for adjusting the height of said side frame relative to the journal box.



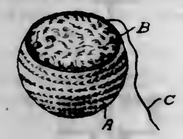
1,575,278. OPHTHALMIC MOUNTING. LAWRENCE POPTON, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Aug. 7, 1924. Serial No. 730,560. 4 Claims. (Cl. 88—53.)

1. An end piece connection for an ophthalmic mounting, comprising separable end piece members and a temple end connection, said end piece members having a plurality of aligned openings and a recess for the temple end, the temple end having an opening aligned with one pair of openings in the end piece members, a boss fixed to the temple end and projecting from the opening therein and extending into one of the openings in the end piece members, a pin fixed in the opposed opening in the end piece members extending into the opening in the temple end and boss, and means in the other openings in the end piece members to hold the members together.



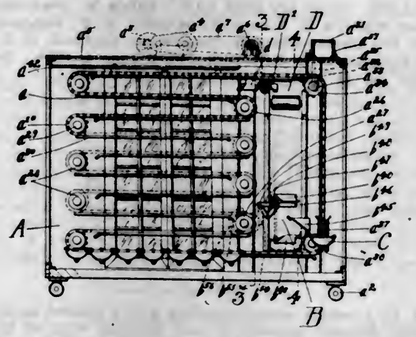
1,575,279. LASTING ATTACHMENT FOR STAPLING MACHINES. ADAM H. PRENZEL, Halifax, Pa. Filed July 9, 1925. Serial No. 42,543. 9 Claims. (Cl. 12—2.)

1. A lasting attachment for a stapling machine having a staple guide, said lasting attachment comprising spaced apart means upon which the margin of an upper is rested preparatory to stapling, means which move with the staple guide to press the marginal upper between and into gripping engagement with said spaced apart means,



and means permitting yielding of said spaced apart means in the direction of movement of the staple guide causing a pull on the upper over a last by which it is carried.

1,575,280. VALVE. JOSHUA C. REYNOLDS, Louisville, Ky. Filed Dec. 29, 1924. Serial No. 758,771. 1 Claim. (Cl. 251—121.)

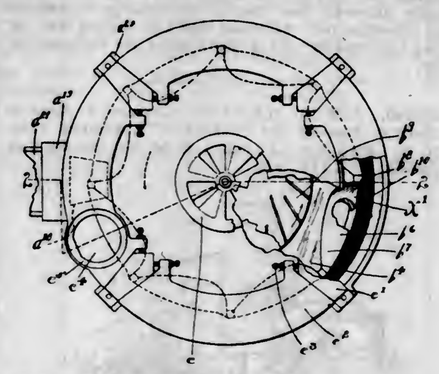


A valve comprising an elongated tubular body having its upper and lower end portions externally threaded and formed with an axially disposed bore, the lower portion of the bore being of greater diameter than the intermediate portion thereof and the upper portion of the bore being of less diameter than the said intermediate portion, the intermediate portion of said bore having a threaded portion and being formed with a rounded upper end forming a cup-shaped valve seat at its junction with the reduced upper end portion of the bore, a valve ball support screwed into the threaded portion of the intermediate portion of said bore and formed with a bore providing communication between the intermediate portion and lower portion of the bore of said body, the upper and lower ends of said support being formed with radial grooves intersecting its bore, and a valve ball in the intermediate portion of the bore of said body freely movable longitudinally therein from seating engagement with the upper end of the valve support to seating engagement with said valve seat.

1,575,281. PRACTICE GOLF BALL. ARMIN ROSENBERG, Milwaukee, Wis. Filed June 28, 1924. Serial No. 722,930. 2 Claims. (Cl. 61—170.)

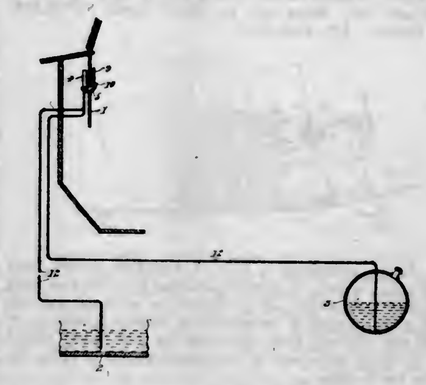
1. As a new article of manufacture, a ball including a core of fibrous material and a spherical casing compacting said material and formed integrally thereabout, said casing comprising a series of stitches in an ellipsoidal helical path and individually under tension, whereby said cover is shaped during manufacture and closely and smoothly embraces said core without puckering.

1,575,282. AUTOMATIC PROOFER. SIGMUND SCHIFF, Cincinnati, Ohio. Filed Jan. 21, 1921. Serial No. 439,015. 28 Claims. (Cl. 198—31.)



1. In an automatic proofer the combination of a casing having a proofing chamber within it, endless chains mounted movably upon opposite sides of the casing, trays mounted on the chains, a loading device comprising cups adapted to carry lumps of dough, a drum having a pocket adapted to register with the cups, an endless chain mounted within the casing transversely thereof, a series of carriers having their one end pivotally mounted upon the transverse chain and adapted to register with the pocket in the drum, a bar normally holding the other end of a series of carriers in a normally elevated position, a series of chutes having their upper ends disposed below the carriers, means adapted to lower the bar when a carrier registers with each chute, the chains mounted on the sides of the casing being adapted to carry the trays into registration with the bottoms of the chutes simultaneously with the lowering of the bar.

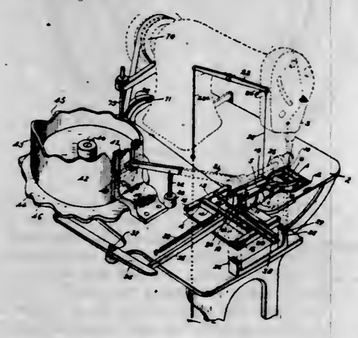
3. In a proofer the combination with trays, of a tray loading device comprising a belt extending from the proofer, a revoluble drum mounted upon the proofer and disposed below the inner end of the belt, pockets in the drum, carriers adapted to be moved below the drum and into which the pockets in the drum discharge, means to discharge the carriers into a tray, and means to revolve the drum.



19. In a tray loading device the combination of an endless moving belt, carriers mounted hingedly on the belt for tilting transversely of the line of movement of the belt, means for depositing articles upon the carriers, and unitary means for tilting the carriers for discharging articles from the carriers.

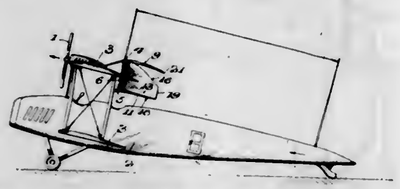
1,575,283. BALLER. SIGMUND SCHIFF, Cincinnati, Ohio. Filed June 10, 1921. Serial No. 476,586. 33 Claims. (Cl. 107—9.)

19. In a baller the combination of a pot having a side wall, a kneading wheel revolubly mounted in the pot comprising a side wall, ribs in the side wall and having pockets formed in the side wall intermediate the ribs, the side wall of the pot and the side wall and ribs of the kneading wheel diverging upwardly, the pot forming a wall for the pockets and each pocket communicating at its ends with the next adjacent pockets, a base for the pockets formed on the lower portion of the kneading wheel tapering gradually upwardly from a place immediately below one rib to the next adjacent rib, and the side wall of the wheel being spaced at a greater distance from the side wall of the pot immediately adjacent the lowermost portion of the base of the pockets and approaching the side wall of the pot as the base reaches a higher level, and means to revolve the kneading wheel.



1,575,284. DEPTH GAUGE. PETER J. SEPPELIS, Ithaca, N. Y. Filed Aug. 2, 1922. Serial No. 579,152. 2 Claims. (Cl. 73—54.)

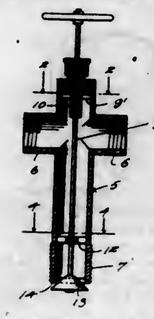
1. A gauge comprising a body of approximate J-shape, the longer arm or stem of the J being in the form of a tube closed at its top with the chamber of the tube terminating adjacent the lower end of the body, the shorter arm of the J having a recess at its upper extremity and the curve of the J being provided with a curved passage of a diameter considerably less than the diameter of the tube for connecting the recess with the tube, a packing gland in said recess, a graduated transparent gauge tube having its lower end open and extending through said



gland into said recess communicating with said passage, the upper end of the gauge tube having a contracted opening, the bore of the gauge tube being of slightly greater diameter than that of the passage, a pressure pipe extending into the closed tube and opening into the upper part thereof, and a liquid filling for the J-shaped body.

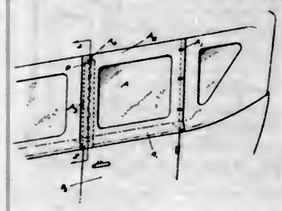
1,575,285. SEWING MACHINE. CHARLES J. SIBBALD, JOHN O. SIBBALD, and CHARLES T. A. SIBBALD, Troy, N. Y. Filed Apr. 21, 1922. Serial No. 555,925. 16 Claims. (Cl. 112—102.)

1. The combination with a sewing machine of an attachment therefor to permit stitching of letters, words, characters, or the like, said attachment including a material holder to present the material to the stitching mechanism of the sewing machine, a cam for controlling the movement of said holder, a sewing machine stop motion controlled in and by the movement of the cam, and manually operable means independent of the stitching to move said cam to a normal starting position following the action of the stop motion.



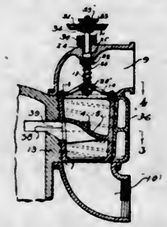
1,575,286. AEROPLANE. JOHN FINNIE DOWNIE SMITH, Atlanta, Ga. Filed Apr. 15, 1925. Serial No. 23,310. 6 Claims. (Cl. 244—29.)

1. In an aeroplane, a pair of elevators spaced from each other, a pair of rudders adjacent the elevators, said elevators and rudders being adapted to be moved towards each other in such a manner as to form a pocket to receive air currents from the propeller and either retard the forward movement of the plane or for moving the plane rearwardly.



1,575,287. FEED VALVE FOR BOILERS. CLINTON A. SPINDLER, Marietta, Ohio. Filed Oct. 30, 1922. Serial No. 597,885. 1 Claim. (Cl. 251—43.)

In combination with a boiler, a valve barrel provided with a valve seat at one end, a plug threaded in the upper end of the barrel, a packing clamp fitted thereon, spiders arranged within the barrel, one of said spiders having an internally threaded sleeve, a threaded stem passing through the plug, the threaded sleeve and the said spiders, a valve carried by the lower end of the stem and engageable with the valve seat, and laterally disposed nipples on the barrel positioned at substantially

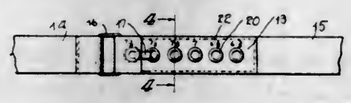


right angles to the barrel and adapted to be connected to the boiler feed water supply, forming a cutoff means to prevent freezing in cold weather, substantially as described.

1,575,288. CURTAIN-ROD CAP. BRUCE M. STANNARD and WILLIAM K. BISHOP, Binghamton, N. Y., assignors to The Brewer-Titchener Corporation, Cortland, N. Y., a Corporation of New York. Filed June 4, 1924. Serial No. 717,793. 7 Claims. (Cl. 296—139.)

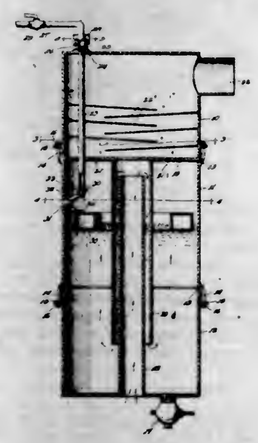
2. In a vehicle curtain provided with a blinded sheath pocket disposed adjacent to one marginal edge of the curtain, a supporting rod therefor mounted within said sheath and having its end portion abutting the blind end of the sheath, and a protector cap concealed within said sheath comprising a transversely disposed hood member attached to said rod and serving to supplement the cross-sectional thrust area of the rod end for the purpose of protecting the curtain fabric against puncture, said cap members together with the rod being removable as a unit through the open end of said sheath.

1,575,289. ROTARY VALVE. JOHN R. E. SUTHERS, Moncton, New Brunswick, Canada. Filed Oct. 26, 1920. Serial No. 419,620. 4 Claims. (Cl. 123—190.)



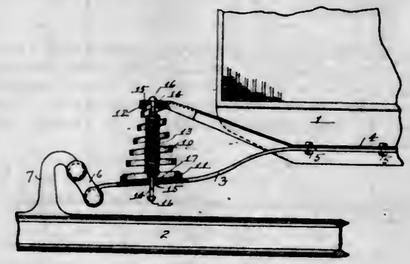
1. In combination with a rotary valve for internal combustion engines embodying a hollow valve sleeve having circular open ends and provided with a partition dividing the interior of the sleeve into non-communicating intake and exhaust chambers, the valve sleeve having parallel ports in the sides thereof respectively communicating with the intake and exhaust chambers, a wire gauze disk covering the intake chamber at one end of the valve sleeve, and a member detachably secured to said end of the valve sleeve and clamping the margin of the wire gauze disk against the adjacent end edge of the valve sleeve.

1,575,290. METHOD OF MANUFACTURING A PULP PRODUCT. ALFRED TINGLE, Ottawa, Ontario, Canada. Filed Sept. 24, 1921. Serial No. 503,044. 9 Claims. (Cl. 8—20.)



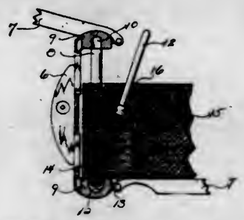
6. The herein described method of manufacturing a pulp product which comprises pressing the article to shape, then treating superficially only with sulphuric acid, then neutralizing the sulphuric acid, and then drying.

1,575,291. ADJUSTABLE CAP. ISIDOR K. TRAU, Louisville, Ky., assignor to Derby Cap Mfg. Company. Filed Aug. 12, 1925. Serial No. 49,721. 2 Claims. (Cl. 2—197.)



1. In a cap of the class described, a pair of sizing straps each having its rear end secured to the cap, one of said straps having a lining on its rear face secured by its edges to the strap to form a pocket behind the strap and concealed thereby, spaced sizing elements fastened to the lining, the fastening means for said elements being concealed by said strap, and size indicia carried by said lining and also concealed by the strap, a single fastening element carried on the rear face of said strap and concealed thereby, and a loop secured to the free end of the second strap, said first strap being run through the loop of the second strap front to rear thereof.

1,575,292. AIR WASHER. DANIEL C. TYLER, Oklahoma City, Okla. Filed Apr. 30, 1925. Serial No. 27,091. 2 Claims. (Cl. 183—15.)

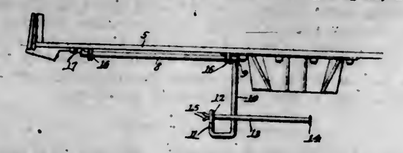


1. An air washer comprising a casing having an air outlet in its upper portion and an air inlet in its bottom, a partition dividing the casing into an upper air chamber and a lower water chamber and having openings for inter-communication between the two chambers, baffles within the air chamber, means for supplying water in regulated quantity to the water chamber, a tube depending from the said partition and closed at its upper end thereby and extending into the water chamber to within a short distance of the bottom thereof, and a tube in line with the air inlet and extending upwardly from the bottom of the casing within the depending tube and terminating a distance from said partition.

1,575,293. VEHICLE SPRING. MORTON VAN METER, Grand Rapids, Mich. Filed Dec. 23, 1922. Serial No. 608,726. 3 Claims. (Cl. 267—28.)

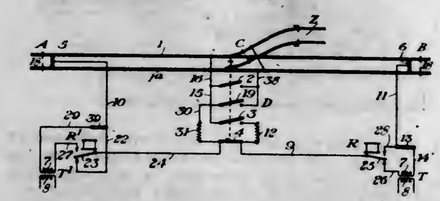
1. In a vehicle; an axle; a body; a lever fulcrumed at one end on the axle, its other end being supported on the body against downward movement; a body-supporting coiled spring supported by the lever; rigid means carried by the body for supporting the same by the spring; a coiled spring extending between the body and the lever and yieldingly resisting the rebound of the first-mentioned coiled spring and having an inoperative movement in a portion of the first-mentioned coiled springs operative movement.

1,575,294. LOOSE-LEAF BINDER. RICHARD M. VAN VALKENBURGH, Kansas City, Mo., assignor to Irving-Pitt Manufacturing Company, Kansas City, Mo., a Corporation. Filed June 2, 1924. Serial No. 717,424. 5 Claims. (Cl. 129—13.)



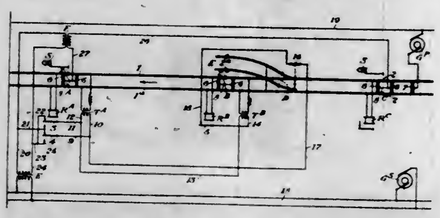
1. In combination with a loose-leaf binder having an expansible back supporting a pair of binder members, leaf holding posts carried by said members and an expansion post adapted to be positioned in sockets formed in each binder member, a plurality of sheets removably engaging said leaf holding posts each having means allowing the positioning of said expansible post in said sockets while said leaves are in the post engaging position.

1,575,295. PIN-LIFTING DEVICE. GEORGE M. WADDY, Buffalo, N. Y. Filed Aug. 27, 1925. Serial No. 52,928. 2 Claims. (Cl. 213—169.)



1. In combination with the vertical movable coupling pin of a car coupler, a rod having an outwardly extended end portion terminating in a rearwardly and inwardly extended portion, the extremity of the inwardly extended portion being extended upwardly and formed with an

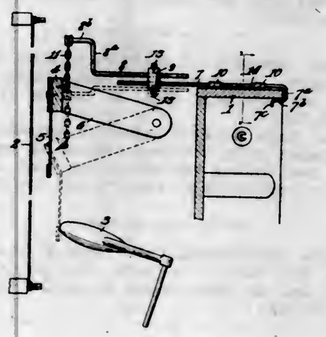
opening, a rod having a head at one end and adapted to be positioned in an opening of the coupler pin, the opposite end of the rod being split providing fingers, and



said fingers adapted to be positioned within the opening of the upwardly extended extremity of the inwardly extended portion, and spread apart to lock the rod within the opening.

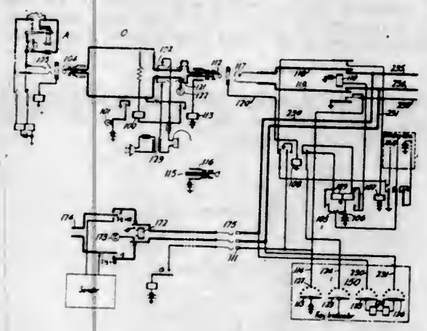
1,575,296. RAILWAY-TRAFFIC CONTROLLING APPARATUS. HERBERT A. WALLACE, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Dec. 21, 1923. Serial No. 681,947. 27 Claims. (Cl. 246—34.)

23. In combination, a section of railway track, a switch in said section, and means for applying to the rails of said section a relatively high traffic controlling voltage when said switch is in the normal position and a relatively low traffic controlling voltage when the switch is in the reverse position.



1,575,297. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. HERBERT A. WALLACE, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Mar. 1, 1924. Serial No. 696,339. 8 Claims. (Cl. 246—37.)

1. In combination, a block of railway track divided into a forward section and a rear section, a switch in said rear section, a track relay for said forward section, and means controlled by said relay and responsive to the position of said switch for at times supplying said rear section with track circuit current.

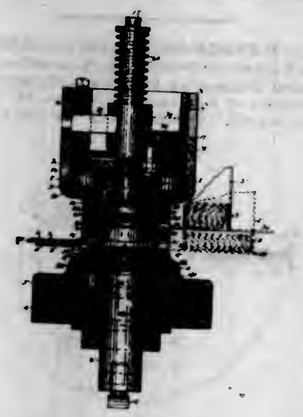


1,575,298. SHIFTING RODS FOR HARP ATTACHMENTS. ALBERT WASEMANN, Wheeling, W. Va. Filed Sept. 20, 1923. Serial No. 663,725. 4 Claims. (Cl. 84—224.)

1. The combination with a harp attachment for pianos, including a vertically shiftable felt-strip-carrying bar, of a rotary bar-supporting and shifting device comprising two complemental rod sections mounted horizontally at right angles to said bar, the inner rod section having a crank formed on its inner end, a suspension member depending from said crank and supporting said bar, and

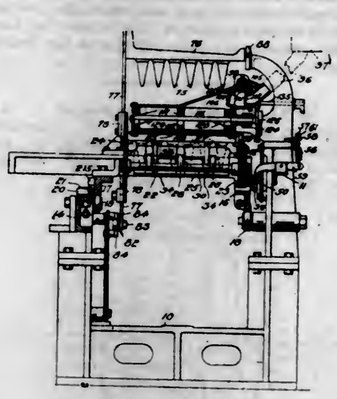
the outer end section of said rod being mounted for rotary movement, and a coupling for the adjacent end portions of said rod sections providing for relative adjustment of the latter.

1,575,299. TELEPHONE-EXCHANGE SYSTEM. WILLIAM C. WEAVER, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 29, 1923. Serial No. 671,361. 6 Claims. (Cl. 179—27.)



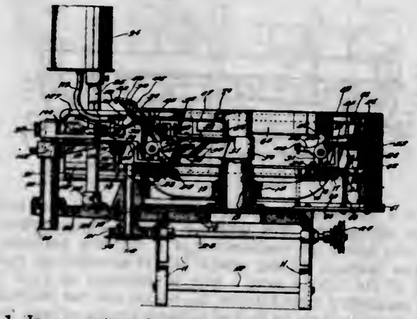
1. In a telephone system, an incoming line, an outgoing line, a source of ringing current, a relay for applying said source to said outgoing line, means controlled over the incoming line for operating said relay, means controlled over said outgoing line for discontinuing the operation of said relay to disconnect said source of ringing current, and means operative thereafter for rendering said relay responsive to said first means to apply and disconnect said source from said outgoing line at will.

1,575,300. METHOD AND APPARATUS FOR MAKING BOTTLE CLOSURES. WALLACE M. WEEKS and JOHN A. PEASE, Skaneateles, N. Y. Filed Jan. 7, 1926. Serial No. 79,814. 6 Claims. (Cl. 93—1.)



1. The method of making bottle closures which consists of imposing a substantially inflexible disc concentrically upon a larger thinner and pliable disc, then

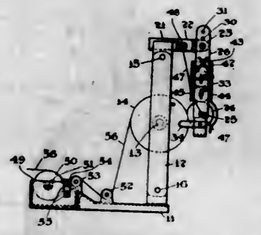
resiliently clamping the extended annular margin of the larger disc, then depressing and cupping the larger disc to the extent of the diameter of the smaller disc while



said clamping is maintained, then molding said extended margin convex, partially folding the said extended margin upon the smaller disc, and finally compressing and clinching the said fold.

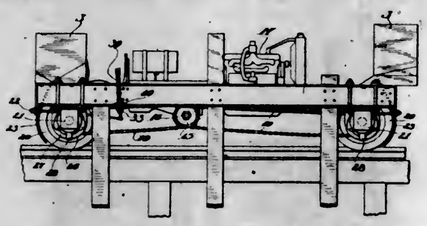
1,575,301. BAKING MACHINE. JOHN LOUIS WILLIAM RACH, Baltimore, Md., assignor to Maryland Baking Company, Baltimore, Md. Filed Aug. 12, 1922. Serial No. 581,420. 23 Claims. (Cl. 107—58.)

9. In a baking macaine of the type employing a plurality of molds and a plurality of core members cooperating therewith, said molds each consisting of two similar sections movable horizontally with respect to each other, and said core sections being movable vertically with respect to its cooperating mold; characterized by the provision of a trackway for opening and closing said mold sections, a trackway for operating said core sections, said trackway having in order a section for raising said cores, a section for lowering said cores, a section for imparting a plurality of rapid reciprocations to said cores to allow for the escape of steam, and a plurality of yieldingly mounted sections for holding said core sections in said molds.



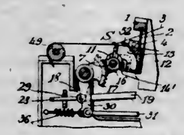
1,575,302. AUTOMATIC BAKING MACHINE. SAMUEL E. WINDER, Chicago, Ill., assignor, by mesne assignments, to Novelty Products, Inc., Chicago, Ill., a Corporation. Filed July 17, 1920. Serial No. 397,066. 16 Claims. (Cl. 107—58.)

1. In an automatic baking machine, the combination with an annular oven and a rotary carrier, of a series of mold units on said carrier, each unit comprising a radially mounted bracket, a lifter pivoted at its inner end to said bracket, cup and core mold sections rigidly mounted on the outer ends of said bracket and lifter respectively, a latch pivoted on the outer end of said lifter and arranged to engage said bracket to hold the mold closed, a rock arm pivoted at the inner end of said bracket and connected to said latch, means for rotating said carrier, a post whereon the latter is mounted, and stationary cams mounted on said post for operating the rock arm and lifter of each mold unit successively and in reverse order to open and close the molds.



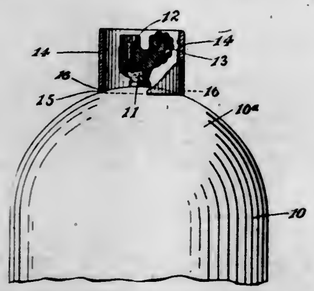
14. In an automatic baking machine, the combination of an oven, a series of cup molds and a carrier for moving the molds through said oven, each of said molds comprising a relatively fixed cup section, a relatively movable core section having a flange adapted to abut against the upper end of said cup section, and a longitudinally movable ejecting plunger extending through the bottom of said cup section and having a head fitting within the lower portion of said cup section and forming the bottom of the mold cavity, said core and cup sections having tapering walls forming the sides of the mold cavity with longitudinal flutes upon its outer wall, and said flange and cup sections being recessed to form a bead at the upper edge of the baked cup.

1,575,303. GUM-TAPE PRINTER. HYMAN C. WOLFE, Montreal, Quebec, Canada, assignor to Printape Machine Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 21, 1923, Serial No. 633,662. Renewed Jan. 28, 1926. 3 Claims. (Cl. 101—213.)



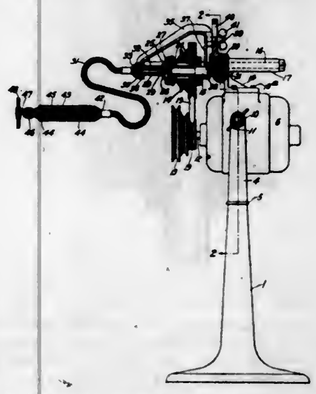
2. In a tape printing machine, the combination of a tape roll holder, a printing mechanism including a printing roller and means for engaging said roller with a roll of tape mounted in said holder, and means carried by the roll holder for adjusting the roll to center the same with respect to the printing roller.

1,575,304. MONORAIL ENGINE. THOMAS H. WRIGHT, Los Angeles, Calif. Filed Nov. 2, 1923. Serial No. 672,279. 1 Claim. (Cl. 105—102.)



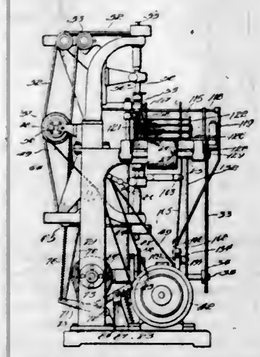
In a monorail car construction having a frame with axles at opposite ends mounted therein, central wheels on said axles, the combination of a centrally positioned engine having a driving axle, a pair of sprockets on each end of the driving axle, a pair of sprockets on each of the supporting axles between the wheels and the bearings, and sprocket chain leading in opposite directions from the sprockets on the driving axle, said chains driving the sprockets on the supporting wheels.

1,575,305. LOOM FOR WEAVING FINE FABRICS. ATTILIO ZANCHI, Seveso-San Pietro, Italy, assignor to the Firm Fratelli Schwarzenbach & Co., Seveso-San Pietro, Italy. Filed Dec. 11, 1922. Serial No. 606,151. 6 Claims. (Cl. 139—191.)



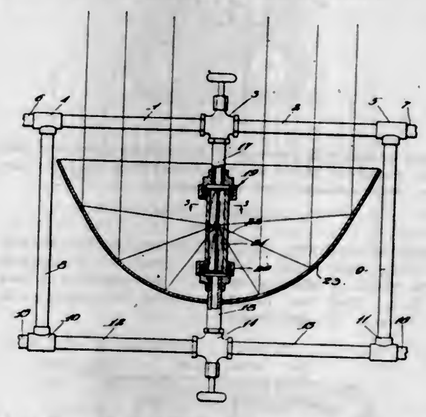
1. In a loom for weaving fine fabrics, the combination of a batten, a reed on said batten for guiding the warp threads, a comb, a rocking shaft on which the comb is mounted, a second shaft parallel to said rocking shaft and carrying the rocking shaft, means to operate the rocking shaft from the parallel shaft to move the comb into and out of the warp at a point that is at a considerable distance from the beating-up point.

1,575,306. COMPRESSED-GAS CYLINDER. DAVID AHLDIN, Chicago, Ill., assignor, by mesne assignments, to Dunham Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 15, 1924. Serial No. 755,855. 3 Claims. (Cl. 220—85.)



1. A metal shipping cylinder for gas under pressure, having a valve fixture including a valve and a hose connection, and a protective collar permanently secured to said cylinder encircling and spaced from said valve fixture, and having an open outer end terminating beyond the valve fixture and through which the valve may be operated and the hose connected.

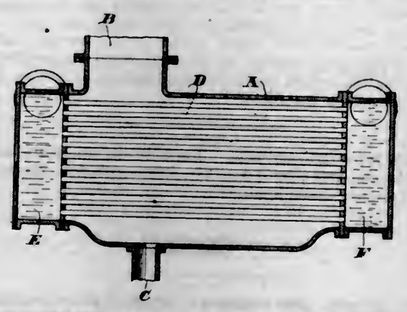
1,575,307. FLEXIBLE-SHAFT BENCH GRINDER. ALWIN B. BACHMANN, Brooklyn, N. Y., assignor to Keller Mechanical Engineering Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Dec. 28, 1922. Serial No. 609,370. 6 Claims. (Cl. 51—166.)



1. In a portable grinding machine, provided with a short belt drive adapted for swiveling movement with the motor, the combination with a motor provided with a shaft and pulley, of a bracket mounted upon the motor, a crank shaft rotatably mounted in said bracket and provided with a crank pin forming a jack shaft, a jack pulley rotatably mounted upon said crank pin and means for rotating said crank shaft in said bracket for varying the distance between the jack pulley and the pulley of said motor.

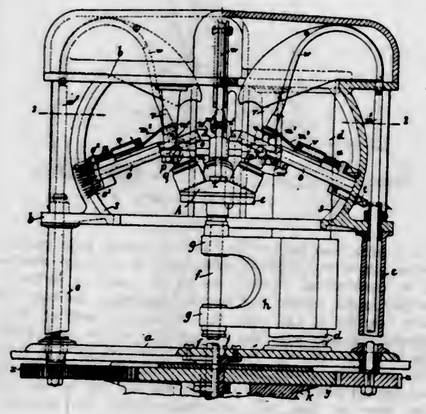
1,575,308. DRILLING MACHINE. HARLEY C. ALGER and RAYMOND E. ACKLEY Chicago, Ill., assignors to R. R. Donnelley & Sons Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 12, 1923. Serial No. 674,200. 11 Claims. (Cl. 77—21.)

1. In a drilling machine, the combination of a continuously moving conveyor having a substantially flat surface adapted to carry objects resting thereon, means for interrupting the motion of and holding stationary an object resting thereon while the conveyor slips beneath said object, a drill, and means for feeding said drill into said object and withdrawing said drill while said object is held stationary, said interrupting and holding means releasing the object after said drill is withdrawn so that the object is again free to move with the conveyor.



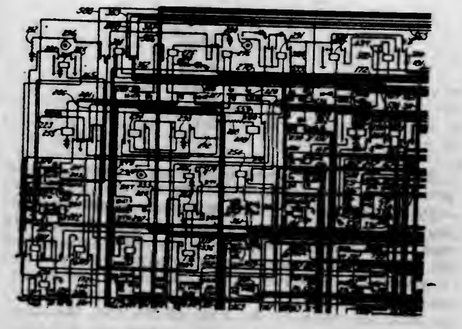
1,575,309. SOLAR HEATING ELEMENT. WILLIAM A. ANDERSON, Los Angeles, Calif. Filed Sept. 15, 1924. Serial No. 737,838. 9 Claims. (Cl. 126—271.)

6. A solar heating element in which water is held between a transparent body and a light-absorbing body so that light may pass through the transparent body and through the water to the light-absorbing body.



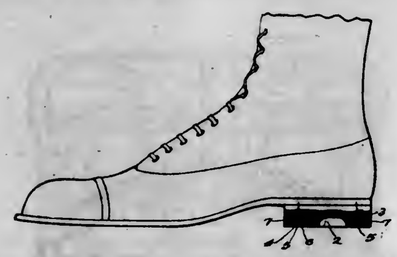
9. A solar heating element comprising lines of tubing containing heated and cold water, return connections between the lines and serving as braces, a connection for an upflow of fluid between the lines including a transparent glass tube, a light absorbing element in the tube and valves for cutting the upflow connection out of the circulation, the water to be heated being in contact with the inside of the transparent tube.

1,575,310. SURFACE CONDENSER. PAUL A. BANCEL, Nutley, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Original application filed Oct. 15, 1924, Serial No. 743,695. Divided and this application filed June 30, 1925. Serial No. 40,513. 2 Claims. (Cl. 257—43.)



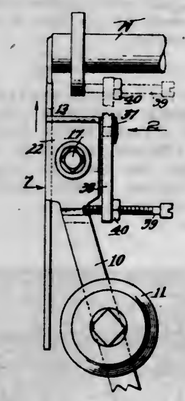
1. A condenser having tubes with different temperatures along their length resulting in unequal capacities for condensing steam in vertical sections along their length, and an inlet for steam relatively remote from the warmer sections to obtain substantially equal depth of steam penetration in all sections along the length of the condenser.

1,575,311. MACHINE FOR GRINDING LENSES. MALCOLM BENTZON, Neuilly-sur-Seine, France. Filed July 5, 1921. Serial No. 482,438. 1 Claim. (Cl. 51—131.)



A lens grinding machine of the kind hereinbefore referred to, comprising a lens holder, a plurality of grinding discs designed to act upon one only of the two lens surfaces, means whereby each grinding disc can be presented to the lens at the angle required to grind or polish convex or concave surfaces thereon and a stop to contact with the centre of the lens to determine the grinding position therefor.

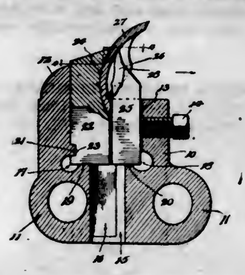
1,575,312. AUTOMATIC TESTING SYSTEM FOR AUTOMATIC TELEPHONE SWITCHES. ARNOLD S. BERTELS, Tenafly, N. J., and EDWIN F. TRAPP, Valley Stream, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 8, 1923. Serial No. 679,312. 22 Claims. (Cl. 179—175.)



1. In a telephone exchange system, a testing device for testing switches, said switches to be tested having different characteristics and being grouped according to their respective characteristics, means for connecting said testing device with any group of said switches, and means for determining the character of the switches of said group.

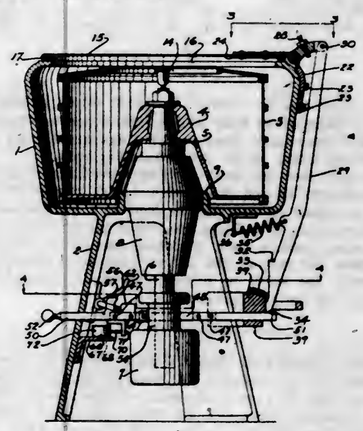
1,575,313. RUBBER HEEL. EDWARD G. BLOSSE, Los Angeles, Calif. Filed May 7, 1923. Serial No. 637,271. 1 Claim. (Cl. 36—35.)

A rubber heel having two lateral halves with parallel faces, oppositely inclined with the top surfaces meeting at a longitudinal center line at an angle, a U-shaped flexible fabric reinforcing member following the side and back contour of the heel, the reinforcing member being inserted parallel with the flat surfaces of the heel, washers imbedded in the heel adjacent the reinforcing member, securing means passing through the washers and reinforcing member, and a single vacuum cup on the bottom face of the heel situated within the U-shaped reinforcing member.



1,575,314. TOOL HOLDER. AURIL BOUSQUET, Southbridge, Mass. Filed Sept. 19, 1924. Serial No. 738,722. 4 Claims. (Cl. 29—99.)

3. In a cutting off tool, the combination with a pair of jaws having opposite grooves along one edge for receiving a cutting off blade, the tool having a shank for holding it in a tool post, and a pivot stud on the opposite side of one jaw, of a longitudinally slotted plate pivoted on the stud and located parallel with the blade so as to be adjustable longitudinally, and a gauge screw mounted on the slotted plate, whereby the plate can be moved to bring the screw to the front of the tool, the screw being adjustable to bring it into contact with a surface parallel with the blade to act as a gauge.

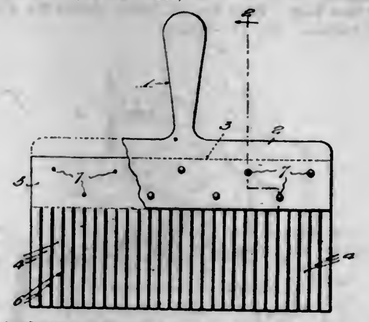


1,575,315. MINING-MACHINE CHAIN LINK AND BIT. NEWTON K. BOWMAN, Bowdil, Ohio. Filed Jan. 21, 1922. Serial No. 530,917. 8 Claims. (Cl. 262—33.)

1. In a mining machine, a chain link including a body having a recess opening through one end thereof and provided with an opening extending from said recess through the opposite end of the link body, the link body

being formed with recesses at the bottom corners of said first mentioned recess to define shoulders lying between the latter recesses and said opening.

1,575,316. SAFETY GUARD FOR CENTRIFUGAL EXTRACTORS. TANDY A. BRYSON, Troy, N. Y., assignor to Tolhurst Machine Works, a Corporation of New York. Filed Feb. 18, 1921. Serial No. 446,017. 23 Claims. (Cl. 192—136.)



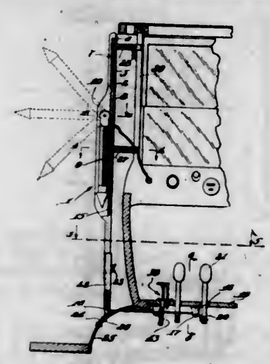
17. In combination in a centrifugal extractor, a basket, a shaft for the basket, a guard for the basket, means including a locking bar, for locking the guard in closed position, and means carried by the basket shaft, operating independently of the shaft speed for positively moving the locking bar to locking position as soon as the basket starts rotating.

1,575,317. TOOTHPICK. JOHN P. CARMICHAEL, Milwaukee, Wis. Filed Jan. 11, 1922. Serial No. 528,506. 6 Claims. (Cl. 132—93.)

1. A tooth pick composed of parallel fibers having a thin, flat, flexible end portion tapering on all sides toward a point, said fibers being held together by a cellulose binder, which with the fibers has sufficient flexibility to follow the surfaces of the tooth root and to be guided by the gums into crevices between teeth without breaking, said tooth pick having its shank portion reenforced by more rigid material.

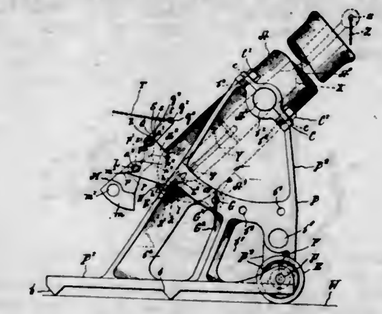
1,575,318. FLEXIBLE TROWEL. EDGAR S. COWAN, Harvey, Ill. Filed May 18, 1925. Serial No. 31,146. 3 Claims. (Cl. 72—136.)

1. A plastering trowel comprising a handle, and a plurality of flat closely spaced spring fingers projecting therefrom in a common plane, any one or group of said fingers being adapted to yield independently of the others when passing over rough portions of the wall being plastered.



1,575,319. MILK-BOTTLE OPENER AND CAP. RYK CROUWER, Pasadena, Calif. Filed Apr. 30, 1925. Serial No. 26,892. 1 Claim. (Cl. 215—55.)

An opener and cap for milk bottles comprising a cap having a depending flange receivable over the rim of a milk bottle, and a single pointed member secured to the cap and extending downwardly therefrom in an inclined position, said pointed member being arranged in a plane tangential to a circle within the cap having a center coaxial with the center of the cap, said pointed member having its pointed end terminating approximately at the point of tangency between said plane and circle and having its outer side sharpened to provide a sharpened side edge as and for the purpose described.

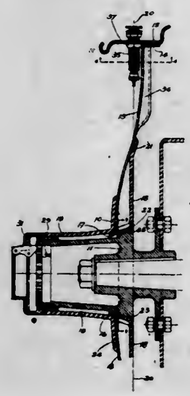


1,575,320. TRAFFIC SIGNAL FOR MOTOR VEHICLES. BEN E. DAVIS, Los Angeles, Calif. Filed Feb. 26, 1924. Serial No. 695,801. 1 Claim. (Cl. 116—34.)

A vehicle signal comprising an open sided housing, a rack slidable in said housing, a coil spring disposed within said housing having one end secured to the housing and the other end secured to the upper end of the rack, a gear pivoted in the housing and meshing with said rack, a semaphore arm rigid with said gear, and means for moving said rack against the action of said spring

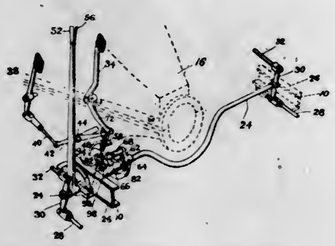
whereby the semaphore arm may be swung outwardly and upwardly through the open side of the housing into either of a plurality of signaling positions.

1,575,321. LINE-THROWING GUN. GREGORY C. DAVISON and CECIL P. CAULKINS, New London, Conn., assignors, by mesne assignments, to American Ordnance Corporation, New York, N. Y., a Corporation of Delaware. Filed May 14, 1919, Serial No. 297,129. Renewed June 2, 1924. 5 Claims. (Cl. 89—1.)



2. A line throwing gun comprising a gun body having a smooth bore, with a concave chamber at the rear end thereof, too narrow to permit the entrance thereinto of the base of the cartridge case, a firing pin having its firing point normally projecting part of the way into said concave chamber and having its base projecting rearwardly through the walls of the piece, a retraction spring normally pressing said firing pin backwards, a spring impressed hammer pivoted to the gun body and adapted to strike said firing pin and throw it forward against the action of said retraction spring, the said hammer being provided with a short cocking arm, a spring impressed sear having a toe engaging said cocking arm, and a lever arm for tripping same, substantially as described.

1,575,322. WHEEL. WALTER W. DAVISON, Buffalo, N. Y., assignor to Wire Wheel Corporation of America, Buffalo, N. Y., a Corporation of New York. Filed July 5, 1922. Serial No. 572,765. 8 Claims. (Cl. 301—63.)

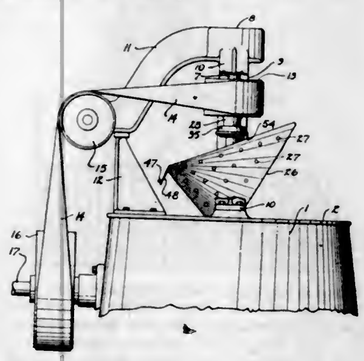


8. The combination with an inner hub having a flange at its inner end, a disk wheel bearing upon said flange,

and including a disk element and a sleeve attached thereto, a hub cap carried by said hub and bearing against the end of said sleeve, said sleeve and hub cap

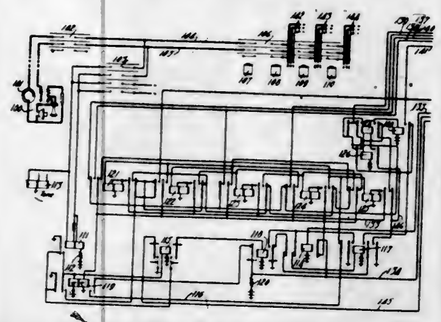
enclosing said inner hub, the sleeve to be attached to the disk element being selected with regard to the length of the inner hub.

1,575,323. VEHICLE BRAKE-CONTROLLING MEANS. JOHN B. DES ROSIERS, Providence, R. I. Filed June 24, 1925. Serial No. 39,297. 30 Claims. (Cl. 74—39.)



1. In a motor vehicle, the combination of a braking means, a clutch for connecting the power to the driving wheels, a braking means independent of said first braking means, means for operating said first braking means and disengaging the clutch simultaneously independently of said other braking means and means for operating both braking means simultaneously independently of the clutch.

1,575,324. PROCESS OF DYEING. WALTER DUISBERG and WINFRIED HENTRICH, Wiesdorf-on-the-Rhine, Germany, assignors to The Grasselli Dyestuff Corporation, New York, N. Y. Filed Nov. 26, 1924. Serial No. 752,457. 6 Claims. (Cl. 8—5.)

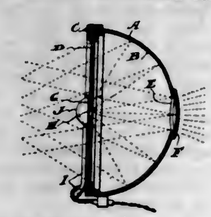


1. The process of dyeing organo-oxy-cellulose compounds which comprises applying thereto dyestuffs of the type R—N=N—R' in which R—N=N— stands for the diazo derivative of an acid substituted aromatic nitro compound and R' stands for an aromatic amine.

1,575,325. AUTOMATIC GUARD FOR CENTRIFUGAL EXTRACTORS. HUMPHREY EVANS, Milwaukee, Wis., assignor to Tolhurst Machine Works, a Corporation of New York. Filed Jan. 21, 1921. Serial No. 438,891. 26 Claims. (Cl. 74—105.)

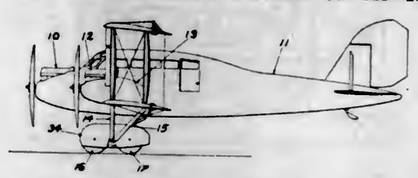
1. In combination in a centrifugal machine, the basket and its shaft, a basket guard and a closing device therefor comprising a guard-moving member mounted on the shaft, and adapted to engage and close said guard.

1,575,326. REGISTERING MECHANISM. OWEN C. FROM, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 18, 1923. Serial No. 669,252. 9 Claims. (Cl. 179—18.)



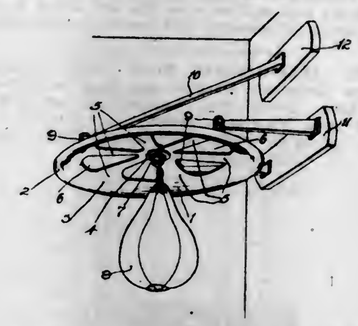
1. In a switching system, a plurality of switching devices coordinately arranged in rows, a plurality of selecting bars individual respectively to rows of devices in one coordinate direction, a plurality of operating bars individual respectively to rows of devices in the other coordinate direction, means for selectively operating said selecting bars, and means for operating one or more of the devices in a row associated with an operating bar through the conjoint operation of one or more of said selecting bars and one of said operating bars.

1,575,327. HEADLIGHT. FRANCIS SYDNEY GARFORD and JOHN WESLEY CAUDWELL, Lougheed, Alberta, Canada. Filed May 2, 1924. Serial No. 710,512. 1 Claim. (Cl. 240—41.)



In combination a metal reflector centrally provided at its inner end with an opening; a transparent closure member at the forward end of said reflector provided centrally with an opening therethrough; an electric lamp

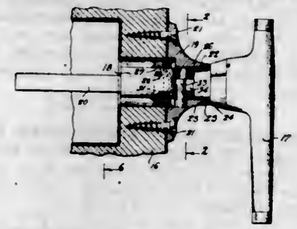
located in front of said last-mentioned central opening; a bracket for said lamp extending transversely of the mouth of said reflector, an inverted reflector supported



by said bracket and in front of said electric lamp, and a translucent member associated with the opening in the back of said metal reflector.

1,575,328. AEROPLANE LANDING GEAR. WILLIAM L. GILMORE, Garden City, and HARVEY C. MUMMERT, Hollis, N. Y., assignors, by mesne assignments, to Curtiss Aeroplane and Motor Company, Inc., Garden City, N. Y., a Corporation of New York. Filed Mar. 26, 1920. Serial No. 368,816. 8 Claims. (Cl. 244—2.)

1. In a landing gear for aircraft, a rigid rocker frame comprising connected side sections, a support for and about which the rocker frame is adapted to yield bodily as well as pivot, and wheels mounted in tandem between the side sections of said frame.

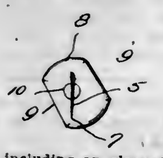


1,575,329. STRIKING-BAG PLATFORM. MORRIS GOLOMB, New York, N. Y. Filed Nov. 11, 1924. Serial No. 749,274. 3 Claims. (Cl. 272—78.)

1. A striking bag platform, comprising a structurally integral casting having a substantially flat central portion, and an edge curving downwardly and outwardly therefrom with a rounded margin.

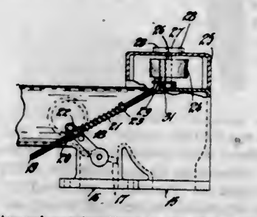
1,575,330. ADJUSTABLE ESCUTCHEON. JOSEPH GOODMAN, Whitneyville, Conn., assignor to The Mt. Carmel Manufacturing Company, Mount Carmel, Conn., a Corporation of Connecticut. Filed May 25, 1925. Serial No. 32,605. 14 Claims. (Cl. 70—16.)

2. In a device of the character described, an escutcheon adapted to be secured to a door and having an outwardly extending flange provided with a convex outer surface, a handle having a spindle extending through said escutcheon, spaced abutments on the spindle one of which engages said convex surface, and means between



the other abutment and the escutcheon having pivotal connection with the escutcheon in one plane and also pivotal connection with the abutment in another plane at an angle to the plane of the first pivot.

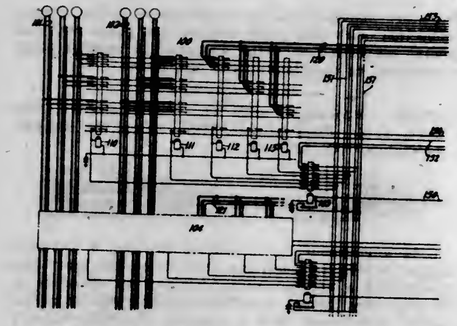
1,575,331. MAGAZINE PENCIL. IRVING GREENE, New York, N. Y. Filed July 24, 1923. Serial No. 653,449. 14 Claims. (Cl. 120—18.)



1. In a magazine lead pencil or the like, a magazine member having lead-receiving channels on the inner face thereof and a spring-retaining channel or channels on the outer face thereof, a barrel containing said magazine member and formed with a plurality of spring-engaging grooves on the inner face thereof, and one or more springs held in said spring-retaining channel or channels and engaging one or more of said spring-retaining grooves.

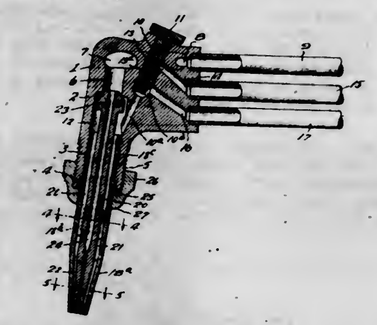
1,575,332. PARING KNIFE. FAY E. HALL, Morris, Minn. Filed Jan. 25, 1924. Serial No. 688,456. 2 Claims. (Cl. 30—9.)

2. A paring knife including an elongated substantially flat blade, and a handle attached to one end of the blade and provided with a pair of parallel plain flat sides which lie at an acute angle to the plane of the blade so as to be positioned to prevent cramp in the hand of the user while using the device.



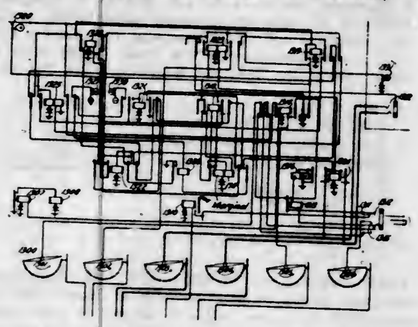
1,575,333. INTERNAL-COMBUSTION ENGINE RELATING TO THE CARBURATION OF HYDROCARBON-LIQUID FUEL. GEORGE HAMILTON-GRAPES, Melbourne, Victoria, Australia. Filed Aug. 20, 1923. Serial No. 658,455. 2 Claims. (Cl. 123—122.)

1. In an internal combustion engine, an exhaust manifold having an enlarged portion at its discharge end adjacent one of the engine exhaust ports and having an



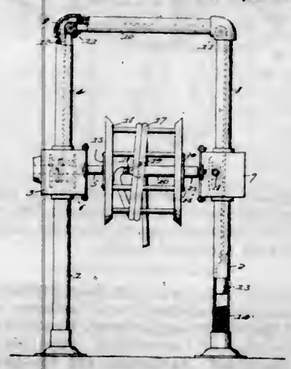
outlet in said enlarged portion, a conductor for conducting carburetted mixture between a carbureter and an engine in-take manifold, a retort having a single opening detachably connected to and extending into said enlarged portion, said retort having substantially lateral communication with said conductor, and said conductor having an internal, substantially transverse groove entering the mouth of said retort, and a by-pass valve for said manifold.

1,575,334. TELEPHONE SYSTEM. ROBERT W. HARPER, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 24, 1923. Serial No. 682,416. 7 Claims. (Cl. 179—27.)



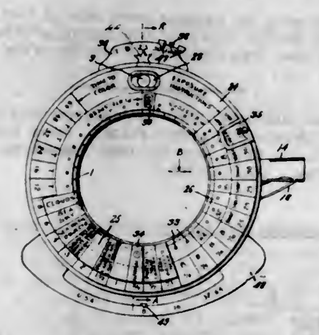
1. The combination in a telephone system of a number of telephone lines, connecting relays and link circuits for interconnecting said lines, a set of counting relays for each link circuit and responsive to a series of impulses sent over one of said lines, a second set of counting relays for each link circuit and responsive to a second series of impulses sent over such line, means for switching in the second set of counting relays at the end of the first series of impulses, and circuits selectively closed through contacts of said counting relays to interconnect a calling line with a called line.

1,575,335. BLOWPIPE. JOHN HARRIS, Cleveland, Ohio. Filed Feb. 1, 1923. Serial No. 616,285. 3 Claims. (Cl. 158—27.4.)



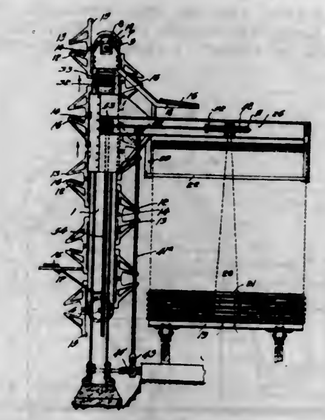
1. In a blowpipe, the combination of a head having a passage for cutting oxygen and provided with an annular seat below such passage and a chamber below such seat, the lower end of the chamber being threaded and the lower end of the head surrounding such chamber being also threaded, a tip comprising an inner and an outer member, the outer member having a downwardly tapering bore at its lower end extending to the delivery end of the tip and the inner member having a downwardly tapering lower end fitting such tapered bore of the outer member, there being one or more passages for preheating mixture provided between such members and extending downwardly from the top of the outer member to the lower end of the tip, the inner member extending beyond and above the outer member and having a central passage for cutting oxygen and provided with a head having a tapered end adapted to engage the inner edge of said seat, the outer tip member being threaded into the lower end of said chamber, a gland nut threaded onto the lower end of the head and having an inwardly directed shoulder surrounding the outer tip member, and a packing ring on said shoulder engaging the joint between the outer tip member and the lower end of the head.

1,575,336. TELEPHONE-EXCHANGE SYSTEM. ISRAEL H. HENRY, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 16, 1924. Serial No. 743,920. 12 Claims. (Cl. 179—6.3.)



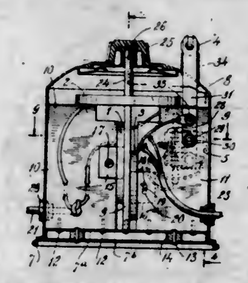
1. In a telephone exchange system, a calling line, a service charging device on said calling line, means for extending said calling line, a plurality of control devices, means to cause all idle control devices to hunt for said extended calling line, means for arresting all of said control devices when one of said control devices is connected with said extended line and means in said control device for operating said service charging device.

1,575,337. SELF-WINDING HOSE REEL. WILLIAM JOSEPH HEPWORTH, Houston, and WILLIAM SHERMAN HORNBECK, Alvord, Tex., assignors of one-third to Willie Mack Singleton, Haslet, Tex. Filed Jan. 7, 1925. Serial No. 1,098. 6 Claims. (Cl. 299—78.)



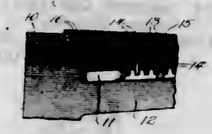
1. An apparatus of the kind set forth comprising a pair of supporting columns, a housing carried by each column, a tubular connection between the columns, a shaft journaled in one of the housings, a drum carried by the shaft and enclosed within the housing, a reel carried by the shaft exterior to the housing, a hose carried by the reel, an air supply duct in the other housing, connections between said duct and the hose, a weight carried in one of the columns, and a flexible connection between the weight and the drum whereby the gravity of the weight may effect the rotation of the drum for the useful purpose specified.

1,575,338. PHOTOGRAPHIC EXPOSURE METER. JOHN R. HEWETT, Schenectady, N. Y. Filed May 9, 1922. Serial No. 559,623. 29 Claims. (Cl. 95—10.)



1. An exposure meter having cooperating "time to color," "subject," "stop" and "exposure" scales, characterized by a correlating mechanism for said scales such that, for a given plate speed, correct exposure instructions may be obtained for any given subject and light value by a single operation of said mechanism.

1,575,339. LUMBER PILER. FREDERICK W. HORSTKOTTE, Spokane, Wash. Filed Nov. 18, 1924. Serial No. 750,690. 14 Claims. (Cl. 214—6.)

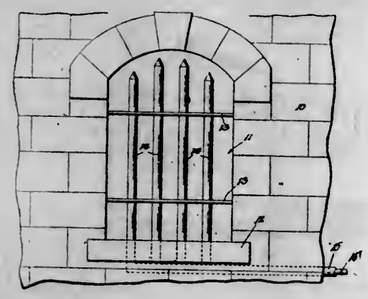


1. The combination with discharging skids, of a main frame, a vertically movable stacking frame supported on the main frame adjacent to said skids, normally spaced guides on said stacking frame, and means for moving said guides toward the center of the stack as the height of the latter increases.

1,575,340. WIRED RADIO-RECEIVING APPARATUS. CLINTON W. HOUGH, Boonville, N. Y., assignor to Wired Radio, Inc., New York, N. Y., a Corporation of Delaware. Filed Feb. 25, 1924. Serial No. 694,817. 7 Claims. (Cl. 250—14.)

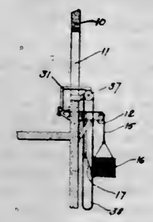
1. In high frequency signal receiving apparatus, a receptacle comprising a base and a cover therefor, a variable electrical device mounted within said receptacle, a rotatable shaft for said device extending to the exterior of said receptacle, a knob and dial secured to said shaft, said dial being undercut at its lower face and said cover having an annular depression in the top thereof terminating in an annular bead extending upwardly to a position within the undercut face of said dial for obstructing a straight line passage between said dial and cover, said knob and dial being operable to prevent the removal of said cover from said base, said receptacle completely enclosing said device so that it is inaccessible from the exterior of the receptacle.

1,575,341. ELECTRICAL TRANSFORMER. AUSTIN A. HOWARD, Chicago, Ill. Filed Mar. 7, 1925. Serial No. 13,773. 3 Claims. (Cl. 175—359.)



1. A device of the character described comprising; a cylindrical support having a spiral groove in its outer surface, said support also being provided with cut away portions, said cut away portions interrupting said spiral groove; a wire laid in the bottom of said groove and spanning said cut away portions, the depth of said groove being greater than the diameter of the wire laid therein; a sheet of material wound on said support and lying over said groove; and another wire wound on the outer surface of said sheet material.

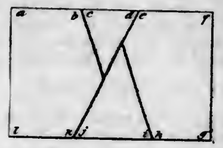
1,575,342. ELECTRICAL TRANSFORMER. AUSTIN A. HOWARD, Chicago, Ill. Filed July 9, 1925. Serial No. 42,411. 4 Claims. (Cl. 175—359.)



1. A device of the character described comprising a cylindrical support having a spiral groove in its outer surface, a wire laid in the bottom of said groove, the depth of said groove being greater than the diameter of the wire laid therein, a sheet of material on said support lying over said groove, and another wire wound on the outer surface of said sheet of material.

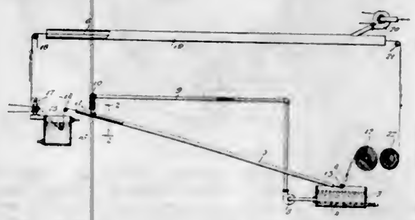
1,575,343. GRATING FOR PRISON WINDOWS, CELLS, OR THE LIKE. ANDREW P. KELLER and JOHN V. SCHLERETH, Jr., Tiffin, Ohio. Filed Jan. 23, 1922. Serial No. 531,251. 2 Claims. (Cl. 177—314.)

1. In a grating for window openings, the combination with a wall provided with a window opening having a sill, of vertically spaced transverse rods extending from side to side of said opening and permanently secured at their ends to said wall, hollow vertical bars sustained by said rods in fixed position within the opening and extending at their lower ends through said sill, a conduit embedded in said wall beneath the sill and having the bars connected thereto with their lower ends communicating with the interior of the conduit, a conductor extending longitudinally through said conduit and having branch conductors extending upwardly into said bars, and means normally insulating said conductor and its branches with respect to the conduit and said bars.



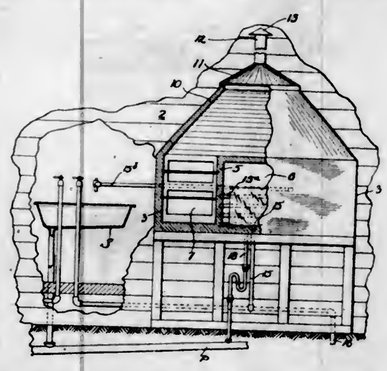
1,575,344. FIRE SAFETY DEVICE. PETER KLEIN, Elizabeth, N. J., assignor of one-half to Emma von der Hüllz, New York, N. Y. Filed Apr. 30, 1924. Serial No. 709,952. 3 Claims. (Cl. 254—151.)

1. In a device of the class described, a basket, a cable supporting said basket, a drum having said cable secured thereto, brackets adapted to support said drum within a building, a clutch mounted on one end of said drum, a motor adapted to rotate said drum, a clutch actuating arm engaging said clutch at one end and extending to a position exterior of the wall of the building, and means for moving said clutch arm longitudinally to operate said clutch.



1,575,345. SEWED SKIN. HYMAN KLEINMAN, Louisville, Ky. Filed Sept. 15, 1924. Serial No. 737,849. 6 Claims. (Cl. 149—28.)

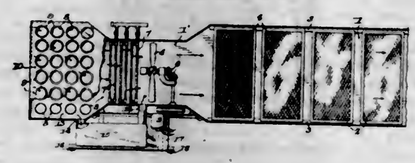
1. A process of cutting and sewing a skin comprising trimming the same to form a body portion having outwardly flaring head and tail portions projecting therefrom, dividing the body portion by a diagonal cut extending from one edge of one flaring portion to the oppositely disposed edge of the other flaring portion, displacing the severed parts along the line of separation to bring the outer edge of one of said flaring portions into



alignment with the adjacent outer edge of that part of the body portion to which said flaring portion is not attached, and sewing said parts together when in such position.

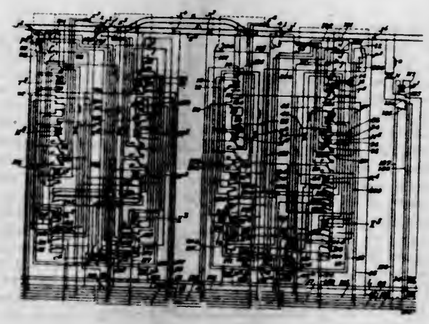
1,575,346. METHOD AND APPARATUS FOR TREATING CINEMATOGRAPHIC FILMS. PETER LOHN, Fort Lee, N. J. Filed Aug. 31, 1925. Serial No. 53,761. 9 Claims. (Cl. 15—100.)

1. An apparatus for the removal of the sensitized emulsion from cinematographic films including a sluiceway, means for feeding a removing agent to said sluiceway, and means for moving a film along said sluiceway in an opposite direction to the flow of the removing agent therein.



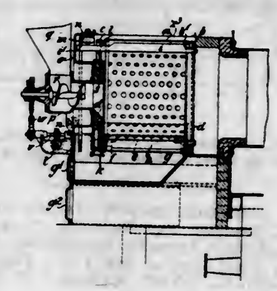
1,575,347. WATER COOLER AND REFRIGERATOR. JOHN W. LUCAS, Los Angeles, Calif. Filed Jan. 19, 1923. Serial No. 613,657. 3 Claims. (Cl. 62—38.)

1. A built-in refrigerator structure including a housing having within the same an ice chamber provided with means for access and being closed at the top, bottom, sides and front so as to form a substantially air tight ice chamber, food spaces at the sides of the enclosed



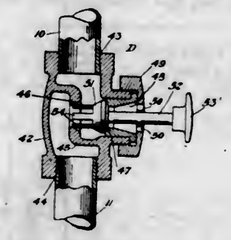
ice chamber in the housing and being provided with access doors, the upper part of the housing forming a ventilating space above the top of the ice chamber, the said ventilating space being in communication with the said food spaces.

1,575,348. METHOD OF DRYING GELATIN. HARRY W. LUSCHER, Carrollville, Wis., assignor to United States Glue Company, a Corporation of Wisconsin. Filed Mar. 30, 1922. Serial No. 548,074. 2 Claims. (Cl. 99—5.)



2. The method of drying substantially sterile gelatin and preventing its contamination during drying, which consists in placing the gelatin in a drying compartment, filtering the drying air to remove excess foreign matter, heating a part of this drying air and passing another part of the drying air through an ozonizer, mixing the heated air with the ozonized air and subjecting the gelatin to the drying action of this mixture of heated ozonised air while in said compartment.

1,575,349. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. RONALD A. MCCANN, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Feb. 15, 1923. Serial No. 619,248. 14 Claims. (Cl. 246—33.)

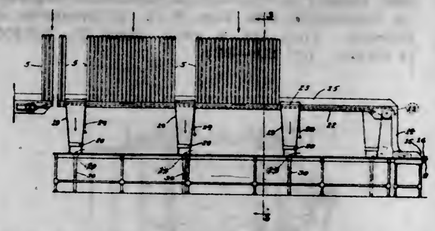


1. In combination, a section of railway track, a track circuit for said section including a secondary of a transformer connected across the rails adjacent the middle of the section, two track relays connected with the rails adjacent the two ends of the section, a source of energy for the primary of said transformer, and means controlled by each of said track relays when affected by a train entering the associated end of the section for immediately disconnecting said source from the primary of said transformer.

1,575,350. METHOD OF BURNING FUEL AND APPARATUS THEREFOR. SAMUEL MCEWEN, London, England, assignor to International Combustion Engineering Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 9, 1923. Serial No. 630,970. 12 Claims. (Cl. 110—35.)

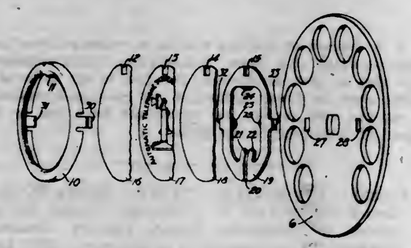
1. A method of burning fuel in a rotating grate having the shape of a figure of revolution, which comprises the step of both distributing the fuel in the form of a layer over the inner surface of the grate and retaining it against this surface, by centrifugal force due to the speed of revolution of the grate.

1,575,351. ATMOSPHERIC VALVE. GEORGE W. MACKENZIE and WILLIAM C. MACMILLEN, Beaver, Pa., assignors to Guarantee Liquid Measure Company, Rochester, Pa., a Corporation of Delaware. Filed June 24, 1921. Serial No. 480,142. 3 Claims. (Cl. 251—22.)



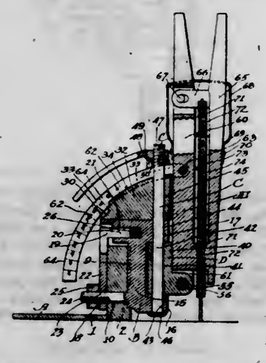
2. A self-closing valve for exhaust lines comprising a casing having alined inlet and exhaust passages at the opposite ends thereof, a partition in the casing having a port therein, an air inlet port opposite the port in said partition, a valve member in the casing between the two ports and adapted to seat on the part surrounding either port, and a valve stem slidably carried by guiding means on which said valve member is carried.

1,575,352. DISTRIBUTING APPARATUS FOR DISPATCH SYSTEMS. JAMES G. MACLAREN, Mamaroneck, N. Y., assignor, by mesne assignments, to The Lamson Company, a Corporation of Massachusetts. Filed Dec. 12, 1921. Serial No. 521,769. 21 Claims. (Cl. 243—16.)



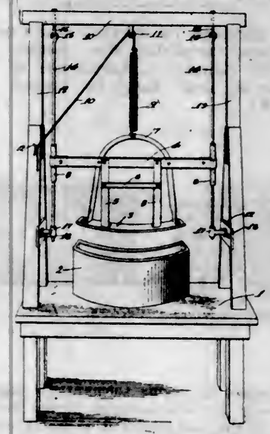
13. In carrier distributing apparatus, a plurality of incoming delivery tubes, a carrier receiving conveyor

belt arranged to receive carriers from the tubes, an operators' table, operators' stations located along each side



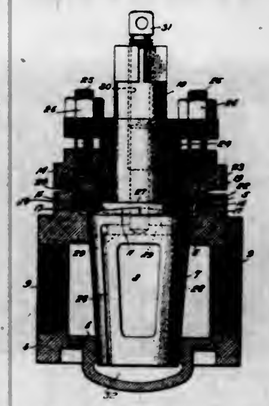
of the table, and means for delivering carriers from the belt to one or more stations at each side of the table.

1,575,353. CARD HOLDER FOR CALLING DIALS. ARTHUR C. MAGRATH, New Dorp, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 13, 1924. Serial No. 719,707. 4 Claims. (Cl. 40—10.5.)



1. The combination with a card holder, of a mounting plate, an instruction card mounted in said holder, and an adjustable member for securing said card in said holder and said holder on said mounting plate.

1,575,354. PORTABLE MITER BOX. MORRIS A. MARTIN, Los Angeles, Calif. Filed Oct. 13, 1924. Serial No. 743,372. 5 Claims. (Cl. 143—88.)

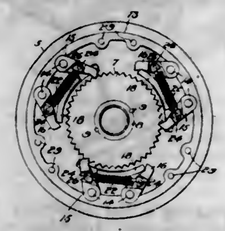


1. A miter box having in combination a base, a vertical semi-circular block attached by a bolt thereto, a mitering guide attached to said block to turn therein, a saw support pivoting on a vertical axis held by the mitering guide, a saw clamp swiveling on a horizontal axis held by the saw support, and a single means for clamping both the saw support and the saw clamp in mitering or beveling position.

1,575,355. TAMPER. JOHN A. MAYBERRY, Bell, Calif., assignor of one-fifth to Thomas A. Mayberry, James T. Mayberry, George O. Heffner, and W. B. Alderson, all of Huntington Park, Calif. Filed June 21, 1923. Serial No. 646,786. 5 Claims. (Cl. 25—41.)

1. A hand tamper comprising guide means, a supporting member movable upon said guide means, a tamping member carried by said supporting member, spring means for returning said tamping member to a predetermined position, and means for adjusting said spring means.

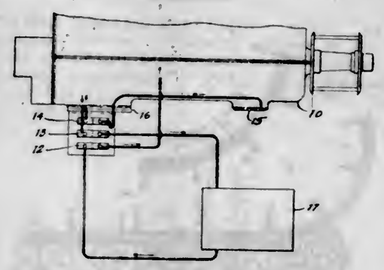
1,575,356. VALVE. LOUIS D. MILLS, Redwood City, and SVEN JOHAN NORDSTROM, San Francisco, Calif., assignors to Merco Nordstrom Valve Company, San Francisco, Calif., a Corporation of Delaware. Filed Jan. 30, 1923. Serial No. 615,964. 8 Claims. (Cl. 251—93.)



1. A valve comprising a casing having a passageway therethrough, a plug seated in the casing and having a hole adapted to register with the passageway, resiliently supported cam means cooperating with cam means on the plug to force the latter against its seat when the valve is closed, resilient means for pressing the plug against its seat when the valve is open, and means for raising the plug from its seat against the resilient means when the valve is open and against the resiliently supported cam means when the valve is closed so that the bearing surface of the valve may be lubricated.

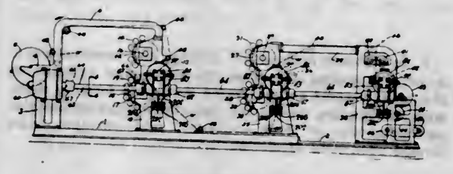
1,575,357. BIAS BINDING TAPE. ALAGE L. MILNER, Tolbert, Tex. Filed Feb. 21, 1923. Serial No. 620,408. 1 Claim. (Cl. 2—274.)

The method of binding goods which consists in folding one marginal edge portion only of a strip and causing it to lie against a side of the strip, then placing the strip against a side of the goods with the marginal fold facing outwardly and with the raw edge registering with the edge of the goods, then securing the strip to the goods by a line of stitching parallel with and spaced from the registering edges of the strip and goods, then folding the strip over the adjacent edges of the goods and strip to bring the marginal fold of the strip against the opposite side of the goods and finally stitching the marginal fold to the goods adjacent the fold containing the first line of stitching.



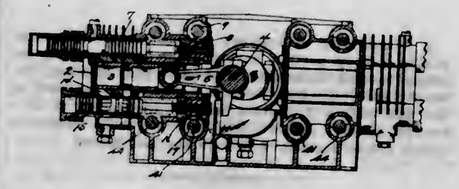
1,575,358. DRIVE UNIT FOR STOKERS. ROY A. MUNSON, Freeport, Ill. Filed Apr. 19, 1924. Serial No. 707,635. 5 Claims. (Cl. 192—48.)

1. A drive unit for stokers involving a ratchet wheel, means for alternately rotating said ratchet wheel in opposite directions, revolubly mounted means adapted to rotate both forwardly and in reverse direction, at least one pair of pivoted pawls whereby said last named means may be caused to rotate either forwardly or in reverse direction, the pawls of said pair being yieldingly attached to each other through the intervention of compression spring means tending when compressed to pull the pawls toward each other, one of said pawls being adapted to cooperate with said ratchet wheel to drive said revolubly mounted means in one direction and the other of said pawls being adapted to cooperate with said ratchet wheel to drive the said revolubly mounted means in the reverse direction, and means for permitting either pawl of said pair to engage and cooperate with said ratchet wheel while the other pawl is disengaged from said ratchet wheel.



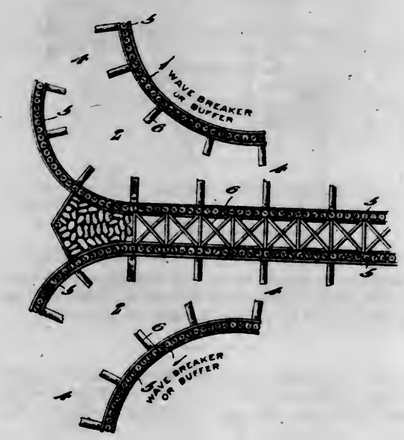
1,575,359. LUBRICATION SYSTEM FOR AERONAUTICAL MOTORS. ARTHUR NUTT, Buffalo, N. Y., assignor to Curtiss Aeroplane & Motor Company, Inc., a Corporation of New York. Filed Feb. 18, 1924. Serial No. 693,473. 4 Claims. (Cl. 184—6.)

1. A lubrication system for traveling motors including a drainage reservoir, an oil duct having its inlet end within said reservoir and its outlet end likewise within said reservoir but at a point remote from said inlet end, a scavenging oil pump operable to withdraw oil from said drainage reservoir at the inlet end of said oil duct and to deliver it again to said reservoir at the outlet end thereof, a supply reservoir, a second scavenging oil pump operable to withdraw oil from said drainage



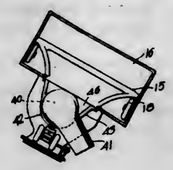
reservoir and to deliver it to said supply reservoir, and a delivery pump operable to withdraw oil from said supply reservoir and to deliver it again to the motor.

1,575,360. POWER-TRANSMITTING MECHANISM. RALPH C. SEYMOUR, Short Hills, N. J. Filed June 17, 1924. Serial No. 720,484. 9 Claims. (Cl. 74—36.)



1. A power transmitting mechanism including in combination a driven shaft journaled in a machine frame, a worm wheel fixed on the shaft, a worm meshing with the worm wheel, a worm shaft, a support in which the worm shaft is journaled, the support being mounted loosely on the driven shaft only, means for driving the worm, and means restraining the worm from angular movement about the driven shaft while leaving it continually free for adjustive movement due to wear of the shaft journal bearing, or to non-alinement in the driven machine.

1,575,361. ENGINE. WILLIAM A. DOBLE, Jr., San Francisco, Calif., assignor to Doble Laboratories, San Francisco, Calif., a Corporation of California. Filed July 23, 1919. Serial No. 312,808. 3 Claims. (Cl. 121—134.)



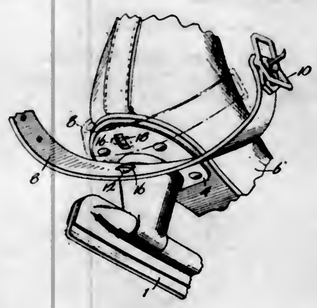
1. In an engine, a cylinder, a piston adapted to reciprocate in said cylinder, an exhaust valve for said cylinder having forward and reverse passages and provided with means disposed between said passages for placing the cylinder in continuous communication with the atmosphere during the reciprocation of the piston.

1,575,362. BEACH-RECLAMATION SYSTEM. LEWIS M. HAUPT, Cynwyd, Pa. Filed Feb. 4, 1924. Serial No. 690,377. 4 Claims. (Cl. 61—4.)

1. In a beach-reclamation system, the combination of a jetty extending out from the shore, and curtains on the flanks thereof and separated therefrom forming therewith impounding basins for the automatic accumulation and retention of drift material, said curtains being formed upon arcs of circles.

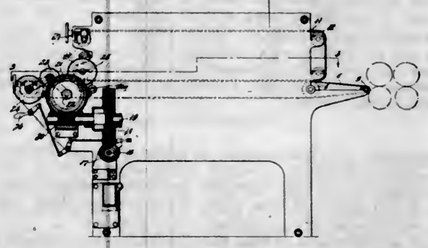
1,575,363. SUCTION CLEANER. HENRY C. HETTELSATER, Canton, Ohio, assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio, a Corporation of Ohio. Filed Aug. 5, 1922. Serial No. 579,808. 4 Claims. (Cl. 15—9.)

4. A converter attachment for suction cleaners comprising a body portion having a discharge opening, an intake conduit connecting with said body portion, forwardly and outwardly extending side walls provided at one end with a projection adapted to be secured to a suction cleaner, and at the other end with means to insure proper registry with said suction cleaner.



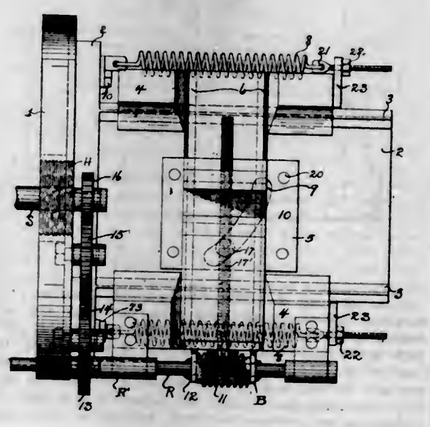
1,575,364. GOLF-CLUB HEAD. REGINALD R. HODGKINS, Los Angeles, Calif. Filed Dec. 1, 1924. Serial No. 753,133. 4 Claims. (Cl. 273—77.)

4. In a golf club head, a plate, a shaft attaching shank projecting upwardly from one end of said plate, a flange projecting upwardly from the rear edge of said plate, a centrally arranged rib extending lengthwise on top of said plate, a wooden body arranged on said plate and overlying said rib, said wooden body being provided in its rear portion with an aperture, a member extending



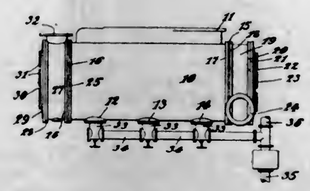
through the flange and seated in said rib and weights carried by said member and occupying the aperture within said wooden body.

1,575,365. SKATE. ALFRED K. JOHNSON, Chicago, Ill. Filed Feb. 18, 1925. Serial No. 9,904. 5 Claims. (Cl. 208—168.)



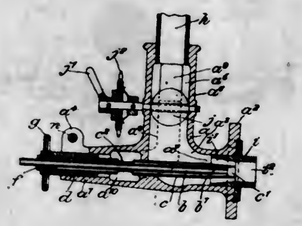
1. A skate having a foot supporting plate, a strap, and means for detachably attaching the strap to the plate and preventing lengthwise movement of the strap relatively to the plate, said means being interfitting parts consisting of but two elements, manually manipulatable, one element being part of the strap and the other part of the plate.

1,575,366. COLLAR-CONDITIONING APPARATUS. GEORGE W. JOHNSON, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 5, 1922. Serial No. 592,620. 11 Claims. (Cl. 34—12.)



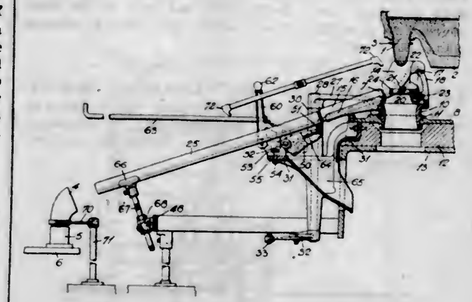
8. A laundry conditioning apparatus comprising a casing having a heating chamber, means for conveying starched work through said heating chamber, a perforated plate extending across said casing and providing a chamber on the opposite side of the path of work from said heating chamber, and suction means arranged to remove the moisture released from the work by drawing the same through said perforated plate.

1,575,367. SHAPING MECHANISM. ROY WALTER JOHNSON, Winona, Minn. Filed Aug. 6, 1923. Serial No. 656,098. 5 Claims. (Cl. 82—14.)



1. A shaping mechanism comprising a revoluble member having a slidable member connected thereto, said slidable member having a second slidable member connected thereto, one of said slidable members having a tool holder connected thereto and being movable in a direction different from the direction of movement of said first slidable member, a guide plate provided with a guide slot and connected to said revoluble member, one of said slidable members having a pin fitting into and co-operating with said guide slot, and means adapted to move one of said carriages when said revoluble member is revolved, said guide slot and pin being adapted to cause said tool holder to have a movement whose longitudinal component is an arc.

1,575,368. CONDENSER. EINAR A. JOHNSEN, Mountain Lakes, N. J. Filed Jan. 11, 1924. Serial No. 685,527. 3 Claims. (Cl. 257—43.)

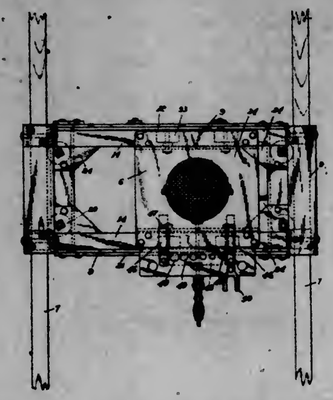


1. In a single pass surface condenser, a shell having an exhaust steam inlet and a condensate outlet, a plurality of tubes arranged in rows converging from the exhaust steam inlet to the condensate outlet, and also decreasing in diameter from the exhaust steam inlet to the condensate outlet, thereby providing a substantially uninterrupted lane for the passage of the exhaust steam between each two rows of tubes.

1,575,369. BURNER FOR LIQUID FUEL. ERNEST JUILLARD, Geneva, Switzerland, assignor to The Ateliers H. Cuénod Société Anonyme, Chatelaine, near Geneva, Switzerland, a Company of Switzerland. Filed July 11, 1923. Serial No. 650,741. 3 Claims. (Cl. 158—76.)

3. A liquid fuel burner according to claim 1 having means for simultaneously adjusting the first Venturi tube and the fuel spray nozzle within the same relatively to the said second Venturi tube.

1,575,370. GLASS-DELIVERING APPARATUS. EDWARD H. LORENZ, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Apr. 7, 1919. Serial No. 287,966. 35 Claims. (Cl. 49—55.)

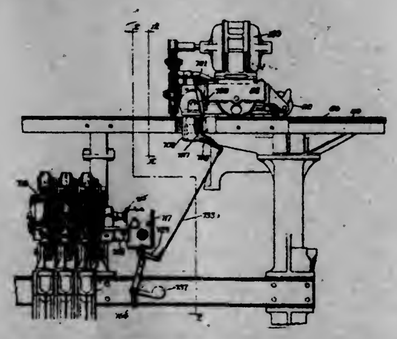


12. A chute for delivering molten glass comprising a plurality of movable sections located in delivering continuity, a support common to said sections, means for moving said sections in unison upon said support and means for moving one of said sections vertically out of delivering continuity with another section, independently of its movement on said support.

1,575,371. LIQUID RECEIVING AND CONVEYING DEVICE. JOSEPH H. LOWDEN, Elyria, Ohio. Filed Apr. 30, 1925. Serial No. 27,115. 7 Claims. (Cl. 104—91.)

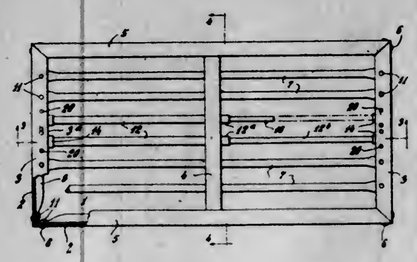
2. In a device of the class described, in combination, a longitudinally adjustable frame, said frame being mov-

able and comprising side members having upwardly extending flanges to provide wheel runways, a carriage supported on wheels engaging the said runways, and a



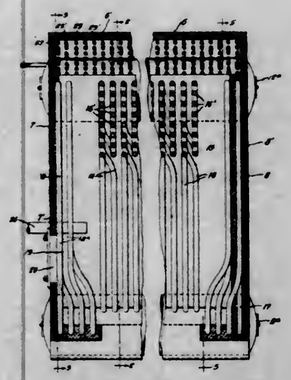
receptacle carried by the carriage, said receptacle being adjustable vertically, and means for adjusting the receptacle vertically.

1,575,372. METHOD OF FERMENTING OR CURING COCOA BEANS AND PRODUCT RESULTING FROM SUCH FERMENTATION OR CURING. WHARTON B. MCLAUGHLIN, New York, N. Y.; Celia Brown McLaughlin administratrix of said Wharton B. McLaughlin, deceased. Filed Dec. 28, 1923. Serial No. 683,200. 2 Claims. (Cl. 99—11.)



1. The method of curing cocoa beans, which consists in maintaining the bean out of contact with atmospheric air at a temperature above that at which organized ferments grow and below that at which the enzyme of the bean is injured until the purplish red color of the bean changes to a reddish brown which upon drying becomes cinnamon brown.

1,575,373. STOPPING AND RESTARTING MECHANISM. BROOKS MARCELLUS, Rockford, Ill., assignor to Barber-Colman Company, Rockford, Ill., a Corporation of Illinois. Filed Mar. 21, 1924. Serial No. 700,785. 25 Claims. (Cl. 242—35.6.)

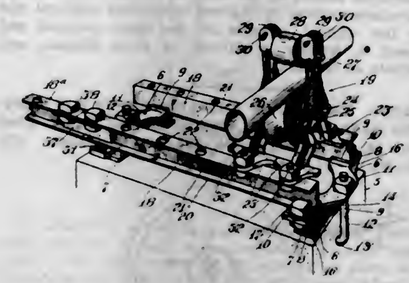


1. In a winder, the combination of a traveling carriage, a control element therefor, means acting upon the control element to cause it to stop the carriage at a predetermined point in its travel, and means operating to cause the control element to permit the carriage to resume its travel after the lapse of a predetermined interval including a timing member and a part actuated by said member as the latter moves in one direction, and means operable in the movemen of said part to effect a return of the timing member to its initial starting position.

1,575,374. POULTRY COOP. JOSEPH MARGOLIS and MAX VOLINETZ, New York, N. Y. Filed Jan. 8, 1925. Serial No. 1,160. 10 Claims. (Cl. 220—8.)

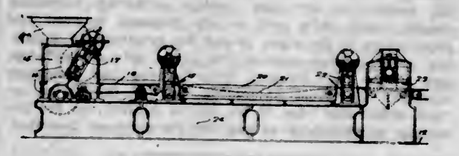
1. A coop of the character specified provided with enclosing means on all sides some of which are telescopically disposed bars slidable one within the other with their telescoping ends at the mid-portion of the coop when the said bars are extended to close the coop, the coop having a strip provided with an opening slidably supporting the outer of the telescopic bars with the companion bar slidably retained within the outer bar, and means to detachably retain the bars.

1,575,375. BOILER. LOREN P. MICHAEL, Elmhurst, Ill., assignor of one-half to Harry T. Bentley, Oak Park, Ill. Filed Feb. 23, 1923. Serial No. 620,557. 5 Claims. (Cl. 122—326.)



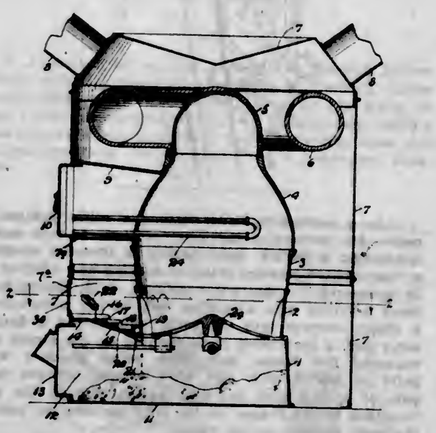
1. In a boiler of the type described, the combination of a housing of generally rectangular form, drums disposed in and lengthwise of the corner regions of said housing, and one or more longitudinal rows of water tubes connecting each lower drum with the upper drum on the opposite side and unitedly forming the roof of the fire box, the tubes of adjacent pairs in each row being bent into a common vertical plane throughout the roof region to provide increased space for the intersection of said tubes.

1,575,376. PUSH BUTTON. FRED N. MIZER, Elyria, Ohio, assignor to The General Phonograph Manufacturing Company, Elyria, Ohio, a Corporation of Ohio. Filed Feb. 4, 1924. Serial No. 690,402. 4 Claims. (Cl. 200—159.)



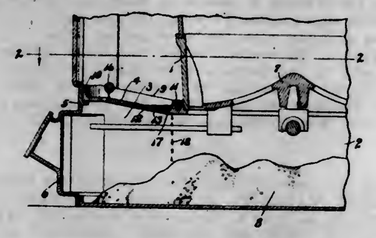
1. A push button switch comprising a non-conductor base member, a ground member adjacent said base, an axially movable stem extending through said base, a button secured to one end of said stem exteriorly of said base member and enclosing one end of said base, means to prevent removal of the other end of said stem through said base member, a leaf spring contact member bent to bear against and normally space said button from said base, said spring contact having one end secured to said base member and the other end normally spaced from and free to be moved into contact with said ground member, and means for connecting said contact member with a source of electric supply, said button moving said free spring contact end into engagement with said round member when pressure is directed thereagainst.

1,575,377. CARRIER SUPPORT FOR SWITCH AND SIGNAL RODS. JAMES C. MOCK, Detroit, Mich. Filed July 20, 1921. Serial No. 486,089. 1 Claim. (Cl. 248—30.)



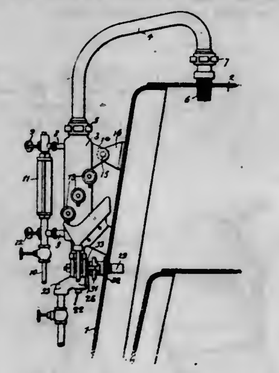
In a device of the character described, the combination of a pedestal having flat bearing surfaces on the bottom of the base portion and ends extended beyond the base portion and formed to provide sockets therebeneath, the upper surfaces of said ends being each provided with a pair of transversely disposed shoulders arranged in parallel spaced relation, a bolt-receiving opening extending through each end at a point intermediate of the shoulders, the intermediate portion of the pedestal having a portion disposed laterally beyond one side of the longitudinal axis and adapted to receive a clamping element whereby the pedestal may be secured to a substructure, anchor bars provided with laterally disposed upper and lower flanges or surfaces, the lower flanges or surfaces being of less width than the distance between one shoulder of each pair and the bolt-receiving opening, while the upper flanges are provided with a plurality of openings, said bars being adapted to be disposed transversely of the pedestal with the lower flange flush with the top surface of the pedestal ends and its body portion in abutting relation with one of said shoulders so as to permit longitudinal adjustment of the anchor bars while the pedestal is secured in place, and bolt-and-nut clamping means disposed through the openings in the ends of the pedestal, with the lower portion of said means arranged in the sockets beneath the upper surfaces of the ends of the pedestal while the upper portion of said means is arranged in lapping relation with the other shoulders on the ends of the pedestal and with the lower laterally disposed surfaces of said anchor bars.

1,575,378. PROCESS OF MANUFACTURING MASTIC SHEET MATERIAL. FRANKLYN R. MULLER, Lake Bluff, Ill., assignor to Franklyn R. Muller, Inc., Waukegan, Ill. Filed Apr. 16, 1925. Serial No. 23,574. 4 Claims. (Cl. 18—18.)



1. A process of producing sheet mastic which includes heating and mixing the ingredients thereof, passing the plastic material thus produced through chilled forming rolls, squeeze rolls, and a water bath.

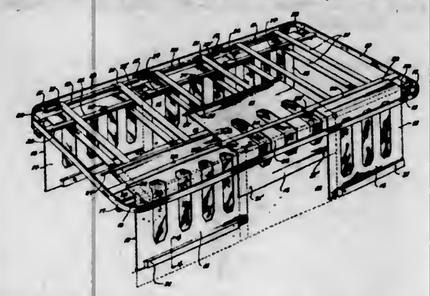
1,575,379. FURNACE HUMIDIFIER. OSCAR P. NYSTROM, Holland, Mich., assignor to Holland Furnace Company, Holland, Mich., a Corporation of Michigan. Filed July 21, 1924. Serial No. 727,136. 10 Claims. (Cl. 126—113.)



10. A furnace humidifier comprising a receptacle located in an inclined position within the jacket of a furnace, ribs extending upwardly from the bottom of the receptacle, means for supplying water to the receptacle above the uppermost rib and means for draining water from the receptacle near its lower side and for conveying said water to the ash pit of the furnace.

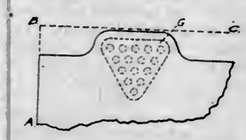
1,575,380. FURNACE HUMIDIFIER. OSCAR P. NYSTROM, Holland, Mich., assignor to Holland Furnace Company, Holland, Mich., a Corporation of Michigan. Filed Feb. 24, 1925. Serial No. 11,082. 12 Claims. (Cl. 126—113.)

1. In a furnace, an ash pit casting and a fire pot casting located above the ash pit casting, said ash pit casting at one side having outwardly extending spaced apart sides and a top disposed between the upper edges of the sides, means for continuously supplying water to and against the upper side of said top, and means cast integral with the top and extending upwardly therefrom preventing flow of the water beyond either side edge of the top or against the fire pot casting, substantially as and for the purposes described.



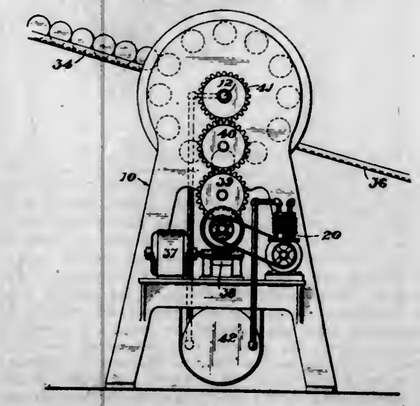
1,575,381. WATER COLUMN FOR LOCOMOTIVES. ALFRED H. OELKERS, Springfield, Mo. Filed Jan. 14, 1925. Serial No. 2,338. 2 Claims. (Cl. 137—102.)

1. In a locomotive boiler having a water column, a means for connecting the water column to said boiler comprising a hollow body having a threaded opening, a pipe member screwed into the opening and adapted to be connected to the water column, said hollow body being provided with attaching ears having perforations, a nipple screwed into the boiler and having a flanged outer end, a perforated plate received by the nipple and engaging the flange, said plate being provided with pairs of spaced ears, and bolts located between each pair of spaced ears and also passed through the perforations in the flanges on the body member for locking the body member to the nipple.



1,575,382. AUTOMOBILE CURTAIN. BLASE PASQUARELLI, New York, N. Y. Filed July 19, 1924. Serial No. 727,051. 6 Claims. (Cl. 296—140.)

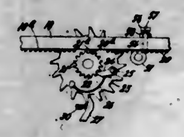
1. In combination with the frame of a vehicle top, sets of curtains arranged at opposite sides of said frame, the meeting ends of the curtains of each set overlapping each other, a winding roller for each of said curtains, idler rollers of various diameters to permit of the overlapping of said curtains, members supported by said frame, a slot or channel formed in each of said members through which the respective curtains pass,



and means carried by one end of said curtains for coaction with said members for limiting the downward movement of said curtains.

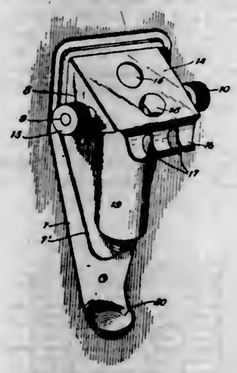
1,575,383. INDEX TAB. JAMES W. PEARL, Chicago, Ill. Filed Feb. 16, 1921. Serial No. 445,490. 2 Claims. (Cl. 129—16.8.)

2. The combination, in a filing element, of a sheet of paper or card-board recessed inwardly from the edge along only that portion of the edge to be used as an index tab, a reinforcing material inserted in the recess and completely covered by the original paper material, cement applied to firmly unite all interior parts and produce a reinforced section of the sheet at the tab only, without perforations, orifices or exposed reinforcing material and with the original surfaces of the sheet retained and restored for writing or printing an index thereon, substantially as set forth.



1,575,384. METHOD OF AND APPARATUS FOR TESTING CANS. LOUIS H. PETERS, Oakland, Calif. Filed Feb. 18, 1924. Serial No. 693,556. 4 Claims. (Cl. 73—51.)

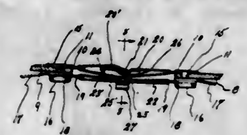
1. A method of testing filled cans consisting in forming a seal around the edge of a closed can end, thereafter creating suction upon a portion of the can end



embraced by the seal, whereby the end of the can will be distended, after which the distension of the end will remain permanent if the can is faulty.

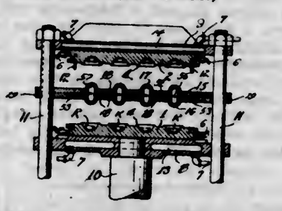
1,575,385. TYPEWRITING MACHINE. HENRY L. PITMAN, Westfield, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 17, 1923, Serial No. 625,699. Renewed July 18, 1925. 12 Claims. (Cl. 197—176.)

1. In a typewriting machine, a carriage urged in letter-feeding direction, escapement means including a pinion advanced one tooth at each typing operation, a mutilated rack on the carriage normally in mesh with said pinion, a track upon the rack, a roller engaging the track to support the rack, and means for automatically lifting the rack out of engagement with the pinion when the carriage reaches a predetermined position.



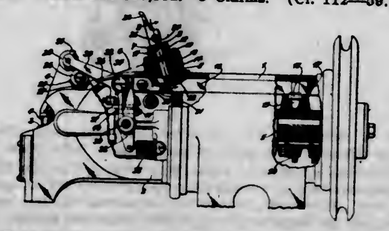
1,575,386. TUBE SQUEEZER. JOSEPHINE RANDALL, Tuckahoe, N. Y. Filed Nov. 10, 1924. Serial No. 748,840. 3 Claims. (Cl. 221—60.)

1. Means for squeezing a collapsible tube to discharge the contents thereof and comprising a back support plate, a top plate and sides plates, said top plate having apertures to receive various sizes of collapsible tube caps and provided with a curved lip adapted to hold various articles used in connection with the contents of the tube, a winding key mounted in said side plates and having a shank located between the plates and provided with means to receive the closed end of a tube whereby the said tube may be suspended from the shank of the key in front of the said back support plate and be wound upon the key.



1,575,387. SHOE FASTENER. BENJAMIN RAUTIO, Detroit, Mich. Filed July 23, 1925. Serial No. 45,490. 1 Claim. (Cl. 24—117.)

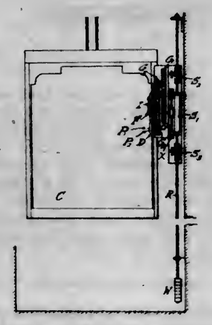
A shoe fastener of the class described adapted for use on a shoe having a split upper provided with meeting edges, comprising a plate secured to said upper adjacent each of said edges adjacent the upper end thereof, said plate having an outwardly projecting end provided with an eyelet; a stud projected through an opening formed in said plate and through said upper; a head mounted on the base of said stud provided with a beveled surface, said plate being flared for engagement in embracing relation with said beveled surface, said stud forming a male portion of a snap fastener; a female portion of a snap fastener for cooperating with each of said studs; a gripping member mounted on each of said female portions and projecting outwardly therefrom; a plate carried by each of said female portions and provided with



an eyelet; a slip buckle; a securing hook mounted on the outer surface of said slip buckle; and an elastic strip threaded into each of said eyelets and into said slip buckle; and means for fastening the ends of said elastic strip for preventing their removal from said eyelets, said elastic strip serving as a yieldable fastening for retaining the said edges in the desired relative position and for permitting upon disengagement of said female portions from said male portions the farther relative separation of said edges.

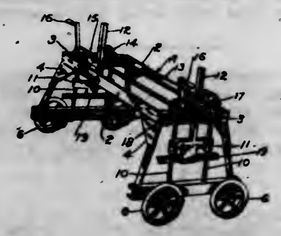
1,575,388. METHOD AND APPARATUS FOR MAKING HOLLOW RUBBER ARTICLES. FRED THOMAS ROBERTS, Upper Montclair, N. J., assignor to Paramount Rubber Consolidated, Inc., Tuckahoe, N. Y., a Corporation of Delaware. Filed Oct. 16, 1922. Serial No. 594,781. 28 Claims. (Cl. 18—56.)

1. A method of making permanently inflated hollow rubber articles, consisting of slightly vulcanising rubber composition, while mechanically forming the walls of the article under pressure and of continuously holding the articles in the same mold member, uniting them and vulcanising them while giving them a permanent inflation.



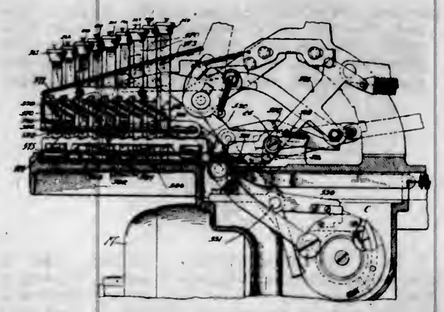
1,575,389. SEWING MACHINE. JOHN SCHNEIDER, St. Louis, Mo. Original application filed May 21, 1921, Serial No. 471,314, Patent No. 1,440,556, dated Jan. 2, 1923. Divided and this application filed Dec. 18, 1922. Serial No. 607,531. 9 Claims. (Cl. 112—59.)

1. In a sewing machine having stitch forming mechanism, the combination of a stem supported for axial movements, a flange rigid on said stem, a spring encircling the stem and bearing against said flange to actuate



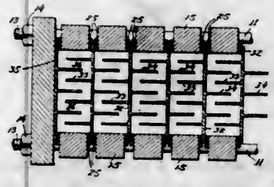
the stem in one direction, a washer loose on said stem on the opposite side of said flange from said spring adapted to press against the thread passing between said washer and said flange, and a spring encircling the stem for pressing the washer toward said flange.

1,575,390. ELEVATOR FLOOR-INDICATOR DEVICE. HENRY DUTTON SMITH, New York, N. Y. Filed Mar. 30, 1923. Serial No. 628,941. 2 Claims. (Cl. 116—122.)



1. In an elevator floor indicator device, the combination of a driving rope weighted and suspended in the hatchway with a bracket mounted on an elevator cab supporting sheaves adapted to frictionally drive an operating sheave, a double set of reduction spur gearing, an indicator pointer shaft and an indicator pointer adjustably connected therewith visible from within said cab, a dial indicator face containing floor numbers and stadia-like segmentations marked thereon likewise visible from within said cab and with pointer engaging protrusions at both ends of travel of said dial indicator, all substantially as and for the purposes hereinbefore set forth.

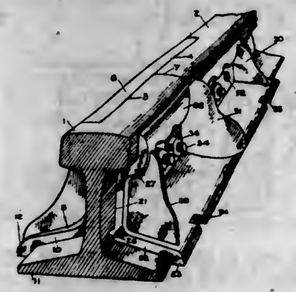
1,575,391. MOLD STRIPPING AND TRANSFERRING MACHINE. WOLCOTT P. STANTON, Berkeley, Calif. Filed July 21, 1924. Serial No. 727,191. 4 Claims. (Cl. 25—1.)



1. A device of the character described comprising a cross frame and a pair of end frames, said cross and end frames adapted to straddle a series of molds placed in line formation, a cross-head on each end frame, guides for the cross-heads, means for imparting vertical movement to the cross-heads upon the guides in unison, lugs on the cross-heads engageable with the molds to raise and support the same and means supporting the cross and end frames and permitting movement thereof longitudinally of the molds.

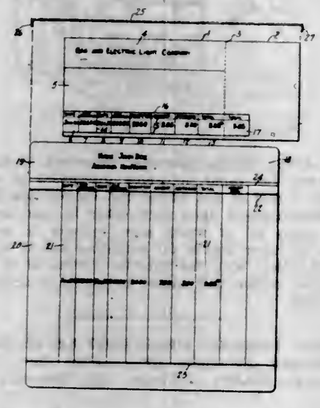
1,575,392. ADDING MACHINE. OSCAR J. SUNDSTRAND, Rockford, Ill., assignor to Rockford Milling Machine Company, Rockford, Ill., a Corporation of Illinois. Filed Jan. 9, 1922. Serial No. 527,827. 11 Claims. (Cl. 235—60.)

1. An adding machine having, in combination, a row of key stems, means to lock any of said stems in depressed position, a projection upon each key stem, a slide arranged to be moved along said row of stems from one stem to the next stem in each cycle of operations of the machine and to engage the projection of a depressed key stem, a spring tending to hold said slide in initial position at one end of the row, a tooth on said slide, two parallel ratchet bars extending along the path of the slide and arranged to be engaged by said tooth, means for reciprocating one of said ratchet bars to advance the slide along the row of key stems from one key stem to the next in each cycle of operations of the adding machine, and means for disengaging the tooth and said bars after said slide has engaged the projection of a depressed key stem.



1,575,393. STORAGE BATTERY. FREDERIC ERNEST SUTTON, Newark, N. J. Filed May 31, 1922. Serial No. 564,808. 5 Claims. (Cl. 136—9.)

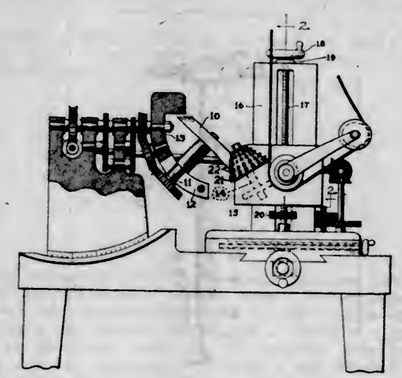
1. A secondary cell comprising in combination, a frame having a vent and filling opening at its upper portion, a cathode plate extending across one face of said frame, and an anode plate extending across the opposite side of said face and cooperating with said frame and cathode plate to form the electrolyte container, each of said plates being provided with a plurality of substantially vertical ribs which extend toward the other plate and between and alternating with the ribs of the other plate.



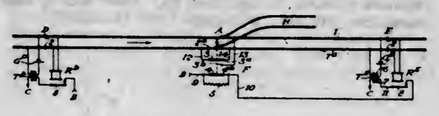
1,575,394. RAIL JOINT. JOSEPH OMER TARDIF, Quebec, Quebec, Canada, assignor to George Frederick Knight, Quebec, Canada. Filed Mar. 14, 1924. Serial No. 699,236. 1 Claim. (Cl. 238—221.)

A joint comprising a joint plate formed at the upper edge as a splice bar fitting into corresponding slots in the meeting rails and crossing from rail to rail, said plate having a hollow buttress in the centre thereof enclosing the webs and bases of the rails at the split, and a joint plate on the opposite side having a corresponding buttress thereby leaving a clear space about the rail ends

below the tread, said joint plates having flanges extending beyond the rail bases and formed with spike slots and bolt holes for the fastening bolts.



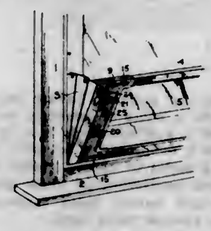
1,575,395. INVOICE SHEET. WALTER E. TORPS, Jersey City, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 6, 1921. Serial No. 490,197. 1 Claim. (Cl. 282—27.)



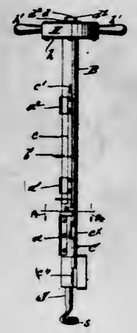
A set of blanks for use in bookkeeping and billing, comprising a ledger-sheet having a series of columns marked thereon and a left filing margin, and a bill-blank having a series of spaces marked thereon arranged to coincide with the columns on the ledger-sheet when the ledger-sheet is superposed on the bill-blank and a detachable memorandum stub at the right extremity of the bill, the blanks being so arranged that the left filing margin of the ledger-sheet will extend beyond the left edge of the bill-blank and the right margin of the detachable memorandum stub will extend beyond the right margin of the ledger-sheet when the corresponding columns and spaces on the ledger-sheet and bill-blank are superposed in coincident relationship.

1,575,396. METHOD OF PRODUCING GEARS. NIKOLA TESLA, Detroit, Mich., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Filed Jan. 21, 1921. Serial No. 438,881. 33 Claims. (Cl. 90—5.)

5. The method of producing gears which consists in giving the gear blank a continuous planetary movement by means of gearing having relatively prime numbers of teeth which impart to the blank a rotation that once during each cycle of said planetary movement brings a new tooth section of the blank into rolling contact with a tool having a plurality of cutting portions arranged on a cone.

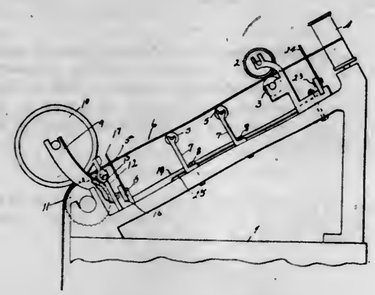


1,575,397. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. RALPH P. TUTTLE, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Jan. 28, 1924. Serial No. 688,917. 27 Claims. (Cl. 246—34.)



1. In combination, a stretch of railway track, a track transformer having its secondary winding connected across the rails of said stretch, a switch in said stretch, and means for controlling the supply of energy to the primary of said transformer in accordance with the position of said switch.

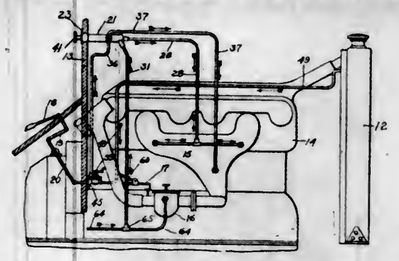
1,575,398. WINDOW VENTILATOR. THOMAS R. WEVANT, New York, N. Y. Filed Oct. 30, 1922. Serial No. 597,990. 6 Claims. (Cl. 98—31.)



1. A window ventilator having a deflector, said deflector comprising a pane, a pair of frames for said pane, each of which frames passes completely around the pane, one of said frames telescoping into the other, each of said frames having a sunken flange adapted to hold the pane, and bolts passing through said frames joining them to each other and exerting resilient pressure of said flanges against the pane, and means to attach said frame to and detach it from operative position.

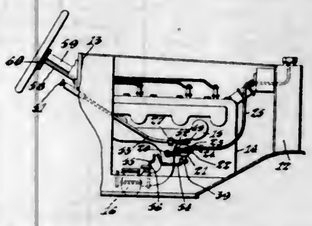
1,575,399. MEANS FOR CURLING HAIR. EMILE WILKENS, Winfield, N. Y. Filed May 19, 1925. Serial No. 31,256. 10 Claims. (Cl. 132—33.)

1. Hair curling means of the character designated, comprising a wind-spindle, and a rotatable tubular enclosure therefor, formed with lateral comb teeth, substantially as and for the purpose set forth.



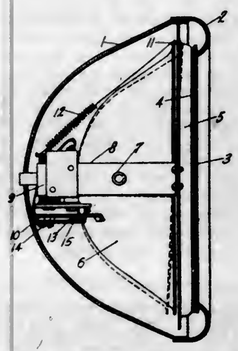
1,575,400. AUXILIARY SHIFTING GUIDE FOR SPINNING AND ROVING MACHINES. JOSEPH WOOD and WALTER HAYNES, Philadelphia, Pa. Filed May 6, 1924. Serial No. 711,333. 2 Claims. (Cl. 19—133.)

2. In a spinning machine having bearing standards for drawing rolls, a series of combined bearing and guide brackets secured to said standards, a guide roll journalled in said brackets, a reciprocating bar also mounted in said brackets, and a series of thread guides carried by said bar, said guides projecting in close proximity to the drawing rolls and having holes therethrough for the passage of the threads being spun.



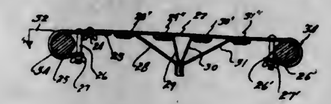
1,575,401. COMBINED PRIMER AND HUMIDIFIER FOR INTERNAL-COMBUSTION ENGINES. JAMES E. WOODWARD, Watertown, Mass., assignor to Henri A. Sevigne, Winthrop, Mass. Filed June 13, 1921. Serial No. 477,261. 1 Claim. (Cl. 123—25.)

The combination with an internal combustion engine of a pump having a piston member provided with a transverse port, and connections to enable said pump to either effect priming of the engine or for said piston



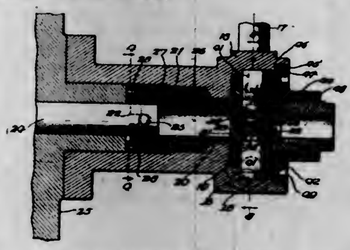
member to open or close a passageway for the introduction of vapor to said engine.

1,575,402. HUMIDIFIER FOR INTERNAL-COMBUSTION ENGINES. JAMES E. WOODWARD, Somerville, Mass., assignor to Henri A. Sevigne, Winthrop, Mass. Filed Sept. 13, 1922. Serial No. 588,002. 4 Claims. (Cl. 123—25.)



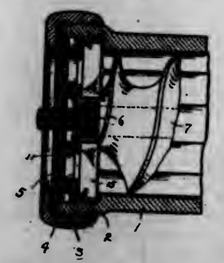
1. A device of the character described, comprising a passageway for vapor, a casing interposed in said passageway, a pair of flat valves and cooperating flat valve seats superimposed upon each other in said casing and having ports all of which must register to permit the passage of vapor, means for actuating one of said valves in synchronism with the throttle control of an internal combustion engine, and means for manually actuating the other valve.

1,575,403. TILTABLE HEADLIGHT REFLECTOR. LEO R. YEAGER, Columbus, Ohio. Filed Nov. 19, 1923. Serial No. 675,536. 6 Claims. (Cl. 240—41.)



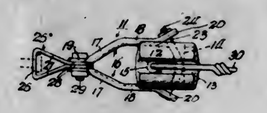
1. In a lamp structure, a light projecting device adjustable to vary the direction of the beam of light, electromagnetic actuating means for adjusting said projecting device by a current of one value and for maintaining adjusted position by a current of a lower value, and means connected to the light projecting device and brought into contact with a part of the electromagnetic actuating means for breaking the high current circuit and completing the low current circuit.

1,575,404. VEHICLE SIGNAL. RALPH L. AMES, Detroit, Mich. Filed Nov. 19, 1923. Serial No. 675,557. 2 Claims. (Cl. 200—59.)



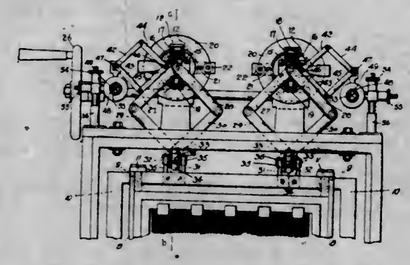
1. An electric switch support adapted for attachment to a spoked steering wheel having a rim, comprising an elongated supporting member, the ends of said supporting member being curved to embrace and adapted to clamp upon the spokes of said wheel, the distance between said ends being variable to permit their clamping engagement with said spokes at various positions relatively to said rim.

1,575,405. ROTARY PUMP. LARS ANDERSON, Chicago, Ill. Filed May 14, 1925. Serial No. 30,141. 9 Claims. (Cl. 103—136.)



5. A rotary pump including a chamber, a rotor eccentrically rotating therein, radially slidable blades carried by the rotor, a floating element with which the inner ends of the blade have abutment to effect the sliding of the blades, said element including opposed laterally and relatively adjustable members each of which has engagement with the blades, and a projection connected with one of said members and projecting between two adjacent blades to cause the floating element to rotate with the rotor.

1,575,406. MEAT CHOPPER. WILLIAM J. ANDERSON, Duluth, Minn. Filed Oct. 17, 1924. Serial No. 744,129. 2 Claims. (Cl. 146—181.)

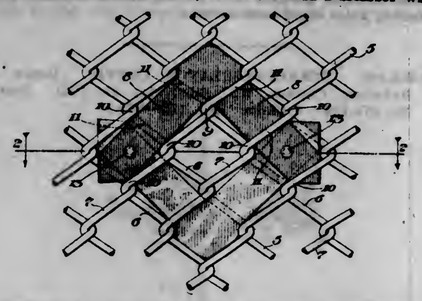


1. A cutter head for meat grinders of the class described comprising a circular body portion having a plurality of radially disposed recesses in the rearmost face thereof, a circular opening through the center of each recessed portion, and an adjustable annular protruding knife about each opening.

1,575,407. STRAIN-INSULATOR CLEVIS. BORIS J. BARMACK, Chicago, Ill. Filed May 31, 1921. Serial No. 473,754. 1 Claim. (Cl. 173—366.)

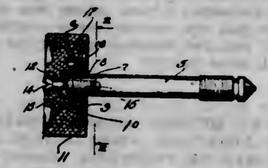
An adjustable clevis for a strain insulator having longitudinal grooves in its sides with a transverse hole in one end, said clevis comprising two similar arms each having a part near one end adapted to engage in a part of an associated groove, of said insulator with said end part bent outwardly therefrom, a bolt adapted to pass through said insulator hole and through the outwardly bent ends of said clevis arms, said bolt having a head on one end, the sides of which engage with parts of one of said bent arm ends, a nut on the other end of the bolt, the sides of which engage with parts of the other of said bent arm ends to prevent rotation of either said bolt or nut, and means connecting the other ends of said clevis arms together.

1,575,408. METHOD OF AND APPARATUS FOR MAKING NEGATIVES FROM WHICH PRINTING PLATES MAY BE PRODUCED. LAURENT BASSANI, Neuilly-sur-Seine, France, assignor, by mesne assignments, to Bassani Processes, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 1, 1924. Serial No. 740,967. 14 Claims. (Cl. 95—5.)



1. The method of making negatives from which printing plates may be produced which consists in making successive exposures of a sensitised surface part at least thereof through a screen and moving said screen in its own plane during said exposures in a path defining a closed figure.

1,575,409. NAME PLATE FOR WIRE FENCES. ALFRED BLAESER, Newark, N. J., assignor to Anchor Post Iron Works, Garwood, N. J., a Corporation of New Jersey. Filed Nov. 11, 1925. Serial No. 68,268. 3 Claims. (Cl. 40—125.)

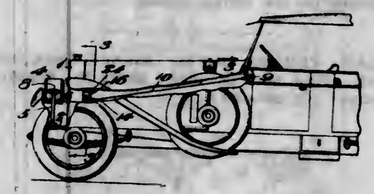


1. The herein described name plate for structures composed of interwoven flattened helical wires, said plate being of annular formation and its members being proportioned for placement flatwise in oppositely-inclined

diagonal rows of meshes of the structure at the respective sides of the latter, so that the said member will

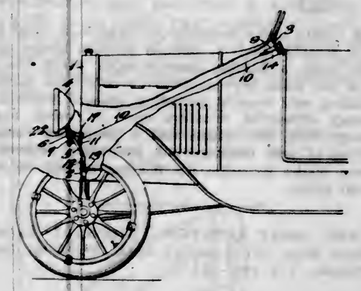
be edgewise and transversely supported by the interwoven wires and one surface of each member will be unobstructed at the adjacent side of the structure.

1,575,410. KNOB-SECURING MEANS. HARRY L. BRADLEY, Milwaukee, Wis., assignor to The Reliance Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Apr. 21, 1922. Serial No. 555,881. 2 Claims. (Cl. 287—53.)



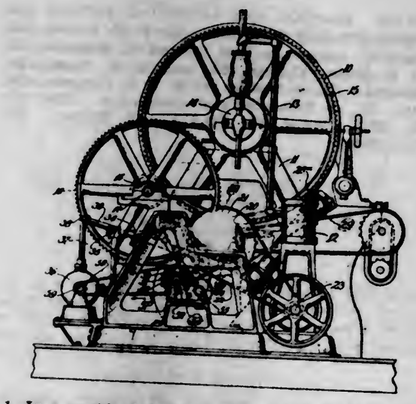
1. A device of the character described, comprising an operating member provided with a two diameter bore, a plate stamped from bendable metal, a round instruck apertured boss formed on the plate by striking the medial portion thereof inwardly and adapted to be disposed in that portion of the operating member bore having the larger diameter, said boss having a tapered bore therein, a shaft having a round tapered end insertable in the tapered bore of said boss, an instruck projection on the plate engaging in a recess in the operating member to prevent rotation of the plate with respect to the operating member, and a securing screw inserted through the smaller portion of the bore in the operating member and engaging in a threaded opening in the end of the shaft to draw the shaft end into the boss aperture and secure the plate and the operating member thereon against rotation solely by reason of the frictional engagement between the tapered shaft and the tapered bore.

1,575,411. CONNECTED FRICTION CAR STOP SHOE. EDWARD W. BREYLEY, Cleveland, Ohio, assignor to The Friction Car Stop Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 21, 1924. Serial No. 687,442. 2 Claims. (Cl. 104—260.)



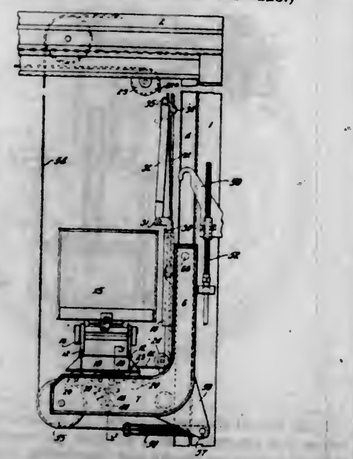
1. In a car stop, the combination of a pair of wheel receiving shoes slidably mounted on the rails, stops on said rails and adapted to limit movement of said shoes in both directions, said shoes being adapted to be moved in both directions by said car wheels until engaging said stops, and means connecting said two shoes, said means being adjustable to maintain the correct gauge between said shoes, said means also providing for slight independent shoe movement.

1,575,412. TILTING HEADLIGHT FOR AUTOMOBILES. PAUL R. COLLIER, Philadelphia, Pa. Filed Sept. 5, 1923. Serial No. 660,994. 1 Claim. (Cl. 240—61.)



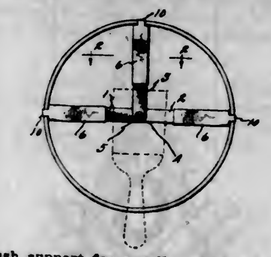
The combination of automobile side channels, a radiator supported with respect thereto, a pair of headlights, forked supports for said headlights carried by said side channels, a shaft for said headlights arranged in front of said radiator and having its ends directly connected thereto, so that the latter and said shaft function as a unit, bearings for said front headlight shaft, a pendant arm attached to said headlight shaft, a rear shaft rotatably mounted upon the rear of said radiator, a pendant arm connected to said rear shaft, a link common to said arms and passing through said radiator, a hand-pull connection controlled by the operator for rocking said rear and front shafts in unison to tilt said headlights and tension devices for resetting said rear shaft and its adjuncts, an apertured instrument board, and a face plate apertured in register with the instrument board aperture and fixed to said board, said connection having ratchet teeth thereon to be interlocked with the inner edge of the aperture of said face plate, whereby the headlights can be locked in the various extreme and intermediate positions they may assume.

1,575,413. TILTING HEADLIGHT FOR SMALL AUTOMOBILES. PAUL R. COLLIER, Wissahickon, Pa. Filed Sept. 5, 1923. Serial No. 660,995. 1 Claim. (Cl. 240—61.)



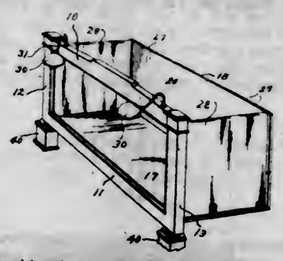
In a device of the character stated an instrument board having a hole therethrough, and a face plate bolted thereon, said plate having an aperture therein in register with the hole in said instrument board, a hand-pull lever positioned in said holes and having ratchet teeth therein, adapted to engage with the inner edge of the holes in said face plate, a vehicle frame, brackets mounted thereon, a head-light shaft rotatably mounted in the upper end of said brackets, headlights mounted on said shaft and movable in unison therewith, a crank arm fast on said headlight shaft, a connection from said crank arm to said hand-pull lever positioned in said instrument board, which rod is pivoted to said hand-pull lever, a lateral arm projecting from said shaft, an eye adjustably mounted in said vehicle frame, a spring intermediate said arm and eye, and an adjusting nut for said eye.

1,575,414. DESICCATING APPARATUS. NORMAN P. COLLIS, St. Paul, Minn., assignor to The Collis Company, Clinton, Iowa, a Corporation of Iowa. Filed Jan. 14, 1922. Serial No. 529,224. 8 Claims. (Cl. 159—11.)



1. In a combined desiccating apparatus of the character indicated, the combination of a rotatably mounted heating drum, means for constantly rotating the heating drum, a delivery pipe having a relatively coarse aperture in proximity to the drum, pump mechanism for delivering a non-homogeneous liquid containing suspended solid particles to said delivery pipe, a second delivery pipe having relatively fine delivery apertures in proximity to a different portion of the drum, a pump for supplying the second delivery pipe with a watery homogeneous liquid, means for constantly rotating the drum, separate transmission mechanisms for each of the pumps, and means associated with the drum rotating means for imparting operating movements to either of the pumps, substantially as described.

1,575,415. LOCKING DEVICE FOR CAR-DUMPER PLATFORMS. ROBERT W. CRIST, Bedford, Ohio, assignor to The McMyler-Interstate Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 27, 1923. Serial No. 682,902. 16 Claims. (Cl. 214—123.)



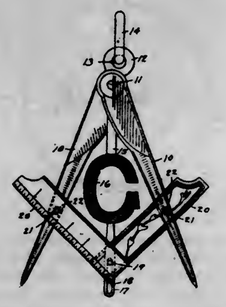
1. In a car dumper, the combination of a cradle, and a laterally movable platen on the cradle onto which a loaded car may be run, means for tilting the cradle and means operating automatically when the cradle is tilted for latching the platen against shifting laterally with relation to the cradle.

1,575,416. BRUSH-SUPPORTING DEVICE. JOHN DEMAN, Detroit, Mich. Filed Jan. 12, 1925. Serial No. 2,015. 4 Claims. (Cl. 248—48.)

1. A brush support for a pail comprising an arm having a tubular extension at one end, a pair of arms rotatable on the tubular extension, the tubular extension being flanged outwardly to secure the arms thereon and a slidable extension on each arm having spaced depending ends between which the edge of the pail is adapted to be engaged.

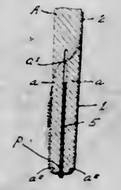
1,575,417. DISPLAY APPARATUS. THOMAS M. DEVINE, Cleveland Heights, Ohio, assignor to The Ohio Varnish Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 3, 1924. Serial No. 747,490. 10 Claims. (Cl. 40—125.)

10. In combination a display device frame, a support therefor, members carried by the frame and adapted to be moved with reference thereto for providing a stage, shiftable illuminating means carried by the frame for illuminating the stage, said members and means being arranged when in one position to occupy a space substantially the same as the depth of the support.



1,575,418. HASP SEAL. EMIL DIETER, Richmond Hill, N. Y., assignor to American Casting and Manufacturing Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Dec. 5, 1924. Serial No. 754,180. 1 Claim. (Cl. 292—315.)

In a device of the class described, sealing means for use with a hasp and loop, the same consisting of a seal passing through the loop against the plate, said seal being a ring of corrugated steel with a name section

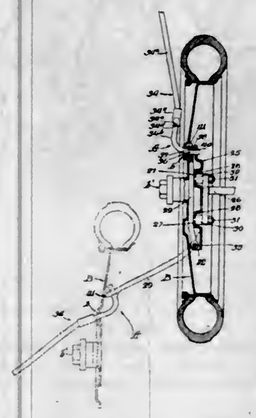


a frangible section, and a notched portion serving as a pivot, and with its free end adapted to be compressed mechanically to provide a sealing impression with identification symbols.

1,575,419. EMBLEM. JOHN M. DOYLE, Linnton, Oreg. Filed Apr. 28, 1925. Serial No. 26,379. 4 Claims. (Cl. 40—1.5.)

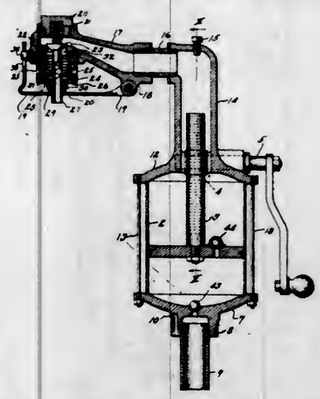
1. In a charm, the combination of a compass hinger at the union of its legs with a square hinged at the union of its arms and at the intersection of said arms with the legs of said compass.

1,575,420. CIGARETTE CASE. ISADORE EISENSTARK and BERNARD LIPSHITZ, Brooklyn, N. Y. Filed July 14, 1924. Serial No. 725,771. 1 Claim. (Cl. 69—21.)



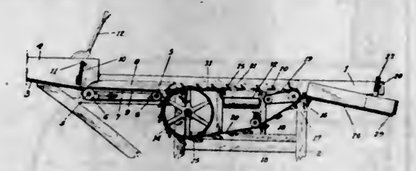
In the process of manufacturing leather compartmental cases, the process step of mechanically assembling a superimposed, flatwise contacting, marginally united, leather back side and leather front side with an intermediate partition of flexible material; in inserting between the partition and each of said sides, a tongued hot-mold having rigid molding tongues and an intermediate partition receiving slot the faces of which are parallel; in simultaneously stretching and shaping said sides and maintaining the partition straight, and lengthwise tautening said partition; and in causing said stretched and shaped sides to become set by the heat from the hot-mold.

1,575,421. EXPANSIBLE CORE FOR USE IN VULCANIZING TIRE CASINGS AND METHOD OF MANUFACTURING SAME. MAXIMILLIAN L. ENGLER, Akron, Ohio, assignor to The General Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Nov. 23, 1923. Serial No. 676,499. 7 Claims. (Cl. 18—56.)



1. The process of manufacturing expansible cores for use in vulcanizing tires under internal pressure comprising, forming a slab of vulcanizable material, forming a rib of vulcanizable material, folding the slab transversely and longitudinally to form a continuous core, folding the rib longitudinally to provide a projecting tongue on the inner circumference of the core, and curing the core thus formed.

1,575,422. RAISING AND LOWERING DEVICE FOR DEMOUNTABLE WHEELS. LEWIS E. FAGAN, Chicago, Ill., assignor to Emil Blumenthal, Evanston, Ill., L. E. Fagan, Chicago, Ill., and E. G. Trowbridge, Winnetka, Ill., as trustees for B. F. T. Company, Chicago, Ill., an Unincorporated Association. Filed Oct. 29, 1923. Serial No. 671,513. 17 Claims. (Cl. 224—29.)

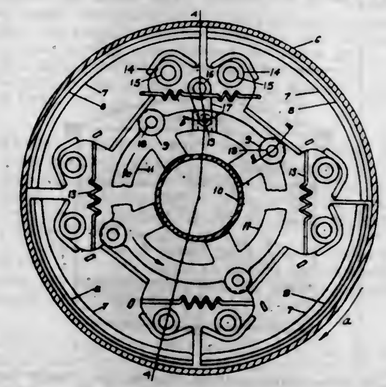


15. A wheel raising and lowering device for demountable wheels, comprising a carrier plate, and a wheel raising and lowering lever fulcrumed thereon, said lever having a detachable handle portion provided with a wheel sustaining element.

1,575,423. OIL-DISPENSING PUMP. PAUL W. FENTON, New York, N. Y. Filed Apr. 8, 1925. Serial No. 21,506. 5 Claims. (Cl. 221—80.)

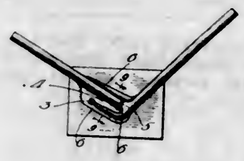
1. In an oil-dispensing device, a pump provided with means for conveying oil therefrom, a nozzle secured to said oil conveying means and comprising a member provided with an oil chamber and an outlet thereto, a valve adapted to open and close the outlet, an oil receiving chamber below said outlet and communicating therewith, means for opening the valve and contracting the oil receiving chamber while the valve is being opened, means for closing the valve, and means for expanding the oil receiving chamber after the valve is closed.

1,575,424. PEACH GRADER. WILLIAM H. FRAZINE and CHARLES W. MORRILL, Modesto, Calif. Filed Sept. 2, 1924. Serial No. 735,243. 3 Claims. (Cl. 209—84.)



1. In a fruit grader, a horizontal grading belt having spaced orifices cut therethrough, plates fixed on the upper face of the belt and having orifices normally alining with the belt orifices, and fruit retaining cups mounted on the plates.

1,575,425. TRIMMING KNIFE. RYOZO HAMADA, San Francisco, Calif. Filed Mar. 9, 1925. Serial No. 14,006. 3 Claims. (Cl. 146—205.)



1. A vegetable peeler comprising a handle having a body portion on one end thereof, the body portion having a hole therethrough, and a trimming knife thereon and co-operating with the hole whereby the cuttings thereof fall through the hole.

1,575,426. BRAKE MECHANISM. EARL L. HARRY, Pontiac, Mich. Filed May 7, 1924. Serial No. 711,638. 8 Claims. (Cl. 188—78.)

1. In a brake mechanism, a brake drum, a series of two or more rigid brake shoes arranged concentrically within the drum and adapted to have frictional engagement with said drum, each shoe having substantially at each end two guiding planes converging toward the brake drum rim, a stationary abutment providing a support for the necessary brake shoe anchors, said anchors being in contact with the guiding planes of the shoes, a cam plate which may be rotated through a small arc, the rotation of which in one direction will force the shoes into frictional engagement with the brake drum and thereby cause said shoes to move through a limited distance with the drum and wedge between the brake anchors and drum and thereby increase the brake effort to be derived therefrom, the rotation of said cam-plate in the opposite direction will allow the shoes to be moved out of frictional engagement with the brake drum.

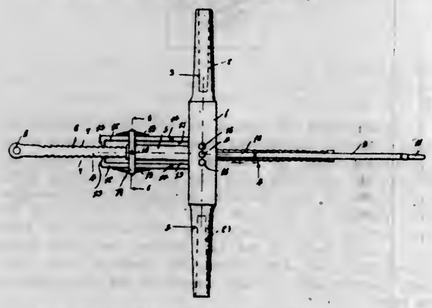
1,575,427. METHOD OF MAKING CRANK AXLES. RAYMOND HENRY, Rock Island, Ill., assignor, by mesne assignments, to Moline Implement Company, a Corporation of Illinois. Filed Feb. 9, 1922. Serial No. 535,120. 4 Claims. (Cl. 29—6.)

1. The method of making an agricultural implement crank axle with an integral crank between its ends which comprises forming an enlarged portion on a metal bar between its ends, flattening the enlarged portion, forming a crank in said flattened enlarged portion substantially parallel to the main body of the bar leaving the cross section of the crank axle substantially the same as the main body of the bar, cutting away the metal around the crank, and bending the crank so that it extends substantially at right angles to the main body of the bar.

1,575,428. REENFORCED FABRIC. SYLVESTER HENRY LAURY, Carlisle, Pa. Filed Nov. 6, 1924. Serial No. 748,254. 1 Claim. (Cl. 139—383.)

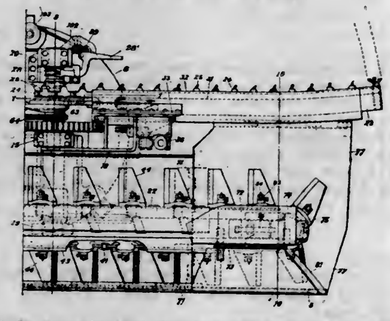
As an article of manufacture, an edge protector for blankets and the like, and comprising a ribbon strip of woven fabric consisting of a central longitudinal zone and lateral zones, said central zone having its warp threads arranged in close relation and equal distances apart to define a central reenforced portion adapted to flex around and protect the edge of the blanket, the lateral zones serving as sewing areas to attach the edge protector to the blanket.

1,575,429. CHAIN DOOR FASTENER. JAY F. LAWRENCE, Chicago, Ill. Filed Nov. 16, 1922, Serial No. 601,235. Renewed Jan. 20, 1926. 1 Claim. (Cl. 292—264.)



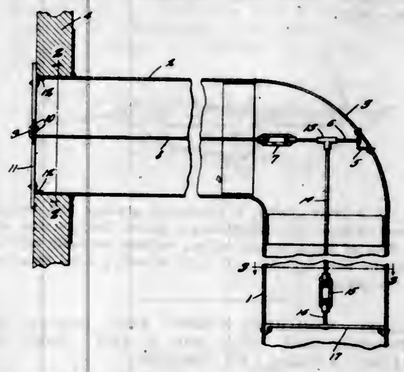
A chain door fastener, comprising a slotted plate adapted to be secured to a door jamb, a chain secured thereto at one end, a plate adapted to be secured to a door, means on the end of the chain adapted detachably

to engage said door plate, and a spool secured to an intermediate point of the chain and adapted to engage the slot in said door jamb plate to shorten the span of said



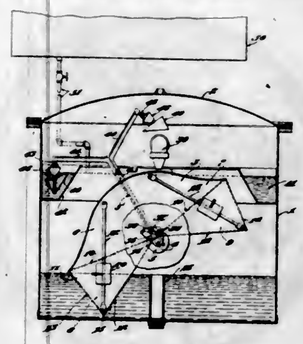
chain when desired, said door jamb plate slot adapted also to receive the other end of the chain when detached from the door plate.

1,575,430. SPOTTING JACK. JOHN LEAR and CHARLES A. BROST, Nashua, Mont. Filed July 7, 1925. Serial No. 42,044. 4 Claims. (Cl. 254—72.)



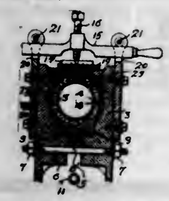
1. A spotting jack for locating dead locomotives in position to be opefated on, comprising a ratchet bar adapted to be attached to the locomotive, a lever yoke, an anchor bar pivotally secured to said lever yoke, a hollow guide pivotally secured to said lever yoke and receiving the ratchet bar, and pawls pivotally secured to the lever yoke and engaging the teeth of the ratchet bar.

1,575,431. COAL-MINING MACHINE. NILS D. LEVIN, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Sept. 11, 1918, Serial No. 253,632. Renewed July 31, 1925. 22 Claims. (Cl. 262—9.)



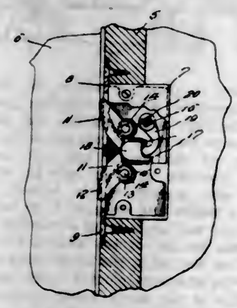
12. In a machine of the class described, the combination with cutting mechanism adapted to form a kerf in the mine wall, of a conveyor adapted to follow in the path of said cutting mechanism, a system of coal engaging devices movable with said conveyor into proximity with the coal above said kerf, and means to actuate said devices to cause them to engage the coal and dislodge it onto said conveyor.

1,575,432. INVISIBLE PIPE FASTENER. SIMEON B. LEWIS, Bloomfield, Mo. Filed Dec. 22, 1923. Serial No. 682,255. 2 Claims. (Cl. 285—12.)



2. Means for holding pipe sections together comprising a bracket having a hole therein, fastened to the inner wall of the elbow section, a bolt passing through the hole, a turn buckle engaging the bolt, a rod having a hook at one end and its other end threaded to engage the other end of the turn buckle, a flue engaging member having openings therein for receiving the hook, means on the said member for engaging the flue end of the last section for holding it in the flue, a T-nut carried by the bolt, a rod having a threaded end engaging the same, a turn buckle on the other end of said rod, a cross piece in the second section and a bolt carried thereby and engaging the turn buckle.

1,575,433. DENATURING MACHINE. FRANK E. LICHTENTHAELER, Newton Highlands, Mass. Filed Feb. 14, 1924. Serial No. 692,697. 5 Claims. (Cl. 221—96.)



4. A denaturing machine having, in combination, a tank, a double bucket tipping trough, each bucket being provided with a substantially closed air pocket dash pot contrivance having a small liquid admitting opening, a supply pipe for discharging alcohol into the trough, means for maintaining such a level of liquid in the tank that the air pocket contrivance strikes the liquid in the tank and deliberately brings the tipping trough to rest at the end of each tipping movement.

1,575,434. RETREADING AND VULCANIZING APPARATUS FOR TIRES. ALBERT MATTHEWS, VICTOR ST. CLAIR MALLEY, and HENRY WILLIAM RAWLEY, Brighton, England. Filed Nov. 14, 1924. Serial No. 749,905. 2 Claims. (Cl. 18—18.)

1. In a tire vulcanizer, a tire receiving mould having spaced side portions, means for applying pressure to a tire disposed within said mould comprising a member bridging the side portions of said mould and carrying a clamp screw for applying said pressure, and means slidably connecting said member with the side portions of said mould to permit correct positioning of said clamp screw with respect to a tire disposed within the mould.

1,575,435. WINDOW LOCK. MARK K. MAYNARD, Colton, Wash. Filed Jan. 21, 1924. Serial No. 687,538. 1 Claim. (Cl. 292—45.)

A window lock comprising a casing, guide plates located therein, a head mounted for sliding movement between the guide plates, jaws pivotally mounted in the casing and having end portions passing through the side of the same and having inner end portions engaging the head, springs coiled around the pivots of the jaws and engaging the guide plates and the jaws and a shaft journaled in the casing and having a finger engaging the head.

1,575,436. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,494. 4 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and a volatile selenium compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,437. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,495. 4 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and a volatile tellurium compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,438. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,496. 4 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and a volatile arsenic compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,439. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,497. 2 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and volatile antimony compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,440. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,498. 4 Claims. (Cl. 44—9.)

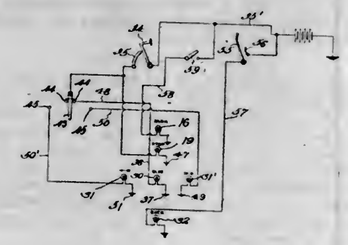
1. A composition of matter comprising a low compression fuel; and a volatile phosphorous compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,441. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,499. 4 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and a volatile cadmium compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,442. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,500. 2 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and a volatile bismuth compound incorporated therein and adapted to increase the critical compression pressure of the fuel.



1,575,443. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,501. 8 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and a volatile titanium compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,444. METHOD AND MEANS FOR USING LOW-COMPRESSION FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 18, 1923. Serial No. 663,502. 4 Claims. (Cl. 44—9.)

1. A composition of matter comprising a low compression fuel; and a volatile tin compound incorporated therein and adapted to increase the critical compression pressure of the fuel.

1,575,445. AUTOMATIC SIGNAL. JAMES M. MILLER, Washington, D. C., assignor to Miller Automatic Signal Light Company, Washington, D. C., a Corporation of Delaware. Filed Feb. 13, 1922. Serial No. 536,265. 5 Claims. (Cl. 177—339.)

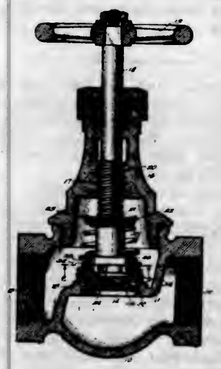
1. A signal for motor vehicles comprising a controlling element operated from the brake mechanism of the vehicle, electrically operated right and left directions signals included in normally open circuits, a switch arranged in said circuits, means operated from said controlling element for closing said switch, and a switch mechanism actuated from the steering mechanism of the vehicle for completing the circuit through the first mentioned switch to selectively operate the direction signals for the purpose specified.

1,575,446. DIRECTION-INDICATOR SWITCH. JAMES M. MILLER, Washington, D. C., assignor to Miller Automatic Signal Light Company, Washington, D. C., a Corporation of Delaware. Filed Aug. 23, 1922. Serial No. 583,875. 2 Claims. (Cl. 200—59.)

1. A switch attachment for use in direction signalling for motor vehicles comprising the combination with the steering column of the steering mechanism of the vehicle, a steering rod wheel, and a toothed wheel carried by said steering wheel and operating when the steering wheel is shifted to take up lost motion prior to steering, of a switching mechanism supported from said column in proximity to said steering wheel and including a pivoted circuit opening and closing member having an inset upper end permanently engaging with said toothed wheel whereby said member is shifted to circuit closing position when the steering wheel is actuated to take up lost motion.

1,575,447. VENTILATING APPARATUS. CHARLES A. MOORE, St. Paul, Minn. Filed Mar. 18, 1924. Serial No. 700,061. 4 Claims. (Cl. 98—27.)

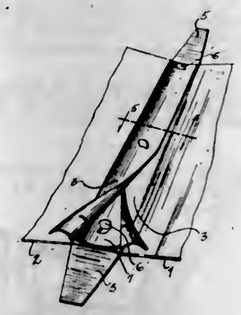
4. The combination with a room and a fan therein having radial blades, each uniformly pitched from end to end thereof, of an air ingress conduit opening adjacent to one side of said fan and embracing a portion only of the area thereof, and an air egress conduit opening adjacent to the other side of said fan and em-



bracing a portion of the area thereof offset from that portion of the area of the opposite side of the fan embraced by the opening of said ingress conduit.

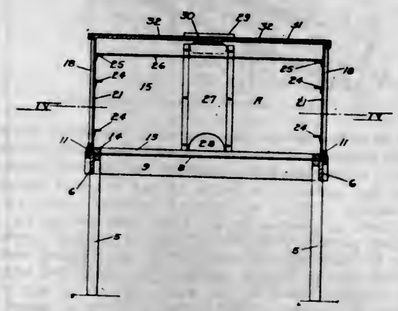
1,575,448. PIPE AND NUT WRENCH. DOWLING CLEMENTS MORRIS and JOHN WILLIAM PALMER, Chattanooga, Tenn. Filed May 31, 1923. Serial No. 642,585. 1 Claim. (Cl 81—77.)

In a wrench, a shank, a rider, the shank and the rider being provided with cooperating jaws, a keeper secured to the rider and receiving the shank slidably, thereby to mount the rider on the shank for reciprocation longitudinally of the shank, one side portion of the keeper being provided with an opening located entirely within said side portion of the keeper, and a latch hinged to the keeper and adapted to fit in the opening, the free end of the latch being outwardly distorted beyond said side portion of the keeper, to facilitate the manipulation of the latch, the latch being provided upon each side of its distorted portion, with projections, and the inner edge of the shank being provided with seats wherewith the projections cooperate to hold the rider in adjusted positions longitudinally of the shank.



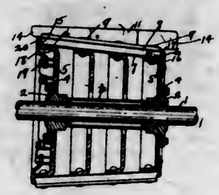
1,575,449. VALVE. SCON L. MOZIAN, New York, N. Y. Filed July 12, 1923. Serial No. 651,145. 1 Claim. (Cl. 251—38.)

In a valve, a casing having a seat, a valve stem axially movable with respect to the seat upon rotation within the casing, a valve plug carried by the stem, and means of connection between the plug and stem to permit of



a limited relative axial movement therebetween when the plug is in engagement with the seat, said means of connection comprising an interiorly threaded axially recessed portion in the plug at the opposite side from its face, a sleeve threadedly engaged in said recess and having longitudinal diametrically disposed slots, the end of the stem extending into said sleeve and provided with radially projecting shoulders engaging in said slots, a spring seat on the stem and a coiled expansion spring having its opposite ends respectively engaging the spring seat and valve plug for normally projecting the plug from the end of the stem, said spring seat being axially adjustable on the valve stem for regulating the tension of the spring.

1,575,450. RING-BOOK COVER. GEORGE WASHINGTON NEWMAN, Chicago, Ill., assignor to Wilson-Jones Loose Leaf Company, a Corporation of Massachusetts. Filed Apr. 14, 1924. Serial No. 706,397. 6 Claims. (Cl. 129—24.)

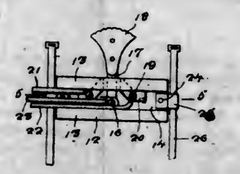


6. In a ring book, a pair of flexible cover members having their adjacent margins arranged in overlapping relation, and a back piece having its margins respectively secured to said cover members beyond said overlapping margins and having end flaps for the purpose set forth.

1,575,451. KNOCKDOWN COOKING STOVE. JOSEPH J. SCHEIB, Pittsburgh, Pa. Filed Oct. 2, 1924. Serial No. 741,148. 5 Claims. (Cl. 126—39.)

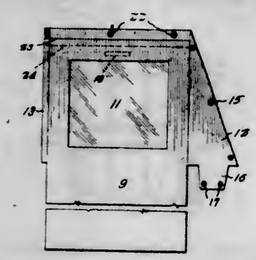
1. A knock-down stove including end walls and side walls, interlocking sliding joints along the vertical edges of the side and end walls, a bottom plate having means thereon for holding the side and end walls in position thereon, an upper plate removably supported by the walls below the top thereof in spaced relation to the bottom one, said space forming an oven, one of said walls having a door thereon, and a removable top plate having burner openings therein supported above the side and end walls.

1,575,452. PULVERIZER BEATER. WILLIAM H. SHAVE, Erie, Pa., assignor, by mesne assignments, to Erie City Iron Works, a Corporation of Pennsylvania. Filed June 23, 1922. Serial No. 570,445. 8 Claims. (Cl. 83—11.)



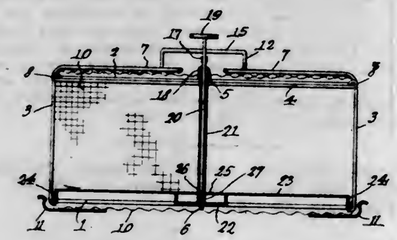
1. In a pulverizer beater, the combination of a rotary carrier having a conical periphery; blade supporting bars having parallel walls and undercut portions secured to the carrier and forming tapered blade securing grooves; and blades having bases extending under the undercut portions of the bars, the blades being tapered.

1,575,453. SEWING-MACHINE ATTACHMENT. ARTHUR SHUTZER, Boston, Mass. Filed Feb. 7, 1924. Serial No. 691,130. 9 Claims. (Cl. 112—153.)



1. In combination with a sewing machine, an attachment for guiding three relatively wide heavy portions of a coat to a sewing machine needle, comprising a relatively long bridge bar provided with supports at its ends for holding the bar spaced sufficiently from the base of the sewing machine to permit the passage of one relatively wide sheet of material under the bar to the needle while a second relatively wide sheet of material lying over the first is supported by the bridge bar in spaced relation to the first sheet, guides for the adjacent edges of said sheets, and a guide for guiding the opposite marginal edge of a wide sheet of sheepskin between said sheets so that the three sheets are sewed together with the marginal edge of the sheepskin extending between the marginal edges of the other two sheets.

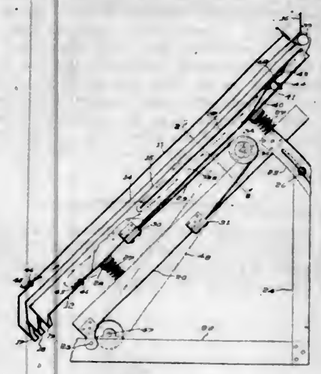
1,575,454. SWITCH. JULIAN K. SMITH, Cleveland, Ohio. Filed Aug. 5, 1924. Serial No. 730,269. 2 Claims. (Cl. 200—59.)



1. The combination with an automobile steering wheel, of an electric switch comprising a base block formed of insulating material and provided with spaced parallel ribs defining a central channel, one of said ribs having a longitudinally disposed slot therein, a switch arm extending through the slot and having its inner end pivotally secured within the channel, spaced contacts secured within the channel upon opposite sides and in the path of the arm and means for securing the switch to the steering wheel whereby the latter will bridge the space between the ribs and provide a cover for the channel.

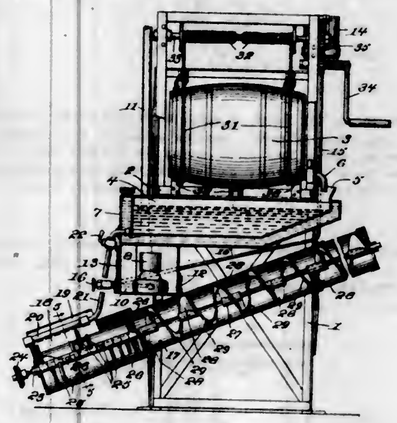
1,575,455. AUTOMOBILE CURTAIN. RAYMOND D. SNYDER, Souderton, Pa. Filed Jan. 31, 1925. Serial No. 6,132. 2 Claims. (Cl. 296—139.)

1. In combination with an automobile body having a top and provided with doors of hollow form, and wherein the doors have horizontal spring rollers journaled in the lower portions thereof and are provided with open tops covered by hinged lids, flexible side curtains associated with said rollers and movable through the tops of the doors, said curtains having flaps upon the forward edges of the upper portions thereof foldable upon the body portion of the curtain when the latter are to be lowered into the doors, and further flaps in the forms of open ended curtain rod receiving hems upon the rear edges of the upper portions of the curtains, and means to detachably connect the upper ends of the curtains to the automobile top the adjacent vertical edges of the curtains being unconnected, said curtains being slit horizontally near their upper edges from their rear vertical edges to points spaced from but adjacent their front vertical edges.



1,575,456. FOWL AND ANIMAL TRAP. ABRAM GREEN SPARKS, Booneville, Miss. Filed Oct. 21, 1925. Serial No. 63,925. 3 Claims. (Cl. 43—61.)

1. A trap comprising a casing, a plunger mounted for vertical movement in the casing, intermediate the ends thereof, a tread plate cooperating with the plunger, a head on the plunger, a trigger fulcrumed intermediate its ends on the top of the trap and extended beneath the head, spring-closed doors hinged to the trap and adapted to be opened upon the top of the trap, and a latch hinged to the casing and overhanging the door when the door is opened, the latch being engaged by the trigger.

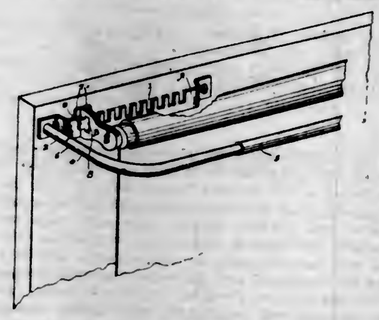


1,575,457. SCREEN. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Mar. 6, 1925. Serial No. 13,442. 6 Claims. (Cl. 209—34.)

1. In a screen, in combination, a closed casing supported at an inclination in the direction of its length, a partition in the casing below the screening surface and extending from the upper end of the casing lengthwise thereof a substantial distance to provide an air chamber below the partition, and means for exhausting air from the upper end of said chamber to draw the dust laden air within the casing upward through said chamber in

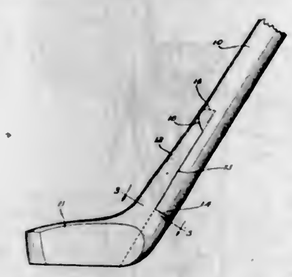
opposition to the force of gravity to cause the heavier particles carried upwardly by the air to settle in the chamber and slide downwardly therein.

1,575,458. MIXER. WILLIAM J. STONESIFER, Keymar, Md. Filed Mar. 12, 1923. Serial No. 624,538. 2 Claims. (Cl. 99—2.)



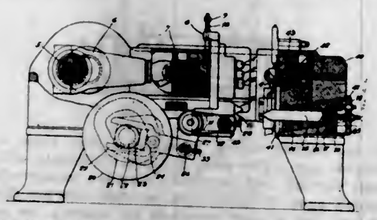
2. A device of the class described comprising an elevated structure, a platform thereon for holding a container, a tank below the platform for receiving material from the container, a jacket around the tank adapted to contain a liquid, an inclined conveyor casing below the tank, an opening in the lower part thereof for receiving chopped material, a pipe for leading material from the tank into the lower part of the conveyor casing, a shaft passing through the conveyor casing and beaters and conveyor parts on the shaft for mixing and conveying the materials, said conveyor being composed of solid parts and open parts.

1,575,459. SUPPORT FOR WINDOW AND DOOR CURTAINS. CHARLES A. STORTS, Marion, Ind. Filed Oct. 12, 1922, Serial No. 594,063. Renewed Oct. 24, 1925. 2 Claims. (Cl. 156—24.)



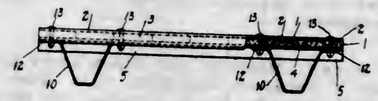
2. A support including a notched plate, and a bracket made of a single piece of metal doubled together in the

center and having the ends thereof bent outwardly to form flanges, said bracket having slots cut in the sides thereof and having tongues bent outwardly from said



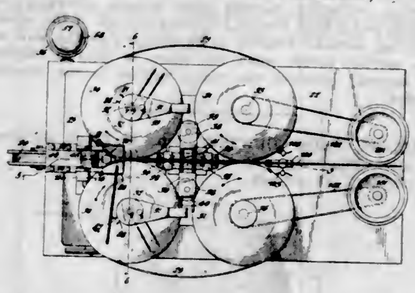
slots, the flanges and tongues being spaced apart and having a notch therebetween in the lower edge of the bracket for receiving the notched supporting plate.

1,575,460. GOLF CLUB. CHAIS SUNTER, Yonkers, N. Y. Filed June 20, 1925. Serial No. 38,544. 2 Claims. (Cl. 273—80.)



1. A golf club, which comprises a head and a shaft and a stem on said head having a tapered upper end, the shaft having an under-cut recess in which the tapered upper end of the head is adapted to lie to prevent lateral relative movement therebetween, the shaft having a dovetail tongue on its lower end adapted to lie in a correspondingly shaped groove in the head to lock the head and the shaft together.

1,575,461. CENTERING AND LOCKING MEANS FOR THE PUNCHES IN RIVET AND FORGING MACHINES. SVENING HILMER SVENSSON and KARL OSKAR ENOKVIST, Bofors, Sweden, assignors to Aktiebolaget Bofors, Bofors, Sweden. Filed May 8, 1923. Serial No. 637,604. 3 Claims. (Cl. 10—12.)

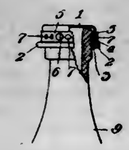


1. In punching machines the combination of a slide, a number of punches mounted on the slide a gate carrying the slide for reciprocating the same in the punching direction, a die for the blank to be punched, a shifting mechanism for giving the slide such an intermittent motion so that the punches in their proper turns are brought in alignment with the die, means for accurately adjusting and locking the slide in each separate punching position, said means consisting of two lock members, one of these members consisting of a bolt, a housing which does not take part in the adjusting movement of the slide, said bolt being adjustably fitted in said housing so as to be pressed inwardly in this latter when the slide is moved towards the die, the other lock member being mounted on the slide and means, whereby the lock members are brought out of engagement with each other automatically, only on account of the movement of the gate with the slide rearwardly to a certain degree.

1,575,462. PLATFORM. WILLIAM STUEBING, Cincinnati, Ohio. Filed Oct. 18, 1920. Serial No. 417,734. 10 Claims. (Cl. 248—41.)

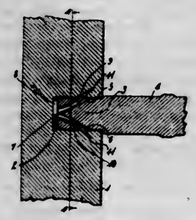
5. A portable skid, for use with a lifting truck, comprising a rigid floor and spaced legs, said floor comprising a number of transversely extending boards and longitudinally extending angle bars at both sides of the skid running along the under sides of the boards, each angle bar having a horizontal flange engaging the boards and secured thereto and a vertical flange arranged to stiffen the horizontal flange, the legs being secured to the angle bars, the vertical flanges of the angle bars lying between the legs and serving as guides for the lifting truck to protect the legs when the lifting truck is introduced beneath the skid.

1,575,463. MACHINE FOR MAKING INDEX TABS. RALPH F. TABER, North Tonawanda, N. Y., assignor to Rand Company, Inc., North Tonawanda, N. Y., a Corporation of New York. Filed Aug. 9, 1923. Serial No. 656,500. 29 Claims. (Cl. 93—1.)



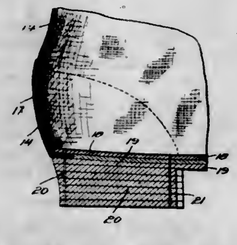
9. A machine for making index-tabs of the character described, comprising a supporting frame, means for guiding a tab-forming strip through the machine, means for folding said strip lengthwise upon itself, and means for subjecting the fold of said strip to heat.

1,575,464. AIR-TIGHT CAP FOR VESSELS. IZO TAMURA, Osaka, Japan. Filed Jan. 6, 1925. Serial No. 888. 1 Claim. (Cl. 215—40.)



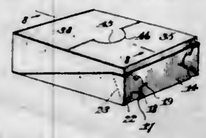
The combination with a receptacle having a mouth provided on its outer surface with an annular groove, of a cap fitting over said mouth and including a disk provided with a depending skirt, said skirt having its lower edge bent to form an annular pocket, a resilient ring having its outer edge arranged in said pocket and

adapted to lie between the outer surface of the receptacle mouth and the inner surface of the skirt of the cap and to enter said groove, said skirt being provided with a circumferential series of apertures, and a sealing band arranged around the skirt of the cap and having pro-



jections extending through the apertures of the cap and engaging the resilient ring for forcing the latter into said groove, said band being provided with a tongue adapted to be grasped by the operator for unsealing the receptacle.

1,575,465. MORTISE AND TENON JOINT LOCK. JOHN V. THOMPSON, High Point, N. C. Filed May 2, 1925. Serial No. 27,436. 3 Claims. (Cl. 20—92.)

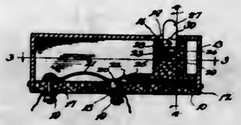


1. Means for locking the members of a mortise and tenon joint in assembled relation, comprising a tenon having a plurality of recesses diverging outwardly from the end thereof a single metallic member having a leg portion extending through each of said diverging recesses, and a head portion overlying the end of the tenon, said leg portions adapted to be driven into the wall of the mortise socket when the tenon is inserted therein to securely interlock the tenon member in the mortise socket.

1,575,466. SHOE COUNTER. JOHN L. TYLER, Gadsden, Ala. Filed Apr. 22, 1925. Serial No. 24,952. 2 Claims. (Cl. 36—68.)

1. In a shoe counter, a cover member adapted to be disposed at the rear of a shoe above a heel, and an internal member of substantially the configuration of the cover member adapted to nest within said cover member independent of said cover member to clamp a portion of a shoe upper therebetween and for securing said members in assembled relation in a shoe.

1,575,467. DISPLAY CONTAINER. ALBERT MILLER VAN WAGENEN, Jr., Norwich, Conn. Filed Oct. 20, 1924. Serial No. 744,724. 4 Claims. (Cl. 206—44.)



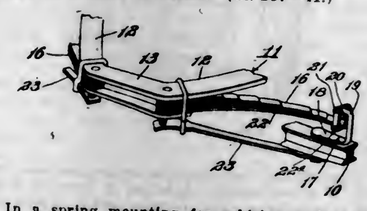
4. In combination with a container, means for supporting the container in display position, said means comprising a base member formed integral with the container, side walls formed integral with said base member, an end wall formed integral with said base member, separable interlocking means for maintaining the end wall and the side walls in right-angular relation to receive the container, and means for changing the position of the end wall with respect to the side walls, whereby the end wall will be disposed at a point beneath the container to support the same in display position.

1,575,468. EMBROIDERY. JACOB D. VOSS, Chicago, Ill., assignor of forty one-hundredths to Serge Wry, Chicago, Ill. Filed Aug. 7, 1925. Serial No. 48,696. 3 Claims. (Cl. 41—31.)

1. The art of making beaded embroidery on fabrics comprising applying a ribbon of adhesive material to outline the design, covering the ribbon outline with powdered coloring material, allowing the ribbon outline to dry, filling in the space within the outline with a plastic adhesive foundation material, applying a colored surface coating to the foundation, and applying a layer of glass beads to the adhesive foundation.

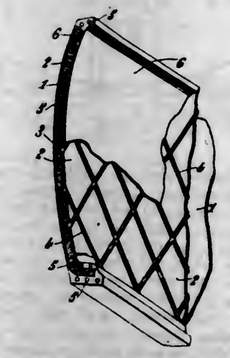
1,575,469. ELECTRIC SWITCH. EDWIN WATERBURY, Caldwell, N. J. Filed Jan. 27, 1923. Serial No. 615,250. 2 Claims. (Cl. 200—165.)

2. An electric switch including a base block, spaced terminals carried thereby, a contact normally closing a circuit through said terminals, a switch member slidably mounted upon the block and movable between the contact and one of said terminals for opening the switch, a cover carried by the block to house said member, said member being provided with a recess, an operating knob slidable in said recess and projecting through the cover, and a spring bearing between a wall of the recess and



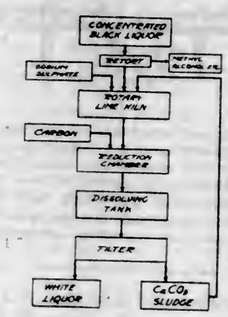
said knob yieldably pressing the knob against the cover for locking the switch member at the end of its throw in opposite directions.

1,575,470. TUNNEL KILN. HERMAN W. WEBER, Maplewood, and ARMIN O. SCHLEIFFARTH, St. Louis, Mo., assignors to Russell Engineering Company, St. Louis, Mo., a Corporation of Missouri. Filed Nov. 27, 1925. Serial No. 71,688. 11 Claims. (Cl. 25—142.)



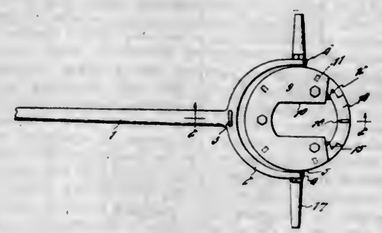
1. A tunnel kiln provided with a preheating zone, a flue arranged transversely across the top wall of said zone and provided with an inlet through which hot air and products of combustion can pass from said zone into said flue, a fan at one end of said flue for inducing a circulation longitudinally of same, and a vertical flue at the side wall of the preheating zone connected with the discharge of said fan and provided with a port through which the hot air and products of combustion are returned to the lower portion of the preheating zone.

1,575,471. SPRING DEVICE FOR VEHICLES. WALTER H. WEINRICH, Pueblo, Colo. Filed Apr. 9, 1925. Serial No. 21,895. 3 Claims. (Cl. 267—41.)



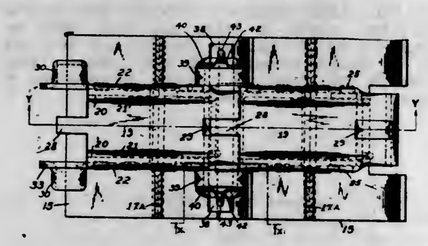
1. In a spring mounting for vehicles, a frame, rearwardly diverging springs having their butt ends secured to the frame, an axle arranged beneath the rear ends of the springs, the rear ends of the main leaves of each spring being disposed at an angle to the body of the spring and extending longitudinally of the axle and a perch carried by the axle adjacent each spring and connected with the angular end of the main leaf of the associated spring.

1,575,472. MOLDED PRODUCT AND PROCESS FOR ITS MANUFACTURE. ROBERT AUGUSTE LOUIS WEITZEL, Paris, France. Filed Sept. 26, 1924. Serial No. 740,149. 11 Claims. (Cl. 18—48.)



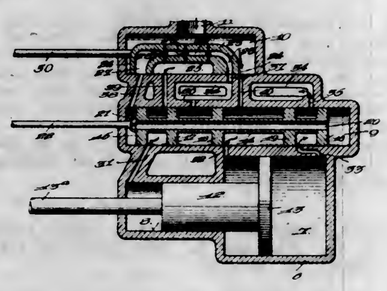
1. A molded product of the class specified, comprising an outer fibrous layer, a layer of cork material, and a layer of fibrous material similar to the first layer, all of these components being agglomerated by a binding medium applied to the outer layer of fibrous material and securing the remaining layers to the outer layer when hardened.

1,575,473. REGENERATION PROCESS FOR BLACK LIQUOR. ALFRED H. WHITE, Ann Arbor, Mich., assignor to John E. Alexander, Port Edwards, Wis., and E. G. Goodell, Stevens Point, Wis., trustees. Filed Dec. 26, 1924, Serial No. 758,147. Renewed Nov. 6, 1925. 3 Claims. (Cl. 23—48.)



3. The process of regenerating black liquor from the sulphate pulp process which includes subjecting the concentrated black liquor to destructive distillation, calcining the resultant solid residue together with calcium carbonate to form a mixture of calcium oxide, sodium carbonate and sodium sulphate causing this calcined residue to react with carbonaceous material at a temperature above 300° C. but below 900° C. in the absence of air until the sulphate is reduced and leaching to recover the soluble sodium salts.

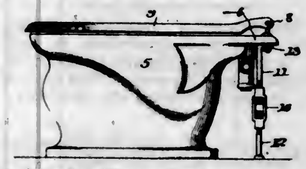
1,575,474. WRENCH. FREDERICK A. WHITE, Pleasantville, Pa. Filed Aug. 25, 1924. Serial No. 734,099. 1 Claim. (Cl. 81—119.)



In a wrench, the combination of a yoke frame, a ring head swiveled thereon having an opening in one side thereof and having its ends provided with wedge notches, a flanged ring member on the lower face of the head and in contact with the inner periphery thereof, said ring member having an opening through one side thereof, a jaw plate having an opening therethrough removably secured to the ring member, roller bearings between the jaw plate, the ring member and the head, a segmental bridge plate having wedge-shaped ends received in the wedge-shaped notches of the head, and a handle on the bridge plate.

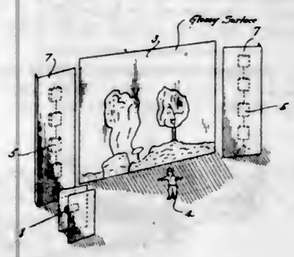
1,575,475. SHEET-METAL TRACK-BELT UNIT. ROLLIN H. WHITE, Cleveland Heights, Ohio, assignor to The Cleveland Tractor Company, Euclid, Ohio., a Corporation of Ohio. Filed May 5, 1922. Serial No. 558,721. 9 Claims. (Cl. 305—10.)

5. A track belt unit comprising a shoe plate, and a rail member formed from a sheet metal blank bent to provide a rail plate having side flanges, rail sides depending from said rail plate flanges and secured to said shoe plate, a forwardly extending loop, and struts bent up from the sides of said loop to extend between and engage said rail plate sides and said depending rail sides to support said rail plate.



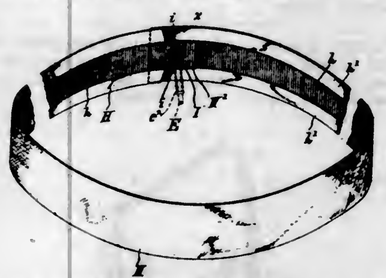
1,575,476. ENGINE. CHARLES LEE COOK, Louisville, Ky. Filed June 10, 1921. Serial No. 476,506. 3 Claims. (Cl. 121—105.)

1. In an expansible fluid operated engine, the combination with a cylinder member having a pair of piston chambers of different diameters and valve chamber, of a piston member comprising a disk of large diameter in the larger piston chamber and a drum of smaller diameter connected to the disk and operating in the smaller piston chamber, a distributing valve in one of the valve chambers for directing motive fluid alternately against opposing faces of the piston, a converting valve in the other chamber, and ports connecting the different chambers and controlled by the converting and distributing valves for either directing live motive fluid simultaneously to correspondingly disposed faces of the drum and disk and to the opposite face of the disk alternately, or to the face of the drum and exhausting it therefrom to the opposite face of the disk.



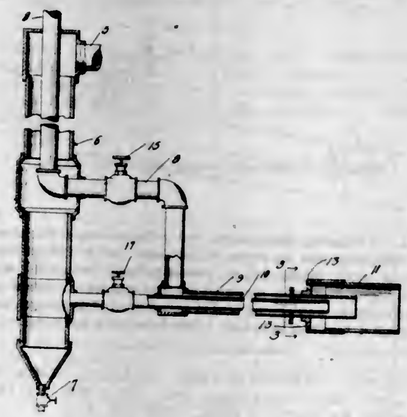
1,575,477. TOILET STOOL. FRANK B. DIXON, West Bend, Iowa. Filed Aug. 31, 1925. Serial No. 53,619. 1 Claim. (Cl. 4—252.)

In combination with a seat having a rearwardly extended lip formed with spaced openings, said openings having enlarged upper and lower portions, hinge shanks extending through the openings, cushioning members positioned within the enlarged portions of the openings and having openings to receive the hinge shanks, a securing device including leg members, each of the leg members comprising an upper and lower section, turn buckles for adjustably connecting the upper and lower sections, said upper sections having right angled end



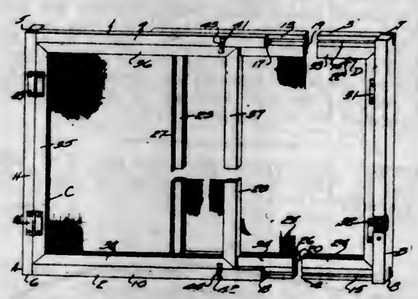
portions formed with openings to receive the hinge shanks, and means for securing the lower ends of the leg members to the floor.

1,575,478. METHOD OF PRODUCING COMPOSITE MOTION PICTURES. FERDINAND EARLE, Los Angeles, Calif. Filed June 3, 1925. Serial No. 34,553. 5 Claims. (Cl. 88—16.)



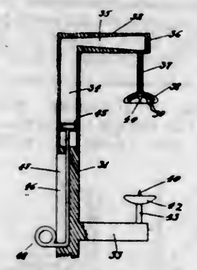
1. A process of photographing motion pictures which consists in posing objects or actors in front of a background comprising a glossy surface having objects delineated thereon, illuminating said surface by light at an extremely shallow angle, and photographing the composite scene.

1,575,479. TIRE FLAP. JULES HAUVETTE-MICHELIN, New Brunswick, N. J. Filed May 12, 1925. Serial No. 29,769. 6 Claims. (Cl. 152—20.)



5. In a pneumatic tire, the combination with an inner tube and a valve stem therefor having flattened sides, and a curved bridge carried by said valve stem, of a flap, composed of a strip of flexible material thickened in its centre and tapering in thickness towards the sides, the said sides being cut away at one end to leave a central tongue, and said tongue and the opposite end of the strip being provided with metal eyelets, adapted to slip over said valve stem, one of said eyelets having an elongated opening therein, the side walls of said opening being parallel to each other to engage the flat side walls of said valve stem, and said bridge being adapted to project between said eyelets and the inner tube, substantially as and for the purposes described.

1,575,480. OIL BURNER. OSCAR H. HERMAN, Council Bluffs, Iowa. Filed Oct. 11, 1922. Serial No. 593,751. 1 Claim. (Cl. 158—75.)

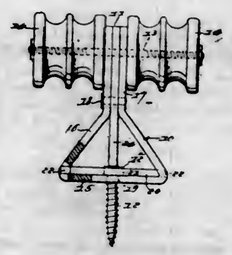


A burner of the class described comprising a vertically disposed casing of relatively large girth, a steam pipe depending into said casing and extending outwardly through the side of the casing intermediate the ends of the latter, the lower portion of the steam pipe outwardly of the casing being offset, a fuel supply pipe extending laterally from the casing below that portion of the steam pipe located within the casing, said fuel supply pipe entering said steam pipe at a point spaced from the casing, a control valve for the steam pipe located outwardly of the casing and steam pipe, and a control valve for the fuel pipe on said offset portion.

1,575,481. ADJUSTABLE WINDOW SCREEN. ALFRED C. HERTZ, New York, N. Y. Filed Oct. 7, 1924. Serial No. 742,206. 2 Claims. (Cl. 156—38.)

1. An adjustable screen comprising a pair of vertical end bars, each carrying a pair of vertically spaced extensors, each extensor being transversely imperforate, the overlapping extensors at the top terminating flush in the same plane, and likewise the two overlapping extensors at the bottom terminating flush in the same plane; means for slidably joining the top extensors in overlapping relation and the bottom extensors in overlapping relation, one hinged section of screening having a frame corresponding substantially with the planes of one pair of extensors and being hinged to their upright bar and a second hinged screen section having a frame corresponding substantially with the planes of the other pair of extensors, and being hinged to the corresponding upright bar.

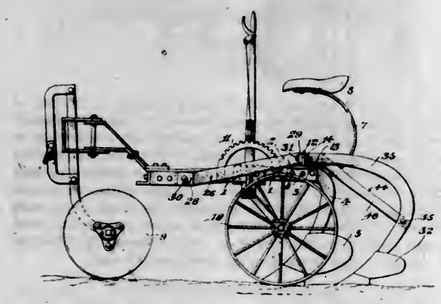
1,575,482. COOLING DEVICE. FRANK HILLS, Long Island City, N. Y. Filed Feb. 25, 1925. Serial No. 11,402. 3 Claims. (Cl. 62—131.)



1. In an air cooling and filtering system, a blower, a cooling coil connected to said blower, a filtering funnel connected to said coil, an air saturater comprising a sponge adapted to be moistened, a pedestal supporting said sponge, said pedestal having a hollow portion therein adapted to be filled with liquid, an upper and a lower arm extending sidewise from the pedestal, the upper arm being hollow, a platform on the lower arm supporting said sponge, and movable means in said pedestal for forcing the water thru the upper arm into said sponge.

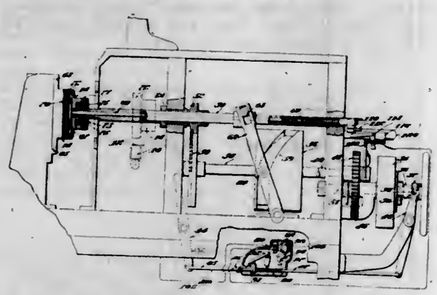
1,575,483. JOINT BREAKER. FRANK J. HINDERLITER, Tulsa, Okla. Filed Oct. 5, 1923. Serial No. 666,708. 8 Claims. (Cl. 255—35.)

1. In a joint breaker, an arcuate rack, an adjustable abutment thereon, a support upon said rack, a screw threaded bearing carried by said support and arranged at an angle thereto, a screw threaded jack shaft supported in said bearing and adapted for engaging substantially at right angles a wrench pivotally anchored at the center of the arc defined by said rack, when the applied force is substantially at a maximum.



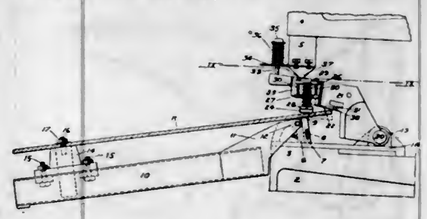
1,575,484. INSULATOR BRACKET. HARRY E. HOENIG, East Liverpool, Ohio. Filed Dec. 5, 1922. Serial No. 605,022. 4 Claims. (Cl. 173—321.)

1. An insulator bracket having a base and stem consisting of a folded blank of strap metal, the base being perforated for the shank of a lag screw, and a wrench plate secured to the base and having a seat for the head of said screw.



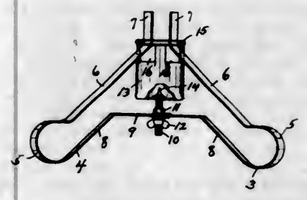
8. An insulator bracket having a base and stem consisting of a folded blank of strap metal and carrying an insulator pin, a lag screw extending through an opening in the base, a wrench plate carried by the base and having a seat for engaging the lag screw head to prevent rotation of the latter, and a retainer for maintaining the lag screw head in seated relation with the wrench plate.

1,575,485. LISTER ATTACHMENT. WILLIAM J. HOLMAN, Hugoton, and GEORGE L. HAYWARD, Rolla, Kans. Filed Aug. 14, 1925. Serial No. 50,280. 2 Claims. (Cl. 97—112.)



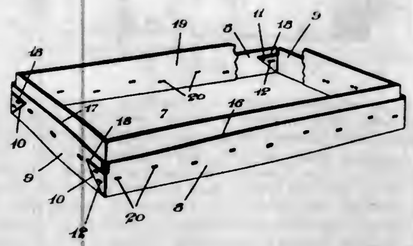
1. A lister attachment for the purpose set forth comprising a combined extension and coupling element adapted to be positioned against and project rearwardly from the back of the frame of the lister with which the attachment is associated, said element of a length to project from each side of such frame, means for detachably connecting said element to said frame, a plurality of spaced beams connected at their forward ends to and projecting rearwardly and downwardly from said element, a plow carried by the rear end of each of said beams and arranged in paced relation rearwardly and laterally with respect to the plows of the lister, and rearwardly and downwardly extending brace elements interposed between and connected at their rear ends to said beams and further having their forward ends connected to said combined extension and coupling element.

1,575,486. BOX-MAKING MACHINE. STANLEY R. HOWARD, East Milton, Mass., assignor to Pneumatic Scale Corporation Limited, Quincy, Mass., a Corporation of Massachusetts. Filed Aug. 20, 1925. Serial No. 51,397. 7 Claims. (Cl. 93—40.)



1. In a box making machine, in combination, box banding mechanism including a rotatable and reciprocatory box holding device, a die into which a box is delivered or is introduced by said device upon reciprocation thereof, and means operative when an abnormal accumulation of boxes takes place within the die for preventing reciprocation of said box holding device.

1,575,487. FLANGING MACHINE. JOHN HUBER, Chicago, Ill. Filed Sept. 6, 1923. Serial No. 661,243. 17 Claims. (Cl. 153—16.)



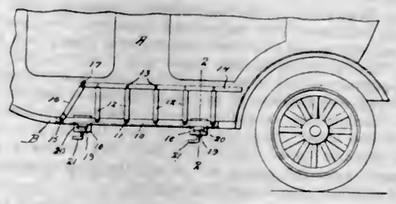
1. In flanging mechanism, the combination with a supporting base and an upper reciprocable power driven head, of an anvil block, and a pressing head connected with the upper head and mounted on the support between the anvil block and reciprocable head, said pressing head having a bending face and a blank holding portion.

1,575,488. CHRISTMAS-TREE HOLDER. JOHN JAKOBEY, East Youngstown, Ohio. Filed Feb. 10, 1925. Serial No. 8,127. 1 Claim. (Cl. 248—38.)

In a device of the class described, a support having four feet, four inclined members continuing therefrom and provided with four upturned tree holding arms, two horizontal members connecting the feet, an adjustable bolt passing through said horizontal members, a water cup secured to the upper end of said adjustable bolt, a sharp pointed element centrally located within said water cup, a plurality of openings in said cup for the reception of the inclined members, a circular ring or flange positioned at the top of said water cup and of said inclined members, means for adjusting the device and to allow for collapsing the same when not in use, substantially as described for the purpose set forth.

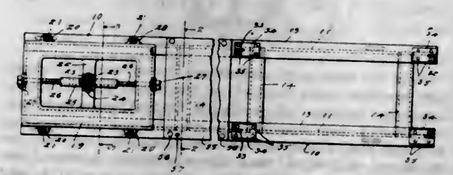
1,575,489. BOX. SAMUEL KOFF, New York, N. Y. Filed Nov. 19, 1921. Serial No. 516,425. 1 Claim. (Cl. 229—43.)

A box comprising tray-like bottom and top sections, a lining within the rim of the bottom section, and extending above said rim so that the top section fits thereon, and means securing said rim and lining together, said rim having upwardly-extending flaps extending the length



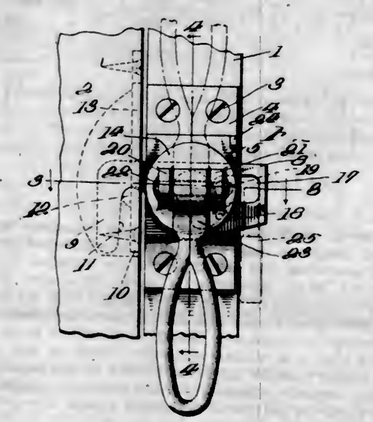
of the walls thereof to the corners of the box and disposed at the outer surfaces of said lining, and the rim of the top section passing between said lining and flaps when said top section is fitted over said lining.

1,575,490. FOOT SUPPORTING AND CORRECTING DEVICE. FREDERICK W. KREBS, Chicago, Ill., assignor of one-half to Rene C. Hanson, Chicago, Ill. Filed Feb. 4, 1924. Serial No. 690,373. 7 Claims. (Cl. 36—71.)



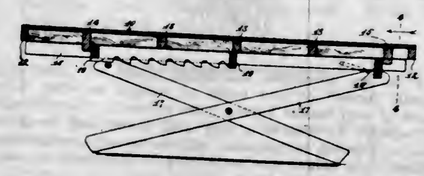
1. In a device of the class described, the combination of similar upper and lower walls of flexible material secured together intermediate their ends, there being a pocket between said walls at the front end thereof, and a friction passageway behind said pocket, an anchor strip engaging in said passageway, and a pad of yieldable material pivoted to said strip to be adjustable laterally in said pocket, said strip being adjustable longitudinally in said passageway, whereby to effect longitudinal adjustment of said pad.

1,575,491. ADJUSTABLE AND FOLDABLE LUGGAGE CARRIER. AUGUST H. KRUEGER, Luray, Kans. Filed Sept. 4, 1924. Serial No. 735,960. 1 Claim. (Cl. 224—29.)



In combination with the running board of an automobile, a luggage carrier comprising, in combination, a plurality of U-shaped clamps straddling the free marginal portion of the running board at points spaced lengthwise thereof, each of the clamps being provided with a slot adjacent to the side member underlying the running board, the second side member of the clamp having direct contact with the running board from above, a set screw threaded through the under side member of each of the clamps, a guard rail structure, arms projecting laterally from the lower portion of said structure and disposed through the slot in the clamp, the set screws carried by the clamps being directly engageable with said arms to clamp said arms between the set screws and the running board and to hold the arms against lengthwise movement.

1,575,492. ADJUSTABLE BASE FOR POWER-PLANT UNITS. GERRARD C. LA MARSNA, Taft, Calif. Filed Apr. 5, 1923. Serial No. 630,117. 2 Claims. (Cl. 248—15.)

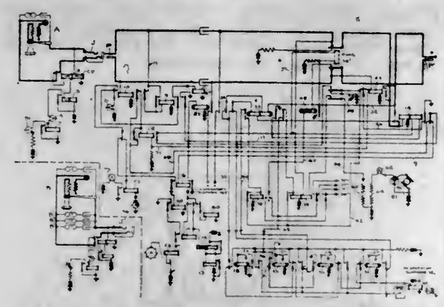


1. A support of the class described comprising an open frame, a bar carried by said frame and extending across the opening thereof, said bar at its terminals overlapping the under surface of said frame, and means on the frame to adjust the bar longitudinally of the frame to move an associated article.

1,575,493. DOOR LATCH. PHILIP LANG, Cedar Falls, Iowa, assignor to Wagner Manufacturing Company, Cedar Falls, Iowa. Filed Sept. 24, 1925. Serial No. 58,368. 8 Claims. (Cl. 292—104.)

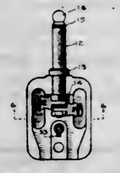
1. A latch of the character described comprising an attaching member, a stub shaft carried thereby, a latch pivoted on said stub shaft, and a member pivotally mounted on the stub shaft, and having a lost motion connection with the latch, and a handle pivotally mounted on the member whereby the handle is at all times maintained in a downward vertical direction.

1,575,494. IRONING BOARD. FRANK ALBERT LAVENDIER, Pawtucket, R. I. Filed May 22, 1925. Serial No. 32,196. 2 Claims. (Cl. 68—10.)



1. As an article of manufacture, an ironing board composed of a skeleton frame, and a cover of stiff sheet material secured thereto, said frame comprising longitudinal side bars and cross bars, the cross bars supporting said cover and including two bars adjacent the ends of the frame and of a depth to extend below the general plane of the under side of the frame.

1,575,495. MANUAL TELEPHONE SYSTEM. JOHN H. LEWIS, Jr., Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Aug. 30, 1920. Serial No. 406,944. 20 Claims. (Cl. 179—35.)

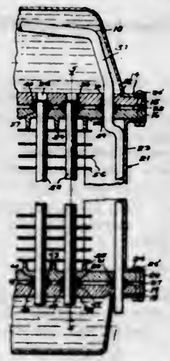


1. In a telephone system, a plurality of telephone lines and a plurality of circuits for connection therewith, a recording device common to a plurality of connection circuits, a controlling circuit having a portion thereof common to a plurality of said circuits, branches of said

controlling circuit, one of which is individual to each connection circuit, a marginal relay in each branch circuit, and means for preventing the operation of more than one relay at the same time.

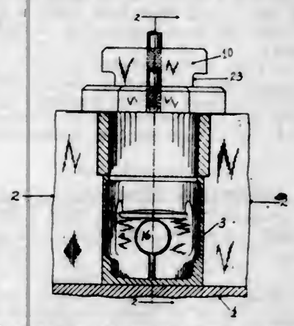
3. In a telephone system, a calling telephone line, a called telephone line, a plurality of connective circuits with answering and calling connective switches, a relay operated when connection is made by means of the answering switch of a connective circuit with the calling telephone line, a recording device and a key common to a plurality of connective circuits and adapted to be associated with a particular connective circuit by said relay, and means operated after the closure of the calling connective switch to disassociate said key and recording device from the particular connective circuit.

1,575,496. RADIOPLUG. RAY H. MANSON, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Mar. 20, 1922. Serial No. 544,998. 8 Claims. (Cl. 173—361.)



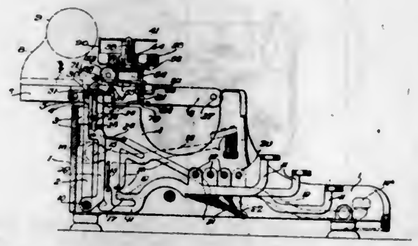
3. In an electrical connection plug, an insulating handle formed of two parts of molded material, both parts of said handle having holes extending therethrough in registry to receive a stay-cord, conducting members secured together in insulated relation extending from said handle, and means for connecting a conductor to each of said members.

4. In an electrical connection plug, a hollow handle composed of parts of insulating material, a hollow metallic body portion having shoulders to engage said handle, a rod extending through said body portion, a connection terminal engaging one of said shoulders to prevent rotation of said connection terminal with respect to said body portion, a second connection terminal in electrical engagement with said rod, and means for insulating said rod from said body portion.



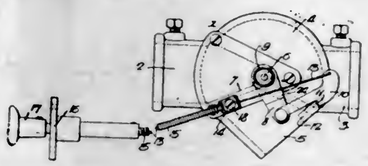
1,575,497. AUTOMOBILE RADIATOR. GUSTAVE E. MESCHKE, Medora, N. Dak., assignor of one-third to J. B. Chaussee and one-third to H. A. Mackoff, both of Dickinson, N. Dak. Filed Oct. 6, 1924. Serial No. 742,015. 1 Claim. (Cl. 257—129.)

In an automobile radiator, an upper tank, a bottom-plate for the same having openings and recesses leading into the openings, a lower compression-plate disposed near and beneath the bottom-plate and having openings and recesses leading into such openings, elastic washers having their upper and lower ends leading into said recesses, heat radiating and reinforcing ribs formed upon the lower compression-plate, a lower tank, a top-plate for the lower tank having openings and recesses leading into the same, an upper compression-plate having openings and recesses leading into the same, elastic washers having their upper and lower ends held within the last named recesses, heat radiating and reinforcing fins formed upon the upper compression-plate, tubes extending through the washers and provided at their upper ends



with outwardly projecting flanges engaging over the upper washers, side supporting members arranged between the upper and lower compression plates and having outwardly extending upper and lower flanges and outwardly bulging longitudinal recesses, bolts clamping the adjacent elements to the upper and lower flanges, and an overflow pipe extending through the bottom-plate and adjacent lower compression-plate and the top-plate and its adjacent upper compression-plate and having a part thereof arranged within the outwardly bulging recess of the adjacent side supporting member.

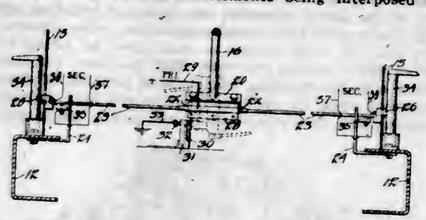
1,575,498. MULTIPART CORE. ALLEN B. NORTON, Cleveland, Ohio, assignor to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Feb. 29, 1924. Serial No. 695,901. 8 Claims. (Cl. 22—168.)



1. A five part core comprising two oppositely disposed side sections, each formed on its inner surface with a centrally located longitudinally extending raised portion and a boss recess in each side section extending into the said raised portion and being only slightly less in width and depth than the width and depth of the said raised portion, a center section between the said side sections extending on either side of the said raised portions, and two outer sections aligned with the said center section between the said side sections.

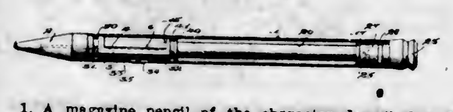
1,575,499. TYPEWRITING MACHINE. OTTO PETERMANN, Groton, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Oct. 21, 1922. Serial No. 596,062. 20 Claims. (Cl. 197—151.)

1. In a typewriting machine, the combination with an inking ribbon having abutments near its ends and a pair of spools with which the ends thereof are connected, of a pair of driven members connected with the spools to rotate and move axially therewith, a pair of stationary posts supporting said spools and driven members for rotary and axial movements, a pair of driving members for rotating the driven members, means for simultaneously shifting the driven members axially in opposite directions to connect one driven member with its driving member and disconnect the other driven member from its driving member, a pair of normally inactive trip devices mounted on the driven member shifting means and movable alternately by the abutments on the ribbon to active position, and universal key-operated means for engaging a shifted trip device to operate said driven member shifting means to reverse the direction of feed of the ribbon.



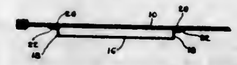
1,575,500. VALVE LATCH. NICHOLAS A. PETRY, Philadelphia, Pa. Filed June 23, 1923. Serial No. 647,365. 16 Claims. (Cl. 137—139.)

1. The combination of a valve casing, a pivoted valve member in the casing, an arm connected to the valve member for swinging it on its pivot, a hook pivoted to the arm, an abutment on the casing adapted to be engaged by the hook, and means for swinging the hook into and out of locking engagement with the said abutment.



1,575,501. AUTOMOBILE LOCK. PETER C. PINKERTON, Indianapolis, Ind. Filed Nov. 11, 1924. Serial No. 749,225. 7 Claims. (Cl. 180—82.)

1. In an automobile a switch interposed in the primary ignition circuit, a switch interposed in the secondary ignition circuit, a rod supporting said primary ignition switch and adapted to be rotated to operate said switch, a key operated bolt connected to said rod, a key for operating said bolt, sliding rods carried by said primary ignition switch and adapted to be reciprocated upon the operation of said switch, hood clamps having hooks adapted to engage the side of the hood to secure the same in closed position said hooks being adapted to cooperate with the sliding bolts to lock the hood in closed position, contact elements carried by said sliding bolts said contact elements being interposed in

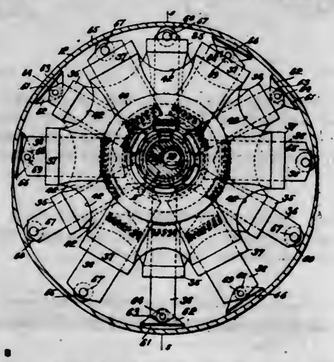


the secondary ignition circuit, and cooperating contact elements adapted to be engaged by said contact elements on the sliding bolts for making and breaking the secondary ignition circuit, substantially as set forth.

1,575,502. MAGAZINE PENCIL. JOHN ERIK PLATON, Jonkoping, Sweden. Filed Mar. 15, 1924. Serial No. 699,515. 4 Claims. (Cl. 120—9.)

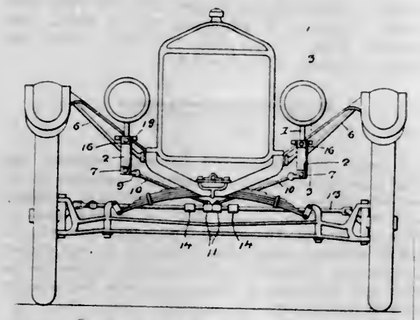
1. A magazine pencil of the character described and comprising in combination a magazine member, a lead holding and guiding tip member, said tip member having a neck at its butt end and adapted to be held in the forward end of the magazine section, a lead ejecting needle for advancing the lead from the magazine to the tip, and means for locking the tip member in the magazine member, said means comprising an internal teat or projection at the forward end of the magazine member, the neck of the tip having a peripheral groove adapted to be normally engaged by said teat, and a lock means for locking said tip member against turning in relation to the magazine members when in proper position therein.

1,575,503. FROST-PREVENTION DEVICE FOR WINDOWS. HERBERT H. POHL and ROY D. NEILL, Minneapolis, Minn. Filed Feb. 18, 1925. Serial No. 9,945. 2 Claims. (Cl. 20—40.5.)



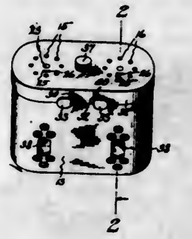
1. A frost prevention device for glass windows comprising a sheet of flexible transparent material of different composition from that of said window, attaching flanges on the edges of said sheet for resting upon the surface of the window inside the edges thereof, and means of different composition from that of said window and sheet for removably securing said flanges to the window for producing a dead air space between the latter and said sheet.

1,575,504. ROTARY MOTOR. OTIS F. PRESBREY, Brooklyn, N. Y. Filed June 10, 1920, Serial No. 387,950. Renewed Aug. 5, 1925. 7 Claims. (Cl. 121—60.)



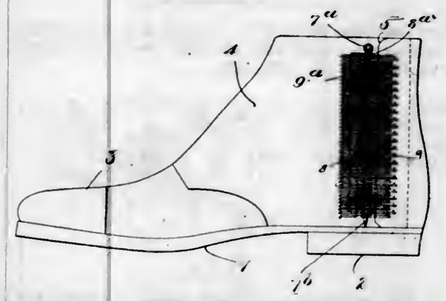
5. A rotary motor of the type described comprising a rotary casing having opposite sides and an encompassing ring or band presenting a uniform circular surface and from which power is to be transmitted, bearing members on which the opposite sides of said casing are mounted, a plurality of side-by-side rotary cylinder-assemblies each having a series of radially disposed cylinders and independent pistons slidable within said

cylinders adapted at their outer ends to engage said circular surface of said band and rotate said casing, the cylinders of one assembly being high pressure cylinders and of the other assembly low pressure cylinders and said casing and said cylinder-assemblies being eccentrically disposed with relation to each other, an intake for motive fluid leading to said high pressure cylinders which may be traveling along those portions of their movement when the arc prescribed by said high pressure cylinders and that prescribed by said casing are in near



relation and gradually diverging, an exhaust extending from said high pressure cylinders as said cylinders successively travel beyond the active zone for their respective pistons and leading to said low pressure cylinders which may be traveling along those portions of their movement when the arc prescribed by said low pressure cylinders and that prescribed by said casing are near together and gradually diverging, and an exhaust from said low pressure cylinders as said cylinders travel beyond the active zone for their pistons.

1,575,505. MOVABLE HEADLIGHT. JOHN W. REYNOLDS, St. Louis, Mo. Filed May 27, 1925. Serial No. 33,238. 1 Claim. (Cl. 280—62.)

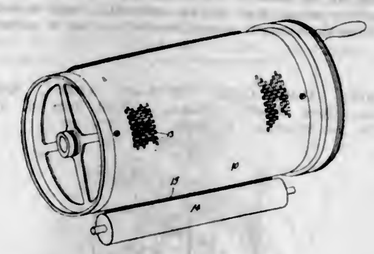


In combination with a motor vehicle and its headlamps, a tubular member through which each standard of each lamp passes, an arm on each tubular member adapted to be bolted to a fender brace of the vehicle, a pair of ears on each arm, a pair of springs connected with each standard and engaging the ears for preventing rotary movement of the standard, an arm connected with the lower end of each standard, a link swiveled to each arm, a pair of sleeves slidably mounted on the connecting rod of the steering mechanism of the vehicle and to which the links are connected and collars fastened to the rod and causing the sleeves to move with the rod when the rod has been moved in the turning movement of the vehicle.

1,575,506. CONDIMENT HOLDER. JOEL H. ROGERS, Newark, N. J., assignor of one-half to Albert Berg, Newark, N. J. Filed July 14, 1925. Serial No. 43,574. 3 Claims. (Cl. 65—45.)

1. A condiment holder comprising a housing, a plurality of condiment receptacles, each having an open upper end, means for normally retaining the receptacles within the housing, a cover for said housing having sets of sifter openings therein disposed respectively in alinement with the open ends of the condiment receptacles and shiftable inverted cup-shaped closure plates mounted on the under side of the cover and having complementary sifter openings therein, said closure plate embracing the upper open ends of the receptacles, and means connected therewith and extending through the cover for independently shifting the same to closed and open relation to the set of sifter openings in the cover.

1,575,507. MOLDER'S SHOE. ALBERT L. ROHRBACHER, Jr., Boston, Mass. Filed Jan. 10, 1923. Serial No. 611,858. 2 Claims. (Cl. 36—50.)

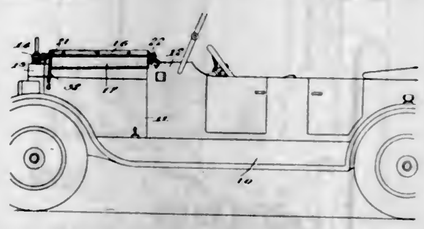


1. A molder's shoe embracing in its construction a shoe bottom, a vamp, and a top joined to said vamp and upper and vented from its upper edge to the bottom and forming flaps lapping one inside of the other, a series of intermatching metallic loops whose ends are clenched through the flap portions of the vent and whose intermediate portions are formed into eyes arranged to register with one another when the vent is closed, and a flexible pin adapted to be inserted and instantly removable from said registering eyes, substantially as described.

1,575,508. STENCILING MACHINE. CHARLES G. ROSENHAUER, Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 3, 1925. Serial No. 72,888. 6 Claims. (Cl. 101—116.)

1. A foraminous sheet of the described copper-silicon-manganese alloy, rolled up and forming an unbulged

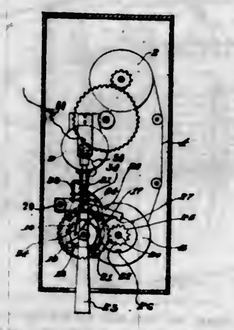
cylinder upon which is placed an ink mat and a stencil-sheet, the perforations in said sheet being of substan-



tially elongated form, avoiding the described peening tendency of said alloy, said perforations extending circumferentially of the cylinder.

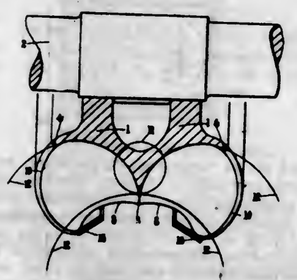
1,575,509. REENFORCED TUBE LINING. JOHN SCHWAB, Jr., Winnipeg, Manitoba, Canada. Filed Aug. 17, 1925. Serial No. 50,700. 4 Claims. (Cl. 152—13.)

1. A pneumatic tube having a lining therein formed from a plastic sealing composition having a fibrous reenforcing material mixed therein and an open meshed reenforcing strip incorporated in the composition.



1,575,510. PROTECTOR FOR AUTOMOBILES. MANUEL J. SCHWANCK, Honolulu, Territory of Hawaii. Filed June 6, 1925. Serial No. 35,869. 5 Claims. (Cl. 180—69.01.)

1. An attachment for covering and protecting the hood hinges of automobiles, including brackets for connection with an automobile adjacent to the opposite ends of its hood hinge and having upstanding bearing portions, a holder including a pair of angle bars, one of which is provided with endwise projecting trunnions, journalled in the upstanding bearing portions of the said brackets, and a section of flexible material clamped between said angle bars and projecting freely upon the opposite sides thereof above the hood at opposite sides of its hinge.

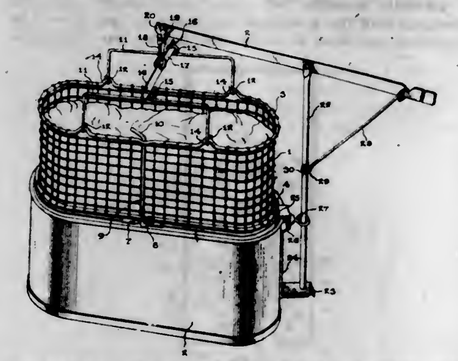


1,575,511. STREET INDICATOR OR ANNUNCIATOR. JAMES L. SCROGGINS, Alhambra, Calif. Filed Dec. 11, 1920. Serial No. 429,976. 2 Claims. (Cl. 40—55.)

1. A street annunciator comprising a pair of web carrying rollers, a ratchet operatively connected to one of said rollers, a pair of oppositely disposed pawls for engagement with said ratchet, a manually operated lever for shifting said pawls to move one or the other of them into engagement with said ratchet, a slidable bar for operating the pawls to in turn rotate said ratchet, a transversely extending lip carried by said slidable bar, a pivotally mounted bell crank lever having one end engaging said lip, a solenoid connected to said lever for operating the lever to move said slidable bar longitudi-

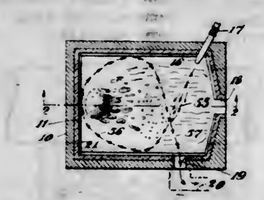
nally, means associated with the roller to which said ratchet is connected for limiting the rotating movement of the roller, and energy storing means associated with the web carrying roller other than the one to which said ratchet is connected.

1,575,512. HYDRAULIC IMPULSE TURBINE. PAUL WERNER SEEWER, London, England, assignor to The English Electric Company Limited, London, England, a British Company. Filed Nov. 15, 1922. Serial No. 601,122. 5 Claims. (Cl. 253—114.)



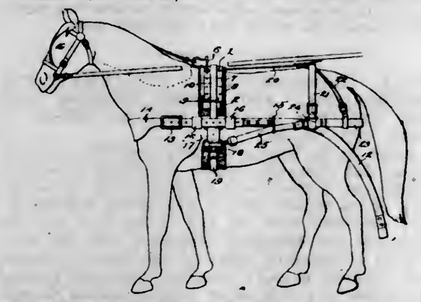
1. A runner for a free jet hydraulic impulse turbine comprising a body formed as a solid of revolution having an outer edge and a side curving radially inward and away from the plane of the said edge so as to show in radial section a concave face, buckets fitting on this face and extending laterally therefrom, the said buckets remaining within the radius of the said edge for a distance equal to the width of the zone of entry of the water to the runner and extending outside that radius at parts where the water flows out from them.

1,575,513. CLOTHES-DRAINING ATTACHMENT FOR WASHBOILERS. ALVIN SETHER, Chippewa Falls, Wis. Filed Dec. 13, 1924. Serial No. 755,711. 1 Claim. (Cl. 68—30.)



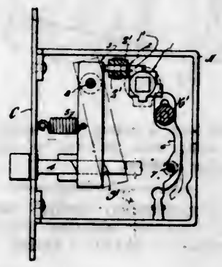
A device for the purpose set forth comprising a clothes receiving and discharging basket with opposite loops, a standard with a lifting lever fulcrumed at the upper extremity of the standard with a transversely disposed bar loosely suspended from one end of the lever with its ends loosely and detachably connecting with the opposite loops, a supporting means for the standard consisting of a bracket having a U-portion detachably engaged with the side of a wash boiler, a device passing through the U-portion and bearing upon the wash boiler side to hold the support in position, and a latching means to secure the lifting lever to the standard when the

basket is in elevated position, said device having an eye for the revolnble reception of the standard, whereby



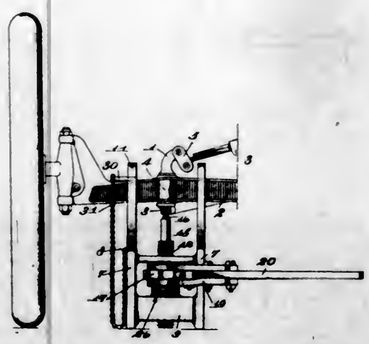
the standard may be rotated to swing the basket over a rinsing receptacle into which the clothes may discharge.

1,575,514. APPARATUS FOR MAKING GLASS AND PROCESS THEREFOR. ROBERT R. SHIVELY, Washington, Pa., assignor to B. F. Drakenfeld & Co. Inc., New York, N. Y., a Corporation of New York. Filed Apr. 12, 1924. Serial No. 706,010. 7 Claims. (Cl. 49—54.)



1. In the art of making glass, placing a mass of the raw materials within a furnace chamber, said mass covering a minor portion of the chamber floor surface adjacent one end thereof, directing a heating medium into enveloping contact with said mass to subject the surface thereof to the uniformly distributed heat effect of said medium whereby the mass is fused with a progressive and uniform reduction in the bulk thereof, and directing the melt away from said mass as the latter is fused to an outlet at the opposite end of the furnace chamber.

1,575,515. HARNESS. JEFFERSON O. ADAMS, Rayne, La. Filed May 25, 1925. Serial No. 32,674. 1 Claim. (Cl. 54—1.)

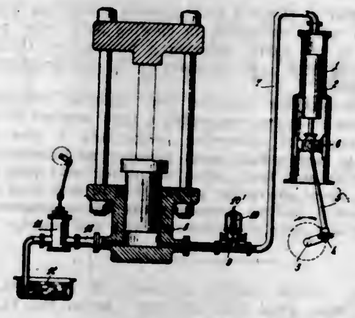


In a harness, the combination of a saddle, a strap having its ends depending from the saddle, traces having connections secured to the depending ends of said strap, short straps secured to said connection and carrying rings, a belly strap sedured to said rings, a breast strap secured to the forward ends of said traces, a breeching strap, and means connecting said breeching strap with the rings to which the belly strap is attached.

1,575,516. DOORLOCK. WILLIAM AHERN, Sydney Mines, Novn Scotia, Canada. Filed July 6, 1922. Serial No. 573,225. 1 Claim. (Cl. 70—29.)

A lock of the character described comprising a casing, a latching catch therefor, a horizontally sliding collar in the casing adapted to receive a knob spindle, a projection rising from the horizontally sliding collar, a lever mounted in juxtaposition to the sliding collar and being adapted to be rocked by the projection, an elongated lever pivoted adjacent one end and lying in the path of the lever first mentioned for movement thereby, said elongated lever passing through a slot formed in the latching catch, and a coil spring tending to hold said elongated lever in normal position.

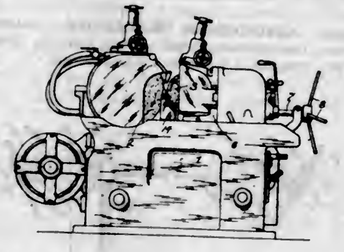
1,575,517. SPRING-PERCH REMOVER. ASA IVY ALBRIGHT and FRANCIS LAMAR MYATT, Monroe, La. Filed Aug. 27, 1924. Serial No. 734,503. 1 Claim. (Cl. 29—85.)



A spring perch remover comprising a frame consisting of parallel side members terminating in hooked ends which have adjacent recesses for the reception of an axle, a web and a web plate connecting the side members but being in spaced relation to each other, a screw shaft passing through a bore in said web and said plate, said screw shaft terminating in a reduced portion constituting a pilot which is surmounted by a tip, a ratchet situated between the web and web plate having a threaded hub in which the shank is screwed, a lever having a dog by which the ratchet is operated, and bearing means interposed between said ratchet hub and said web plate.

1,575,518. PROCESS OF WATERMARKING PAPER AND ADJUNCT THEREFOR. ALBERT ALLEN, Bangor, Me., assignor to Eastern Manufacturing Company, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 20, 1925. Serial No. 70,284. 10 Claims. (Cl. 92—48.)

1. The combination with a watermarking device having marking elements, of a smooth membrane covering the marking elements on said device.

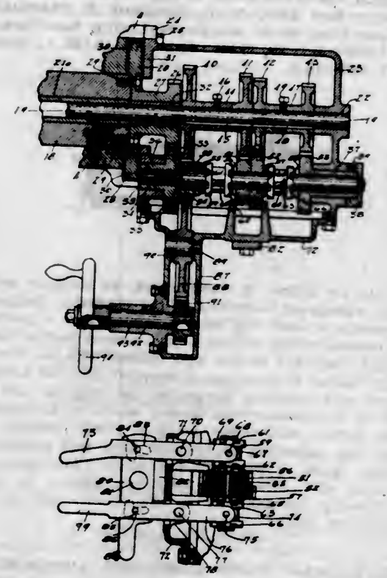


1,575,519. TESTING MACHINE. ALFRED AMSLER, Schaffhausen, Switzerland. Filed June 17, 1924. Serial No. 720,661. 5 Claims. (Cl. 138—17.)

1. A device for testing machines operated by pressure liquid for carrying out fatigue tests with changing loads, comprising at least one cylinder filled with liquid, an open connection between said cylinder and the pressure cylinder of the testing machine, a piston reciprocable in said cylinder for generating pressure fluctuations in the cylinder of the testing machine, and means to adjust and automatically maintain the maximum and minimum pressure of such pressure fluctuations irrespective of the elastic and permanent deformations of the test piece.

1,575,520. WORK-CARRYING DEVICE FOR GRINDING MACHINES. WALTER D. ARCHEA, Norwood, Ohio, assignor to The Cincinnati Milling Machine Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Jan. 16, 1924. Serial No. 686,658. 10 Claims. (Cl. 51—108.)

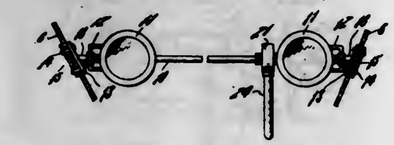
1. In combination with a grinding machine, a work-feeding device comprising a fixed supporting guide; a carriage mounted and movable upon said guide toward and from the grinding space; a work-rest or support secured to and movable with said carriage; means for supporting the outer or trailing end of the work; and supports at the side of the work opposite that which is



in contact with the work-rest, extending normally into guiding and supporting position relatively to the work but adapted to be forced aside as the carriage and work advance, to carry the work into grinding position.

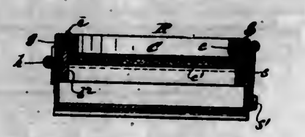
1,575,521. PROCESS OF TREATING WOOD, METAL, AND CONCRETE. DON C. ATKINS, Denver, Colo. Filed May 2, 1922. Serial No. 557,998. 4 Claims. (Cl. 99—12.)

4. The process of treating the surfaces of materials which includes subjecting the said surfaces to an application of sulfur chloride dissolved in gasoline and mixed with linseed oil.



1,575,522. FEED MECHANISM FOR FACING MACHINES. JAMES O. BARRETT, Meadville, Pa. Filed Mar. 13, 1922. Serial No. 543,219. 2 Claims. (Cl. 82—2.)

1. In a mechanism of the class described, the combination of two parallel shafts; a series of sets of gears on said shafts of differing speed ratios; means for throwing different gear sets into operative relation comprising two shift levers acting on different sets; and a



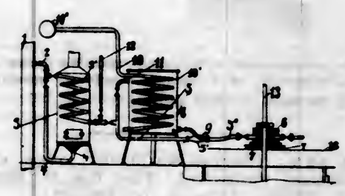
locking lever arranged across the shift levers, said shift levers and locking lever having pin and slot connections permitting the shifting of one shift lever at a time.

1,575,523. AUTOMOBILE HEADLIGHT. CLARENCE E. BEATTY, Des Moines, Iowa. Filed Nov. 28, 1924. Serial No. 752,785. 1 Claim. (Cl. 240—61.)

The combination with the front mud guards of an automobile, inwardly directed spindles carried by the mud guards, an annular shoulder formed on each of the spindles, a pair of connected headlights, normally vertically arranged U-shaped yokes carried by each of the headlights and receiving the spindles for rotation therein, washers on the spindles and engaging the U-shaped yokes at a point opposite the annular shoulders, abutments on the inner ends of the spindles and expansible coil springs encircling the spindles and engaging the abutments and washers for normally holding the washers in contacting engagement with the U-shaped yokes, and at the same time holding the yokes against the annular shoulders to prevent casual movement of the headlights and flexible means for tilting the latter in unison when desired.

1,575,524. WATERPROOF RECEPTACLE. PHILIP BENJAMIN, New York, N. Y., BENJAMIN E. STEINHARDT, Jersey City, N. J., and HARRY LIPTIN, New York, N. Y. Filed July 29, 1925. Serial No. 46,753. 2 Claims. (Cl. 220—46.)

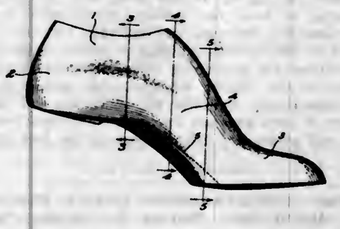
1. As an article of manufacture, an elongate rectangular waterproof receptacle of the character designated, comprising a basic box section formed with a protuberant circumscribing sealing flange, a cover section hinged to said basic box section and formed with an inturned flange shaped to constitute a receptive inverted L-shaped groove with retaining flanges for the reception and support of a circumscribing gasket which is L-shaped in cross section, said gasket being of elastic resilient material for embracing engagement with said protuberant sealing flange on the basic box section, and means for securing said cover and basic box section in closed relationship, substantially in the manner and for the purpose set forth.



1,575,525. PILOT LAMP FOR AUTOMOBILES. MITCHELL L. BLANTON, Denver, Colo., assignor, by direct and mesne assignments, to F. J. McManaman, Denver, Colo. Filed Dec. 1, 1923, Serial No. 678,064. Renewed Jan. 2, 1926. 1 Claim. (Cl. 240—62.)

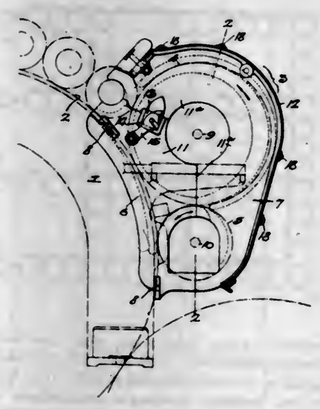
In combination with an automobile, a bracket having a plurality of arms, one arm being mounted behind the spindle arm nut, a locking device between said arm and said nut, said bracket having another arm extending at right angles to the first mentioned arm and

having its end twisted through an angle of ninety degrees, said end having an opening for the reception of a bolt.



1,575,526. METHOD OF AND APPARATUS FOR CLEANING AND CONSERVING HOIST CABLES. KARL BÖCHER, Brambauer, Germany. Filed May 5, 1925. Serial No. 28,184. 15 Claims. (Cl. 91—45.)

1. Method of cleaning and applying conserving preparation to cables consisting in blowing fluid under pressure on to the cable, spraying a preparation thereon, and blowing fluid under pressure on to such preparation on the cable.

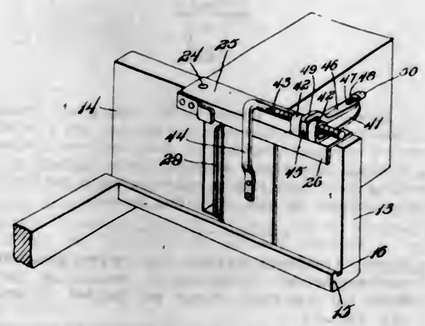


4. Apparatus for cleaning and applying conserving preparation to cables, comprising a tank adapted to contain a supply of conserving preparation, a pipe line adapted to receive fluid under pressure, an injector connected with said tank, pipes connecting said pipe line with the space above the preparation in said tank and said injector, and an annular spray nozzle adapted to surround said cable and connected with said injector.

1,575,527. SHOE LAST. GUSTAVUS H. BOEHMER, St. Louis, Mo. Filed Feb. 26, 1925. Serial No. 11,786. 2 Claims. (Cl. 12—133.)

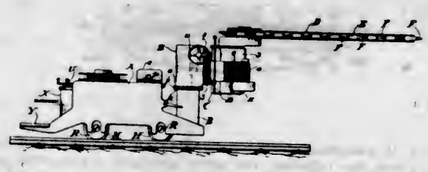
1. A shoe last having a longitudinal transversely curved arch in its bottom face extending from the heel portion thereof to the ball thereof, the outer portions of said arch being convexly curved and the central portion concavely curved, the center line of said concaved portion also tapering longitudinally from heel to tread.

1,575,528. GARNETT MACHINE. WILLIAM F. BOKUM, Jenkintown, Pa., assignor to Proctor and Schwartz, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Oct. 8, 1925. Serial No. 61,369. 4 Claims. (Cl. 19—98.)



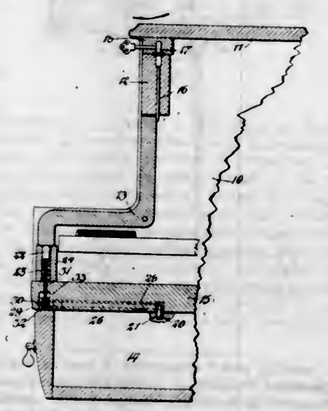
1. The combination in a Garnett machine, of a "fancy" roll; and an enclosing casing having internal ribs at the ends which fit against the ends of the roll.

1,575,529. PROCESS OF INCREASING THE DURABILITY OF PURE SALAD OR SWEET OILS. HERMANN BOLLMANN, Hamburg, Germany, assignor, by mesne assignments, to Mary Fulford Foster, trustee, Washington, D. C. Filed May 28, 1925. Serial No. 33,561. 4 Claims. (Cl. 99—11.)



1. A process for improving the durability of liquid vegetable oils of an edible nature, which comprises adding a small quantity of lecithin to the oil directly after purification.

1,575,530. HEAD-GATE CONSTRUCTION. ROBERT E. BOULTON, Silt, Colo., assignor to Sadie J. Boulton, Silt, Colo. Filed Mar. 12, 1925. Serial No. 15,028. 8 Claims. (Cl. 61—22.)



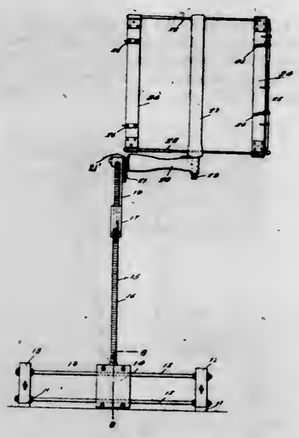
1. In a head gate for irrigation ditches and the like and as means for delivering a predetermined quantity of water from a main ditch end to a lateral, a duct connecting the main ditch and lateral and communicating with each thereof, a duct at the main ditch thereof being provided at its downstream end with a wall forming one wall of the ditch, a baffle connected at one end of said wall and extending transversely of the ditch and having its upper end level with the surface of the bottom of the duct and its lower surface embedded in the bottom of the ditch, the opposite end of said baffle being provided with a vertical extension forming a portion of the wall of the ditch in opposition to the downstream wall of the duct and a gate for controlling the passage of fluid through the duct, said gate being horizontally movable and being provided at its downstream edge with an outstanding flange deflecting floating debris to the center of the ditch.

1,575,531. COAL-CUTTING MACHINE. JOHN C. BRACKETT, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed May 16, 1924. Serial No. 713,700. 5 Claims. (Cl. 262—28.)

1. A coal cutter comprising the combination of a cutter bar, a cutter bar mounting, a column, fluid pressure operated means to support said cutter bar mounting adapted to be raised on said column, a motor for operating said cutter bar rotatably disposed on said mounting and supporting said cutter bar, and means adapted to rotate said motor for swinging said cutter bar.

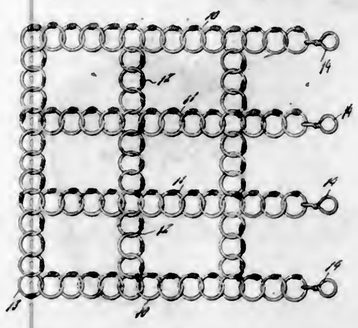
1,575,532. PIANO-LOCKING DEVICE. ISRAEL E. BRETZFELDER, MAURICE K. BRETZFELDER, and JOSEPH SHADY, New York, N. Y., assignors to Krakauer Bros., New York, N. Y., a Corporation of New York. Filed Jan. 16, 1924. Serial No. 686,572. 2 Claims. (Cl. 89—177.)

1. In a reproducing grand piano which includes a drawer disposed below the key-board housing and containing the controls and tracker board of the player mechanism, the combination with the locking mechanism which locks the top and key-board cover in closed position, of locking means for said drawer comprising a keeper opening formed in the drawer, a shaft having angularly disposed front and rear arms, the latter having a locking terminal engageable within the keeper open-



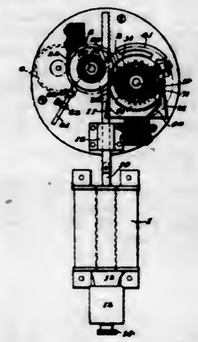
ing upon downward swinging movement of said arm, a plunger connected with the free end of the front arm, means normally projecting the upper end of the plunger into the path of movement of the key-board cover when moved to closed position and effecting the upward swing of the rear arm to disengage the locking terminal from the keeper opening whereby said key-board cover when locked in a closed condition by the locking mechanism, cooperates with said locking means to cause the same to lock the drawer.

1,575,533. POLISHING DEVICE. EUSTACE CARLILL BRIERLEY, Bath, England. Filed June 11, 1925. Serial No. 36,537. 8 Claims. (Cl. 132—78.)



1. A polishing device embodying an inflatable pad and a pump for inflating the same arranged within the pad substantially as described so as to produce a single, self-contained, unit.

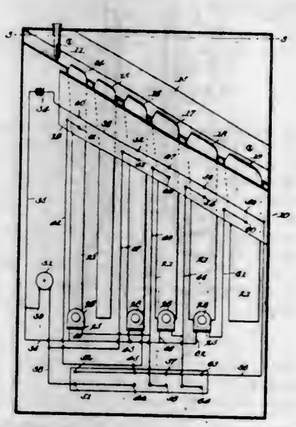
1,575,534. ADJUSTABLE SUPPORT. ROMA E. BRINSON, Atlantic City, N. J. Filed June 9, 1922, Serial No. 567,103. Renewed Dec. 4, 1925. 3 Claims. (Cl. 45—60.)



1. A reading stand embodying a base, a standard slidingly mounted thereon, a sleeve slidingly mounted upon the standard, a vertically disposed arm carried by the sleeve, a horizontally arranged arm, including a reduced extension for connecting said horizontally arranged arm with the vertically disposed arm to permit of rotation of the former, a toothed wheel secured to the reduced extension, a spring actuated dog carried by the vertically disposed arm and engaging the toothed wheel to hold the horizontal arm against rotation, a holding member, and means for connecting the holding member to said horizontally disposed arm, whereby said holding member may be rotated.

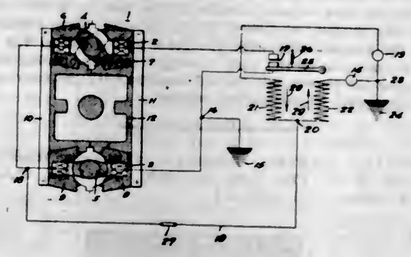
1,575,535. TRACTION CHAIN. ORICE J. BROUILLETTE, Galesburg, Ill. Filed June 22, 1925. Serial No. 38,886. 1 Claim. (Cl. 152—14.)

A traction chain comprising side, intermediate and cross chains respectively, and each of the chains formed of a plurality of inter-connecting split rings having their opposite end portions forming a multiplicity of twisted portions one upon the other to form traction surfaces.



1,575,536. INTERMITTENT ELECTRIC MAKE-AND-BREAK DEVICE. HERBERT C. BUNTING, Seattle, Wash. Filed Apr. 16, 1923. Serial No. 632,574. 9 Claims. (Cl. 200—90.)

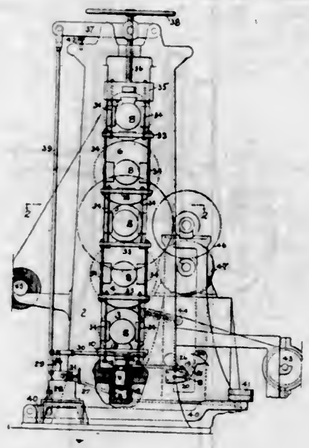
1. In a device for intermittently making and breaking an electric circuit, an oscillating member and a rotating member carrying complemental make-and-break contacts, a solenoid having said make-and-break contacts in its exciting circuit, and a make-and-break device for the load circuit carried by said oscillating member.



1,575,537. CHANGE-MAKING AND FARE-REGISTERING MACHINE. ALOIS BURIAN, Schenectady, N. Y. Filed Apr. 12, 1922. Serial No. 551,946. 1 Claim. (Cl. 194—7.)

A change making device of the character described comprising a casing, a bridging strip secured above the base of the casing, a plurality of parallel chutes of graduated sizes arranged in said casing, a transverse member closing the lower ends of some of said chutes, a pocket underlying the lower end of said chutes, some of said chutes having their closed ends each provided with registering slots formed in the walls thereof, U-shaped supports secured to the bridging strip and arranged in parallelism before the slotted chutes, a solenoid arranged between the arms of each U-shaped support, a finger for each solenoid

being operatively associated with the slots, and means in some of said chutes for operating the fingers as and for the purpose specified.

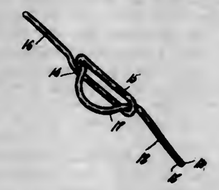


1,575,538. AUTOMOBILE LIGHTING SYSTEM. JOHN B. BUSHNELL, Berkeley, Calif., assignor to N. R. Harris and M. C. Harris, both of San Francisco, Calif., Copartners, doing business under the firm name of Harris Electric Company. Filed Aug. 11, 1923. Serial No. 656,955. 14 Claims. (Cl. 171—313.)

1. In a system for supplying electrical energy, a plurality of translating devices arranged in parallel, a source of current therefor, and means for controlling the amount of current produced by said source, comprising a device for balancing the currents supplied to the translating devices, and contacts operated by the said device in response to a condition of substantial unbalance in the currents supplied to each of the translating devices.

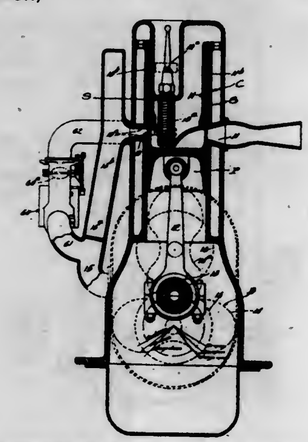
14. In an automobile lighting system, a generator having a pair of generating coils, said generator being adapted to be driven by the source of motion for the automobile, and said coils having a substantially constant current output irrespective of generator speed, and arranged to be connected in parallel, a pair of sets of lamps connected in parallel, and arranged to be supplied with current from the generating coils in parallel, and means for disconnecting one of the generator coils in response to the existence of an inoperative condition of either of the sets of lamps, comprising an electromagnet having a pair of differentially wound coils, one for each of the lamp sets and arranged to carry the lamp current, an armature for the electromagnet, said electromagnet when both sets of lamps are active being ineffective to attract the armature, but when either of the two differentially wound coils becomes deenergized, due to the interruption in the lamp current, the resultant magnetism exerted by the other coil is sufficient to attract the armature, and a pair of contacts, one carried by the armature, which are closed when the armature is in its unattracted position, said contacts being in series with one of the generating coils.

1,575,539. CALENDER. HARRY W. BUTTERWORTH, Jr., Philadelphia, Pa., assignor to H. H. Butterworth & Sons Company, a Corporation of Pennsylvania. Filed July 16, 1925. Serial No. 44,135. 8 Claims. (Cl. 92—75.)



1. A calender, comprising a plurality of horizontal rolls arranged in vertical alinement, hydraulically operated means for raising and lowering the said rolls to bring them into contact or permit them to be lowered out of contact with each other, means for suspending the several rolls out of contact with each other when lowered by the hydraulically operated means, means for putting the hydraulically operated means into and out of action, and means automatically operating to constitute a positive support for the rolls when raised into rolling contact by the hydraulically operated means and the hydraulic pressure thereof has been removed.

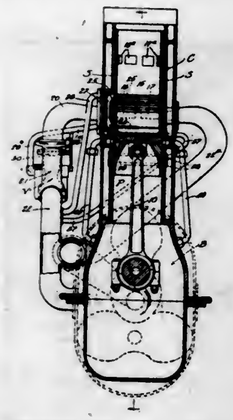
1,575,540. HAIR CURLER. CAROLYN E. BYRNE, Lawrence, Mass. Filed Apr. 26, 1924. Serial No. 709,197. 4 Claims. (Cl. 132—43.)



1. A hair curler comprising an elongated ligature of flexible non-resilient wire, and a coupling rigidly connecting two portions of the ligature side by side, the ligature including a loop maintained by the coupling, a relatively short end portion extending in one direction from the coupling and constituting a tying terminal and a longer end portion extending in the opposite direction from the coupling and movable endwise in the loop, said longer end portion constituting a binder and a tying

terminal, the arrangement being such that the free end portion of a mass of bobbed hair may be inserted between the binder and the loop, clamped by an endwise

movement of the longer end portion, converted into a roll by rotation of the waver, and confined as a roll by the interengagement of the tying terminals.

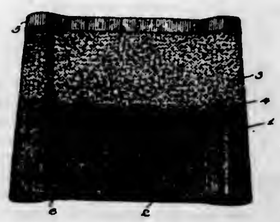


1,575,541. INTERNAL-COMBUSTION ENGINE. JOHN M. CAGE, Santa Monica, Calif., assignor, by mesne assignments, to Halvor Andresen, Christiania, Norway, and Oliver Otis Howard, Rockport, Mass. Filed Aug. 25, 1921. Serial No. 495,167. 3 Claims. (Cl. 123—67.)

3. In combination with an internal combustion engine, having intake and exhaust ports and valves controlling the same, air pressure raising means operated by the engine and adapted to compress air substantially to a pressure which varies as the resistance to flow of such air through the intake port varies at varying engine speeds; a passage leading from such means to the intake port, a carburetor also communicating with said intake port; and a passage connecting said carbureter with said first mentioned air passage, whereby the carbureter acts under the pressure raised by said means; said pressure raising means being of sufficient capacity to introduce to the engine cylinder a quantity of air in excess of the amount required to fill the cylinder, so that such excess flows out through the exhaust during the period that both exhaust and intake are open.

1,575,542. SLEEVE-VALVE ENGINE. JOHN M. CAGE, Santa Monica, Calif., assignor, by mesne assignments, to Halvor Andresen, Christiania, Norway, and Oliver Otis Howard, Rockport, Mass. Filed Aug. 25, 1921. Serial No. 495,168. 13 Claims. (Cl. 123—69.)

4. In combination with an internal combustion engine having a cylinder and an intake port and a sleeve valve movably fitting within the cylinder controlling said intake port; means for feeding a charge to said intake port under pressure, and means for maintaining a counter pressure around said intake port in the space between the sleeve and the cylinder wall, said last men-



tioned means embodying grooves in the cylinder wall on opposite sides of said intake port, and means for introducing air under pressure to said grooves.

1,575,543. VANITY CASE. HARRY BLISS CLEGG, Attleboro, Mass. Filed May 29, 1925. Serial No. 33,674. 7 Claims. (Cl. 132—83.)

2. A powder dispenser, including a body having an open top and having a removable bottom, a raised bead on the bottom, a dished spring expeiler plate engaged on its concave side with the bead, and a dished top in said open top of the body having a central opening and having the convex side thereof engaged with the convexed central part of the spring expeller.

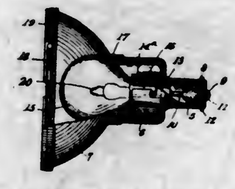
1,575,544. GARTER. EVERETT G. CLEMENTS, Washington, D. C. Filed Dec. 24, 1925. Serial No. 77,541. 4 Claims. (Cl. 241—5.)

1. A garter comprising an upwardly tapered, tubular band of garter elastic adapted to frictionally engage and adhere to the leg of the wearer, and of such width as to permit that the upper tapered portion thereof be folded over and outside of the lower portion to envelop and resiliently support the material of the upper part of a stocking lying between the folds, whereby to support the stocking upon the leg.

1,575,545. TIRE-CHAIN TIGHTENER AND LOCK. WALTER O. COLBURN, Bangor, Me. Filed June 8, 1925. Serial No. 35,783. 3 Claims. (Cl. 24—242.)

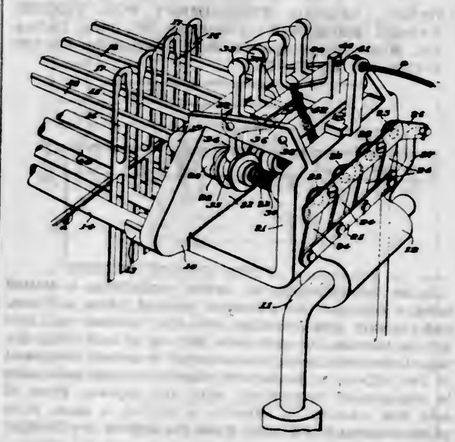
1. A chain tightener and lock comprising an elongated plate, a link-engaging chain-tightening lever fulcrumed to one end of said plate, said lever being adapted for inward movement to a position longitudinally of the plate, means for limiting the inward swinging of said lever, and a lever-locking member pivoted between its ends to the end of the plate remote from the lever fulcrum, the outer end of said lever-locking member being adapted for connection with one end of the tire chain while the inner end of said lever-locking member is adapted to abut said lever and hold it against outward swinging.

1,575,546. TIRE-CHAIN TIGHTENER AND LOCK. WALTER O. COLBURN, Bangor, Me. Filed June 8, 1925. Serial No. 35,784. 2 Claims. (Cl. 24—242.)



1. A chain tightener and lock comprising an elongated plate having one end adapted for connection to one end of a tire chain, the other end of said plate having a link-receiving notch in one edge, said edge being also formed with an angular notch whose inner end extends toward said other end of the plate, a channel-shaped lever having longitudinal side flanges straddling said plate and having link-receiving notches, and a pin and slot connection between one end of said flanges and said other end of the plate, the slot being in converging relation with the link-receiving notch of the plate, the flange-connecting portion of the lever having a slot to receive the portion of the plate adjacent said angular notch, permitting the outer end of said flange-connecting portion to enter said angular notch.

1,575,547. NONFREEZING SILL FAUCET. FREDERICK CONRAD and SVEND RASMUSSEN, Bogota, N. J. Filed June 9, 1925. Serial No. 36,013. 2 Claims. (Cl. 251—156.)

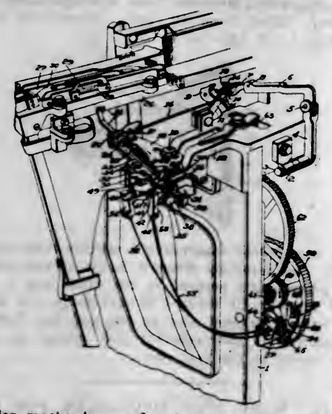


2. A sill faucet, comprising means forming a discharge nozzle, a pipe connected with said nozzle and adapted to extend through a sill, means connected with said pipe for presenting a valve seat, a valve member co-acting with said seat, a spring acting to normally hold said valve member against the seat, a rod connected with said valve member extending through said pipe and nozzle to a point exteriorly of the nozzle, a hand operated wheel slidingly mounted on the rod, a pair of cams connected with said wheel, and a pair of coacting cams connected with the nozzle, said cams co-acting with each other when the wheel is rotated for moving the rod longitudinally against the action of said spring for opening said valve.

1,575,548. ELECTRIC-LAMP MOUNTING. CHARLES H. CUNO, Meriden, Conn., assignor to The Cuno Engineering Corporation, Meriden, Conn., a Corporation of Connecticut. Filed June 12, 1924. Serial No. 719,536. 3 Claims. (Cl. 240—41.)

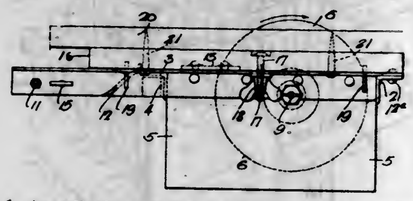
1. A lamp holder comprising a tubular body having an inwardly and reversely directed flange at one end, a reflector permanently secured to the other end, a tubular member permanently secured to said flange and having a socket with a bayonet slot at one end for receiving a lamp inserted in said reflector and having an external locking device at the rear end.

1,575,549. WARP STOP MECHANISM FOR LOOMS. HARRY A. DAVIS, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Oct. 16, 1925. Serial No. 62,762. 11 Claims. (Cl. 139—351.)



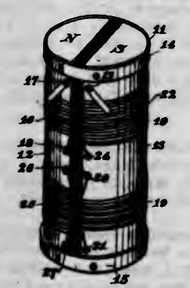
1. In a warp stop mechanism for looms, the combination of two or more banks of drop wires, a vibrator for each bank, means for oscillating the vibrators about their longitudinal axes, give-way connections between each of the vibrators and the operating means permitting the individual stoppage of the oscillatory movement of any one of the vibrators by a drop wire on the occurrence of a warp fault, and an indicator moved by the give-way device on stoppage of the oscillatory movement of a vibrator by a drop wire to locate the bank of drop wires in which the warp fault occurred.

1,575,550. FEELER MECHANISM FOR LOOMS. HARRY A. DAVIS, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed MAR. 20, 1925. Serial No. 17,047. 12 Claims. (Cl. 139—270.)



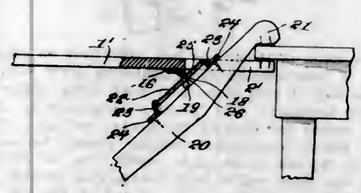
1. In an intermittent feeler mechanism for looms, the combination of a feeler, a device for engaging and holding the feeler in a frontward position during periods of inactivity, and two independent control mechanisms for said device, one operating independently of the other for freeing the feeler at intervals and for moving said de-

vice frontwardly when again engaged by the feeler, and independent means located at a pronounced distance from



the feeler mechanism and actuated by a going part of the loom for positively actuating said two independent mechanisms in succession.

1,575,551. GLUING ATTACHMENT FOR VENEER-TAPING MACHINES. FREDERICK W. DOVE, Ludington, Mich. Filed Apr. 10, 1922. Serial No. 551,389. 8 Claims. (Cl. 91—51.)

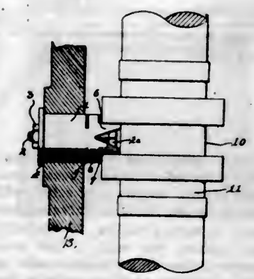


1. An adhesive-applying device comprising a slotted table, a container for adhesives secured below said slot, and a rotary disk extending into the container and projecting through the slot above the top of said table, the top of the table being unobstructed to permit movement of two objects to be secured together across said table in engagement respectively with the opposite faces of said disk whereby an adhesive is applied to those faces of the objects which abut when the objects are brought together.

1,575,552. COUPLING TRANSFORMER. WILLIAM J. DOW, Washington, D. C. Filed Apr. 3, 1924. Serial No. 704,071. 9 Claims. (Cl. 175—359.)

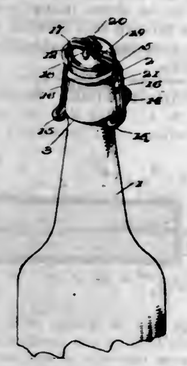
1. A coupling transformer having primary and secondary windings comprising a pair of insulation cores having their axes parallel, a section of one of said windings on each core at axially displaced positions, said sections being wound in opposite directions, and a portion of said other winding on one of said cores.

1,575,553. IRONING BOARD. HENRY KREIDER DUFFIELD, South Jacksonville, Fla. Filed Feb. 18, 1925. Serial No. 10,118. 2 Claims. (Cl. 68—10.)



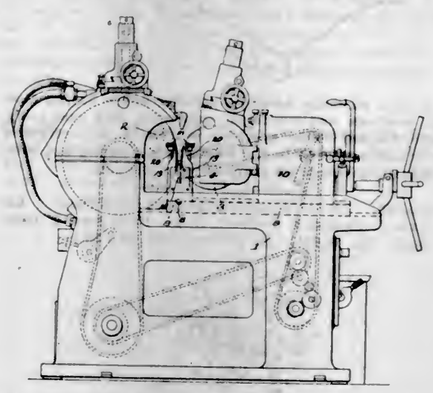
1. The combination with a board, having a slotted end, a toothed reinforcing plate having a depending T-shaped member secured on the under face of the board at the terminal of the slot, a prop having a headed end, which is received through the slot of the board, a toothed rack on the prop which is centrally slotted to receive the T-head of the reinforcing plate therein and with which rack the toothed reinforcing plate engages.

1,575,554. KNIFE SHARPENER. PHILIP L. DUPLOTH, Anamosa, Iowa. Filed Sept. 11, 1924. Serial No. 737,112. 1 Claim. (Cl. 51—187.)



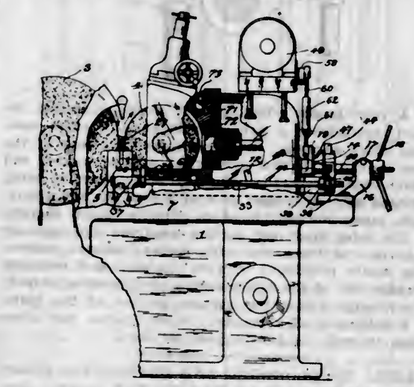
An edge tool sharpener including an elongated body having one end angularly turned and the other end provided with a hook, and having an elongated opening adjacent said angularly turned end, a slidable plate beneath the body and having a projection extending through the elongated opening, a nut held by said projection, a strip of abrading material having one end engaged with said hook and its other end tucked around the far edge of said slidable plate and between it and the adjacent faces of said body, and a threaded rod engaged through one end of the body and threaded through said nut.

1,575,555. ADJUSTABLE CAM-SHAFT THRUST BLOCK. PERRY B. EDWARDS, Athens, N. Y. Filed July 9, 1923. Serial No. 650,559. 3 Claims. (Cl. 308—161.)



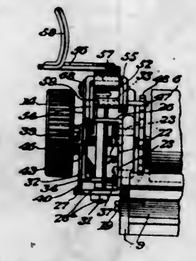
1. A thrust block comprising a body having a longitudinal central bore and an end portion and a tapered bifurcation therein and also having slots adjacent to said end portion, in combination with a headed and threaded bolt, and a nut mounted on said bolt and opposed to one end of the body.

1,575,556. BOTTLE STOPPER. OTTO EICK, St. Louis, Mo. Filed Aug. 27, 1925. Serial No. 52,908. 2 Claims. (Cl. 215—66.)



1. In a stopper, a sealing member adapted to enter the mouth of a bottle, an attaching head superimposed on the sealing member and having a stem secured in a cavity in the outer end portion of said sealing member, said attaching head having an outwardly extending eye, and a one piece fastening member having a substantially U-shaped portion for embracing the neck of the bottle against a shoulder on the latter, spring portions for clamping the arms of said substantially U-shaped portion to said bottle neck, end portions engaging the attaching head and adapted to press the sealing member into the mouth of the bottle, said end portions extending transversely across said attaching head and having their extremities adapted to engage with a bead at the outer end of the bottle neck, and other portions connecting said sealing member pressing portions with said arm actuating spring portions of the fastening member.

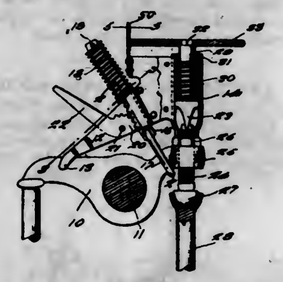
1,575,557. WORK REST AND GUIDING DEVICE FOR GRINDING MACHINES. SOL EINSTEIN and LESTER F. NENNINGER, Cincinnati, Ohio, assignors to The Cincinnati Milling Machine Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Jan. 18, 1924. Serial No. 687,062. 7 Claims. (Cl. 51—103.)



1. A combined work-rest or support and guide, comprising a body or casting having in its upper portion a longitudinal slot; a work-rest in the form of a blade, bar or plate, seated within said slot; pressure stems extending through a side wall of the slot and provided each with an inclined face; screw stems provided with conical ends arranged perpendicular to the pressure stems and bearing at their conical ends against the inclined faces thereof; upright swinging arms pivoted on opposite sides of the work-supporting bar and pivotally connected near their lower ends to the body or casting; guide-plates carried by the free ends of said arms; springs connecting opposed swinging arms in pairs and tending to separate said arms and their guide-plates; horizontally-projecting studs carried by the body or casting and having each an inclined face; and screws carried by said swinging arms, having conical ends to bear upon the inclined faces of the studs, and provided with heads by which to turn them and thus to force them down the inclined faces, and thereby to cause the arms to swing inward toward the work-supporting blade.

1,575,558. CENTERLESS GRINDING MACHINE. SOL EINSTEIN and LESTER F. NENNINGER, Cincinnati, and WALTER D. ARCHEA, Norwood, Ohio, assignors to The Cincinnati Milling Machine Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Jan. 18, 1924. Serial No. 687,063. 16 Claims. (Cl. 51—108.)

1. A centerless grinding machine comprising, in combination, a grinding wheel; a governing or control-wheel; an intermediate work-rest or support; means for progressively advancing and receding one of said wheels toward and from the other; and means for automatically removing the work from between said wheels after it is completely ground.



1,575,559. TYPEWRITING MACHINE. ALONZO B. ELY, Groton, N. Y., assignor to Corona Typewriter Company, Inc., Groton, N. Y., a Corporation of New York. Filed Apr. 30, 1925. Serial No. 26,966. 30 Claims. (Cl. 197—114.)

28. In a line spacing mechanism, the combination of a rotatably mounted ratchet wheel, a pawl extending across the wheel, means supporting said pawl for swinging movement and movement of translation about and

along an axis perpendicular to the axis of the ratchet wheel, means for forcing said pawl against a tooth of the wheel to advance the wheel, and means for stopping pivotal and translational movement of the pawl when it has advanced said tooth to a predetermined point circumferentially of the wheel at which said pawl is engaged by the next following tooth of the wheel to obstruct further advance of the wheel.

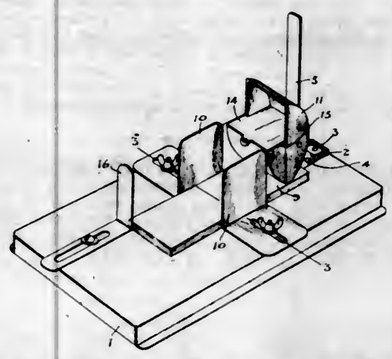
1,575,560. TAPPET-ADJUSTING TOOL. GIDEON B. ENGLUND, St. Petersburg, Fla. Filed Jan. 31, 1925. Serial No. 6,086. 2 Claims. (Cl. 81—3.)

1. A valve-tappet adjusting tool of the character described, comprising a pair of substantially offset companion plate members, the opposite end portions of the plates providing hollow cylindrical and bifurcated end portions respectively, the hollow cylindrical portion being positioned upon the upper face of a jam nut and receiving the upper end portion of an adjusting screw therein, and the bifurcated end portion engaging the opposite end portion of the rocker arm, spring-tensioned reciprocating means positioned between the plate and engaging the under side of the rocker arm, a shaft member extending vertically within the tubular portion of the plate, and a calibrated disk member included upon the upper portion thereof, for the purpose set forth.

1,575,561. DECOLORIZING AND DEFECATING PRODUCT AND PROCESS OF MAKING THE SAME. GUSTAVUS J. ESSELEN, Jr., Swampscott, Mass., assignor to United Fruit Company, Boston, Mass., a Corporation of New Jersey. Filed Oct. 6, 1922. Serial No. 592,887. 6 Claims. (Cl. 252—3.)

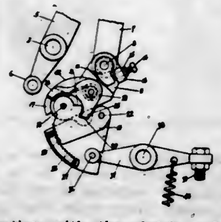
1. The hereindescribed decolorizing and defecating product comprising a decolorizing carbon derived principally from the isolated pithy component of the sugar cane, intimately associated with an alkaline material.

1,575,562. GARMENT AND METHOD OF SEWING SLEEVE LININGS INTO ARMHOLES THEREOF. RICHARD A. FEISS, Cleveland, Ohio, assignor to The Joseph & Feiss Company, Cleveland, Ohio. Filed Feb. 1, 1924. Serial No. 690,031. 5 Claims. (Cl. 2—97.)



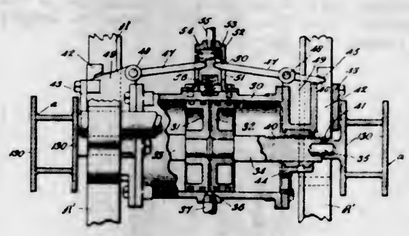
5. The method of stitching sleeve lining within a garment, which consists in providing the sleeve lining with an opening by leaving juxtaposed portions of two longitudinal edges of the lining unseamed, turning the sleeve structure inside out and stitching one looped end of said sleeve lining to the garment sleeve, stitching the other looped end of the sleeve lining to the garment by the access afforded through said opening, sewing shut the opening and then restoring the right-side-out position of said sleeve structure.

1,575,563. CARTRIDGE FUSE. FREDERICK A. FELDKAMP, Newark, N. J. Filed Feb. 20, 1924. Serial No. 694,002. 13 Claims. (Cl. 200—132.)



1. In a cartridge fuse, a tubular shell, blade-terminals, end caps, and blade holding and positioning washer members engaged between the ends of said shell and said end caps, each washer member having portions interlocked with a blade terminal to hold the latter against longitudinal displacement, and each washer member having buttress lugs struck up from the body thereof to respectively engage and brace opposite sides of said blade terminal.

1,575,564. GUMMING DEVICE. JOHN GORDON FLEMING, Toronto, Ontario, Canada. Filed June 16, 1924. Serial No. 720,322. 4 Claims. (Cl. 93—68.)

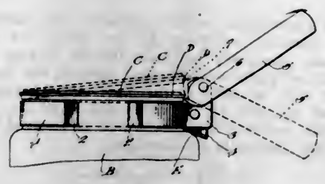


1. In a gumming device, a gum receptacle having feeding openings, and means for supporting said gum receptacle adapted to be operated to remove the receptacle from engagement with the sheets to be gummed and coincidentally interrupting the feeding of the gum.

1,575,565. TRANSMISSION-CLUTCH CONTROL. ERNEST C. FREEMAN, Endicott, N. Y. Filed Sept. 2, 1925. Serial No. 54,071. 15 Claims. (Cl. 74—39.)

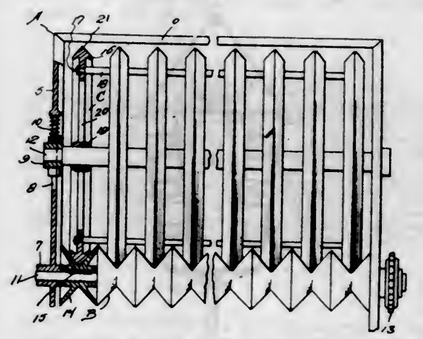
1. In combination with the clutch and brake of an automobile transmission and shafts therefor, pedals rigid on said shafts, means operated by said brake shaft for disengaging said clutch and locking it in such disengaged position, and means operated by said clutch pedal for releasing said locking means.

1,575,566. TRENCH-WALL SUPPORTER. SYDNEY BURT GARDNER, Benson, Minn. Filed Feb. 5, 1925. Serial No. 7,121. 17 Claims. (Cl. 254—93.)



8. In a trench wall supporting machine, a pair of relatively movable sections; fluid pressure means for expanding said sections laterally; means for locking said sections; fluid pressure releasable means for unlocking said sections; additional fluid pressure means for moving said sections longitudinally relative to one another; and a singe valve for controlling all of said fluid pressure means.

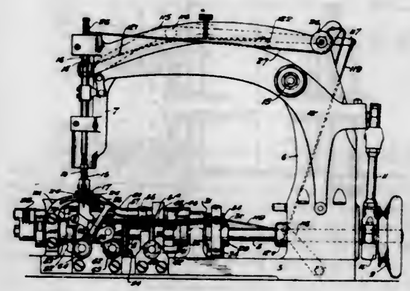
1,575,567. COLLAPSIBLE CONTAINER. WILLIAM HENRY GREGORY GEAKE, Killara, near Sydney, New South Wales, Australia. Filed Sept. 11, 1924. Serial No. 737,145. 7 Claims. (Cl. 221—60.)



1. A container for fluent substance comprising nested dished members peripherally joined, the superposed of said members being of relatively hard material and the other of relatively flexible and soft material, the latter being evertible by pressure of its contents when the receptacle is filled, to form with said superposed member, a chamber.

1,575,568. LID REMOVER. PAUL D. GERHART, Exeter, Calif. Substitute for application Serial No. 516,398, filed Nov. 19, 1921. This application filed Nov. 28, 1924. Serial No. 752,771. 1 Claim. (Cl. 81—3.1.)

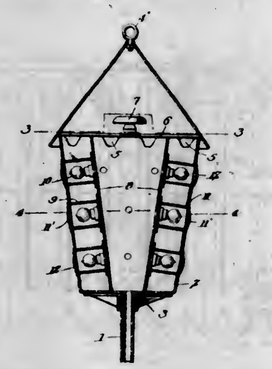
A lid remover comprising a split band for engagement around a jar neck, said band being formed with a folded portion to provide a projection extending at right angles to the band, wings at the lower end of the projection and extending in opposite directions for bearing on the shoulder of the jar and a lever pivoted to the projection to swing vertically and a tooth on the inner end of the lever for engagement under the jar cap.



1,575,569. FLAX-PULLING ATTACHMENT FOR GRAIN BINDERS. SAMUEL S. GILBERT, Albany, Oreg. Filed Oct. 13, 1925. Serial No. 62,280. 5 Claims. (Cl. 55—66.)

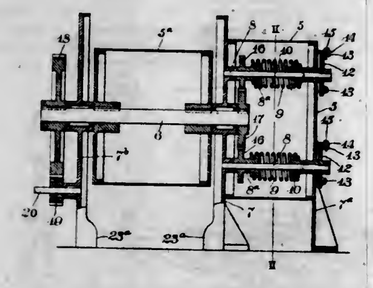
1. A flax pulling machine of the class described including a frame, an axle mounted in the frame, a main drive roller on the axle, a floating shaft journaled in the frame, and a reel structure on said shaft for association with the roller.

2. A flax pulling machine of the class described including a frame, an axle mounted in the frame, a main drive roller on the axle, a floating shaft journaled in the frame, and a reel structure on said shaft for association with the roller, said roller including a plurality of sections, each section having an annular V-shaped groove therein.



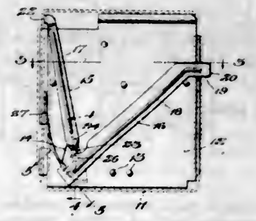
1,575,570. TUFTING-ATTACHMENT MECHANISM FOR SEWING MACHINES. JOHN MILTON GLADISH, Chattanooga, Tenn., assignor, by mesne assignments, to Carter Brothers, a Firm composed of August J. Carter and Peyton L. Carter, Chattanooga, Tenn. Filed June 23, 1924. Serial No. 721,860. 27 Claims. (Cl. 112—79.)

1. In a machine of the class specified, the combination with a single reciprocating needle, means for guiding a strand thereto, loop forming mechanism comprising a slotted abutment and a reciprocating device partially



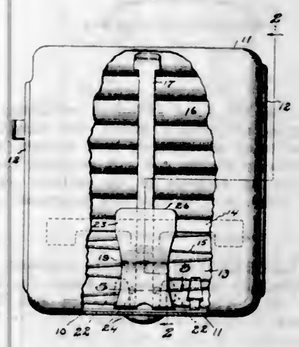
movable into the abutment, and means separate and apart from the reciprocating device for holding portions of the successive loops during the operation of the needle to produce successive loops of uniform dimensions.

1,575,571. TRAFFIC SIGNAL. ALBERT M. GRAY, Newport News, Va. Filed Feb. 21, 1921. Serial No. 446,628. 1 Claim. (Cl. 177—329.)



A signal comprising a support, a housing mounted thereon and having downwardly and inwardly converging side walls, partition walls arranged within the housing and disposed parallel with and spaced from the side walls of the housing, inclined wall sections located in the space between the side walls and the partition walls of the housing and dividing the space into compartments, the median longitudinal dimensions of the compartments being disposed at acute angles to the axis of the support, transparent disks carried by the side walls of the housing and disposed at the other ends of the compartments and bulbs mounted upon the partition walls of the housing and disposed interiorly of the compartments.

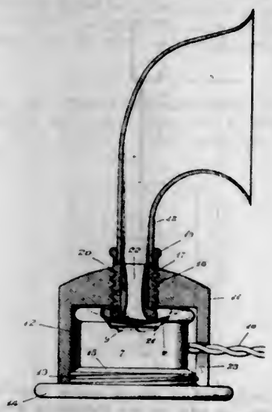
1,575,572. WINDING AND COUNTERBALANCING MECHANISM FOR CURTAINS. RALPH H. GREGOOR, Columbus, Ohio, assignor to The Kinnear Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed June 27, 1924. Serial No. 722,883. 4 Claims. (Cl. 189—57.)



1. A counterbalancing mechanism for a rolling curtain, including a winding shaft therefor provided with a spur gear fixed thereto, said counterbalancing mechanism including a frame, a spur gear mounted in the frame on an axis parallel to the axis of the curtain winding shaft and in position to be driven by the spur gear of the curtain winding shaft when the curtain is wound and unwound, a coil spring connected at one end with said second named spur gear to be wound and unwound when the curtain is unwound and wound respectively, said coil spring having its other end fixed to the frame.

1,575,573. CIGARETTE CASE. ERNEST GREGORY, Derby, Conn., assignor to The Lyons Manufacturing Company, New Haven, Conn., a Corporation of Connecticut. Filed Dec. 29, 1923. Serial No. 683,408. 2 Claims. (Cl. 206—41.)

1. In mechanism of the character described; an inner plate having an opening therethrough; an ejector lever pivotally connected thereto adjacent to said opening and having an offset portion projecting into said opening and movable therein; a primary lever; and a pivot connection between said primary lever and ejector lever at said offset portion.



1,575,574. STOP MECHANISM. ERNEST GREGORY, New Haven, Conn., assignor, by direct and mesne assignments, to The Lyons Manufacturing Company, New Haven, Conn., a Corporation of Connecticut. Filed Feb. 2, 1925. Serial No. 6,308. 6 Claims. (Cl. 206—41.

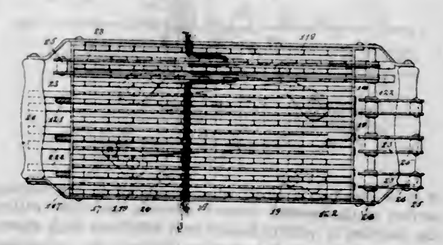
1. The combination with a cigarette case having one member movable relatively to the other; of a stop mechanism immovably mounted therein, having a plurality of foot portions and a head portion, the outer end of which is at an angle to the inner end, whereby when positioned the edge of the outer end is in the path of one of the movable members which is engaged thereby and is thus limited in its movement.

1,575,575. AMPLIFIER FOR TELEPHONE RECEIVERS. JOHN LAYTON GUERRANT, Fresno, Calif. Filed Jan. 31, 1924. Serial No. 689,697. 6 Claims. (Cl. 179—146.)

4. An amplifier comprising a case for enclosing a telephone receiver, a screw cap for the case, a horn having a neck screw-threaded into the case opposite to said cap, and a gasket carried by the inner end portion of said

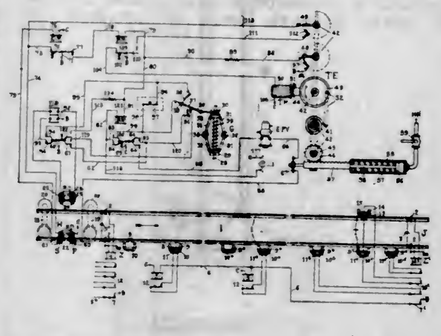
neck to contact with said receiver, with the receiver clamped between said gasket and cap.

1,575,576. PLATE LIFTER. MARIA GUITIAN, Habana, Cuba. Filed Nov. 25, 1925. Serial No. 71,394. 2 Claims. (Cl. 294—27.)



1. A plate lifter comprising a head arranged for the attachment of a handle thereto and a pair of spring jaws projecting from said head and each substantially an equilateral triangle in form, said jaws being arranged in spaced relation and at a slight angle to each other so that the space between said jaws contracts toward the inner ends of the jaws, said jaws having recesses in their opposing sides and pads in said recesses.

1,575,577. HAND-DRIVEN CIRCULAR SAW. THOMAS GUZA, Flint, Mich. Filed Nov. 17, 1922. Serial No. 601,569. 1 Claim. (Cl. 143—43.)

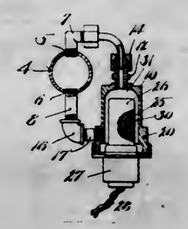


In a device of the class described, a housing comprising a plurality of elements, means for connecting said elements of the housing and permitting relative adjustment, a shaft rotatable in the housing, means for connecting a tool with the shaft, means for driving the shaft, a spring mounted and adjustable gage carried by one element of the housing and movable vertically with reference to the lower portion of the housing, the tool and gage operating in approximately parallel planes, and one of said adjustable elements of the housing being movable laterally with reference to the adjacent surface of the saw.

1,575,578. HAIR WAVER. EMMA HAGEMEISTER, New York, N. Y. Filed Apr. 24, 1925. Serial No. 25,681. 4 Claims. (Cl. 132—31.)

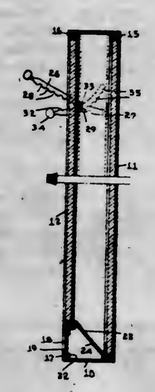
4. A hair waver including heating elements, a series of fixed combs in rigid relation to the heating elements in the general longitudinal plane thereof, additional fixed combs alternating with the first mentioned fixed combs, and movable combs alternating with the fixed combs and shiftable longitudinally thereto.

1,575,579. TRAIN CONTROL. WINTHROP K. HOWE, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Jan. 4, 1924. Serial No. 684,357. 22 Claims. (Cl. 246—63.)



1. An automatic train control system comprising, normally inactive means which when initiated sets up a restricted speed limit and effects an automatic brake application if this speed limit is exceeded, and means including a device which responds to the reception of two successive control influences if received in less than a predetermined time for initiating said means.

1,575,580. HEATER FOR LIQUID-CIRCULATING SYSTEMS. EDWARD C. JOHNSTONE, Spartanburg, S. C. Filed May 26, 1925. Serial No. 33,012. 2 Claims. (Cl. 219—38.)



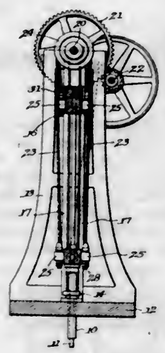
1. A heater for liquid circulating systems, comprising a heating chamber, means permitting the flow of liquid

into and out of said heating chamber, and a removable electric heating element located within said heating chamber, said heating element having such proportions relative to the heating chamber that the liquid capacity

of such chamber is small when compared to the heating surface of the heating element, whereby the liquid within the chamber is quickly heated to a relatively high degree and propelled from the chamber through the circulating system.

1,575,581. WINDSHIELD FOR CLOSED CARS. ALBRIDGE C. JORDAN, Eau Claire, Wis. Filed June 9, 1925. Serial No. 36,000. 3 Claims. (Cl. 296—94.)

1. A device of the kind described comprising a frame, windshields hinged at their upper edges to the upper edge of the frame, the one being narrower than the other, and a ventilator disposed below the narrower shield and covered by the wider shield when the latter is in closed position.



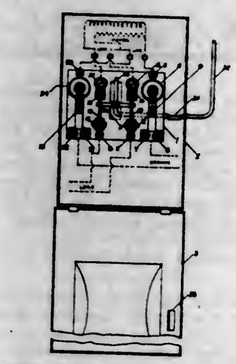
1,575,582. NAIL DRIVER AND SET. ERNEST M. JOY, Hollywood, Md. Filed Nov. 18, 1925. Serial No. 69,873. 2 Claims. (Cl. 1—47.)

1. A nailing tool designed to inset nails a predetermined distance below the surface of material into which nails may be driven, comprising a body having a bore therein, a pin slidable in said bore, a head on the pin to receive the impact of a hammer, said pin being of such length that when the nail is driven said predetermined

distance the said head of pin is spaced from said body, and an indicator on said pin for indicating when the pin has been driven to said predetermined depth.

1,575,583. DUPLEX PUMP GEAR. ALBERT H. KENNEDY, Rockport, Ind. Filed July 14, 1924. Serial No. 726,014. 7 Claims. (Cl. 74—14.)

3. A pump gear for duplex pumps having concentric sucker rods comprising a frame, a pair of cross-heads on the sucker rods mounted in the frame, means for reciprocating said cross-heads simultaneously in opposite directions and means to balance the reciprocating parts.

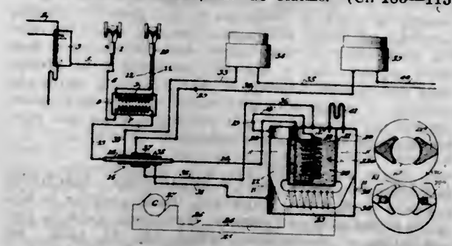


1,575,584. CRYSTALLIZER. MARTIN J. KERMER, Evanston, Ill. Filed Apr. 2, 1924. Serial No. 703,832. 6 Claims. (Cl. 257—86.)

1. A crystallizer comprising two concentric conduits, the outer conduit to contain a temperature changing agent and the inner conduit to contain material to be acted upon; a conveyor within the inner conduit to move

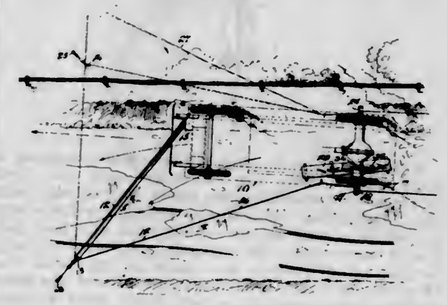
a portion of said material in a given direction thru the conduit; another conveyor to move a portion of said material to a less extent in an opposite direction; an axially positioned shaft comprising a part of both conveyors and bearings for the shaft at intervals within the inner conduit.

1,575,585. EXTERNALLY-OPERATED CURRENT-CONTROLLING DEVICE. BENJAMIN C. KING, Brooklyn, N. Y. Filed June 25, 1924. Serial No. 722,418. 11 Claims. (Cl. 200—50.)



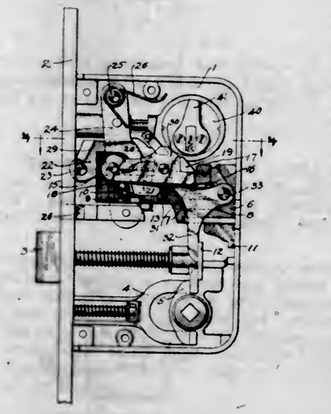
7. In a device of the class described, a base, a circuit controlling device, means to hold the same to the base, and means to actuate the circuit controlling device, a groove being made in the base forming a bearing in which the actuating means is adapted to work.

1,575,586. WATER EXCLUDER. REINOLDT KLATTENBURG and JENS M. NIELSEN, Albion, Nebr. Filed Oct. 11, 1923. Serial No. 667,828. 4 Claims. (Cl. 257—125.)



1. A radiator overflow pipe attachment of the character described comprising a body portion slit longitudinally throughout its length, and a top overlying the upper end thereof as and for the purpose specified.

1,575,587. SEPARATION OF GASEOUS OR LIQUID MIXTURES. PIERRE E. HAYNES, Buffalo, N. Y., assignor to The Linde Air Products Company, New York, N. Y., a Corporation of Ohio. Filed Sept. 2, 1919. Serial No. 321,205. 15 Claims. (Cl. 183—115.)

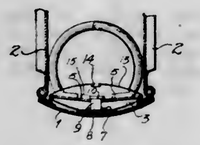


1. The method of separating fluid mixtures having fluid constituents of different magnetic susceptibilities, which consists in passing a stream of the mixture through a conduit having a permeable wall and magnetically acting upon the mixture transversely of the stream to cause the constituent having the greater magnetic susceptibility to pass through the permeable wall out of the stream.

1,575,588. EXTRICATING MEANS FOR VEHICLES. CHARLES L. HOOEY, Dover, N. J. Filed Sept. 17, 1923. Serial No. 663,310. 1 Claim. (Cl. 180—7.)

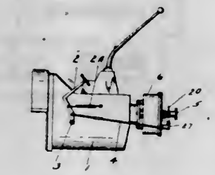
A means for extricating ditched motor cars comprising a rope adapted to be secured around the driving wheels of the car and to be secured to a point beyond the car, a portable platform, and a carriage adapted to be detachably secured to the rear axle housing and to form a rolling means for one side of the car on the said platform, the carriage being disposed so as to cause the wheel of the car to clear the ground whereby the speed of the car is controlled entirely by the coiling of the rope.

1,575,589. LOCK. NORMAN B. HURD, New Britain, Conn., assignor to The American Hardware Corporation, New Britain, Conn., a Corporation of Connecticut. Filed Mar. 27, 1925. Serial No. 18,760. 6 Claims. (Cl. 70—46.)



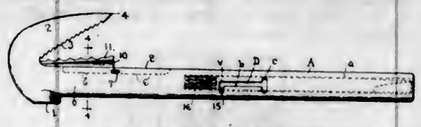
1. In a lock, a lock case, a latch in said case, a slide bolt in said case for locking said latch in projected position, a tumbler carried by said slide bolt for locking the same in one position, and a stump cooperating with said tumbler for dogging the same in one position, said stump being movably mounted so as to be movable to an operative and an inoperative position.

1,575,590. CLOTHESPIN. CLIFFORD LIMPRIGHT, Marysville, Wash., assignor to Utility Manufacturing Company, Marysville, Wash., a Corporation. Filed Sept. 29, 1924. Serial No. 740,494. 1 Claim. (Cl. 24—260.)



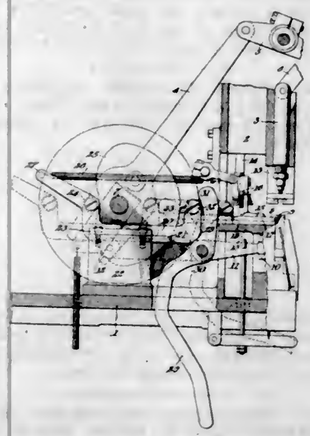
A clothes pin of the character described comprising a single piece of spring wire bent at the center upon itself to provide a connecting loop and a pair of legs; said legs being formed straight and extending substantially parallel in slightly spaced relation from said loop and, toward their ends, bent outwardly and then inwardly, forming an intermediate open space for the clothes line when the pin is not functionally in use; said legs being provided with outwardly curled, closed loops at their ends; normally engaged so as to close the said open space to retain the pin on the line, and a ring slidable in the straight formed part of said legs as a means of limiting their spread and their extent of projection over a line.

1,575,591. RING-BOOK LOCK. GEORGE W. NEWMAN, Chicago, Ill., assignor to Wilson-Jones Loose Leaf Company, a Corporation of Massachusetts. Filed May 31, 1924. Serial No. 716,888. 8 Claims. (Cl. 129—24.)



7. In a ring book comprising hook carrying members having limited movement and a manually operable member for locking said first members nt one limit of movement.

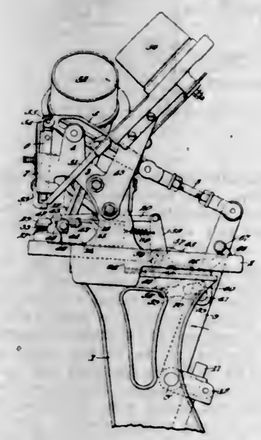
1,575,592. OIL-COMPRESSION BRAKE. OMI GRANT PHILLIPS, Portland, Oreg., assignor of one-half to Kathryn B. Swift, Portland, Oreg. Filed Oct. 15, 1924. Serial No. 743,720. 4 Claims. (Cl. 188—90.)



1. An oil compression brake comprising a driven shaft, a housing about said shaft, a closure for said housing, a rotor within said housing adapted to rotate with the driven shaft, slots within the rotor adapted to maintain vanes in slidable relation with said slots, an actuator adapted to rotate with the driven shaft and in slidable relation therewith and adjustable through the end closure, sloping surfaces within the actuator adapted to position the vanes, an annular groove connected to a filling well and an operating fluid within the well.

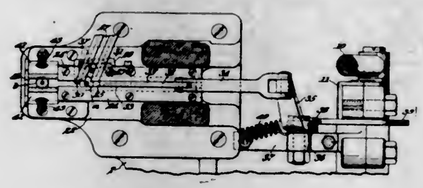
1,575,593. PIPE WRENCH. JACOB H. SEITER, Marion, Ohio, assignor of one-half to Oscar Sipes, Galion, Ohio. Filed Nov. 13, 1923. Serial No. 674,547. 1 Claim. (Cl. 81—179.)

A tool of the character described comprising a head having a gradually curved outer surface, a stationary jaw formed on said head, a hollow handle having a dove-tailed groove formed therein adjacent said head and continued into a groove of rectangular formation, a removable jaw slidably mounted in said dove-tail groove and disposed in operative relation to said stationary jaw, and a pin passing through aligned openings in the handle adjacent the groove therein, to limit movement of the removable jaw in the said groove.



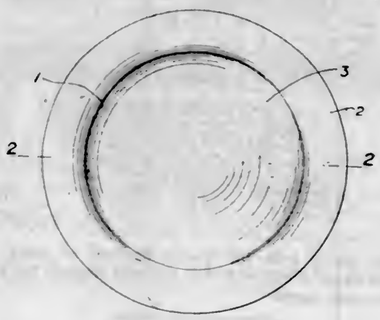
1,575,594. FEED-ACTUATING DEVICE FOR BUTTON-ATTACHING MACHINES. FRANK E. WARNER, Waterbury, Conn., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Aug. 29, 1923. Serial No. 659,998. 2 Claims. (Cl. 218—6.)

2. In a feed actuating device for button attaching machines, a tack pusher, a cam, means connected with said pusher and cooperating with said cam for imparting automatic tack feeding movement to said pusher, a yielding member cooperating with said connecting means for causing cooperation of said means with said cam, a fixed pivot member, and a normally quiescent lever pivoted upon said member adjacent to said connecting means and operable to engage with said means to move said pusher against the influence of said yielding member and independently of its automatic operation.



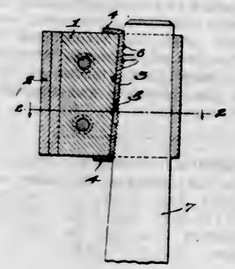
1,575,595. FASTENER-ATTACHING MACHINE. FRANK E. WARNER, Waterbury, Conn., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Apr. 10, 1924. Serial No. 705,664. 8 Claims. (Cl. 218—6.)

1. In a fastener attaching machine, a setting anvil, a setting plunger, a raceway communicating with said anvil, a chute communicating with said raceway and adapted to feed fastener parts thereto, a push finger cooperating with said raceway and adapted to advance to the anvil the fastener parts fed to said raceway, and a stop and brake member arranged in cooperative relation to said raceway and adjacent to the discharge end of said



chute, said member adapted to prevent entrance into said raceway from said chute of more than one fastener part at a time and to frictionally engage such fastener parts during their initial movement by said push finger and until said push finger engages said member, to prevent premature movement of said fastener parts in said raceway.

1,575,596. FASTENER-SETTING MACHINE. FRANK E. WARNER, Waterbury, Conn., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Apr. 22, 1924. Serial No. 708,255. 2 Claims. (Cl. 218—6.)

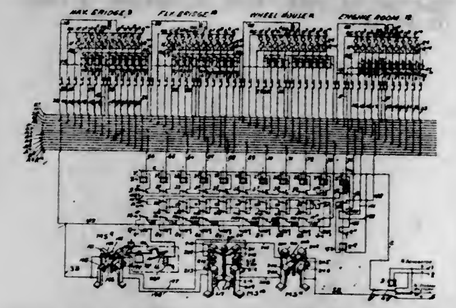


1. In a fastener setting machine, a setting anvil, guides forming a raceway communicating with said anvil, a chute communicating with and adapted to supply fastener parts to said raceway, a detent pivoted adjacent to the discharge end of said chute and having a finger normally obstructing said raceway and underlying one of said guides and adapted to engage the heads of fastener parts fed to said raceway from said chute, whereby such fastener parts may be maintained in predetermined position in said raceway.

1,575,597. FIBER OR LIKE PLATE. ANDREAS BOTHE, Oreland, Pa., assignor to Kleen Products Company, Inc., North Wales, Pa., a Corporation of Delaware. Filed Oct. 13, 1922. Serial No. 594,239. 1 Claim. (Cl. 65—15.)

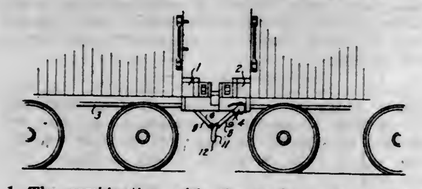
A fiber or like plate having a rim, an annular wall and a bowl, the said wall being steep and fabricated of fibers more widely spaced or separated than in the remainder of the structure, the bottom of said bowl and the said rim being convex on any cross-sectional line to provide rigidity.

1,575,598. PICKER. ALEXANDRE GAGNON, Biddeford, Me., assignor of one-third to James A. Andrews and one-third to John W. Herbert, both of Biddeford, Me. Filed Aug. 6, 1925. Serial No. 48,480. 3 Claims. (Cl. 139—159.)



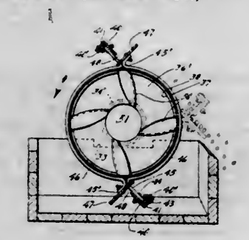
1. In combination with a picker head having a socket, a plate in the socket having a serrated face formed to engage the front side of a picker stick, said plate having its ends bent along transverse lines and extending outwardly of the front face of the stick and engaged with the top and bottom ends of the head, said plate having an opening therethrough formed to register with the impact point of the shuttle.

1,575,599. SHIP TELEGRAPH. WILLIAM REED HORNBERGER, Philadelphia, Pa., assignor of one-half to Charles A. Gehrmann, Philadelphia, Pa. Filed Nov. 28, 1919. Serial No. 341,004. 30 Claims. (Cl. 177—334.)



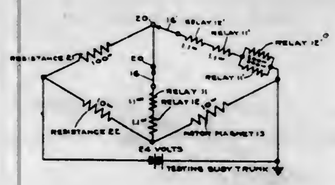
1. The combination of an order instrument with order and reply signals, locally operated means for closing a

circuit through a selected order signal, control means providing the return path of said circuit when normally positioned, and distantly operated means for moving said



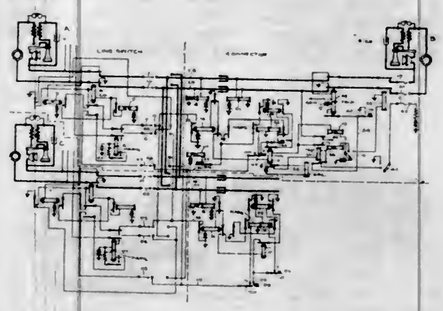
control means from the normal position to break the control signal circuit and close a circuit through the companion reply signal.

1,575,600. AIR-HOSE NIPPLE. HERBERT DEAN, Brandon, Manitoba, Canada, assignor of one-half to George Samuel Morris, Brandon, Canada. Filed Mar. 9, 1922. Serial No. 542,407. 4 Claims. (Cl. 285—204.)



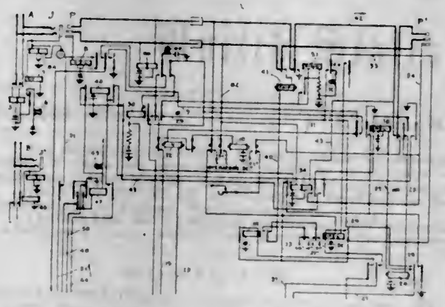
1. The combination with the angle cocks of the air pipes of adjoining train sections, of similar nipples screw threaded to the angle cocks and presenting rigid hollow extensions extending angularly downwardly and outwardly from the angle cocks and having their lower ends angularly deflected further outwardly towards one another and short flexible hose attached to the angularly deflected ends of the extensions and adapted to be detachably coupled one to the other.

1,575,601. SCREENING DEVICE. CURT G. KNOBLAUCH, Chicago, Ill., assignor, by mesne assignments, to Goodwin Garst, Lake Bluff, Ill. Original application filed Nov. 26, 1923, Serial No. 677,132. Divided and this application filed Feb. 16, 1925. Serial No. 9,377. 8 Claims. (Cl. 209—284.)



1. A screening device comprising in combination a liquid container, a rotary screen operating in the liquid in said container and having a trunnion at each end, means extending laterally outward from said screen for elevating and deflecting material from said container, and members adjustably mounted on said elevating means for adjusting said elevating means for capacity.

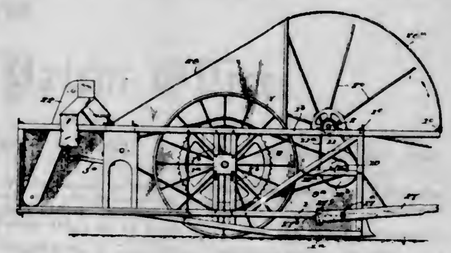
1,575,602. AUTOMATIC TELEPHONE SYSTEM. WINFRED T. POWELL, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Apr. 3, 1922. Serial No. 548,943. 14 Claims. (Cl. 179—18.)



6. In an automatic telephone system, a plurality of automatic switches, each provided with sets of movable contacts and fixed terminals, a plurality of pairs of telephone lines, each pair of telephone lines terminating in the movable contacts of an automatic switch, a plurality of pairs of trunks multiply connected to the fixed terminals of a plurality of said switches, a test conductor for each pair of trunks, means including a motor magnet for advancing the movable contacts of each switch on the iniation of a call over one of its lines to successively engage the fixed contact of the various pairs of trunks, a battery, a cut-off relay for disabling said motor magnet when an idle pair of trunks is located, an initial energizing circuit for said cut-off relay extending through a movable contact of said switch and the test conductor of an idle pair of trunks to one terminal of said battery, and a holding circuit for said cut-off relay extending through a second winding of said cut-off relay, said switch contact and said conductor to the other pole of battery.

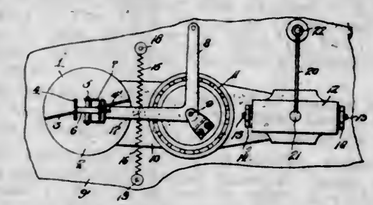
1,575,603. AUTOMATIC TELEPHONE SYSTEM. WINFRED T. POWELL, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Nov. 6, 1922. Serial No. 599,202. 15 Claims. (Cl. 179—18.)

1. In an automatic telephone system, two groups of telephone lines, a group of numerical switches individual to each group of telephone lines, means including a non-numerical switch for extending a calling telephone line to an idle numerical switch, means for operating and releasing said numerical switch in response to a series of impulses, means responsive to such operation for causing said non-numerical switch to select a numerical switch in the group of switches common to the group of telephone lines in which the wanted telephone line is located, and means for directively operating said last mentioned numerical switch.



1,575,604. MANUAL TELEPHONE SYSTEM. WINFRED T. POWELL, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Jan. 30, 1924. Serial No. 689,570. 11 Claims. (Cl. 179—9.)

1. In a telephone system, a telephone line provided with a message-charging device, a second telephone line, means including a cord circuit terminating at each end in a manual switch for interconnecting said telephone lines, a normally inoperative progressively movable switch associated with said cord circuit, automatic means responsive to the completion of a telephone connection between two telephone lines for operating said switch and means including said progressively movable switch for controlling the operaion of said message-charging device.



1,575,605. HARVESTER. HARVEY S. CLAPP, Accotink, Va. Filed Dec. 6, 1924. Serial No. 754,321. 4 Claims. (Cl. 56—19.)

1. A harvester for beans and the like comprising a frame open in front, a receiving table extending across the lower front part of the frame, transverse journal bearings carried on the upper part of the frame, approximately in a vertical plane through the front edge of said table, a transverse beater shaft having its ends journaled in said bearings, and a series of elongated separate individual beater arms extending out radially from said shaft of such a length as to just clear the upper surface of said table, and so spaced and arranged with respect to each other and to the dimensions of the product to be harvested along and around the shaft that when the latter is rotated, substantially every unit of area on said table surface of approximately the magnitude of a unit of said product will be swept over by a beater arm in each revolution of the shaft, together with suitable conveyer means extending from beneath the rear edge of the table to the upper part of the rear of

the frame, cleaning and gathering means arranged in the rear of the frame to receive the product of the beater from said conveyer, and power actuating means for the beater, conveyer and other members.

1,575,606. SIGHTING DEVICE. JAMES BLACKLOCK HENDERSON, Lee, England. Filed July 26, 1919. Serial No. 313,532. 14 Claims. (Cl. 89—27.)

2. In apparatus for automatically compensating for the angular movement of a controlled mechanism during a predetermined interval of time, the combination of a member movably mounted with respect to the controlled mechanism, a gyroscope mounted upon a supporting axis and adapted to partake of the angular movement of the mechanism, a constraining connection between the gyroscope and the mechanism effective about said axis and means whereby the precession of the gyroscope resulting from such movement produces a displacement of the member with respect to the mechanism.

Patents Nos. 1,575,607 to 1.576,493.

THE

OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 344—No. 2. TUESDAY, MARCH 9, 1926. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $5.00 per annum; single numbers, 10 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

(Order No. 2,946.)

U. S. Patent Office, *Washington, Feb. 25, 1926.*

Order No. 1,755, of March 12, 1908, disbarring Warren E. Willis from practice before the United States Patent Office, is hereby revoked and Mr. Willis is reinstated and given his former registration number on the records of this Office.

THOMAS E. ROBERTSON,
Commissioner.

PATENT SUITS.

1,524,088, H. Ernst, Door guard, decree Jan. 13, 1926, holding patent not infringed, suit dismissed, D. C., W. D. Wis., Doc. E 78, *H. Ernst* v. *Faultless Protection Co.*

1,526,982, E. W. Hill, Stencil sheet, defendant enjoined from further infringing (notice dated Jan. 7, 1926) D. C., N. D. Calif. (S. Div.), Doc. E 1576, *A. B. Dick* v. *The Styx Co.*

1,527,427, A. Dinkiage, Anchoring device, consent and order of discontinuance Jan. 11, 1926, D. C., S. D. N. Y., Doc. E 34/345, *Creepcheck Co., Inc.*, v. *P. & M. Co.*

1,535,981, 1,535,982, F. S. Carr, Fastener, suit filed Nov. 16, 1925, D. C., N. D. Ill. (E. Div.), Doc. 5315, *Carr Fastener Co.* v. *The Belmor Mfg. Co. et al.*

1,535,982. (See 1,535,981.)

1,550,295, Weber & Weber, Folding bier and truck, suit filed Jan. 16, 1926, D. C., N. D. Ohio (W. Div.), Doc. E 610, *L. A. Weber et al* v. *G. B. Moore* (*Moore Mfg. Co.*).

1,559,234, Des. 68,903, R. G. Fleming, Smoker's stand, suit filed Jan. 8, 1926, D. C., S. D. N. Y., Doc. E 35/120, *Smokador Mfg. Co., Inc.*, v. *J. Wanamaker of New York, Inc., et al.* Same, suit filed Jan. 12, 1926, D. C., N. D. Calif. (S. Div.), Doc. E 1624, *Smokador Mfg. Co., Inc.*, v. *Boesch Lamp Co. et al.*

Re. 13,730, P. Weston, Method of making paper, suit filed Jan. 11, 1926, D. C. Mass., Doc. E 2516. *Byron Weston Co.* v. *L. L. Brown Paper Co.*

Re. 14,002, Re. 14,003, J. R. Surrell, Boiler furnace and feed-water heater, decree of district court affirmed (notice dated Jan. 11, 1926), C. C. A. (2d Cir.), Doc. 8818, *J. R. Surrell et al.* v. *Pierce Butler et al.*

Re. 14,003. (See Re. 14,002.)

Re. 14,492. (See 1,048,654.)

Re. 14,581. (See 1,048,654.)

Re. 15,217, W. A. Caldwell, Ventilated grain-crib stave, suit filed Dec. 21, 1925, D. C., N. D. Iowa (W. Div.), Doc. E 165, *Iowa Concrete Crib & Silo Co. v. C. J. Schmitt.*

Re. 15,881, C. W. Prickett, Concrete and wood floor construction device, bill dismissed (notice dated Jan. 11, 1926), D. C., S. D. Iowa (Central Div.), Doc. E 4261, *The Bull Dog Floor Clip Co. et al.* v. *Munson Mfg. Co.*

Des. 62,224, Steffan, Ackermann & Greiner, Pencil, suit filed Jan. 7, 1926, D. C., W. D. Wis., Doc. E 91-F, *W. C. Steffan et al.* v. *The Parker Pen Co.*

Des. 65,811, J. K. Kabalan, A shawl, consent decree sustaining patent and granting injunction Jan. 13, 1926, D. C., S. D. N. Y., Doc. E 30/311, *J. K. Kabalan* v. *Cleopatra Needle Art Corp. et al.*

Des. 68,278, J. Sasieni, Tobacco pipe, suit filed Jan. 5, 1926, D. C., S. D. N. Y., Doc. E 35/107. *M. Rapaport et al.* v. *A. Orlik.*

Des. 68,903. (See 1,559,234.)

T. M. 22,406, T. M. 47,189, The Coca Cola Co., Nutrient or tonic beverage, final decree Jan. 2, 1926, perpetually restraining defendant from infringing, D. C. Minn. (2d Div.), Doc E 78, *The Coca Cola Co.* v. *J. C. Jenson* (*St. James Bottling Works*).

T. M. 47,189. (See T. M. 22,406.)

Condition of Applications Under Examination at Close of Business February 26, 1926.

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 40,609; Trade-Mark Division, 2,040. Oldest new case, Aug. 7, 1925; oldest amended, Aug. 7, 1925. The dates given are 1925 except where † indicates 1926.) DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTIONS	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Harrows and Diggers; Plant Husbandry; Plows; Planting; Scattering Unloaders	Dec. 7	Dec. 10	572
126	2. HADEN, C. F., Bee Culture, Dairy; Preserving; Presses; Tobacco	Nov. 13	Oct. 24	591
331	3. RICH, WM. J., Electric Heating; Electrochemistry; Heating; Metal Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working	Nov. 23	Nov. 25	815
234	4. MERRITT, A. D., Conveyers, Chutes, Skids, Guides, and Ways; Conveyers, Fluid Current; Conveyers, Power Driven; Excavating; Handling—Hand and Hoist-Line Implements; Material or Article Handling; Pushing and Pulling Implements; Traversing Hoists.	Dec. 1	Nov. 30	525
108*	5. MACNAB, J. F., Harvesters; Jewelry; Music; Acoustics; Sound Recording and Reproducing; Tying Cords or Strands.	Sept. 28	Sept. 28	853
318	6. LEWERS, A. M., Bleaching and Dyeing; Chemistry; Chemistry—Carbon Compounds; Explosive, Pyrotechnic, and Match Compositions; Fertilizers; Substance Preparation; Hides, Skins and Leather; Sugar and Starch; Concentrating Evaporators.	Nov. 20	Nov. 3	1,054
106	7. JARBOE, C. O., Amusement and Exercising Devices; Toys; Optics; Photography	Dec. 11	Dec. 8	774
133	8. HENRY, C. C., Beds; Chairs and Seats; Furniture; Kitchen and Table Articles; Store Furniture	Dec. 5	Dec. 7	1,035

DECISIONS IN PATENT AND TRADE-MARK CASES.

U. S. Circuit Court of Appeals—Second Circuit.

INTERNATIONAL CORK CO. *v.* NEW PROCESS CORK CO.

[6 (2d) Fed. Rep. 420.]

Decided February 16, 1925.

1. INVENTION—SUBSTITUTION OF MATERIALS.

Where bottle caps were formerly made by placing fusible gum into cup-shaped metallic shells, inserting cork disks above the gum, and then heating the shells and holding the disks in them under pressure until the cement hardened, a patent was held valid the claims of which covered the use of albumen instead of fusible gum, and hardening by heat, the new invention resulting in doubled production at less cost, due to increased speed, reduced fire hazard, insensitiveness to weather conditions, and great diminution in the number of imperfect caps.

2. SPECIFICATION—FULLNESS AND EXACTNESS OF DISCLOSURE—PROPORTIONS.

A patent which does not state the proportions of ingredients is not invalid if any proportion within reason will answer.

3. SAME—DEFINITIONS OF TERMS.

A patentee may define his own terms, regardless of common or technical meaning.

4. ANTICIPATION—SAME SUBSTANCE APPLIED TO DIFFERENT MATERIALS TO PRODUCE DIFFERENT ARTICLES.

A patent which taught the art only that soft cork could be made by grinding cork, mixing it with a solution of albumen, reducing its bulk by pressure, and subjecting the molds containing it to moist heat, does not teach the art that a cork disk can be cemented into a bottle cap in a commercially successful manner by the use of albumen solution.

5. SAME—SUBSTANCE USED BY INVENTOR—USED FORMERLY AS ONE OF SEVERAL INGREDIENTS.

An attempt to secure cork disks in bottle caps by a cement in which albumen was only one of several ingredients and was rendered inert by the other ingredients used, does not anticipate the use of albumen alone for the same purpose when hardened or set by applying heat to the cap.

APPEAL from the District Court of the United States for the Eastern District of New York.

Suit in equity by the International Cork Company against the New Process Cork Company. Decree for defendant, and complainant appeals. Reversed.

For opinion below, see 295 F. 539.

Messrs. Newell & Spencer (*Mr. Emerson R. Newell* of counsel) for the appellant.

Mr. Livingston Gifford (*Mr. William H. Davis* of counsel) for the appellee.

Before ROGERS, MANTON, and HAND, Circuit Judges.

MANTON, *Cir. J.*:

The appellant sues on two patents, the first No. 1,234,109, granted July 24, 1917, on an application filed June 23, 1913, renewed April 19, 1917, and the second, No. 1,234,711, granted July 31, 1917, on an application filed August 26, 1913, and renewed December 23, 1916. The first is for a process of manufacturing bottle closures, and the second is for closure for receptacles. Claims 1 to 6 of the first patent and claims 1 to 5 of the second are involved.

Bottle caps made of metallic shell and the cork disk cemented therein were old, and were made for many years under the Painter patents, Nos. 792,285 and 887,838, and also the Wheeler patent, No. 887,883. Such prior art is referred to in the patent in suit. Fusible gum, as copal or resin, was put into the cup-shaped metallic metal shell, and this cork disk inserted above it. Heat was applied and the gum melted. Pressure was then applied against the cork disk, and the cap held under the pressure for a sufficient time, until the cement was hardened by a cooling process. The Painter process patent, No. 792,284, referred to this cooling process to harden the binding medium. The art was desirous of accelerating the manufacture, through hardening the fused medium, and men directed their efforts to find some method to accomplish this result. Automatic machines with improvements could rapidly turn out caps, but the production was delayed because of the necessary delay in holding this cork cap under pressure while adhesion was obtained by cooling. If speed of production was obtained, caps could be made cheaper.

[1] It is asserted that, by the patents in suit, the speed of production has been doubled, so that now 250 per minute may be manufactured by a single machine. This is acceded to by some of the appellee's witnesses. The problem was to devise some process which differed from the existing methods under former patents and gain speed by decreasing the period of manufacture, due to delay in cooling. The inventor's claim is that this was accomplished by the use of egg albumen setting by heating method. Under all known methods, it was necessary to melt the adhesive and hold it under pressure until it cooled. Appellant's method accomplished the desired result as to speed, and now the albumen adhesive is used in cap making, having been adopted by most cap manufacturers. It is not affected by weather conditions, as hot days; fire hazard has been reduced, and dangers of bad sticking have been eliminated; practically 100 per cent of the disks are stuck to the tin. Puffer caps—that is, those that bulge up by the disk being forced away from the tin, due to internal gas pressure—have been reduced to a minimum. Some of the caps are decorated, and the damage or injury by heat is negligible, because the heat required need not be even at a boiling temperature. Double production has reduced the cost.

Egg albumen is the white of egg. For commercial purposes, it is the dried, uncoagulated egg. When dissolved in water, it may be used like albumen from a fresh egg. Albumen dissolved in water in concentration will coagulate when heated. Both patents state that, when it reaches a temperature of 140° Fahrenheit, it sets and becomes in-

soluble. After coagulation, it can not be brought back to its uncoagulated state. There are but two commercial albumens on the market—egg and blood albumen. The process, as set forth in each patent, is that the cork disk is stuck to the metal shell by a cement which is set by heat—specifically by albumen which is interposed and then coagulated by heat. The albumen referred to could mean only one or two commercially known albumens. The patent says:

> Albumen has been found to be particularly adapted for carrying out the present process, it being inodorous, tasteless, soluble in water before use, and coagulates at 140° Fahrenheit. The assembled closures can be subjected to pressure without changing the chemical properties of the albumen, and when they are, after the pressure is applied and while it is maintained, subject to heat, the albumen is easily coagulated, rendered insoluble, and forms an effective cementing medium for uniting the parts of the closure.

And further:

> The coagulation results in a firm union between the parts of the closure, such union being instantaneous, particularly when albumen is used.

[2] The patents make it plain that the albumen is coagulated or set by heat. They sufficiently disclose to the art, or one skilled in the art, how to use egg albumen as an adhesive medium, and how to carry out the process and produce the caps. The proportions of water and albumen to be used is not set forth. Because of the lack of statement as to it, we do not think the patent is invalid. Any proportions within reason will answer. *A. B. Dick Co. v. Barnett*, 317 O. G., 789; (C. C. A.) 288 F. 799. It is only necessary in a patent to point out one way of carrying out the process, and these patents do that. The figures are clear enough in explanation to one skilled in the art. They show that the liquid albumen may be put into a container 12, from which it may be dropped, as shown at 11, into a shell 10, a miniature pan. The cork disk 14 is then inserted. Pressure is then exerted, such as by plunger 15, as shown by Fig. 2, with heat simultaneously applied by any suitable heating means, an example of which is illustrated by the steam plate 16. This sets the albumen (Figs. 1 and 2). Figure 3 illustrates a modified construction, in which a disk or collet of paper coated with uncoagulated albumen is suggested. The drawings of the second patent show a cap, similar to the figures of the first patent, with the disk stuck in place by the coagulated albumen.

[3] Both patents state that the albumen was preferable in liquid form before coagulation. They distinctly point out that albumen is to be uncoagulated, and that, when coagulated after it is interposed between the disk and the shell, the application of heat will set the albumen or produce adhesion. The degree of heat to be applied is sufficiently referred to. A patentee may define his own terms, regardless of common or technical meaning, and fairness to the patentee requires the court to accept his definition of words, phrases, and terms. *Rajah Auto Supply Co.* v. *Belvidere, Etc., Co.*, 294 O. G., 993; [C. C. A.] 275 F. 761. The words of the claims are sufficiently explained in the descriptive part of the specification.

In patent No. 1,237,109, claim 1, the application was made in 1913, but Alberti conceived his idea in 1911. The appellee started making caps in the fall of 1914, which, it is alleged, are an infringement. It uses commercial egg albumen dissolved in water, and its process in all substantial respects is the same as the appellant's. Claim 1 of the first patent accurately describes the appellant's process, and claim 2 is the same as claim 1, except that it adds the words "and in the meantime placing the closure under appropriate pressure." Claim 3 restates claim 2 in different words, and claim 4 adds the "rendered insoluble" feature. Egg albumen is used, which is necessarily rendered insoluble by heat. Claims 5 and 6 specify an adhesive albuminous substance with the application of heat to set the same, and claim 6 then adds the feature of maintaining the parts under pressure. We think that the appellee's process falls within claims 5 and 6.

As to the second patent, the claims are as follows:

> 1. A closure for receptacles comprising a metallic cap, a sealing disk, and an interposed heat-coagulating cementing medium.
> 2. A closure for receptacles comprising a metallic cap, a sealing disk, and an interposed cementing medium coagulated and rendered insoluble by heat.
> 3. A closure for receptacles comprising a metallic cap, a sealing disk or packing of cork or the like, and an interposed cementing medium composed of heat-coagulating albuminous substance.
> 4. A closure for receptacles comprising a metallic cap, a sealing disk, and an interposed liquid cementing medium rendered insoluble by heat.
> 5. A closure for receptacles comprising a metallic cap, a sealing disk, and an interposed cementing medium rendered insoluble by heat.

Claims 1 to 3 each include a cementing medium, which is specified as coagulated or set by heat. What the appellee does in making its caps is clearly an infringement of claim 3. Claims 4 and 5 do not state the cementing medium as coagulated or set, but say it is rendered insoluble by heat. Nobody has ever used albumen as a cement for this purpose before, and the substitution of an albuminous cement for the earlier resin and waxes produced a patentable invention. *Potts & Co.* v. *Creager*, 70 O. G., 494; 155 U. S. 597, 15 S. Ct. 194, 39 L. Ed. 275; *Edison, Etc., Co.* v. *U. S. Electric Lighting Co.*, 61 O. G., 564; 52 F. 300, 3 C. C. A. 88.

Many patents of the prior art are called to our attention to support the claims of anticipation. Serra, No. 846,251 (1907), used egg albumen in the composition of a cork block, by grinding cork and mixing it with a solution of albumen. That patent says:

> The material is then put in molds and its bulk reduced by pressure, after which the molds are subjected to a temperature of about 212 degrees Fahrenheit in a moist heat, either by introducing it in boiling water or by subjecting it to a jet of steam, in order to coagulate the albumen.

And further:

> It is of the utmost importance that the material be subjected to a moist heat, as otherwise the product made under a high, dry temperature will be found to be of a hard nature, not suitable for the use for which corks are intended.

[4] It will be noted that the claims refer to a moist heat. Serra was after a cork block, which should not be of a hard nature, but soft. Alberti was after a hard cementing of the cork to the tin receptacle, while Serra emphasized the use of albumen; but he says the cork material must be subject to a moist heat, such as by introducing it in boiling water, or by subjecting it to a jet of steam. To have used such a process in producing bottle caps would have had no result for the purposes intended by the patent in suit. It was the teaching of the Serra patent, "as of the utmost importance," that the material be subjected to moist heat. Serra's patent taught the art only that soft cork could be made by his process with moist heat—a molding process. This is not teaching the art that a cork disk could be cemented into a bottle cap in a commercially successful manner by the use of albumen solution. Nor is the appellant's invention a mere substitution of a known adhesive. Nobody, since 1907, and before Alberti, used this adhesive to stick the cork to tin caps.

In the Plinatus patent, No. 925,233, a method of sealing fruit cans and the like is disclosed. It provided a packing for the old India rubber ring between the top and the can. He takes a rag pulp or paper and suitably treats it, and then impregnates this packing material.

> For this purpose white of egg, blood, or egg albumen, or suitable mixture of these substances, may be employed. Casein is also adapted for the impregnation, either alone or mixed with the above-mentioned substances.

And he says that—

> by this coagulation, and in consequence of the increase of volume thereby resulting, the joint-making material completely fills up the space between the top or closure and the top of the can, thus forming a permanent hermetic joint.

This idea was not a cement for holding the two parts together, but a packing material, which would swell up and fill the joint by the increase in volume, as might oakum in the seam of a boat, swelling when wetted. We do not think that this was teaching the art that albumen could be used to stick securely a cork disk to a metal cap by dry heat. Plinatus taught the art, so far as caps are concerned, that after the cap had been made, and applied to the bottle, the joint between the cap and bottle could be filled up and sealed against the entrance of air by the joint-filling material he suggests.

The Painter patent refers to a melted and cooled adhesive, and this method was used by the art for many years. The cap, composed of a metal shell and an inserted cork disk, was old, and the sticking was obtained by a melting and cooling adhesive medium, such as sealing wax and fusible gums. This was as far as the art had advanced when Alberti made his invention. The cooling process was slow—at least too slow to accommodate the improved automatic machinery which turned out the caps with such rapidity. The great volume of work and experimentation that was indulged in by men who were interested in this art, all laboring to meet this necessity, indicates the importance of the new idea which has resulted in the patents in suit. To the art it seems a forward step, and has succeeded in bringing about economy in manufacture, speed in production, and a cheaper product—cheaper because of the ability to manufacture faster. The outstanding fact is that in all this experimentation of trained men, with some knowledge of egg or blood albumen, no one thought of its use as Alberti made use of it in the patents in suit. It is more than a mere substitution for a new use. Such a substitution, if it was one, was not evident to these experienced men.

We are also referred to the British patents issued to Wittkowsky, No. 8,347 (1891), and the Gardiner, No. 21,774 (1896). The former was for a casein cement for gluing two wooden articles together. The inventor says he takes casein—the coagulated product of milk—and slaked lime, and mixes them together to dissolve the casein. He adds parts of water-glass and obtains "a slimy, smearable mass," and says the cement must be dried upon each part before the two parts are brought together. They are then melted by heat. It thus appears that these three ingredients are mixed together, smeared on each surface, and allowed to dry. There is mention of albumen proper, or ox blood. These seem to be mentioned only "for the sake of definition." The inventor there recites that, in order to get a broad scope for his invention, he merely, for the sake of definition, mentions a number of materials which he thinks might possibly be used.

Casein is already coagulated and an insoluble product of milk, and, since it is already a coagulated product, it can not be brought back to its uncoagulated form, and so can not be recoagulated. This mere mention of albumen in no way discloses the Alberti process. The Gardiner patent is a casein waterproof glue patent. The parts are smeared with it, put together, and allowed to dry as in the former patent. The United States patent, No. 537,096, later granted to Wittkowsky, has the same disclosure as the earlier British patent, except that parts of the water glass are given and albumen is not mentioned. This would indicate, as one of the experts explained, that albumen with an alkali was unworkable in his method.

The patent to Dunham, No. 695,198, is a process of producing insoluble casein which is said to be suitable for use as a substitute for egg or blood albumen coagulated by heat. The patentee says that the solution is dried out in any suitable way in the form of a film, or it may be dried out by pressing the mixture into the meshes of a cloth, and in allowing it to dry in the form of a thin sheet. After drying, it is subjected to steam under a pressure of about five pounds per square inch. This process may be compared to the casein drying and subsequent liquefying method of the Gardiner patent. He speaks of it as an "insoluble casein product of such a character that it may be used in the arts as a substitute for insoluble egg or blood albumen." This patent teaches that egg or blood albumen may be coagulated by heat and rendered insoluble, but that was not new, and no use was made of it, such as was conceived by the inventor of the patents in suit.

[5] But it is said that the patent is invalid because of prior uses. The outstanding prior use

in this record is that of one McManus, who worked for years trying to develop a successful cement which would avoid the objections of the melted gum adhesive. His experiments were abandoned, because his various ideas proved to be impracticable. He tried a cement which included an albuminous material as one of several ingredients. Because the albumen used was only one of several ingredients, and was rendered inert by the other ingredients used, it resulted in a sticking substance, which was impractical and was abandoned. In 1906, McManus, then engaged in business for himself, made a metal cap. He used the cork disk. During the course of his experiments, he tried a glue consisting of albumen, casein, and borax, with water and some antiseptics. This he called an A B C formula. His trials, however, were not confined to this. He does say he used albumen. How much he does not disclose; his record book as to this was not produced.

An effort has been made to show—to at least give the impression—that albumen was used which did coagulate by heat; but we think the record bears out the claim of the appellant that these words as used include casein, which does not coagulate by heat, because it is already coagulated. Exhibit N admits this. There it is said it had a "casein compound on the inner surface, and cork is fit in on top of that, the cork also having a casein binder." It is an apparent effort to use interchangeably for the experiment casein and albumen. Such interchangeability of words is illustrated in the Wittkowsky patent, where it is said: "Albuminous matters are casein, fibrin, and albumen proper." Casein is an albuminous substance, but it is not albumen, and will not set by heat, which is of the essence of the patent in suit. But, assuming that McManus did use the egg albumen in his A B C formula, it is apparent to us that his use of albumen, casein, and borax composition was not a success, and the reason seems to be that an alkali, such as borax, must be used with casein to dissolve it before it can be used, but an alkali is the wrong thing to use with egg albumen. It has a decomposing and anti-coagulating effect on the albumen, it causes the cork to turn black—which is what happened with McManus' caps—and *renders them unsalable.* In his testimony, McManus *admitted that some of his caps offered in evidence show that there was a chemical added* which caused the quick hardening action on the casein. At best, McManus *may be assumed to have used some unknown proportions* of albumen. But the outstanding fact is that he was engaged in the same art and desired the same result as Alberti, but was unsuccessful. His ideas produced no forward step in the art. The casein binder poured in was not a success. It requires a drying time to permit the complete adhesion of the article.

McManus formed the present appellee company in 1912, and they made a composition cork in 1914, and started to manufacture bottle caps; but this, we think, was after it was learned what Alberti was doing. The process was commercially used in 1913–14. It is not proved that whatever albumen he used in his experiments was set in by heat action, as is done in the patent in suit. Therefore there was not the coagulation by heat. What he did depends solely upon his oral testimony. It fails in that definiteness and certainty required as a proof of prior use. The Supreme Court has recently reiterated that—

> the oral evidence on this point falls far short of being enough to overcome the presumption of novelty from the granting of the patent. The temptation to remember in such cases and the ease with which honest witnesses can convince themselves after many years of having had a conception at the basis of a valuable patent, are well known in this branch of law, and have properly led to a rule that evidence to prove prior discovery must be clear and satisfactory. *Barbed Wire Patent Case,* 58 O. G., 1555; 143 U. S. 275, 284; *Loom Co. v. Higgins,* 21 O. G., 2031; 105 U. S. 580, 591.

See *Bibel Process Co.* v. *Minnesota & Ontario Paper Co.*, 310 O. G., 3; 261 U. S. 45, 43 S. Ct. 322, 67 L. Ed. 523.

Another prior use is referred to, that of La Porte, who alleges a date of conception as in the spring of 1912. Alberti proves sufficiently that his conception was in the spring of 1911. In the interference proceedings in the Patent Office, this has been so considered and decided in favor of Alberti. In the La Porte experiments, the caps came out hard and coagulated. He tried albumen with alkali, lime, and borates. He got up a long list of available substances, went through the literature of patents, because his directors wanted a method to get greater efficiency. On his hot-water press, the disks were securely sealed in when they came out. The albumen was in a glazed condition, which was thought to prove fusion. We think that La Porte's experiments did not conceive the idea of Alberti. The latter was first to accomplish the desired result. The invention in suit, although simple in its operation, is a valuable step forward in cap-making art and should be protected.

We hold that appellant's claims 5 and 6 of the process patent and claim 3 of the product patent are valid and infringed.

Decree reversed.

ADJUDICATED PATENTS.

(D. C. Cal.) The Young patent, No. 891,895, for steel barrel, *Held* valid and infringed. *Meurer Steel Barrel Co.* v. *Boyle Mfg. Co.*, 9 F. (2d) 92.

(D. C. N. J.) The Pauling patent, No. 1,031,864, for method of concentrating nitric acid, claims 1, 3, and 5 *Held* invalid. *Southern Electro-Chemical Co.* v. *E. I. du Pont de Nemours & Co.*, 9 F. (2d) 69.

(C. C. A. Mass.) The Stork patent No. 1,365,803, for envelope sealer, claim 10 *Held* valid and infringed. *Postage Meter Co. v. Standard Mailing Mach. Co.*, 9 F. (2d) 19.

(D. C. Pa.) The Tufford reissue patent, No. 14,049, for rubber heel, *Held* valid, but not infringed. *I. T. S. Rubber Co.* v. *Malakoff*, 9 F. (2d) 188.

TRADE-MARKS

OFFICIAL GAZETTE, MARCH 9, 1926.

[VOL. 344. No. 2.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 179,745. (CLASS 34. HEATING, LIGHTING, AND VENTILATING APPARATUS, NOT INCLUDING ELECTRICAL APPARATUS.) GEORGE P. SCHMITT, Oakland, Calif. Filed Apr. 26, 1923.

DUPLEX

Particular description of goods.—Radiators.
Claims use since Jan. 15, 1923.

Ser. No. 183,337. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) GEO. HAAS & SONS, San Francisco, Calif. Filed July 17, 1923.

No claim is made to the word "Chocolates" apart from the mark shown.
Particular description of goods.—Eating Chocolates Molded in Fancy Shapes.
Claims use since May 24, 1923.

Ser. No. 187,010. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MAYBELLE MANNING, New York, N. Y. Filed Oct. 15, 1923.

No claim is made to the words "New York," "Paris," "Parfum," and "Creation of" apart from the mark as shown on the drawing.
Particular description of goods.—Perfumes.
Claims use since Sept. 1, 1923.

Ser. No. 191,818. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) DURAND-MCNEIL-HORNER CO., Chicago, Ill. Filed Feb. 5, 1924.

"CLOVERHILL"

Particular description of goods.—Canned Fruits, Canned Vegetables, Canned Fish, Canned Hawaiian Pineapple, Fruit Preserves, Peanut Butter, Fruit Jelly, Tea, Coffee, Dried Codfish, Olives, Honey, Table Syrup, Flavoring Extracts for Food Purposes, Coconut, Cocoa, Tomato Catchup, Pickles, Olive Oil, Evaporated Milk, Salad Dressing, Dried Fruits, Pepper, Candy, Salted Peanuts, Spaghetti, Self-rising Pancake Flour, Toasted Corn Flakes, Horse-Radish, Malt Extract for Food Purposes, and Thyme.
Claims use since 1911.

Ser. No. 191,997. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) THE BUCKEYE PAINT & VARNISH CO., Toledo, Ohio. Filed Feb. 4, 1924.

CRYSTAL-ROCK

Particular description of goods.—Varnishes.
Claims use since 1894.

Ser. No. 192,539. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) MINNESOTA MERCANTILE CO., Stillwater, Minn. Filed Feb. 19, 1924.

STATE

No claim is made to the word "State" apart from the mark shown, applicant reserving all common-law rights therein.

Particular description of goods.—Rice, Canned Fish, Canned Oysters, Fruit Preserves, Canned Fruits, Baked Beans, Blended Coffee, Dried Fruit, Flavoring Extracts for Foods, Macaroni, Tomato Catchup, Catchup, Apple Butter, Corn and Refinery Sirup, Tea, Spices, Pepper Sauce, Pepper, Mustard Dressing, Spiced Pickles, Salad Dressing, Cheese, Jelly, Rolled Oats, Condensed and Evaporated Milk.

Claims use since November, 1904, on tea, flavoring extracts and spices; since 1915 on other products.
